Changes of the functional condition of the neocortex during direct application of optical radiation
A82-43655
RADIOGRAPHY
The contribution of standard radiography in cardiovascular exploration during the examination of pilots
N82-31935
RADIOLOGY
Noninvasine techniques for cardiovascular examination of interest in aerospace medicine
[AGARD-AG-277(FR)] N82-31930
RADIOLYSIS
Interpretation of Viking biology experiments
A82-43221
RATS
Genetic and individual differences in cardiovascular disturbances of rats during experimental emotional stress
[NASA-TM-76911] N82-30890
Investigation of behaviorally modified rats for use in explosives detection systems
[AD-A114632] N82-30895
REACTION TIME
Performance tests for repeated measures: Moran and computer batteries
[AD-A115068] N82-30941
READING
Reading text from visual display units
[FOA-C-53006-H2] N82-31951
REAL TIME OPERATION
A general purpose data acquisition and analysis system for nystagmus and related data
[NASA-CR-167704] N82-30919
RECEPTORS (PHYSIOLOGY)
Glucocorticoid receptors and metabolic disturbances in the (rat) liver and heart during immobilization
[NASA-TM-76874] N82-30887
RECORDING INSTRUMENTS
Medical thermography with a pyroelectric vidicon camera
[ESRB-3365] N82-30921
REDUCED GRAVITY
Some potential blood flow experiments for space
[UR-3490-1720] N82-32068
REFLEXES
The participation of the hypothalamus in the regulation of parasympathetic cardiac reflexes in unanesthetized cats
A82-43633

A software package for evaluating the transmissibility between vehicle vibration and motions of hands (in controls), limb, head and eyes
N82-30853

**REGENERATION (ENGINEERING)**
Regenerable life support for the space station - A technology status summary
[IAF PAPER 82-45] A82-44658

**REGENERATION (PHYSIOLOGY)**
Changes in peripheral circulation of limbs during bone regeneration under influence of low-frequency magnetic fields
N82-30906

**RELIABILITY**
Investigation of behaviorally modified rats for use in explosives detection systems
[AD-A114632] N82-30895

**RELIABILITY ANALYSIS**
Overview of a procedure for human-reliability analysis
[DE81-030816] N82-30947

**REMOTE CONTROL**
Proceedings of the Sixteenth Annual Conference on Manual Control
[NASA-CR-169243] N82-30833
Evaluation of Smart sensor displays for multidimensional precision control of space shuttle remote manipulator
N82-30870
Implantable, remotely-programmable insulin infussion system
[DE82-003084] N82-31927
Supervisory control: Problems, theory and experiment for application to human-computer interaction in undersea remote systems
[AD-A116236] N82-31949

**REMOTE HANDLING**
A comparison of control modes for time-delayed remote manipulation
N82-30868

**REMOTE MANIPULATOR SYSTEM**
Evaluation of Smart sensor displays for multidimensional precision control of space shuttle remote manipulator
N82-30870

**RENAL FUNCTION**
Renin-angiotensin-aldosterone system and electrolyte metabolism in rat blood after flight aboard Cosmos-1129 biosatellite
N82-31918

**RESEARCH AND DEVELOPMENT**
Medical support and technology for long-duration space missions
[IAF PAPER 82-174] A82-44687

**RESPIRATION**
Investigation on the carcinogenic effect of trichlorethylene by inhalation and mechanisms of metabolic bioactivation
[BMFT-FB-HA-82-007] N82-30933

**RESPIRATORY DISEASES**
Fluid distribution in progressive pulmonary edema: A low-temperature scanning electron microscopy study
[DE82-002554] N82-31928

**RESPIRATORY PHYSIOLOGY**
Activation of lipid peroxidation during stress in man, evaluated according to the content of pentane in expired air
A82-42600
Physiological mechanisms determining the mechanical work of breathing for different types of muscular activity
A82-43237
Hyperoxia inhibits stimulated superoxide release by rat alveolar macrophages
A82-44143

**RESPIRATORY REFLEXES**
Factors inducing periodic breathing in humans - A general model
A82-44140

**RESPIRATORY SYSTEM**
Computer simulation of respiratory control system
A82-43145

**REST**
Hemodynamic response to converting enzyme inhibition at rest and exercise in humans
A82-44135
Regulation of glycogenolysis in human muscle at rest and during exercise
A82-44146

**RESUSCITATION**
Anesthesia, surgey and resuscitation during manned spaceflights
N82-31894

**RETINA**
Mechanisms of the damaging effect of light on retinal photoreceptors
A82-43233

**RETINAL IMAGES**
Hyperacuity and interpolation by the visual pathways
A82-43100
Factors determining the characteristics of the perception of stabilized retinal images
A82-43232

**RHEOENCEPHALOGRAPHY**
System for automatic analysis of rheoencephalograms
N82-31916

**RHYTHM (BIOLOGY)**
The contraction, regulation, and functional role of lymph vessels
A82-42603
A composite assessment of heart rhythm regulation during dosed functional loads
A82-43637

**RIBONUCLEIC ACIDS**
Indices of the rat central nervous system metabolism during 36- and 60-day hypokinesia
[NASA-TM-76870] N82-30883
RNA accumulation in the body of neurons as an indicator of their functional deafferentation
[NASA-TM-76850] N82-30922
Reaction to hypokinesia and hyperkinesia of somatochrome neurons in the motor zone of the cerebral cortex in rabbits
[NASA-TM-76885] N82-30925
Changes in rat tissue deoxyribonucleoprotein and nucleic acids following flight aboard Cosmos-1129 biosatellite
N82-31907

**RIDING QUALITY**
Vibration and comfort. I - Translational seat vibration
A82-42829
Vibration and comfort. II - Rotational seat vibration
A82-42830

**RISK**
Overview of a procedure for human-reliability analysis
[DE81-030816] N82-30947
Probabilistic methodology for estimating radiation induced cancer risk
[DE82-001474] N82-31929

**ROBOTS**
Experimental evaluation of the concept of supervisory manipulation
N82-30869
Human factors and robotics: Current status and future prospects
[AD-A115042] N82-30945
Optical fiber multiple sensor for gripping complex objects
N82-32298

**ROTATING ENVIRONMENTS**
Measurement of vestibular asymmetry in rotation tests
N82-31913

S

**SAFETY MANAGEMENT**
Overview of a procedure for human-reliability analysis
[DE81-030816] N82-30947

**SALYUT SPACE STATION**
Psychophysiological performance examination onboard the orbital complex Salyut-Soyuz
[IAF PAPER 82-171] A82-44686
The first joint Franco-Soviet manned flight - The posture experiment
[IAF PAPER 82-183] A82-44689

**SAMPLERS**
Electron paramagnetic resonance assignment: An analysis of methods used for biological samples
[ISS-T-82/2] N82-31889

SEATS
Vibration and comfort. I - Translational seat vibration
A82-42829
Vibration and comfort. II - Rotational seat vibration
A82-42830
SECRETIONS
State of the endocrine glands in hypodynamia (A review of the literature)
[NASA-TM-76906] N82-30926
SEISMOCARDIOGRAPHY
Seismocardiographic evaluation of contractile function of the myocardium of hypokinetic rats
N82-31902
SENSITIVITY
Activation of the cerebral gba-ergic inhibiting system in stress
[NASA-TM-76867] N82-30881
SENSITIZING
Effect of sensitization on development of stress gastric ulcers in rats
[NASA-TM-76868] N82-30892
SENSORIMOTOR PERFORMANCE
The dynamics of certain psychophysiological indicators under the cumulative effect of Coriolis accelerations
A82-42995
The role of the extrapolation and dynamic stereotype in the mechanism of the formation and improvement of adequate motor coordination
A82-43651
Proceedings of the Sixteenth Annual Conference on Manual Control
[NASA-CR-169243] N82-30833
SENSORS
Evaluation of Smart sensor displays for multidimensional precision control of space shuttle remote manipulator
N82-30870
SENSORY DEPRIVATION
RNA accumulation in the body of neurons as an indicator of their functional deafferentation
[NASA-TM-76850] N82-30922
SERVOCONTROL
Evaluation of Smart sensor displays for multidimensional precision control of space shuttle remote manipulator
N82-30870
SERVOMECHANISMS
Experimental evaluation of the concept of supervisory manipulation
N82-30869
SHIPS
Mental hygiene of sailors --- Russian book
A82-43602
SIGNAL PROCESSING
Medical thermography with a pyroelectric vidicon camera
[ESRE-3365] N82-30921
SIGNS AND SYMPTOMS
Early clinical manifestations of vibration-noise pathology in miners of Donets Basin
A82-42616
Classification of pathological states of the stato-kinetic /vestibular/ analyzer
A82-42630
Medical monitoring and therapy of space motion sickness
[IAF PAPER 82-169] A82-44684
SITTING POSITION
Vibration and comfort. III - Translational vibration of the feet and back. IV - Application of experimental results
A82-43674
SKIN (ANATOMY)
The effects of the direction of attention on the transmission of cutaneous information --- French thesis
A82-42083
Ear-nose-throat electrodiagnostic device for determining the rheobase of human mucosa and skin
A82-42629
SKIN TEMPERATURE (BIOLOGY)
An examination of heat exchanges in man - Establishment of a reference technique for measuring average cutaneous temperatures using infrared thermometry --- French thesis
A82-42080
Effect of heat stress on cutaneous vascular responses to the initiation of exercise
A82-44146
SLEEP
Sleep and motor activity: Stages of the ontogenic evolution of the supraspinal motor control in the human sleep cycle --- Russian book
A82-43607
Factors inducing periodic breathing in humans - A general model
A82-44140
Cognitive performance, sleep quality and mood during deep oxy-helium diving
[ENP-1/81] N82-30920
A Trimix saturation dive to 660 meters: Studies of cognitive performance, mood and sleep quality
[RPN-2/82] N82-31923
SPACE ENVIRONMENT SIMULATION
Space telescope neutral buoyancy simulations: The first two years
[NASA-TM-82485] N82-30942
SPACE EXPLORATION
Planetary atmospheres and the search for life
[IAF PAPER 82-268] A82-44708
SPACE FLIGHT STRESS
Medical monitoring and therapy of space motion sickness
[IAF PAPER 82-169] A82-44684
Psychophysiological performance examination onboard the orbital complex Salyut-Soyuz
[IAF PAPER 82-171] A82-44686
Catecholamines and their enzymes in discrete brain areas of rats after space flight on biosatellites Cosmos
[IAF PAPER 82-180] A82-44688
Activity of rat adrenal medula after flight aboard Cosmos-1129 biosatellite
N82-31905
Stereological analysis of rat bone tissue after flight aboard Cosmos-1129 biosatellite
N82-31906
Changes in rat tissue deoxyribonucleoprotein and nucleic acids following flight aboard Cosmos-1129 biosatellite
N82-31907
Renin-angiotensin-aldosterone system and electrolyte metabolism in rat blood after flight aboard Cosmos-1129 biosatellite
N82-31918
Epinephrine and norepinephrine concentrations in rat cardiac ventricles and atria after flight aboard Cosmos-1129 biosatellite
N82-31919
Rat blood plasma corticosterone after flight aboard Cosmos-1129 biosatellite
N82-31920
Deoxyribonucleoprotein and nucleic acid content of rat tissues after flight aboard Cosmos-936 biosatellite
N82-31921
The advantage of the lower body negative pressure test in aerospace medicine
N82-31942
Techniques for cardiovascular examination in human centrifuges and the principal results obtained
N82-31943
Cybernetic analysis of cardiac rhythm of Salyut-6 orbital station crew during graded exercise test
N82-32282
Combined rehabilitation and therapeutic measures in space medicine
N82-32283
SPACE PERCEPTION
Contrast increment thresholds of rhesus monkeys
A82-43099
Threshold models of spatial vision
A82-43230
Absence of depth processing in the large-frame rod-and-frame effect --- human space perception
A82-44823
Inhibition of the rod-and-frame effect by circular contours --- human depth perception
A82-44824
SPACE STATIONS
Medical support and technology for long-duration space missions
[IAF PAPER 82-174] A82-44687

SPACEBORNE EXPERIMENTS
The first joint Franco-Soviet manned flight - The posture experiment
[IAF PAPER 82-183] A82-44689
Changes in rat tissue deoxyribonucleoprotein and nucleic acids following flight aboard Cosmos-1129 biosatellite
N82-31907
SPACEBORNE TELESCOPES
Space telescope neutral buoyancy simulations: The first two years
[NASA-TM-82485] N82-30942
SPACECRAFT CABIN SIMULATORS
Dehydration therapy for subjects exposed to simulated spaceflight conditions
N82-31897
SPACECRAFT ENVIRONMENTS
Regenerable life support for the space station - A technology status summary
[IAF PAPER 82-45] A82-44650
Habitability support for manned missions of space 2000
[IAF PAPER 82-170] A82-44685
Dehydration therapy for subjects exposed to simulated spaceflight conditions
N82-31897
SPACECREWS
Habitability support for manned missions of space 2000
[IAF PAPER 82-170] A82-44685
SPLEEN
Effect of single exposure to microwaves on quantity and functional properties of T and B lymphocytes of guinea pig and mouse spleen
N82-30913
STATIC DISCHARGES
Formation of systemic adaptation reactions in static magnetic fields
N82-30904
Changes in transcapillary metabolism in patients with chronic venous insufficiency of legs under influence of static magnetic fields
N82-30907
STATIC ELECTRICITY
Cytogenetic and gonadotoxic effects of static electric fields
N82-30915
STATISTICAL ANALYSIS
A performance analysis study of a complex G field experiment
N82-30852
STEERING
The bench mixing system: Progress in two-dimensional simulation of steering characteristics
[RR-176] N82-31950
STELLAR ENVELOPES
Laboratory simulation of interstellar chemical evolution
A82-41665
STEREOSCOPY
Stereological analysis of rat bone tissue after flight aboard Cosmos-1129 biosatellite
N82-31906
STOMACH
Effect of sensitization on development of stress gastric ulcers in rats
[NASA-TM-76868] N82-30892
Efficacy of cimetidin in the prevention of ulcer formation in the stomach during immobilization stress
[NASA-TM-76864] N82-30923
STRESS (PHYSIOLOGY)
The condition of the cardiovascular system in air traffic controllers according to data acquired at the workplace
A82-42614
A physiological justification of allowable noise levels in work involving heavy physical labor under nervous stress
A82-42617
Changes in the lymphoid organs of rats under the effect of acute hypoxia
A82-42623
Analysis of methods for evaluating thermal stress --- effects on human beings
A82-42994
Individual features of the vegetative regulation of body functions during the adaptation of sailors in the tropics
A82-42996
Evaluation of the heaviness of physical work with marked nervous-emotional stress
A82-43240
Internal stresses and contractility of myocardium
A82-43513
The effect of a physiological load on the exchange and phosphorylation of cell membrane proteins in the brain of rats
A82-43654
Effect of heat stress on cutaneous vascular responses to the initiation of exercise
A82-44146
Head cooling and heat
A82-44292
Possible adaptation to strong magnetic fields --- by animals
[IAF PAPER 82-188] A82-44690
Influence of stress on the blood system reaction in adrenalectomized mice
[NASA-TM-76902] N82-30877
Effect of mebicar on animals under extreme conditions
[NASA-TM-76851] N82-30879
Reaction of the blood system to single and double effect of a stress agent
[NASA-TM-76866] N82-30880
Activation of the cerebral gba-ergic inhibiting system in stress
[NASA-TM-76867] N82-30881
Catecholamines in the blood plasma of August and Wistar rats during emotional stress
[NASA-TM-76872] N82-30885
Changes of blood plasma renin activity in August and Wistar rats under emotional stress
[NASA-TM-76873] N82-30886
Glucocorticoid receptors and metabolic disturbances in the (rat) liver and heart during immobilization
[NASA-TM-76874] N82-30887
Genetic and individual differences in cardiovascular disturbances of rats during experimental emotional stress
[NASA-TM-76911] N82-30890
Effect of immobilization stress on diacyl- and plasmalogen-derivatives of phospholipids in various rat organs and tissues
[NASA-TM-76852] N82-30891
Effect of sensitization on development of stress gastric ulcers in rats
[NASA-TM-76868] N82-30892
Specific cytoplasmic glucocorticoid receptors of rat liver under conditions of immobilization stress
[NASA-TM-76863] N82-30893
Specific cytoplasmic glucocorticoid receptors of the rat liver during immobilization stress
[NASA-TM-76869] N82-30894
Efficacy of cimetidin in the prevention of ulcer formation in the stomach during immobilization stress
[NASA-TM-76864] N82-30923
The role of the hypophysis in early reaction of hemopoietic organs to stress
[NASA-TM-76865] N82-30924
Detailed research plan: Cardiovascular effects of noise
[PB82-163379] N82-30934
STRESS (PSYCHOLOGY)
Activation of lipid peroxidation during stress in man, evaluated according to the content of pentane in expired air
A82-42600
Emotional stress and hypokinesia in the origination of cardiac disorders and hypertensive states
A82-42608
A systems analysis of individual vascular reactions in animals under experimentally induced emotional stress
A82-42610
A physiological justification of allowable noise levels in work involving heavy physical labor under nervous stress
A82-42617

Electrocardiographic correlates of emotional stress
A82-43236
Evaluation of the heaviness of physical work with marked nervous-emotional stress
A82-43240
The mechanisms of hypertensive responses during emotional stress
A82-43630
A composite assessment of heart rhythm regulation during dosed functional loads
A82-43637
Biogenic monoamine content of the ganglia in the autonomic nervous system of rabbits during acute experimental emotional stress
[NASA-TM-76900] N82-30875
Activation of the cerebral gba-ergic inhibiting system in stress
[NASA-TM-76867] N82-30881
Emotional stress as a factor in cardiovascular disturbances
[NASA-TM-76910] N82-30889
Genetic and individual differences in cardiovascular disturbances of rats during experimental emotional stress
[NASA-TM-76911] N82-30890

SUBMARINES
Position paper: The toxic effects of chronic exposure to low levels of carbon dioxide
[AD-A115053] N82-30930

SUPERHIGH FREQUENCIES
Meteorological radar as source of SHF electromagnetic field energy and problems of environmental hygiene
N82-30911
Effects of superhigh frequency electromagnetic fields on animals of different ages
N82-30916

SURFACE TO AIR MISSILES
Modeling human target acquisition in ground-to-air weapon systems
N82-30836

SURGERY
Anesthesia, surgery and resuscitation during manned spaceflights
N82-31899

SURVEYS
The airline pilot's view of flight deck workload: A preliminary study using a questionnaire
[RAE-TM-FS(B)-465] N82-31945

SYMPATHETIC NERVOUS SYSTEM
The effectiveness of neurohumoral influences on pulmonary circulation
A82-42607
The mechanisms of the development of the cardiogenic vagosympathetic reflexes
A82-43631

SYNAPSES
Stereological analysis of interneuronal contacts in the cerebral cortex of rats during the posthypoxic period
A82-42622

SYNTHESIS (CHEMISTRY)
DNA and RNA synthesis in isolated nuclei of rat skeletal muscles during hypodynamia
[NASA-TM-76875] N82-30888

SYSTEM FAILURES
Pilot reaction to attitude gyro failure: A flight experiment
N82-30858

SYSTEMS ANALYSIS
New aspects of functional system theory
N82-30934
Plastic properties of motivation as prime component in systemic organization of purposeful behavioral acts
N82-30937

SYSTEMS INTEGRATION
Logistics support productivity improvement
A82-42196

SYSTEMS SIMULATION
Computer simulation of respiratory control system
A82-43185

SYSTOLIC PRESSURE
Internal stresses and contractility of myocardium
A82-43513

T

TACTILE DISCRIMINATION
Optical fiber multiple sensor for gripping complex objects
N82-32294

TARGET ACQUISITION
A finite-state description of coordination in a two-handed target acquisition task
A82-44514
Modeling human target acquisition in ground-to-air weapon systems
N82-30836
Prediction of short term tracking tasks using an optimal pilot model
[AD-A115543] N82-30840

TARGET RECOGNITION
The effects of color and contrast on target recognition performance using monochromatic television displays
[AD-A116238] N82-31946

TASK COMPLEXITY
The effects of the direction of attention on the transmission of cutaneous information --- French thesis
A82-42083

TASKS
Combined discrete network continuous control modelling of operator behavior
N82-30861

TECHNOLOGY ASSESSMENT
Information automation and the Apollo program - A retrospective
A82-44513
Regenerable life support for the space station - A technology status summary
[IAF PAPER 82-45] A82-44650
An analytic framework for allocating R and D resources at GRI
[PB82-168428] N82-30898

TELEOPERATORS
Experimental evaluation of the concept of supervisory manipulation
N82-30869
Evaluation of smart sensor displays for multidimensional precision control of space shuttle remote manipulator
N82-30870

TELEVISION SYSTEMS
The effects of color and contrast on target recognition performance using monochromatic television displays
[AD-A116238] N82-31946

TEMPERATURE DISTRIBUTION
Distribution of heat in biological tissues under influence of UHF electromagnetic fields --- for tumor treatment
N82-30909

TEMPERATURE EFFECTS
Temperature effects on lung mechanics in air- and liquid-filled rabbit lungs
A82-44134
Effect of heat stress on cutaneous vascular responses to the initiation of exercise
A82-44146
Head cooling and heat
A82-44292

TEMPERATURE MEASURING INSTRUMENTS
Thermography and microwave heating - The design and fabrication of systems intended for biological and medical use --- French thesis
A82-42087

TERRAIN FOLLOWING AIRCRAFT
A comparison of display formats for the electronic master monitor and advisory display system
[AD-A115127] N82-30946

TEST PILOTS
The role of the test pilot in flight tests
A82-43329

THERAPY
Characteristics of pharmacotherapeutic complications in otolaryngology /Review of the literature/
A82-42628
Combined rehabilitation and therapeutic measures in space medicine
N82-32283

**THERMAL COMFORT**
Methods of human adaptation to heat
A82-42993
Analysis of methods for evaluating thermal stress --- effects on human beings
A82-42994

**THERMOREGULATION**
Methods of human adaptation to heat
A82-42993
Thermogenesis and muscle activity during the adaptation to cold --- Russian book
A82-43610
Hormone response of normal and intermittent cold-preadapted humans to continuous cold
A82-44137

**THRESHOLDS (PERCEPTION)**
Contrast increment thresholds of rhesus monkeys
A82-43099
Threshold models of spatial vision
A82-43230

**THYMUS GLAND**
Morphological criteria for diagnosing pathologies of the thymus with myasthenia
A82-42633
State of the endocrine glands in hypodynamia (A review of the literature)
[NASA-TM-76906] N82-30926

**THYROID GLAND**
Role of the thyroid gland during adaptation of skeletal muscles to increased motor activity
[NASA-TM-76871] N82-30884
State of the endocrine glands in hypodynamia (A review of the literature)
[NASA-TM-76906] N82-30926
A technique for long-term measurements of thyroid function in beagle dogs using iodine 125
[FOA-A-59003-H3] N82-31890
Morphological distinctions of Macaca rhesus monkey thyroid under normal and various types of hypokinetic conditions
N82-31508

**TIME DEPENDENCE**
Dynamics of the process of the determination of orientation by man
A82-43231

**TIME DISCRIMINATION**
Effect of counting and tracking on verbal and production methods of time estimation
N82-30845

**TIME LAG**
A comparison of control modes for time-delayed remote manipulation
N82-30868

**TIME MEASUREMENT**
Effect of counting and tracking on verbal and production methods of time estimation
N82-30845

**TISSUES (BIOLOGY)**
Principles of the definition and classification of tissues
A82-42620
The topography of elements of the cardiac conduction system
A82-42625
Stimulating effect of exposure of rat sternum to variable magnetic field on antibody production in the spleen
N82-30900
Distribution of heat in biological tissues under influence of UHF electromagnetic fields --- for tumor treatment
N82-30909
Stereological analysis of rat bone tissue after flight aboard Cosmos-1129 biosatellite
N82-31906
Deoxyribonucleoprotein and nucleic acid content of rat tissues after flight aboard Cosmos-936 biosatellite
N82-31921

**TOMOGRAPHY**
Contribution of nuclear medicine in cardiology
N82-31939

**TOXIC HAZARDS**
Cytogenetic and gonadotoxic effects of static electric fields
N82-30915
Biological availability of nickel arsenides: Toxic effects of particulate Ni5As2
[DE82-000580] N82-30932

**TOXICITY**
Position paper: The toxic effects of chronic exposure to low levels of carbon dioxide
[AD-A115053] N82-30930

**TOXICITY AND SAFETY HAZARD**
Investigation on the carcinogenic effect of trichloroethylene by inhalation and mechanisms of metabolic bioactivation
[BMFT-FB-HA-82-007] N82-30933

**TOXICOLOGY**
Morphology and coagulant function of human blood system during long exposure to low ammonia concentrations in a sealed environment
N82-31903

**TRACE CONTAMINANTS**
Morphology and coagulant function of human blood system during long exposure to low ammonia concentrations in a sealed environment
N82-31903

**TRACKING (POSITION)**
An analysis and modeling of the binocular system in human sagittal vision --- French thesis
A82-42090
Modelling of human operator dynamics in simple manual control utilizing time series analysis
N82-30830
A gunner model for an AAA tracking task with interrupted observations
N82-30835
Pursuit tracking and higher levels of skill development in the human pilot
N82-30839
Modeling lateral acceleration effects on pilot performance
N82-30854

**TRACKING FILTERS**
An analog tracking filter for a swept-sine human vibration test
A82-41808

**TRAINING DEVICES**
Improved procedures training through use of aids developed from learning guidelines
[AD-A113109] N82-30939

**TRAINING EVALUATION**
Training and personnel impact on increased productivity
A82-42230
Improved procedures training through use of aids developed from learning guidelines
[AD-A113109] N82-30939

**TRANQUILIZERS**
Effect of mebicar on animals under extreme conditions
[NASA-TM-76851] N82-30879

**TRANSDUCERS**
Comparative evaluation of informativeness of three corrected orthogonal leads and twelve conventional EKG leads in conducting functional tests
N82-31914

**TRANSLATIONAL MOTION**
Vibration and comfort. III - Translational vibration of the feet and back. IV - Application of experimental results
A82-43678

**TRANSMISSION**
A comparison of control modes for time-delayed remote manipulation
N82-30868

**TRANSMISSION LINES**
Effects of low-frequency (50 Hz) electric fields on animals of different ages
N82-30910

**TRANSPORT AIRCRAFT**
A model based technique for predicting pilot opinion ratings for large commercial transports
N82-30846

**TRANSVERSE ACCELERATION**
Modeling lateral acceleration effects on pilot performance
N82-30854

**TRINITROTOLUENE**
Investigation of behaviorally modified rats for use in explosives detection systems
[AD-A114632] N82-30895

TROPICAL REGIONS
  Individual features of the vegetative regulation of body functions during the adaptation of sailors in the tropics
  A82-42894
TUMORS
  Distribution of heat in biological tissues under influence of UHF electromagnetic fields --- for tumor treatment
  N82-30909
TURBOPROP AIRCRAFT
  Effect of synthesized propeller vibration on passenger annoyance in a turboprop interior noise environment
  [NASA-TM-84515] N82-31946

U

ULCERS
  Effect of sensitization on development of stress gastric ulcers in rats
  [NASA-TM-76868] N82-30892
  Efficacy of cimetidin in the prevention of ulcer formation in the stomach during immobilization stress
  [NASA-TM-76864] N82-30923
ULTRAHIGH FREQUENCIES
  Distribution of heat in biological tissues under influence of UHF electromagnetic fields --- for tumor treatment
  N82-30909
ULTRASONICS
  Echocardiography in the examination of pilots
  N82-31937
ULTRAVIOLET RADIATION
  Changes of the functional condition of the neocortex during direct application of optical radiation
  A82-43655
UNDERWATER ACOUSTICS
  Supervisory control: Problems, theory and experiment for application to human-computer interaction in undersea remote systems
  [AD-A116236] N82-31949

V

VASCULAR SYSTEM
  A systems analysis of individual vascular reactions in animals under experimentally induced emotional stress
  A82-42610
  An experimental study of the human blood-cerebral barrier using scanning electron microscopy
  A82-42630
  Changes in transcapillary metabolism in patients with chronic venous insufficiency of legs under influence of static magnetic fields
  N82-30907
VASOCONSTRICTION
  The contraction, regulation, and functional role of lymph vessels
  A82-42603
  The coronary vessels and the contractile apparatus of the myocardium in immune heart damage /Histochemical and ultrastructural studies/
  A82-43605
  Hypoxic pulmonary vasoconstriction and the size of hypoxic compartment
  A82-44138
  Effect of heat stress on cutaneous vascular responses to the initiation of exercise
  A82-44146
VASOCONSTRICTOR DRUGS
  The effectiveness of neurohumoral influences on pulmonary circulation
  A82-42607
VASODILATION
  The interrelationship of the function of the blood kallikrein-kinin system with the main parameters of central hemodynamics during hypertension
  A82-42175
  Effect of heat stress on cutaneous vascular responses to the initiation of exercise
  A82-44146
VESTIBULAR NYSTAGMUS
  A general purpose data acquisition and analysis system for nystagmus and related data
  [NASA-CR-167704] N82-30919
  Measurement of vestibular asymmetry in rotation tests
  N82-31913
VESTIBULES
  Classification of pathological states of the stato-kinetic /vestibular/ analyzer
  A82-42620
  The morphology of the connections of the cortical vestibular zone --- Russian book
  A82-43611
  A comprehensive system model for motion/space sickness: Preliminary results
  N82-30855
VIBRATION EFFECTS
  The effect of general vibration combined with intermittent noise on the human auditory function
  A82-42615
  Early clinical manifestations of vibration-noise pathology in miners of Donets Basin
  A82-42616
  Studies directed toward improving hygienic standards pertaining to total-body vibration resulting from heavy moving equipment
  A82-42619
  Vibration and comfort. I - Translational seat vibration
  A82-42829
  Vibration and comfort. II - Rotational seat vibration
  A82-42830
  Subjective response to whole-body vibration - The effects of posture
  A82-42831
  Vibration and comfort. III - Translational vibration of the feet and back. IV - Application of experimental results
  A82-43674
  Variability in human response to whole-body vibration - The effects of instructions
  A82-43675
  A software package for evaluating the transmissibility between vehicle vibration and motions of hands (in controls), limb, head and eyes
  N82-30853
  Dynamics of functional state of heavy transport helicopter pilots in the course of flight shift
  N82-31900
  Effect of synthesized propeller vibration on passenger annoyance in a turboprop interior noise environment
  [NASA-TM-84515] N82-31946
VIBRATION PERCEPTION
  Early clinical manifestations of vibration-noise pathology in miners of Donets Basin
  A82-42616
  Studies directed toward improving hygienic standards pertaining to total-body vibration resulting from heavy moving equipment
  A82-42619
  Subjective response to whole-body vibration - The effects of posture
  A82-42831
VIBRATION TESTS
  An analog tracking filter for a swept-sine human vibration test
  A82-41808
VIDICONS
  Medical thermography with a pyroelectric vidicon camera
  [ESRB-3365] N82-30921
VIKING MARS PROGRAM
  Interpretation of Viking biology experiments
  A82-43221
VISION
  Hyperacuity and interpolation by the visual pathways
  A82-43100
  A cortically implantable multielectrode array for investigating the mammalian visual system
  [AD-A115484] N82-30931
VISUAL CONTROL
  The effect of visual information on the manual approach and landing
  N82-30837
VISUAL DISCRIMINATION
  Contrast increment thresholds of rhesus monkeys
  A82-43099

Absence of depth processing in the large-frame rod-and-frame effect --- human space perception
A82-44823

VISUAL PERCEPTION

The organization of the afferent subcortical inputs of the visual region of the cat cerebrum
A82-42621

Three stimuli for visual motion perception compared
A82-42900

Dynamics of the process of the determination of orientation by man
A82-43231

Factors determining the characteristics of the perception of stabilized retinal images
A82-43232

Psychophysical characteristics of perception and bioelectric activity of the brain during micropolarization of the occipital part of the hemispheres
A82-43235

An experimental study of human pilot's scanning behavior
N82-30841

A comprehensive system model for motion/space sickness: Preliminary results
N82-30855

Performance tests for repeated measures: Moran and computer batteries
[AD-A115068] N82-30941

New look at models of visual performance
[DE82-001337] N82-31924

VISUAL SIGNALS

An analysis and modeling of the binocular system in human sagittal vision --- French thesis
A82-42090

VISUAL STIMULI

The influence of afferent visual impulses on the morphological and biochemical parameters of the development of the neurons of the visual, motor, and parietal cerebral cortices
A82-42636

Three stimuli for visual motion perception compared
A82-42900

Dynamics of the process of the determination of orientation by man
A82-43231

Factors determining the characteristics of the perception of stabilized retinal images
A82-43232

Absence of depth processing in the large-frame rod-and-frame effect --- human space perception
A82-44823

Inhibition of the rod-and-frame effect by circular contours --- human depth perception
A82-44824

W

WATER BALANCE

The effect of body position and the administration of a diuretic on the water-salt status and the activity of the kidneys
A82-43230

WEAPON SYSTEMS

A gunner model for an AAA tracking task with interrupted observations
N82-30835

Modeling human target acquisition in ground-to-air weapon systems
N82-30836

Application of optimal control principles to describe the supervisory control behavior of AAA crew members
N82-30864

WEAPONS DELIVERY

Aerial combat simulation in the U.S. Air Force
A82-42794

WEIGHTLESSNESS

Medical monitoring and therapy of space motion sickness
[IAF PAPER 82-169] A82-44684

Catecholamines and their enzymes in discrete brain areas of rats after space flight on biosatellites Cosmos
[IAF PAPER 82-180] A82-44688

Activity of rat adrenal medula after flight aboard Cosmos-1129 biosatellite
N82-31905

Changes in rat tissue deoxyribonucleoprotein and nucleic acids following flight aboard Cosmos-1129 biosatellite
N82-31907

Rat blood plasma corticosterone after flight aboard Cosmos-1129 biosatellite
N82-31920

The advantage of the lower body negative pressure test in aerospace medicine
N82-31942

WHITE BLOOD CELLS

Effects of +G sub z acceleration and adeutron on nuclei acid content and other parameters of mouse peripheral blood
N82-31909

WIND VELOCITY

Aircrew windblast protection concepts, development and evaluation
[AD-A115424] N82-31947

WORK CAPACITY

Levels of physiological reserves of sailors working a 10-hour shift
A82-42618

WORK-REST CYCLE

Levels of physiological reserves of sailors working a 10-hour shift
A82-42618

WORKLOADS (PSYCHOPHYSIOLOGY)

The condition of the cardiovascular system in air traffic controllers according to data acquired at the workplace
A82-42614

A physiological justification of allowable noise levels in work involving heavy physical labor under nervous stress
A82-42617

A composite assessment of heart rhythm regulation during dosed functional loads
A82-43637

Proceedings of the Sixteenth Annual Conference on Manual Control
[NASA-CR-169243] N82-30833

Subjective scaling of mental workload in a multi-task environment
N82-30844

An analytical prediction of pilot ratings utilizing human pilot model
N82-30847

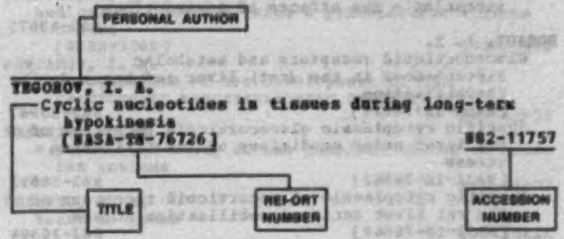
FMP study of pilot workload. Qualification of workload via instrument scan
[NASA-CR-169254] N82-30944

The airline pilot's view of flight deck workload: A preliminary study using a questionnaire
[RAE-TM-FS(B)-465] N82-31945

# PERSONAL AUTHOR INDEX

AEROSPACE MEDICINE AND BIOLOGY/*A Continuing Bibliography (Suppl. 239)* DECEMBER 1982

## Typical Personal Author Index Listing



The title of the document is used to provide the user with a brief description of the subject matter. The NASA or AIAA accession number is included in each entry to assist the user in locating the abstract in the abstract section of this supplement. If applicable, a report number is also included as an aid in identifying the document.

## A

**ABRAMOVA, R. N.**
Studies directed toward improving hygienic standards pertaining to total-body vibration resulting from heavy moving equipment
A82-42619

**ABUSHKEVICH, V. G.**
Functional means for the regulation of heart rhythm during burst stimulation of the vagus nerves
A82-43632

**ABYZOV, R. A.**
Characteristics of pharmacotherapeutic complications in otolaryngology /Review of the literature/
A82-42628

**ADAMS, R. P.**
A critical value for O2 transport in the rat
A82-44141

**ADAMS, W. J.**
Aircrew windblast protection concepts, development and evaluation
[AD-A115424] N82-31947

**AGARWAL, G. C.**
Modelling of human operator dynamics in simple manual control utilizing time series analysis
N82-30834

**AHARON, N.**
Protein kinase activity in liver of heat-acclimated hamsters
A82-44145

**ALEC, K. P.**
Role of the thyroid gland during adaptation of skeletal muscles to increased motor activity
[NASA-TM-76871] N82-30884

**ALEKSANIAN, Z. A.**
The adaptive control of vegetative processes
A82-43652

**AMERY, A.**
Hemodynamic response to converting enzyme inhibition at rest and exercise in humans
A82-44135

**AMIRKHANYAN, Y. A.**
Morphological distinctions of Macaca rhesus monkey thyroid under normal and various types of hypokinetic conditions
N82-31908

**AMORETTI, R.**
The contribution of cardiac mechanograms in the evaluation of pilots
N82-31936

**ANASTASOVA, N. P.**
Effect of dosed physical loading on biological oxidation and bioenergy in liver and myocardium
A82-43046

**ANTONOV, V. V.**
Comparative analysis of the biological effects of electromagnetic radiation. II - Eye damage. Cataractogenesis
A82-43222

**APSHKALNS, D. L.**
Possible use of magnetobiological effects in neurosurgery
N82-30905

**ARTEMEVA, A. I.**
Conjugated changes of the resistance and blood filling of cerebral vessels during shifts in the blood gas composition
A82-43635

**ASTABOLOVA,**
Percutaneous measurement of partial oxygen tension and local blood flow in man during orthostatic test
N82-31904

**AUBAKIROV, A. B.**
The anatomy and topography of the human bronchopulmonary lymph nodes
A82-42624

**AVETIKIAN, SH. T.**
The condition of the cardiovascular system in air traffic controllers according to data acquired at the workplace
A82-42614

## B

**BABIIAN, V. I.**
The dynamics of certain psychophysiological indicators under the cumulative effect of Coriolis accelerations
A82-42995

**BADAYEVA, L. N.**
Cytogenetic and gonadotoxic effects of static electric fields
N82-30915

**BADDELEY, A. D.**
Cognitive performance, sleep quality and mood during deep oxy-helium diving
[RNP-1/81] N82-30920
A Trimix saturation dive to 660 meters: Studies of cognitive performance, mood and sleep quality
[RPN-2/82] N82-31923

**BAIR, R. E.**
Implantable, remotely-programmable insulin infusion system
[DE82-003084] N82-31927

**BAKAY, R. A.**
Stimulating effect of exposure of rat sternum to variable magnetic field on antibody production in the spleen
N82-30900

**BARMAN, S. S.**
Biological availability of nickel arsenides: Toxic effects of particulate Ni5As2
[DE82-000580] N82-30932

**BARON, S.**
Procru: A model for analyzing flight crew procedures in approach to landing
N82-30863

**BARTONICKOVA, L.**
Effects of microwave radiation on mouse hemopoietic stem cells and on animal resistance to ionizing radiation
N82-30912

BAYEVSKIY, R. M.
Cybernetic analysis of cardiac rhythm of Salyut-6 orbital station crew during graded exercise test
N82-32282

BAZAROV, V. G.
Classification of pathological states of the statokinetic /vestibular/ analyzer
A82-42630

BAZHENOV, YU. I.
Thermogenesis and muscle activity during the adaptation to cold
A82-43610

BAZIKOV, A. A.
Principles of the definition and classification of tissues
A82-42620

BEJCZY, A. K.
Evaluation of Smart sensor displays for multidimensional precision control of space shuttle remote manipulator
N82-30870

BELKANIIA, G. S.
Changes in the transaminase activity and several biochemical blood values in the acute period of experimental myocardial infarction in monkeys
A82-42172

BELKANIYA, G. S.
Morphological distinctions of Macaca rhesus monkey thyroid under normal and various types of hypokinetic conditions
N82-31908
Diagnostic use of enzymatic test in experiments on monkeys
N82-31915

BELL, B. J.
Overview of a procedure for human-reliability analysis
[DE81-030816] N82-30947

BELONOGOV, A. A.
Effect of optokinetic stimulation on operator's functional state and professional work capacity
N82-31896

BELOUS, A. K.
Internal stresses and contractility of myocardium
A82-43513

BELOUSOVA, O. I.
Reaction of the blood system to single and double effect of a stress agent
[NASA-TM-76866] N82-30880

BELOVA, E. V.
Electrocardiographic correlates of emotional stress
A82-43236

BELOVA, T. I.
Catecholamines in the blood plasma of August and Wistar rats during emotional stress
[NASA-TM-76872] N82-30885
Changes of blood plasma renin activity in August and Wistar rats under emotional stress
[NASA-TM-76873] N82-30886

BELYI, N. I.
Features of information processing in the right and left hemispheres of the human brain /A survey of the literature/
A82-42632

BENUMOF, J. L.
Hypoxic pulmonary vasoconstriction and the size of hypoxic compartment
A82-44138

BERDYSHEV, V. V.
Individual features of the vegetative regulation of body functions during the adaptation of sailors in the tropics
A82-42996

BEREGOVKIN, A. V.
Combined rehabilitation and therapeutic measures in space medicine
N82-32283

BERMAN, S.
New look at models of visual performance
[DE82-001337] N82-31924

BERSHADSKII, B. G.
The mechanisms of hypertensive responses during emotional stress
A82-43630

BESPALOVA, L. A.
Specificity of ultrastructural changes in rat cardiomyocytes after local gamma-irradiation and hypokinesia
[NASA-TM-76853] N82-30882

BIRD, K. L.
Effect of counting and tracking on verbal and production methods of time estimation
N82-30845

BITTNER, A. C., JR.
Performance tests for repeated measures: Moran and computer batteries
[AD-A115068] N82-30941

BOARER, P. A.
Subjective response to whole-body vibration - The effects of posture
A82-42831
Variability in human response to whole-body vibration - The effects of instructions
A82-43675

BOBKOV, A. I.
Glucocorticoid receptors and metabolic disturbances in the (rat) liver and heart during immobilization
[NASA-TM-76874] N82-30887
Specific cytoplasmic glucocorticoid receptors of rat liver under conditions of immobilization stress
[NASA-TM-76863] N82-30893
Specific cytoplasmic glucocorticoid receptors of the rat liver during immobilization stress
[NASA-TM-76869] N82-30894

BOBKOVA, A. S.
Specific cytoplasmic glucocorticoid receptors of rat liver under conditions of immobilization stress
[NASA-TM-76863] N82-30893
Specific cytoplasmic glucocorticoid receptors of the rat liver during immobilization stress
[NASA-TM-76869] N82-30894

BOENNING, R. A.
Logistics support productivity improvement
A82-42196

BOGNAR, L.
Psychophysiological performance examination onboard the orbital complex Salyut-Soyuz
[IAF PAPER 82-171] A82-44686

BOGOLEPOVA, I. N.
Morphological features of the individual structure of the human brain
A82-42637

BOGOLYUBOV, V. M.
Status and prospects of research on biological and therapeutic effects of magnetic fields
N82-30901
Combined rehabilitation and therapeutic measures in space medicine
N82-32283

BOGOMOLOV, V. V.
Combined rehabilitation and therapeutic measures in space medicine
N82-32283

BOLTZ, R. L.
Contrast increment thresholds of rhesus monkeys
A82-43099

BONDARENKO, V. M.
Study of the morphological and biological properties of obligate and facultative psychrophylic bacteria found in the Antarctic
A82-43671

BORISOVA, R. P.
The contraction, regulation, and functional role of lymph vessels
A82-42603

BOULANGE, M.
An investigation of the mechanical meaning of the surface electromyogram
A82-42078

BOUTELIER, C.
Hormone response of normal and intermittent cold-preadapted humans to continuous cold
A82-44137

BOYLE, P. J.
Coatings for the prevention of macrofouling in the OTEC program
[DE82-003238] N82-30897

BRABY, R.
Improved procedures training through use of aids developed from learning guidelines
[AD-A113109] N82-30939

BRADBURY, J. N.
Medical uses of accelerators
[DE82-000572] N82-31926

**BROOKS, T. L.**
Experimental evaluation of the concept of supervisory manipulation
N82-30869

**BROWN, J. W.**
Evaluation of Smart sensor displays for multidimensional precision control of space shuttle remote manipulator
N82-30870

**BUCHANAN, P.**
Medical support and technology for long-duration space missions
[IAF PAPER 82-174] A82-44687

**BURGESS, D. E.**
Medical thermography with a pyroelectric vidicon camera
[RSRE-3365] N82-30921

**BURIAKOV, I. B.**
The mechanisms of the development of the cardiogenic vagosympathetic reflexes
A82-43631

**BURYKINA, L. N.**
Experimental study of the combined effect of noise and acetone
A82-42612

**BUTENKO, G. M.**
Heart antigens
A82-43666

**BYTKA, P. F.**
Microcirculatory state in the case of chronic obliteration of arteries
A82-42626

## C

**CAIN, S. M.**
A critical value for O2 transport in the rat
A82-44141

**CAPRARO, R.**
The first joint Franco-Soviet manned flight - The posture experiment
[IAF PAPER 82-183] A82-44689

**CARLSON, G. A.**
Implantable, remotely-programmable insulin infusion system
[DE82-003084] N82-31927

**CARRE, R.**
Noninvasive techniques for cardiovascular examination of interest in aerospace medicine
[AGARD-AG-277(FR)] N82-31930

Principal electrocardiographic anomalies in the evaluation of pilots
N82-31931

The contribution of cardiac mechanograms in the evaluation of pilots
N82-31936

**CARTER, R. C.**
Performance tests for repeated measures: Moran and computer batteries
[AD-A115068] N82-30941

**CHASIOTIS, D.**
Regulation of glycogenolysis in human muscle at rest and during exercise
A82-44144

**CHAYALO, P. P.**
Effect of restricted mobility on the composition and metabolism of blood lipoproteids in rabbits
[NASA-TM-76846] N82-30871

**CHAYOTH, R.**
Protein kinase activity in liver of heat-acclimated hamsters
A82-44145

**CHEKMAN, I. S.**
Characteristics of pharmacotherapeutic complications in otolaryngology /Review of the literature/
A82-42628

**CHEN, J.**
Life-cycle costing of life support equipment
[AD-A116404] N82-31948

**CHERKASOV, G. V.**
Possible adaptation to strong magnetic fields
[IAF PAPER 82-188] A82-44690

**CHERNUKH, A. M.**
Biomicroscopy of a microcirculatory bed in experiments - Possibilities, limitations, and prospects
A82-42611

**CHERNYY, A. V.**
DNA and RNA synthesis in isolated nuclei of rat skeletal muscles during hypodynamia
[NASA-TM-76875] N82-30888

**CHERTOK, V. M.**
A morphological investigation of the regulatory mechanisms of the intracerebral blood circulation
A82-42627

**CHESNOKOV, IU. V.**
Stereological analysis of interneuronal contacts in the cerebral cortex of rats during the posthypoxic period
A82-42622

**CHIKALE, K. T.**
Microcirculatory state in the case of chronic obliteration of arteries
A82-42626

**CHUGUNOVA, A. B.**
Functional means for the regulation of heart rhythm during burst stimulation of the vagus nerves
A82-43632

**CHURBAR, A. V.**
The topography of elements of the cardiac conduction system
A82-42625

**CLEAR, R.**
New look at models of visual performance
[DE82-001337] N82-31928

**CLEMENT, G.**
The first joint Franco-Soviet manned flight - The posture experiment
[IAF PAPER 82-183] A82-44689

**CLEVENSON, S. A.**
Effect of synthesized propeller vibration on passenger annoyance in a turboprop interior noise environment
[NASA-TM-84515] N82-31944

**COIGNARD, A.**
Echocardiography in the examination of pilots
N82-31937

**COKELET, G. R.**
Some potential blood flow experiments for space
[UR-3490-1720] N82-32068

**COOK, P. A.**
Aerial combat simulation in the U.S. Air Force
A82-42794

**CROSIER, W. G.**
A general purpose data acquisition and analysis system for nystagmus and related data
[NASA-CR-167704] N82-30919

**CULMAN, J.**
Catecholamines and their enzymes in discrete brain areas of rats after space flight on biosatellites Cosmos
[IAF PAPER 82-180] A82-44688

**CUMMINGS, E. J.**
Aircrew windblast protection concepts, development and evaluation
[AD-A115424] N82-31947

## D

**DAKOVSKA, L. N.**
Effect of dosed physical loading on plasma and liver lipids and lipoproteins in rats
A82-43045

Effect of dosed physical loading on biological oxidation and bioenergy in liver and myocardium
A82-43046

**DALLEMAGNE, G.**
Biocorrosion
[SNIAS-821-551-105] N82-31891

**DANIELE, R. P.**
Hyperoxia inhibits stimulated superoxide release by rat alveolar macrophages
A82-44143

**DARYANIAN, B.**
Subjective scaling of mental workload in a multi-task environment
N82-30884

**DASAEVA, A. D.**
Experimental study of the combined effect of noise and acetone
A82-42612

DATSOV, Y. R.
Effects of +G sub z acceleration and adeutron on nucleic acid content and other parameters of mouse peripheral blood
N82-31909

DAVENPORT, E. L.
A computer simulation approach to measurement of human control strategy
N82-30843

DAVYDOV, B. I.
Comparative analysis of the biological effects of electromagnetic radiation. II - Eye damage. Cataractogenesis
A82-43222

DEFAUX, B.
Optical fiber multiple sensor for gripping complex objects
N82-32290

DEGTYAREV, V. A.
Preflight examination results used to forecast cosmonaut endurance of orthostatic tests after spaceflight
N82-31917

DEMBITSKII, V. N.
Effect of immobilization stress on diacyl- and plasmalogen-derivatives of phospholipids in various rat organs and tissues
[NASA-TM-76852] N82-30891

DEMIDOVA, T. N.
Dehydration therapy for subjects exposed to simulated spaceflight conditions
N82-31897

DEMINA, D. M.
Evaluation of the heaviness of physical work with marked nervous-emotional stress
A82-43240

DEMOKIDOVA, N. K.
Experimental study of the combined effect of noise and acetone
A82-42612

DERYAGINA, G. P.
Effect of immobilization on the development of experimental arteriosclerosis in rabbits
[NASA-TM-76901] N82-30876

DESCAMO, A.
Ballistocardiography: A nonintrusive method moving towards clinical applications
N82-31940

DESHEVOY, Y. B.
The role of the hypophysis in early reaction of hemopoietic organs to stress
[NASA-TM-76865] N82-30924

# PUBLIC COLLECTIONS OF NASA DOCUMENTS

## DOMESTIC

NASA distributes its technical documents and bibilographic tools to eleven special libraries located in the organizations listed below. Each library is prepared to furnish the public such services as reference assistance, interlibrary loans, photocopy service, and assistance in obtaining copies of NASA documents for retention.

**CALIFORNIA**
University of California, Berkeley
**COLORADO**
University of Colorado, Boulder
**DISTRICT OF COLUMBIA**
Library of Congress
**GEORGIA**
Georgia Institute of Technology, Atlanta
**ILLINOIS**
The John Crerar Library, Chicago
**MASSACHUSETTS**
Massachusetts Institute of Technology, Cambridge
**MISSOURI**
Linda Hall Library, Kansas City
**NEW YORK**
Columbia University, New York
**OKLAHOMA**
University of Oklahoma, Bizzell Library
**PENNSYLVANIA**
Carnegie Library of Pittsburgh
**WASHINGTON**
University of Washington, Seattle

NASA publications (those indicated by an '*' following the accession number) are also received by the following public and free libraries:

**CALIFORNIA**
Los Angeles Public Library
San Diego Public Library
**COLORADO**
Denver Public Library
**CONNECTICUT**
Hartford Public Library
**MARYLAND**
Enoch Pratt Free Library, Baltimore
**MASSACHUSETTS**
Boston Public Library
**MICHIGAN**
Detroit Public Library
**MINNESOTA**
Minneapolis Public Library and Information Center
**NEW JERSEY**
Trenton Public Library
**NEW YORK**
Brooklyn Public Library
Buffalo and Erie County Public Library
Rochester Public Library
New York Public Library
**OHIO**
Akron Public Library
Cincinnati and Hamilton County Public Library
Cleveland Public Library
Dayton Public Library
Toledo and Lucas County Public Library
**TEXAS**
Dallas Public Library
Fort Worth Public Library
**WASHINGTON**
Seattle Public Library
**WISCONSIN**
Milwaukee Public Library

An extensive collection of NASA and NASA-sponsored documents and aerospace publications available to the public for reference purposes is maintained by the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, New York 10019.

## EUROPEAN

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. By virtue of arrangements other than with NASA, the British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy of microfiche of NASA and NASA-sponsored documents, those identified by both the symbols '#' and '*', from: ESA - Information Retrieval Service, European Space Agency, 8-10 rue Mario-Nikis, 75738 Paris CEDEX 15, France.

| NASA SP-7011(237) | 277-303 | October 1982 | September 1982 |
| NASA SP-7011(238) | 305-363 | November 1982 | October 1982 |
| NASA SP-7011(239) | 365-402 | December 1982 | November 1982 |
| NASA SP-7011(240) | 403-444 | January 1983 | December 1982 |

This bibliography was prepared by the NASA Scientific and Technical Information Facility operated for the National Aeronautics and Space Administration by PRC Government Information Systems.

# SPECIAL NOTICE

The abstract sections of the monthly supplements of *Aerospace Medicine and Biology* can be bound separately. Individual abstracts can be located readily by means of the page numbers given at each entry, e.g., p 0403 A82-45179. To assist the user in binding Supplements SP-7011(229) through SP-7011(240), a title page is included in the back of this Cumulative Index.

NASA SP-7011(241)

# A CUMULATIVE INDEX
# TO
# A CONTINUING BIBLIOGRAPHY ON

# AEROSPACE MEDICINE AND BIOLOGY

This Cumulative Index supersedes the indexes contained in supplements [SP-7011(229) through SP-7011(240)] published by NASA during 1982.

Washington, DC

This index is available from the National Technical Information Service (NTIS), Springfield, Virginia 22161 at the price code of $12.00 domestic; $24.00 foreign.

# INTRODUCTION

## WHAT THIS CUMULATIVE INDEX IS

This publication is a cumulative index to the abstracts contained in NASA SP-7011(229) through NASA SP-7011(240) of *Aerospace Medicine and Biology: A Continuing Bibliography,* NASA SP-7011, and by means of supplements, serves as a current abstracting and announcement journal for references on bioscience and biotechnology. It has been compiled through the cooperative efforts of the American Institute of Aeronautics and Astronautics (AIAA), and the National Aeronautics and Space Administration (NASA). Entries prepared by the two contributing organizations are identified as follows:

1. NASA entries by their *STAR* accession numbers (N82-10000 series).
2. AIAA entries by their *IAA* accession numbers (A82-10000 series).

## HOW THIS CUMULATIVE INDEX IS ORGANIZED

This Cumulative Index includes a subject, personal author, and corporate source index.

## HOW TO USE THE SUBJECT INDEX

Two types of cross-references appear in the subject index:

1. Use (U) references indicate that the subject term is not "postable," i.e., not a valid term, and that the following term or terms are used instead. For example:

    DOSE
      U DOSAGE
    AIRLINERS
      U COMMERCIAL AIRCRAFT
      U PASSENGER AIRCRAFT

2. Narrower Term (NT) references refer the user to more specific headings in the same subject area, under which additional material on the subject may be found. For example:

    FATIGUE (BIOLOGY)
      NT AUDITORY FATIGUE
      NT FLIGHT FATIGUE
      NT MUSCULAR FATIGUE

In addition, a searcher may use the title or title and title extension in the index to narrow further his quest for particular items, this is because subject terms can readily include more than one class of document. For example:

BIOLOGICAL EFFECT
Vibratory force effect upon biological systems, particularly human organism.
Biological effect of cosmic and solar radiations on human body at high altitudes.

illustrates a case where two references on different topics are listed under the same subject term.

## HOW TO USE THE PERSONAL AUTHOR INDEX

All personal authors used in the abstract-section citations in the individual Supplements appear in the index. Differences in translation schemes may require multiple searching of the index for variants of an author's name. For example:

EMELIANOV, M. D.
and
YEMELYANOV, M. D.

## HOW TO USE THE CORPORATE SOURCE INDEX

The corporate source index entries are abridged versions of the corporate sources used in the abstract-section citations in the individual Supplements. The corporate source supplementary (organizational component) does not appear in the index. For example:

| | |
|---|---|
| NEW MEXICO STATE UNIV., LAS CRUCES. DEPT. OF BIOLOGY. | (Source citation entry) |
| NEW MEXICO STATE UNIV., LAS CRUCES. | (Source index entry) |

## IDENTIFICATION OF DESIRED SUPPLEMENT

The abstract and descriptive cataloging for any accession number selected from the indexes may be found in the appropriate Supplement. The page-number range of each Supplement appears on the inside front cover of this index. Once the range of page numbers containing the selected accession number is located in the second column, the desired Supplement number will be found in the first column. For example:

Page 403 will be found in Supplement 240.

## AVAILABILITY OF DOCUMENTS

Information concerning the availability of documents announced in *Aerospace Medicine and Biology* supplements is found in the introduction to the most currently issued supplement.

# TABLE OF CONTENTS

*Page*

Personal Author Index ........................................................ B-1
Corporate Source Index ...................................................... C-1

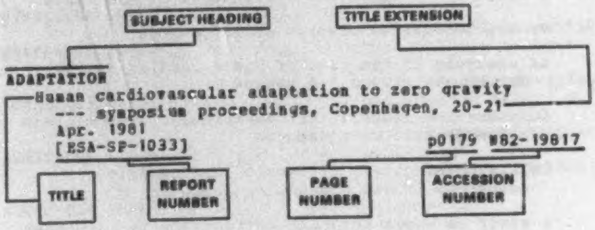
# SUBJECT INDEX

JANUARY 1983

## AEROSPACE MEDICINE AND BIOLOGY / *a continuing bibliography*

### 1982 Cumulative Index

### Typical Subject Index Listing



The title is used to provide a description of the subject matter. When the title is insufficiently descriptive of the document content, a title extension is added, separated from the title by three hyphens. The NASA or AIAA accession number is included in each entry to assist the user in locating the abstract in the abstract section of this supplement. If applicable, a report number is also included as an aid in identifying the document.

## A

**A-10 AIRCRAFT**
G stress on A-10 pilots during JAWS II exercises p0210 A82-28479

**ABDOMEN**
Oxygen tension in albino rat abdominal cavity organs in normo- and hyperoxybaria p0060 A82-16969
Delayed radiation pathology after irradiation of the rat abdomen p0411 A82-46860

**ABILITIES**
Ability differences and cognitive mapping skill [AD-A106389] p0128 N82-16741
A rationale for the development of cut-off scores --- task mastering [IZF-1981-3] p0267 N82-24828
On models and methods for performance measurement [AD-A113578] p0354 N82-28998
On the modelling of creative behavior [AD-A116896] p0435 N82-34027
Assessment and development of oculomotor flying skills by the application of the channel theory of vision [AD-A115325] p0436 N82-34035
Levels of steering control: Reproduction of steering-wheel movements p0441 N82-34071

**ABIOGENESIS**
Molecular complexes of amino acids with porphyrins as possible precursors of pigment-protein systems p0020 A82-13841
Hydrazines and carbohydrazides produced from oxidized carbon in earth's primitive environment p0021 A82-14197
From inanimate matter to living systems p0026 A82-15700
'Hot spots' in the problem of the origin of life p0062 A82-17360
Organic compounds in space and the problem of the origin of life p0062 A82-17362
New data on abiogenic synthesis of prebiological compounds in volcanic processes p0090 A82-20017
A theory of the origin of life p0091 A82-20023
A neutral theory of biogenesis p0091 A82-20024
Comets and the origin of life - Bibliography p0097 A82-20871
Origin of life; Proceedings of the Third ISSOL Meeting and Sixth ICOL Meeting, Jerusalem, Israel, June 22-27, 1980 p0097 A82-20901
Abiotic organic synthesis in space p0098 A82-20910
Far UV photolysis of methane-water gaseous mixtures and the prebiotic synthesis of aldehydes p0099 A82-20913
Chemical evolution and plate tectonics p0099 A82-20918
Photoassisted carbon dioxide reduction and formation of twoand three-carbon compounds --- prebiological photosynthesis p0100 A82-20920
Abiotic synthesis of phosphoric esters of monosaccharides according to the 'cold model' p0100 A82-20923
Synthesis and degradation of amino acids by contact glow discharge electrolysis, a possible route for prebiotic formation of bio-organic compounds p0100 A82-20924
Genesis of amino acids in the primeval sea - Formation of amino acids from sugars and ammonia in a modified sea medium p0100 A82-20925
Porphyrin-like compounds genesis under simulated abiotic conditions p0100 A82-20926
Potentiometric titration behavior of polyamino acids prepared by thermal polycondensation p0102 A82-20938
Primitive transfer RNA and origin of Darwinian system p0104 A82-20959
Possible impact of cosmochemistry on terrestrial biology - Historical introduction p0120 A82-21987
Organic matter in meteorites and Precambrian rocks - Clues about the origin and development of living systems p0121 A82-21988
Problems in the rate of evolution in biological systems p0121 A82-21989
Modeling of the synthesis of peptide-like compounds in the primeval lithosphere of the earth p0149 A82-23136
The appearance of life in the universe p0157 A82-23981
Models for protocellular photophosphorylation p0195 A82-26596
How life began --- international symposium p0207 A82-28094
Formation of pyrophosphate, tripolyphosphate, and phosphorylimidazole with the thioester, N, S-diacetylcysteamine, as the condensing agent --- molecular evolution p0208 A82-28229
Abiogenic synthesis of the peptide bond. II p0317 A82-39426
Abiogenic synthesis of the peptide bond. I p0318 A82-39448
The radiolysis of aqueous propionitrile - Compounds of interest to chemical evolution studies p0339 A82-41197
Formation of the thioester, N-acetyl, S-lactoylcysteine, by reaction of N-acetylcysteine with pyruvaldehyde in aqueous solution --- in prebiotic evolution p0339 A82-41200
Protein folding, protein structure and the origin of life: Theoretical methods and solutions of

dynamical problems
[NASA-CR-166310] p0245 N82-22867

ABNORMALITIES
The effect of abnormal cell proportion on specimen classifier performance p0234 A82-30296

ABSORBENTS
Absorbent product and articles made therefrom [NASA-CASE-MSC-18223-2] p0294 N82-26960

ABSORBERS (MATERIALS)
Carbon dioxide absorption characteristics of high performance Sodasorb at 1 atmosphere [AD-A107488] p0298 N82-26989

ABSORPTION BANDS
U ABSORPTION SPECTRA

ABSORPTION COEFFICIENT
U ABSORPTIVITY

ABSORPTION SPECTRA
Disclosure of the complex structure of the absorption spectrum of bacteriorhodopsin p0231 A82-29806

Structural changes in plasma membrane under influence of ionizing radiation p0430 N82-33993

ABSORPTIVE INDEX

Electron-histochemical and functional evaluation
of the effects of aspirin on the thrombocytes of
healthy people and patients with ischemic heart
disease
p0204 A82-27784

ACID BASE EQUILIBRIUM
The importance of carboanhydrase in regulating the
acid-base equilibrium during muscular activity
p0158 A82-24405

Ventilation and acid-base equilibrium for upper
body and lower body exercise
p0210 A82-28482

Comparative physiological responses to exercise
stress
p0231 A82-29571

Effect of pH on sensation and vastus lateralis
electromyogram during cycling exercise
p0256 A82-32835

Acid-base, metabolic, and ventilatory responses to
repeated bouts of exercise
p0341 A82-41219

Effects of various countermeasures against the
adverse effects of weightlessness on central
circulation in the healthy man
p0416 A82-47331

Domestic swine in physiological research. 3:
Blood gas and acid-base values of arterial and
venous blood from young anesthetized pigs
maintained under steady-state ventilatory
conditions
[AD-A111834]
p0347 N82-28945

ACIDITY
Brain extracellular fluid pH and blood flow during
isocapnic and hypocapnic hypoxia
p0290 A82-37930

ACIDOSIS
Regulation of Pa/CO2/ and ventilation in humans
inspiring low levels of CO2
p0168 A82-24912

Effect of acid-base status on the kinetics of the
ventilatory response to moderate exercise
p0230 A82-29564

Effects of glycogen depletion and pedaling speed
on 'anaerobic threshold'
p0286 A82-36038

Respiratory adaptation to acute metabolic acidosis
in goats with ablated carotid bodies
[AD-A116657]
p0420 N82-33984

ACTIVATED CARBON
The utilization of macromolecules in blood
purification systems
[NRC/CNR-TT-2021]
p0358 N82-29864

ACTIVATION (BIOLOGY)
  Effects of microwaves on acupuncture points under conditions of acute emotional stress in rabbits
    p0202 A82-27763
  The effect of hyperactivation of the anterior amygdaloid nucleus on heart activity during states of altered reactivity
    p0322 A82-40454
  Human lymphocyte activation is depressed at low-g and enhanced at high-g
    p0327 A82-40658
  Effect of spaceflight on lymphocyte stimulation
    p0331 A82-40700
  Benefits of detailed models of muscle activation and mechanics
    p0046 N82-13713
ACTIVATION ANALYSIS
 NT NEUTRON ACTIVATION ANALYSIS
ACTIVATION ENERGY
  The temperature dependence of the kinetics of isometric myocardium relaxation
    p0090 A82-19748
  The energy supply of serotonin inactivation processes in the lungs
    p0186 A82-25680
  The interrelationship between the pressor response and energy metabolism during isometric muscle contractions
    p0373 A82-43636
ACTIVE GLACIERS
 U GLACIERS
ACTIVE VOLCANOES
 U VOLCANOES
ACTIVITY (BIOLOGY)
  Artificial hypobiosis as a stable functional state of reduced vital activity
    p0020 A82-13699
  Concerning a model of human activity
    p0050 A82-16704
  The effect of motor activity on the development of cardiac arrhythmias in experimental emotional stress
    p0110 A82-21713
  Activation of succinate dehydrogenation in rat liver by noradrenalin, cAMP and acute cooling
    p0112 A82-21734
  An investigation of the biological activity of chalones separated from normal livers and from livers that are being regenerated
    p0112 A82-21742
  Changes with age in the cholin- and adrenergic innervation of the human heart
    p0152 A82-23268
  Theoretical and experimental analysis of material turnover in a closed microecosystem. I - Construction of a mathematical model
    p0191 A82-25821
  Systemic brain activity /Experimental investigation/ --- Russian book
    p0194 A82-26547
  Effects of reduced motor activity and water regimen on the growth of animals and their skeletal musculature
    p0228 A82-29440
  Functional properties of T-lymphocytes in patients with acute myocardial infarction
    p0341 A82-41459
  Myosatellocytes and cambial properties of skeletal and muscular tissue
    p0342 A82-41469
  Current problems in hypobiosis
    p0366 A82-42171
  Individual features in the organization of the human endocrinal system
    p0369 A82-42631
  The effect of body position and the administration of a diuretic on the water-salt status and the activity of the kidneys
    p0372 A82-43238
  Thermogenesis and muscle activity during the adaptation to cold --- Russian book
    p0372 A82-43610
  Changes of the functional condition of the neocortex during direct application of optical radiation
    p0374 A82-43655
  The mechanism of the activating effect of anti-cardiac antibodies on the electrical and contractile activity of myocardial cells
    p0374 A82-43665
  Aortic body chemoreceptor responses to dopamine, haloperidol, and pargyline
    p0375 A82-44136
  Regulation of glycogenolysis in human muscle at rest and during exercise
    p0376 A82-44144
  Protein kinase activity in liver of heat-acclimated hamsters
    p0376 A82-44145
  An investigation of the postirradiation dynamics of lymphopoiesis using a mathematical model
    p0404 A82-45776
  The metabolism of hydrocortisone in isolated livers of irradiated rats
    p0404 A82-45782
ACTIVITY CYCLES (BIOLOGY)
  Diurnal rhythm of sleep and wakefulness in arctic suslik /Citellus parryi/ during summer season
    p0192 A82-25823
  Daily rhythms of physiological functions during shift work
    p0203 A82-27771
  Biorhythms of rats during and after space flight
    p0330 A82-40692
  Regulation of circadian rhythmicity
    p0372 A82-43383
  Sleep and motor activity: Stages of the ontogenic evolution of the supraspinal motor control in the human sleep cycle --- Russian book
    p0372 A82-43607
  Sleep schedules and peak times of oral temperature and alertness in morning and evening 'types'
    p0403 A82-45575
  Cerebral hemispheric activity and autonomic nervous function
    p0137 N82-17068
  Physical testing of polymers for use in circulatory assist devices
    [PB82-127069]    p0223 N82-21888
  Behavioral study of ultradian activity periods of mice enclosed in experimental cages of different dimensions
    [NASA-TM-76848]    p0245 N82-22870
ACTUATORS
  An overview of artificial intelligence and robotics. Volume 2: Robotics
    [NASA-CR-168727]    p0224 N82-21896
  Fracture and viscoelastic characteristics of the human cervical spine kinematics of the 3 actuator system
    [AD-A110980]    p0299 N82-27965
ACUITY
 NT HYPEROPIA
 NT VISUAL ACUITY
ACYLATION
  Quantum mechanical conformational analysis of aminoacyladenylates - Implication in the origin of life
    p0102 A82-20941
  Selective acylability of amino acids by non-enzymic model reactions of biochemical transacylations

 NT ALTITUDE ACCLIMATIZATION
 NT COLD ACCLIMATIZATION
 NT DARK ADAPTATION
 NT DESERT ADAPTATION
 NT HEAT ACCLIMATIZATION
 NT LIGHT ADAPTATION
 NT RETINAL ADAPTATION
  Changes in Hageman factor system indicators during human adaptation to intense physical loading
    p0054 A82-16816
  Visually induced self-motion sensation adapts rapidly to left-right reversal of vision
    p0067 A82-17455
  Psychological problems in the mutual adaptation of man and machine in control systems --- Russian book
    p0087 A82-19000
  Contractile dysfunction of vascular wall smooth muscle under emotional nociceptive stress
    p0094 A82-20322
  Changes in the structure and cellular composition of the inguinal lymph nodes of white rats subjected to static and dynamic stresses

p0114 A82-21761

Poststimulatory auditory adaptation in humans according to computer audiometry
p0116 A82-21791

Biological rhythm aspects of adaptation mechanisms
p0153 A82-23277

Features of biorhythms for patients with chronic nonspecific pulmonary diseases during adaptation to the climato-geographic conditions of the Crimea
p0162 A82-24535

Individual variability in reaction norms and population adaptation --- tadpole growth in various environments
p0162 A82-24537

The typological systematization of adaptive responses - Example of the antiorthostatic effect
p0165 A82-24835

Population mechanisms of adapting to extreme environmental conditions /with Clethrionomys glareolus Schreb considered as an example/
p0187 A82-25692

A psychophysiological analysis of the memory changes undergone by humans in adapting to new climatic and geographic conditions
p0187 A82-25694

Effects of high ambient temperature on athlete adaptation to muscular activity
p0188 A82-25706

Investigation of the mechanism of auditory adaptation by the simultaneous recording of auditory evoked potentials of the brain and neurotropic potentials of the cochlea
p0189 A82-25714

Effects of exercise adaptation on the age variation of human cardiac contractile function and left ventricular mass
p0204 A82-27785

Mechanisms for the adaptive and trophic effects of the sympathetic nervous system on cerebral vessels and tissue
p0210 A82-28458

Adaptation in motion perception - Alteration of motion evoked by ocular pursuit
p0237 A82-31412

Adaptation of skeletal and cardiac muscle to elevated motor activity in hypo- and athyreotic rats
p0241 A82-31527

The prevention of dysadaptive changes in sailors at sea
p0259 A82-33728

Physiological adaptations and maintenance of vegetative homeostasis
p0281 A82-35826

A classification of behavioral adaptation
p0281 A82-35827

Omega potential: Quantitative index of states of brain and organism structures. I - The physiological significance of the omega potential when it is recorded from deep structures and from the scalp
p0282 A82-35834

Fatigue and the adaptive possibilities of the organism during work
p0282 A82-35835

Dependence of reactions of the organism to extremal factors on initial state
p0282 A82-35839

Hormonal mechanisms of adaptation and training --- Russian book
p0289 A82-36976

Changes in man's constant electric field in the course of adaptation to hypokinesia
p0312 A82-38595

Rapid perceptual adaptation to high gravitoinertial force levels Evidence for context-specific adaptation
p0320 A82-40436

State of adaptation in patients with hypertension
p0324 A82-40476

Aspects of cardiovascular adaptation to gravitational stresses
p0329 A82-40687

Adaptation to weightlessness and its physiological mechanisms - Results of animal experiments aboard biosatellites
p0329 A82-40688

Physiological mechanisms of adaptation of rat skeletal muscles to weightlessness and similar functional requirements
p0330 A82-40689

Weightlessness effects on resistance and reactivity of animals
p0330 A82-40690

Gravitational adaptation of animals
p0333 A82-40716

Metabolic and cardiovascular adaptations in trained hypophysectomized rats
p0340 A82-41215

Higher plant acclimation to solar ultraviolet-B radiation
p0031 N82-12737

Human cardiovascular adaptation to zero gravity --- symposium proceedings, Copenhagen, 20-21 Apr. 1981
[ESA-SP-1033] p0179 N82-19817

Cardiovascular reflexes during upright position
p0179 N82-19821

Volume regulating hormones and their role in the cardiovascular adaptation to zero gravity
p0179 N82-19822

Protective mechanisms and acclimation to solar ultraviolet-B radiation in Oenothera stricta
p0213 N82-20830

Comparative evaluation of pressure chamber conditioning and man's adaptation to hypoxia at high altitude
p0216 N82-20853

Development and persistence of adaptation to ozone exposure in ozone-sensitive Southern California residents
[PB82-125899] p0223 N82-21809

Sleep, circadian cycles of physiological functions and parameters of human work capacity on first day after changing from altered to usual sleep-waking cycle
p0348 N82-28951

Human external respiration and gas exchange in acute period of adaptation to immersion in water
p0349 N82-28959

Adapative motivation theory
[AD-A111195] p0354 N82-28997

Attenuation of radioprotective effects of acute hypoxia on animals adapted to high altitudes
p0357 N82-29855

A comprehensive system model for motion/space sickness: Preliminary results
p0381 N82-30855

Formation of systemic adaptation reactions in static magnetic fields
p0387 N82-30904

Preflight examination results used to forecast cosmonaut endurance of orthostatic tests after spaceflight
p0396 N82-31917

Respiratory adaptation to acute metabolic acidosis in goats with ablated carotid bodies
[AD-A116657] p0428 N82-33984

ADAPTIVE CONTROL
NT LEARNING MACHINES
The 'Error' signals subserving adaptive gain control in the primate vestibulo-ocular reflex
p0068 A82-17468

Psychological problems in the mutual adaptation of man and machine in control systems --- Russian book
p0087 A82-19000

Physiological monitoring and the concept of adaptive systems
p0288 A82-36963

The adaptive control of vegetative processes --- biofeedback control of cardiovascular system
p0374 A82-43652

Methods for linking item parameters
[AD-A105509] p0084 N82-15779

Identification of the adaptive feedback of the human motor system using the Response Difference Method (RDM)
[WTHD-134] p0176 N82-18869

Application of optimal control principles to describe the supervisory control behavior of AAA crew members
p0441 N82-34067

ADAPTIVE CONTROL SYSTEMS
U ADAPTIVE CONTROL
ADAPTIVE FILTERS
Superconducting magnetometry for cardiovascular studies and an application of adaptive filtering

ADRENAL GLAND
Functional condition of the rat sympato-adrenal system during emotional and nociceptive stress
p0095 A82-20335
Phase characteristics of the response of the hypophysal-adrenal system under high-altitude conditions
p0150 A82-23166
Diurnal and seasonal rhythms in adrenal cortex activity in albino rats undergoing physical training
p0155 A82-23295
Effect of regulated muscular load on the morphological and functional characteristics of adrenal glands in dogs with experimental hypocorticalism
p0161 A82-24524
Dynamics of aerobic work capacity and changes in the functional stability of the oxygen-supply mechanism and hypophysical adrenocortical system in skiers
p0187 A82-25696
Adaptive changes in the rat hypophysical-adrenal system upon altitude hypoxia
p0203 A82-27772
Preventing disturbances to the structure of DNA in the cardiac muscle from emotional-nociceptive stress by blocking beta-adrenoreceptors and the peroxidation of lipids
p0241 A82-31528
The effect of positive and negative ions of air on the content of catecholamines in the brain and adrenal glands
p0287 A82-36690
The gradualness of the reaction of the pituitary-adrenocortical system to activating and inhibiting signals
p0320 A82-40315
State of the endocrine glands in hypodynamia (A review of the literature)
[NASA-TM-76906] p0390 N82-30926
Activity of rat adrenal medula after flight aboard Cosmos-1129 biosatellite
p0395 N82-31905
Rat blood plasma corticosterone after flight aboard Cosmos-1129 biosatellite
p0397 N82-31920
ADRENAL METABOLISM
Functional characteristics of the pilot hypothalamus-hypophysis-adrenal cortex system
p0049 A82-16275
Phase characteristics of the response of the hypophysal-adrenal system under high-altitude conditions
p0150 A82-23166
Effect of regulated muscular load on the morphological and functional characteristics of adrenal glands in dogs with experimental hypocorticalism
p0161 A82-24524
Application of electrogustometry for the evaluation of adrenal functional conditions
p0163 A82-24548
The rate at which exogeneous hydrocortisone is eliminated from peripheral blood flow in patients suffering from an acute myocardial infarction
p0344 A82-41498
The influence of prostaglandins and polyunsaturated fatty acids on the corticosteroid metabolism of normal and spontaneously hypertensive rats
p0366 A82-42174
The metabolism of hydrocortisone in isolated livers of irradiated rats
p0404 A82-45782
The sympathico-adrenal and the hypophysial-adrenal systems in the pathogenesis of the post-ischemic syndrome
p0410 A82-46717
Participation of the hypophyseal-adrenal cortex system in thrombin clearance during immobilization stress
[NASA-TM-76729] p0012 N82-11760
Stationary magnetic fields and reticular influences on adrenergic and cholinergic systems
p0126 N82-16725
Human adrenosympathetic system during immersion in water
p0130 N82-17819
Metabolic changes in experimental animals as indicators of biological effects of 50 Hz electromagnetic fields

p0266 N82-24821
Biogenic monoamine content of the ganglia in the autonomic nervous system of rabbits during acute experimental emotional stress
[NASA-TM-76900] p0383 N82-30875
Influence of stress on the blood system reaction in adrenalectomized mice
[NASA-TM-76902] p0383 N82-30877
Role of the thyroid gland during adaptation of skeletal muscles to increased motor activity
[NASA-TM-76871] p0384 N82-30884
Rat blood plasma corticosterone after flight aboard Cosmos-1129 biosatellite
p0397 N82-31920

AEROSPACE MEDICINE

Hazards of chemicals used in agricultural aviation - A review
p0005 A82-11026

Retro-hyperflexion luxation - Mechanism of cervical spinal cord contusion injury during ejection sequence
p0005 A82-11032

Sarcoidosis and aeronautical risk
p0007 A82-12310

Presbyopia in flight personnel - Its repercussions and correction
p0007 A82-12312

A follow-up on blood pressure in two groups of air traffic controllers
p0008 A82-12314

Peripheral chorioretinal lesions and aeronautical flight personnel Consequences for fitness
p0008 A82-12315

Aphakia in the flier - Its consequences and correction
p0008 A82-12316

The application of a combined passive orthostatic test in the flight medical examination
p0020 A82-13550

Gamma facilities for radiobiological investigations /Design and experimental results/ --- Russian book
p0022 A82-14674

Cardiovascular responses to mixed static and dynamic exercise
p0022 A82-14803

A study of performance effects under G stress
p0023 A82-14805

Comparison of impedance ventricular function indices with systolic time intervals
p0023 A82-14806

A single-channel model does not predict visibility of asynchronous gratings
p0024 A82-15358

Influence of 15-day alimentary starvation on human tolerance to the breathing of pure nitrogen
p0027 A82-15710

Concerning the rationalization of the work and rest schedule of cosmonauts
p0052 A82-16724

Basic environmental problems of man in space; Proceedings of the Sixth International Symposium, Bonn, West Germany, November 3-6, 1980
p0056 A82-16926

Summary of medical investigations in the U.S.S.R. manned space missions
p0056 A82-16928

Current views and future programs in cardiovascular physiology in space
p0056 A82-16931

Ion regulatory function of the human kidney in prolonged space flights
p0057 A82-16936

Informational need of emotional stress --- effect on operator performance of visual tasks
p0058 A82-16943

The effects of hypokinesia in primates and bone strength
p0059 A82-16946

Bone effects of space flight - Analysis by quantum concept of bone remodelling
p0059 A82-16947

Anesthesia, surgical aid and resuscitation in manned space missions
p0059 A82-16950

Characteristics of loading hypoxia
p0060 A82-16968

Oxygen tension in albino rat abdominal cavity organs in normo- and hyperoxybaria
p0060 A82-16969

Some characteristics of thermal adaptation in small laboratory animals
p0060 A82-16971

Experimental biology and medicine in space
p0060 A82-17123

Active head rotations and eye-head coordination
p0068 A82-17469

Different effects involved in the interaction of saccades and the vestibulo-ocular reflex
p0070 A82-17480

Study of the discrimination capacity of the auditory analyzer in flight personnel
p0071 A82-18523

Hepato-splenic injury in aircraft accidents
p0072 A82-18735

Forensic dentistry --- in aircraft accident fatalities identification
p0073 A82-18737

Surgical treatment of recurrent frontal sinus barotrauma - A case report
p0073 A82-18743

Investigation of the otolithic membrane of the utricle of the guinea pig
p0091 A82-20301

Special and clinical physiology of hypoxic states
p0093 A82-20317

The prevalence of visual deficiencies among 1979 general aviation accident airmen
p0109 A82-21688

Nonesterified fatty acid metabolism during exercise in humans
p0117 A82-21809

An investigation of the visual observations made by cosmonauts under experimental and actual conditions
p0155 A82-23305

Twenty years of aviation medicine serving civil aviation of the GDR
p0156 A82-23469

Combined rehabilitative and therapeutic measures in space medicine
p0163 A82-24547

Man in weightlessness - Physiological problems, clinical aspects, prevention and protection
p0167 A82-24846

Current questions in the problem of flight crew fatigue
p0170 A82-25188

Coronary risk in flight personnel: Epidemiologic approach - Incidence upon screening and prevention
p0171 A82-25496

Mechanisms of motion sickness
p0171 A82-25497

Elevation of hypoxia tolerance under the influence of prolonged fasting
p0186 A82-25679

Tennis elbow in aviators
p0194 A82-26243

Principal results of medical studies carried out during long-term manned flights in the Salyut 6-Soyuz-Progress orbital complex
p0198 A82-27512

New trends in the development of aerospace medical technology
p0198 A82-27515

Changes in contractile protein composition and properties following space flight
p0199 A82-27728

Seventy-five days in space --- technical and medico-biological experiments
p0203 A82-27773

The extraction and identification of drugs in aviation toxicology
p0210 A82-28478

Airline pilot disability - Economic impact of an airline preventive medicine program
p0211 A82-28489

Beta adrenergic blocking agents to control hypertension in aviation personnel
p0211 A82-28490

The medical and public health challenge of space
p0228 A82-29266

Effects of ascorbic acid on the elevation of human cold tolerance
p0233 A82-30027
Use of an active orthostatic test in aeromedical examinations
p0233 A82-30028
A contribution to the history of Russian and Soviet aviation psychology: Documents and materials --- Russian book
p0235 A82-30875
Effects of starvation on human tolerance to acute hypoxia
p0236 A82-31159
The state of hearing in pilots in civil aviation

Phasic energy analysis of rheoencephalograms in the detection of the decompensation of cerebral hemodynamics p0113 A82-21754
The effect of physical training on the lipid and lipoprotein metabolism in people of various ages p0114 A82-21757
Age morphofunctional characteristics of chromaffin tissue in the celiac nodes, both in the norm and with hypokinesia p0114 A82-21766
LDH isoenzyme spectrum in intact and denervated skeletal muscles of rats of various age during cold adaptation p0117 A82-21798
The effects of age and anotropia on the dark focus of visual accommodation p0142 A82-22929
Changes with age in the cholin- and adrenergic innervation of the human heart p0152 A82-23268
Natural immunity in athletes of different age groups p0159 A82-24489
Age norms of cardiac chamber volumetric parameters p0163 A82-24541
The isoenzyme spectrum of serum lactate dehydrogenase as a function of age in healthy individuals p0164 A82-24554
Age-related features of blood-coagulation changes in the treatment of cerebral ischemias with indirect-action anticoagulants p0201 A82-27754
Effects of exercise adaptation on the age variation of human cardiac contractile function and left ventricular mass p0204 A82-27785
Age characteristics of fatigue during local muscular work in humans p0238 A82-31487
The carbohydrase system of the small intestine of rats of various ages following heat and cold exposures p0257 A82-33135
State of the hearing function in diesel locomotive crewmen p0280 A82-35688
On the mathematical modelling of microbial age dynamic and some control aspects of microbial growth processes p0314 A82-38823
Age changes in the cerebral cortex of humans and cats /A comparative electron-microscopical investigation/ p0325 A82-40496
The age-related changes of biochemical and biomechanical parameters of human sclera in normal and myopic individuals p0410 A82-46713
The content of the luteinizing hormone in the hypothalamus depending on the physiological condition of rats p0412 A82-46877
The activity of the microsomal hydroxylases according to age in healthy individuals p0413 A82-46878
The age-related features of the incidence of sickness for female workers in the main branches

of the clothing industry p0414 A82-46894
Maximal cardiac function in sedentary normal men and women - Comparison of age-related changes p0417 A82-47376
Age related distinctions of cosmonauts regional hemodynamics p0132 N82-17029
Age-related distinctions of echocardiographic parameters of healthy man p0272 N82-25774
Endurance of +Gz G forces by middle-aged people before and after 7-day immersion p0349 N82-28950
Airline pilot age, health, and performance: Scientific and medical considerations [PB82-161506] p0361 N82-29895
Effects of superhigh frequency electromagnetic fields on animals of different ages p0389 N82-30916
**AGING (BIOLOGY)**
Aging and visual function of military pilots - A review p0320 A82-40435
Simulated gravitational field influences on the aging process p0329 A82-40685
Blood circulation and aging p0367 A82-42609
The superoxide radical and superoxide dismutase in the free radical theory of ageing /Review/ p0412 A82-46876
The problem of aging and death in modern biology p0414 A82-46895
Airline pilot age, health, and performance: Scientific and medical considerations [PB82-161506] p0361 N82-29895
**AGRICULTURAL AIRCRAFT**
Hazards of chemicals used in agricultural aviation - A review p0005 A82-11026
**AGRICULTURE**
The influence of the seasonal factor and the intensity of work on the basic physiological functions of agricultural workers p0186 A82-25685
Conference on plant virology p0082 N82-15767
Variation in plant response to ozone: A conceptual model of physiological events [DE81-029692] p0123 N82-16701
USSR Report: Life sciences. Biomedical and behavioral sciences [JPRS-81775] p0429 N82-33908
**AIDS**
Linguistic and human performance considerations in the design of an anticipatory communication aid p0039 N82-13657
**AIR**
NT ALVEOLAR AIR
NT EXPIRED AIR
Thresholds of hearing by air conduction and by bone conduction under different masking conditions [NPL-AC-100] p0034 N82-12768
**AIR CARGO**
Aircraft and crew scheduling during airlift operations [AD-A114114] p0355 N82-29011
**AIR CONDITIONING**
A review of aircraft cabin conditioning for operations in Australia [AD-A109044] p0219 N82-20680
**AIR COOLING**
Auxiliary cooling - Comparison of air-cooled vs. water-cooled vests in hot-dry and hot-wet environments p0321 A82-40440
Effects of whole and partial body exposure to dry heat on certain performance measures [AD-A100305] p0246 N82-22880
Auxiliary cooling: Comparison of air-cooled versus water cooled vests in hot-dry and hot-wet environments [AD-A110554] p0275 N82-25797

Evaluating operator performance on automated tactical systems p0140 A82-22908
Decision aids for airborne intercept operations in advanced aircrafts p0042 N82-13683
Human supervision and microprocessor control of an optical tracking system p0046 N82-13715
**AIR FILTERS**
Evaluation of air cleaning and monitoring equipment used in recirculation systems [PB81-242695] p0085 N82-15788
**AIR FLOW**
A computational model for expiratory flow p0119 A82-21929
Effect of breathing patterns on the perceived magnitude of added loads to breathing p0197 A82-26813
A caloric vestibular test using air p0262 A82-34474
**AIR FREIGHT**
U AIR CARGO
**AIR LAND INTERACTIONS**
Mass mortality and its environmental and evolutionary consequences --- at end of Cretaceous period p0227 A82-28596
**AIR LAW**
Standards of physical condition for private pilots of aircraft and gliders p0315 A82-38847
**AIR NAVIGATION**
NT NAP-OF-THE-EARTH NAVIGATION
**AIR POLLUTION**
NT GLOBAL AIR POLLUTION
Biologically damaging radiation amplified by ozone depletions p0029 A82-15788
Variation in plant response to ozone: A conceptual model of physiological events [DE81-029692] p0123 N82-16701
Health effects of carbon monoxide and ozone [PB82-114265] p0137 N82-17866
Determination of the effects of material from alternate energy sources on the upper respiratory tract clearance mechanism. Part 1: In vitro exposure to particulate pollutants. Part 2: In vivo exposure to ozone [PB82-117037] p0178 N82-19811
Effects of short-term intermittent air pollutants on incidence and severity of acute respiratory disease: Data collection and quality assurance [PB82-129479] p0223 N82-21887
Air pollutant production by algal cell cultures [NASA-CR-166384] p0442 N82-34076
**AIR PURIFICATION**
Development of an advanced Sabatier CO2 reduction subsystem [ASME PAPER 81-ENAS-11] p0002 A82-10899
The elimination of metabolic products in expired air in relation to the carbon dioxide content in a sealed chamber p0155 A82-23294
Subjective response to negative air ion exposure p0321 A82-40446
Modification of method for assaying ozone by the diacetyl dihydrolutidine reaction p0351 N82-28973
**AIR QUALITY**
Health effects of carbon monoxide and ozone [PB82-114265] p0137 N82-17866
Modification of method for assaying ozone by the diacetyl dihydrolutidine reaction p0351 N82-28973
Preprototype independent air revitalization subsystem [NASA-CR-167703] p0362 N82-29898
**AIR SICKNESS**
U MOTION SICKNESS
**AIR TO SURFACE MISSILES**
Is image quality important --- predicting air-to-ground target acquisition performance with electro-optical system p0145 A82-22954
**AIR TRAFFIC**
In-trail following during profile descents with a cockpit display of traffic information p0405 A82-46260
Landing airplanes, detecting traffic, and the dark focus --- experiments on pilot visual misperception in darkness accommodation

p0406 A82-46265

Pilot scanning patterns while viewing cockpit displays of traffic information
p0046 N82-13710

Evaluation of the visual acquisition range of enroute air traffic from cockpit observations --- collision avoidance
[ESA-TT-691] p0175 N82-18861

Separation monitoring with four types of predictors on a cockpit display of traffic information
p0440 N82-34063

AIR TRAFFIC CONTROL

A comparison between over-the-shoulder and computer-derived measurement procedures in assessing student performance in radar air traffic control
p0005 A82-11027

Aircraft noise and speech communication interference in JASDF air traffic control room
p0025 A82-15510

Computer simulation as a visual aid in a video course --- for ATC system performance
p0088 A82-19248

A systems engineering evaluation method for piloted aircraft and other man-operated vehicles and machines. Appendix D: A unifying set of hypotheses for dynamic system test and evaluation; the rating and measurement of system performance, system load, and system work and their interrelationships
[AD-A115601] p0427 N82-32991

Evaluation of four-color plan view display console
[AD-A117897] p0444 N82-34085

AIR TRAFFIC CONTROLLERS (PERSONNEL)

A follow-up on blood pressure in two groups of air traffic controllers
p0008 A82-12314

The dynamics of cardiac rhythm parameters during work under various loads --- by air traffic controllers
p0062 A82-17146

Conductors of the airways --- air traffic controllers
p0207 A82-27812

The condition of the cardiovascular system in air traffic controllers according to data acquired at the workplace
p0368 A82-42614

AIR TRANSPORTATION

Some characteristics of the aerial evacuation of the sick and otorhinolaryngologically injured
p0028 A82-15711

Physical and physiological features of long-range flight and its impact on patients
p0087 A82-19012

AIRBORNE EQUIPMENT

NT AIRBORNE/SPACEBORNE COMPUTERS

AIRBORNE/SPACEBORNE COMPUTERS

A methodology for decision augmentation system design --- airborne computer as aircrew performance aid
[AIAA 81-2201] p0001 A82-10139

Automated item recognition as a secondary task for objective assessment of aircrew workload in flight simulators
p0023 A82-14837

Design and evaluation of an onboard computer-based information system for aircraft
p0376 A82-44512

The intelligent use of intelligent systems: Problems in engineering man/machine symbiosis
p0037 N82-13058

AIRCRAFT ACCIDENT INVESTIGATION

Methodological principles of the investigation of pilot error
p0050 A82-16709

The prevalence of visual deficiencies among 1979 general aviation accident airmen
p0169 A82-21688

Sarcoidosis in aircrew
p0194 A82-26240

Mechanism of vertebral fracture in the F/FB-111 ejection experience
p0252 A82-32004

AIRCRAFT ACCIDENTS

Liver pathology in aircrew
p0072 A82-18734

Hepato-splenic injury in aircraft accidents
p0072 A82-18735

Check your oxygen --- oxygen supply equipment and aircraft safety
p0073 A82-18736

Forensic dentistry --- in aircraft accident fatalities identification
p0073 A82-18737

Pilot judgment - Training and evaluation
p0196 A82-26777

Human factor and flight safety
p0339 A82-40885

General aviation cockpit design features related to inadvertent landing gear retraction accidents
p0405 A82-46259

An investigation into pilot and system response to critical in-flight events. Volume 1: Executive summary
[NASA-CR-164993] p0036 N82-12782

An investigation into pilot and system response to critical in-flight events. Volume 2: Appendix
[NASA-CR-164994] p0036 N82-12783

Harmfulness of violent impact and airflow shocks
p0079 N82-15742

Theories of the pathogenesis of fractures of the spine
p0359 N82-29874

Aetiology and pathogenesis --- traumatic lesions of the spine
p0359 N82-29875

Helicopter accidents
p0359 N82-29876

Fractures of the spine in flight
p0360 N82-29880

Radiology of spinal trauma in aviation medicine
p0363 N82-29883

Analytical study of traumatic lesions of C3-C7
p0360 N82-29884

Radiological study of fractures of C1 and C2
p0360 N82-29885

Sequelae of vertebral fractures and trauma
p0360 N82-29886

AIRCRAFT APPROACH SPACING

In-trail following during profile descents with a cockpit display of traffic information
p0405 A82-46260

Modeling of the aircraft in-trail-following task during profile descent
p0043 N82-13690

AIRCRAFT CABINS

U AIRCRAFT COMPARTMENTS

AIRCRAFT CARRIERS

Operational performance measures for carrier landing - Development and application
p0146 A82-22960

The landing signal officer - Auditory aspects --- of aircraft carrier flight operations
p0284 A82-35910

Evaluation of a trajectory command concept for manual control of carrier approaches and landings
p0440 N82-34060

AIRCRAFT COMPARTMENTS

Aircraft cabin furnishing materials - A toxicological problem
p0007 A82-12311

A review of aircraft cabin conditioning for operations in Australia
[AD-A109044] p0219 N82-20880

Cabin ozone and tropopause definition
p0220 N82-21151

AIRCRAFT CONFIGURATIONS

Comparison of closed loop model with flight test results
p0043 N82-13691

On the use of the OCM's quadratic objective function as a pilot rating metric
p0043 N82-13693

AIRCRAFT CONSTRUCTION

U AIRCRAFT STRUCTURES

AIRCRAFT CONSTRUCTION MATERIALS

Aircraft cabin furnishing materials - A toxicological problem
p0007 A82-12311

AIRCRAFT CONTROL

NT HELICOPTER CONTROL

Mode of flight and a mathematical model of pilot activity relating to flight-vehicle control
p0198 A82-27513

Psychological investigation of pilot behavior during integration of control systems in the cockpit of passenger airliners --- German thesis
p0326 A82-40560
An analytical approach for predicting pilot induced oscillations
p0043 N82-13688
Theoretical linear approach to the combined man-manipulator system in manual control of an aircraft
p0045 N82-13702
System simulation applied to the evaluation of displays for guidance and control
[ESA-TT-659] p0220 N82-20883
Predicting pilot opinion ratings of flying qualities of highly control augmented aircraft using an optimal pilot model
[AD-A111136] p0268 N82-24637
A computer simulation approach to measurement of human control strategy
p0380 N82-30843
An analytical prediction of pilot ratings utilizing human pilot model
p0380 N82-30847
A performance analysis study of a complex G field experiment
p0380 N82-30852
Pilot model hypothesis testing
p0438 N82-34047

AIRCRAFT DESIGN
Method for the analysis of pilot postural behavior based on head-up - head-down simulations
p0171 A82-25494
The role of the test pilot in flight tests
p0372 A82-43329
Environmental control systems
p0177 N82-19147

AIRCRAFT ENGINES
Analysis and classification of human errors in troubleshooting live aircraft power plants
p0277 A82-34970
Environmental control systems
p0177 N82-19147

AIRCRAFT EQUIPMENT
NT AIRCRAFT LIGHTS
NT EJECTION SEATS
U.S. Navy molecular sieve on-board oxygen generation system - An update
p0024 A82-14973
A new concept in life support systems - The NGL molecular sieve oxygen generator
p0156 A82-25370

AIRCRAFT FUEL SYSTEMS
Biocorrosion --- of aircraft fuel tanks
[SNIAS-821-551-105] p0393 N82-31891

AIRCRAFT FUELS
An industrial hygiene evaluation of aircraft refueling inside closed aircraft shelters at elevated ambient temperatures
[AD-A114396] p0353 N82-28994

AIRCRAFT GUIDANCE
System simulation applied to the evaluation of displays for guidance and control
[ESA-TT-659] p0220 N82-20883

AIRCRAFT HAZARDS
Cockpit automation and workload reduction - Too much of a good thing
p0192 A82-26047
Human body reaction to vibration
p0080 N82-15743

AIRCRAFT INDUSTRY
DOT/FAA Human Factors Workshop on Aviation. Transcript, volume 2
[AD-A107803] p0138 N82-17877

AIRCRAFT INSTRUMENTS
NT GYRO HORIZONS
Trouble shooting pattern of emergency through instruments by jet-pilots. II
p0026 A82-15521
Human Factors Society, Annual Meeting, 24th, Los Angeles, CA, October 13-17, 1980, Proceedings
p0139 A82-22901
A case for early objective evaluation of candidate display formats --- of head-up displays based on pilot performance experiments
p0139 A82-22904
What do pilots see in displays
p0139 A82-22906
Instrument scan - Is it an indicator of the pilot's workload
p0141 A82-22924
Ergonomic aspects in cockpit lay-out
p0405 A82-46257

AIRCRAFT LANDING
Operational performance measures for carrier landing - Development and application
p0146 A82-22960
Effect of different runway sizes on pilot performance during simulated night landing approaches
p0252 A82-32008
Landing airplanes, detecting traffic, and the dark focus --- experiments on pilot visual misperception in darkness accommodation
p0406 A82-46265
The dark focus of accommodation and pilot performance
p0406 A82-46266
Fractional rates of change as functional optical invariants --- deceleration and descent judgment experiments on flight simulator
p0406 A82-46268
A comparison of landing manoeuver piloting technique based on measurements made in an airline training simulator and in actual flight
p0042 N82-13685
Identification of multiloop pilot describing functions obtained from simulated approaches to an aircraft carrier
p0043 N82-13686
Comparison of closed loop model with flight test results
p0043 N82-13691
Development of the Automated Performance Assessment and Remedial Training System (APARTS): A landing signal officer training aid
[AD-A106224] p0138 N82-17873
Time domain identification of an optimal control pilot model with emphasis on the objective function
[NASA-CR-168487] p0138 N82-17874
The effect of visual information on the manual approach and landing
[NLR-TR-80055-U] p0181 N82-19836
Procru: A model for analyzing flight crew procedures in approach to landing
p0381 N82-30863
Assessment and development of oculomotor flying skills by the application of the channel theory of vision
[AD-A115325] p0436 N82-34035
The effect of visual information on the manual approach and landing
p0437 N82-34041
Training aircraft design considerations based on the successive organization of perception in manual control
p0437 N82-34043
Effects of higher order control systems on aircraft approach and landing longitudinal handling qualities
p0438 N82-34052
Evaluation of a trajectory command concept for manual control of carrier approaches and landings
p0440 N82-34060
Application of a pilot control strategy identification technique to a joint FAA/NASA ground-based simulation of head-up displays for CTOL aircraft
p0440 N82-34061
PROCRU: A model for analyzing flight crew procedures in approach to landing
p0441 N82-34066

AIRCRAFT LIGHTS
Fuselage lights as a cause factor of vertigo in night formation flight - Perceiving pattern of fuselage light
p0227 A82-28925
PAVE LOW III - Interior lighting reconfiguration for night lighting and night vision goggle compatibility
p0405 A82-46261

AIRCRAFT MAINTENANCE
Computer simulations for fault diagnosis training - From simulation to live system performance
p0140 A82-22911

Training maintenance technicians for troubleshooting - Two experiments with computer simulations
p0289 A82-37182

AIRCRAFT MANEUVERS

The validity of task analytic information to human performance research in unusual environments
p0142 A82-22931

Task analytic approach to human performance battery development
p0143 A82-22937

Cognitive styles and the acquisition of a complex aerial maneuver
p0146 A82-22962

Orientation perception during aircraft coordinated turns
[AIAA PAPER 82-0258] p0198 A82-27096

G stress on A-10 pilots during JAWS II exercises
p0210 A82-28479

Post-acceleration chaotic atrial rhythm
p0211 A82-28488

Aerobatics in light aircraft - Sensations and stresses experienced by the pilot
p0315 A82-38848

Medico-physiological aspects of stunt-flying
p0315 A82-38849

Development and application of air combat performance assessment methods
p0407 A82-46277

Apparent instrument horizon deflection during and immediately following rolling maneuvers
p0416 A82-47335

Horizontal conflict resolution maneuvers with a cockpit display of traffic information
p0041 N82-13671

A comparison of landing maneuver piloting technique based on measurements made in an airline training simulator and in actual flight
p0042 N82-13685

Comparison of closed loop model with flight test results
p0043 N82-13691

Visual/motion cue mismatch during a coordinated roll maneuver
p0439 N82-34055

AIRCRAFT MODELS

Method for the analysis of pilot postural behavior based on head-up - head-down simulations
p0171 A82-25494

AIRCRAFT NOISE

NT JET AIRCRAFT NOISE

Aircraft noise and speech communication interference in JASDF air traffic control room
p0025 A82-15518

A comparison of models to predict annoyance reactions to noise from mixed sources
p0227 A82-29168

The state of hearing in pilots in civil aviation
p0240 A82-31520

Noise and sense of hearing
p0080 N82-15747

An evaluation of helicopter noise and vibration ride qualities criteria
[NASA-TM-83251] p0137 N82-17871

Effect of synthesized propeller vibration on passenger annoyance in a turboprop interior noise environment
[NASA-TM-84515] p0400 N82-31944

AIRCRAFT PERFORMANCE

NT HELICOPTER PERFORMANCE

Operational performance measures for carrier landing - Development and application
p0146 A82-22960

Further tests of a model-based scheme for predicting pilot opinion ratings for large commercial transports
p0043 N82-13687

Predicting pilot opinion ratings of flying qualities of highly control augmented aircraft using an optimal pilot model
[AD-A111136] p0268 N82-24837

A model-based technique for predicting pilot opinion ratings for large commercial transports
p0438 N82-34050

An analytical prediction of pilot ratings utilizing human pilot model
p0438 N82-34051

Effects of higher order control systems on aircraft approach and landing longitudinal handling qualities
p0438 N82-34052

Pilot opinions of sampling effects in lateral-directional control
p0439 N82-34053

AIRCRAFT PILOTS

NT TEST PILOTS

Hazards of chemicals used in agricultural aviation - A review
p0005 A82-11026

Retro-hyperflexion luxation - Mechanism of cervical spinal cord contusion injury during ejection sequence
p0005 A82-11032

The application of a combined passive orthostatic test in the flight medical examination
p0020 A82-13550

A self-contained, man-borne biomedical instrumentation system in the flight testing of naval weapons systems
[AIAA PAPER 81-2403] p0021 A82-13890

In-flight physiological monitoring of tactical jet aircrewmen
p0024 A82-14962

Development of a secondary task method for measuring operator workload. V - Measurement of pilot workload during take off and landing by C-1 jet carrier
p0025 A82-15516

A study of self-initiated elimination from the flight training. I - Reasons for self-initiated elimination
p0025 A82-15520

Trouble shooting pattern of emergency through instruments by jet-pilots. II
p0026 A82-15521

Functional characteristics of the pilot hypothalamus-hypophysis-adrenal cortex system
p0049 A82-16275

Recent life change measurement in Canadian Forces pilots
p0072 A82-18733

Visual scanning behavior and mental workload in aircraft pilots
p0073 A82-18741

The prevalence of visual deficiencies among 1979 general aviation accident airmen
p0109 A82-21688

Computer simulations for fault diagnosis training - From simulation to live system performance
p0140 A82-22911

New ideas on the psychological selection of aircraft pilots
p0166 A82-24840

Contribution to the history of the theoretical evolution of the psychological selection of aircraft pilots in Italy
p0166 A82-24841

Old and new directions in the engineering psychology of artificial horizons and their effects on the mental hygiene of the student pilot
p0166 A82-24842

Serial personality evaluations of repatriated U.S. Air Force southeast Asia POWs
p0193 A82-26237

Airline pilot disability - Economic impact of an airline preventive medicine program
p0211 A82-28489

Studies of planning behavior of aircraft pilots in normal, abnormal, and emergency situations --- Book
p0261 A82-33905

Standards of physical condition for private pilots of aircraft and gliders
p0315 A82-38847

A study of decision-making behavior of aircraft pilots deviating from a planned flight
p0406 A82-46262

An adaptive private pilot certification exam
p0407 A82-46275

Physiopathology and pathology of spinal ailments in aerospace medicine
[AGARD-AG-250-FR] p0011 N82-10720

Investigation of spatial disorientation of F-15 Eagle pilots
[AD-A104684] p0014 N82-11781

An investigation into pilot and system response to critical in-flight events. Volume 1: Executive summary

[NASA-CR-164993] p0036 N82-12782
An investigation into pilot and system response to critical in-flight events. Volume 2: Appendix
[NASA-CR-164994] p0036 N82-12783
Further tests of a model-based scheme for predicting pilot opinion ratings for large commercial transports
p0043 N82-13687
On the use of the OCM's quadratic objective function as a pilot rating metric
p0043 N82-13693
Pilot scanning patterns while viewing cockpit displays of traffic information
p0046 N82-13710
Ways and means of maintaining heat balance in pilots and cosmonauts
p0123 N82-16706
In-flight diets and quantitative adequacy thereof to pilot expenditure
p0130 N82-17813
Cardiac output and cardiac cycle phase structure of pilots during flights
p0131 N82-17821
Time domain identification of an optimal control pilot model with emphasis on the objective function
[NASA-CR-168487] p0138 N82-17874
DOT/FAA Human Factors Workshop on Aviation. Transcript, vol 1
[AD-A107802] p0138 N82-17876
Predicting pilot opinion ratings of flying qualities of highly control augmented aircraft using an optimal pilot model
[AD-A111136] p0268 N82-24837
Problem of accelerations in aviation medicine
p0347 N82-28950
Development of a methodology for assessing aircrew workloads
[AD-A114364] p0355 N82-29010
Ejection of pilots from combat aircraft
p0359 N82-29877
Fractures of the spine in flight
p0360 N82-29880
Backache in helicopter pilots
p0360 N82-29887
The cervical column of pilots of combat aircraft
p0361 N82-29888
The spine and fitness for flight
p0361 N82-29889
Vertebral arthritis
p0361 N82-29890
Ankylosing spondylitis
p0361 N82-29891
Medico-legal aspect of spinal disorders in aviation medicine
p0361 N82-29892
Airline pilot age, health, and performance: Scientific and medical considerations
[PB82-161506] p0361 N82-29895
Quantification of pilot workload via instrument scan
[NASA-CR-169230] p0362 N82-29900
FMP study of pilot workload. Qualification of workload via instrument scan
[NASA-CR-169254] p0392 N82-30944
Principal electrocardiographic anomalies in the evaluation of pilots
p0398 N82-31931
Studies of planning behavior of aircraft pilots in normal, abnormal and emergency situations
[NASA-CR-169319] p0425 N82-32981
The effects of pilot experience of acquiring instrument flight skills, phase 2
[AD-A113576] p0436 N82-34033
A comprehensive system model for motion/space sickness. Preliminary results
p0439 N82-34059

AIRCRAFT POWER SOURCES
U AIRCRAFT ENGINES

AIRCRAFT SAFETY
Check your oxygen --- oxygen supply equipment and aircraft safety
p0073 A82-18736
Symposium on Aviation Psychology, 1st, Ohio State University, Columbus, OH, April 21, 22, 1981, Proceedings
p0405 A82-46251
Human factors and aviation safety - A program of research on human factors in aviation
p0405 A82-46253

An investigation into pilot and system response to critical in-flight events. Volume 1: Executive summary
[NASA-CR-164993] p0036 N82-12782
An investigation into pilot and system response to critical in-flight events, volume 1
[NASA-CR-166243-VOL-1] p0040 N82-13662
An investigation into pilot and system response to critical in-flight events, volume 2
[NASA-CR-166243-VOL-2] p0040 N82-13663
F/FB-111 ejection experience (1967-1980). Part 1: Evaluation and recommendations
[AD-A110199] p0222 N82-21079

AIRCRAFT STRUCTURES
NT FUSELAGES
Canopy induced displacement evaluation --- visual displacement of targets for fighter aircraft
p0145 A82-22958

AIRCRAFT SURVIVABILITY
Operational performance measures for air combat - Development and application
p0145 A82-22959

AIRCREWS
U FLIGHT CREWS

AIRLINE OPERATIONS
Flight simulation in the current Australian airline scene
p0095 A82-20534
Effects of long-term exposure to low levels of ozone - A review
p0107 A82-21676
Conductors of the airways --- air traffic controllers
p0207 A82-27812
Airline pilot disability - Economic impact of an airline preventive medicine program
p0211 A82-28489
Inflight medical facilities
p0284 A82-35914

AIRPORT TOWERS
Conspicuity of observation posts at the air weapon firing ranges on the Vliehors and the Noordvaarder
[IZF-1979-33-E] p0035 N82-12774

ALANINE
The influence of some triterpenic glycosides on C-14-alanine inclusion into the bone-marrow cells of rats
p0092 A82-20306
Asymmetrical radical formation in beta-irradiated D- and L-alanines
p0103 A82-20949
The effects of daily blood sampling on creatine phosphokinase, aspartate aminotransferase and alanine aminotransferase activities in the blood serum of the monkey
p0118 A82-21811

ALBUMINS
The effect of acetazolamide on the proteinuria of altitude
p0073 A82-18739
Gastrointestinal allergy in the experimental animal: The use of radioiodinated serum albumin in the assessment of new drugs
[IAEA-R-2067-F] p0031 N82-12741

ALCOHOLS
NT ETHYL ALCOHOL
NT GLYCOLS
NT METHYL ALCOHOLS

ALDEHYDES
NT FORMALDEHYDE
Far UV photolysis of methane-water gaseous mixtures and the prebiotic synthesis of aldehydes
p0099 A82-20913
Selecting optimal conditions for heart conservation in weak aldehyde solutions by using mathematical methods of experimental design
p0308 A82-38534

ALDOSTERONE
The role of aldosterone in the regulation of the water and salt balance in hot-shop workers of the metallurgical industry
p0151 A82-23251
Renin, aldosterone, and converting enzyme during exercise and acute hypoxia in humans
p0168 A82-24914
Relevance of aldosterone on circulatory, renal and blood reactions during simulated weightlessness and on aerobic metabolic rate
p0335 A82-40736

Clinical physiology of the
renin-angiotensin-aldosterone system
p0179 N82-19820
Role of hormonal compounds in regulation of
electrolyte metabolism in the presence of
emotional stress
p0348 N82-28952
Renin-angiotensin-aldosterone system and
electrolyte metabolism in rat blood after flight
aboard Cosmos-1129 biosatellite
p0397 N82-31918
Acute albumin-induced plasma volume expansion and
exercise in the heat: Effects on hormonal
responses in men
[AD-A115180] p0433 N82-34017
ALERTNESS
Theories of vigilance - A modern perspective
p0146 A82-22964
A pilot study of human factors in SAR
[AD-A117917] p0444 N82-34087
ALGAE
NT BLUE GREEN ALGAE
Competition between algae in a flow system
p0240 A82-31517
Laser induced fluorescence from algae: Results
of a ship-borne field test
[NASA-TM-76626] p0011 N82-11758
Distinctions of regeneration of confined
atmosphere by means of photosynthesis of
unicellular algae
p0125 N82-16720
Settlement of fouling organisms at the JITTEE
North Barnard Island raft site
[MRL-TN-450] p0220 N82-21870
Settlement of fouling organisms at the HMAS
STIRLING raft site
[MRL-TN-441] p0221 N82-21871
Primary light-harvesting system: Phycobilisomes
and associated membranes
[DE81-028326] p0221 N82-21874
Algal culture studies related to a Closed
Ecological Life Support System (CELSS)
[NASA-CR-166375] p0392 N82-30943
ALGAL BLOOM
U ALGAE
ALGEBRA
NT STATE VECTORS
ALGORITHMS
Iterative reconstruction-reprojection - An
algorithm for limited data cardiac-computer
tomography
p0257 A82-32879
Optimization of stochastic man-machine systems
p0261 A82-33769
Increasing the efficiency of running on the basis
of learning algorithms and information tools
p0324 A82-40488
Algorithms for imaging myocardial blood flow using
X-ray computed tomography
p0039 N82-13661
Simple geometric algorithms to aid in clearance
management for robotic mechanisms
p0042 N82-13680
Protein folding, protein structure and the origin
of life: Theoretical methods and solutions of
dynamical problems
[NASA-CR-166318] p0295 N82-22867
A computer aided workstation assesor for crew
operations - WOSTAS
[AD-A116045] p0443 N82-34079
ALIPHATIC COMPOUNDS
NT ACETONE
NT ACETYL COMPOUNDS
NT ACETYLENE
NT ACRYLATES
NT ADENINES
NT ADENOSINE TRIPHOSPHATE
NT ADENOSINES
NT CHLOROETHYLENE
NT CHLOROFORM
NT CHOLINE

ALKALOIDS
NT ATROPINE
NT HYOSCINE
NT MORPHINE
NT NICOTINAMIDE
NT NICOTINE
ALKALOSIS
Variability of oxygen affinity of blood - Human
subjects native to high altutude
p0088 A82-19493
Effect of acid-base status on the kinetics of the
ventilatory response to moderate exercise
p0230 A82-29564
ALKANES
NT METHANE
NT OCTANES
NT PENTANES
ALKYNES
NT ACETYLENE
ALLERGIC DISEASES
Effect of sensitization on development of stress
gastric ulcers in rats
[NASA-TM-76860] p0305 N82-30892
ALPHA JET AIRCRAFT
The role of the test pilot in flight tests
p0372 A82-43329
ALTITUDE
NT HIGH ALTITUDE
NT LOW ALTITUDE
Oxygen transport to human tissues
[AD-A115904] p0432 N82-34007
ALTITUDE ACCLIMATIZATION
Salyut 6 medical monitoring techniques
p0006 A82-11924
An investigation of memory during the process of
adaptation to mountain conditions
p0061 A82-17138
Alterations in responses to drugs of atria from
white rats acclimated to hypobaric hypoxia
p0089 A82-19497
Functional condition and work capacity under
mountain conditions
p0093 A82-20313
The role of natriuresis in the prophylactic effect
of adaptation to hypoxia in the case of
hereditary hypertension
p0110 A82-21712
Adaptation to high-altitude hypoxia at different
ambient temperatures /before and during
adaptation/
p0110 A82-21715
Lysosomes under conditions of stress
p0114 A82-21770
Mechanisms of adaptation to ergothermic hypoxemia
in athletes specializing in different sports
p0118 A82-21820
Changes in the activity of monoaminergic systems
of the brain under conditions of adaptation to
high altitude
p0149 A82-23144
Phase characteristics of the response of the
hypophysal-adrenal system under high-altitude
conditions

p0150 A82-23166

High altitude and the oxygen dissociation curve of hemoglobin modifications in inter-heme cooperativity
p0167 A22-24884

The effect of adapting to high-altitude hypoxia on certain indicators of catecholamine metabolism in rats in the case of spontaneous hereditary hypertension
p0202 A82-27758

Adaptive changes in the rat hypophysical-adrenal system upon altitude hypoxia
p0203 A82-27772

Sparing effect of chronic high-altitude exposure on muscle glycogen utilization
p0229 A82-29556

Effects of starvation on human tolerance to acute hypoxia
p0236 A82-31159

Women at altitude - Cardiovascular responses to hypoxia
p0252 A82-32009

Dynamics of blood flow rate in athletes upon changes in environmental conditions
p0279 A82-35669

The hemostasis system in man in high-altitude conditions
p0282 A82-35832

Evaluation of the functional state existing in the adaptation to high-altitude conditions
p0282 A82-35836

Rate of change of physiological functions as an index of the degree of adaptation
p0283 A82-35840

Mechanical properties of the lungs during acclimatization to altitude
p0284 A82-36027

The characteristics of hemodynamic shifts under physical stress at mountain elevations
p0307 A82-38166

Study of RNA synthesis rate and DNA content in the myocardium of new-born rats during adaptation to high-altitude hypoxia
p0308 A82-38537

Prevention of heart function abnormalities during reoxygenation after ischemia by adaptation to altitude hypoxia
p0322 A82-40455

Altitude-induced changes in plasma thyroxine, 3,5,3 prime-triiodothyronine, and thyrotropin in rats
p0340 A82-41207

Serum and urinary cation changes on acute induction to high altitude /3200 and 3771 metres/
p0417 A82-47339

The morphology of the submandibular lymph nodes of white rats during adaptation to high-altitude conditions
p0420 A82-48221

Caisson disease
p0080 N82-15749

Comparative antihypoxic efficacy of pressure chamber conditioning and fasting of man
p0127 N82-16729

Medical and performance problems of acute high altitude-exposure
[AD-A111062]
p0295 N82-26970

ALTITUDE SICKNESS

The effect of acetazolamide on the proteinuria of altitude
p0073 A82-18739

Phenytoin - Ineffective against acute mountain sickness
p0192 A82-26231

Antidiuretic hormone responses to eucapnic and hypocapnic hypoxia in humans
p0417 A82-47377

ALTITUDE SIMULATION

Body fluid and hematologic changes in the toad exposed to 48 h of simulated high altitude
p0005 A82-11151

Rare cases of serious disturbances in cardiac rhythm during a hypoxic functional test
p0280 A82-35688

Measurement of cardiopulmonary performance during acute exposure to a 2440-m equivalent atmosphere
p0283 A82-35904

The effect of hypoxic and hypobaric exercises on the blood-brain barrier in rats
p0332 A82-40713

Changes in the lymphoid organs of rats under the effect of acute hypoxia
p0368 A82-42623

Altitude hypoxia and hypercapnic mixtures
p0407 A82-46308

Comparative antihypoxic efficacy of pressure chamber conditioning and fasting of man
p0127 N82-16729

ALTITUDE TESTS
NT HIGH ALTITUDE TESTS

Probability of caisson disease after pressure drop from 840 to 308 mm Hg
p0214 N82-20839

ALTITUDE TOLERANCE

Effect of altitude exposure on induction of Streptococcal endocarditis in young and middle-aged rats
p0073 A82-18740

Elevation of hypoxia tolerance under the influence of prolonged fasting
p0186 A82-25679

Cardiorespiratory assessment of 24-hour crash-diet effects on altitude, +Gz, and fatigue tolerances
p0192 A82-26228

Mechanism for the antihypoxic effects of depakin
p0202 A82-27761

Altitude and hypoxia as phase shift inducers --- of human circadian rhythms
p0210 A82-28480

The pathophysiology, presentation, and triage of altitude-related decompression sickness associated with hypobaric chamber operation
p0253 A82-32012

The effect of hypokinesia on the resistance of the heart to hypoxia
p0307 A82-38170

The participation of the lymphatic system in the resistance of an organism to hypoxia
p0319 A82-39793

Caisson disease
p0080 N82-15749

Method of assessing individual resistance of rats to hypoxic hypoxia
p0133 N82-17837

Differentiated ratings of perceived exertion are influenced by high altitude exposure
[AD-A111075]
p0295 N82-26967

ALUMINUM

Five OTEC biofouling and corrosion experiments at Keahole Point, 1976 to 1980
[DE82-008086]
p0429 N82-33987

ALUMINUM COMPOUNDS
NT MONTMORILLONITE
ALUMINUM SILICATES
NT MONTMORILLONITE
ALVEOLAR AIR

The state of the air-blood barrier in hyperoxia
p0060 A82-16970

Breath-by-breath measurement of true alveolar gas exchange
p0089 A82-19498

The significance of airflow resistance to changes in responses to increasing hypercapnia
p0094 A82-20327

Rate of uptake of carbon monoxide at different inspired concentrations in humans
p0120 A82-21930

Blood-gas CO2 equilibration in lungs of unanesthetized dogs during hypercapnia
p0256 A82-32834

Oxygen toxicity and lung collagenous protein
[AD-A104702]
p0033 N82-12756

ALVEOLI

Analysis of lung vasomotor responses to alveolar hypoxia and hypercapnia
p0002 A82-10749

The ventilation-perfusion relation in residents of the Arctic coast of the north-east USSR
p0236 A82-31154

Changes in mineralized tissues in the case of calcitonin and somatotropic hormone injections under hypokinesia
p0325 A82-40503

Hyperoxia inhibits stimulated superoxide release by rat alveolar macrophages
p0376 A82-44143

AMBIENT TEMPERATURE

Metabolism and thermoregulation during stages of

sleep in humans exposed to heat and cold p0006 A82-11157
Adaptation to high-altitude hypoxia at different ambient temperatures /before and during adaptation/ p0110 A82-21715
The effects of elevated environmental temperature combined with radiation on the organism p0113 A82-21752
Effects of temperature on the duration of arousal episodes during hibernation p0120 A82-21934
A mechanism for the stimulation of the immune response under the influence of high ambient temperature p0164 A82-24557
Effects of high ambient temperature on athlete adaptation to muscular activity p0188 A82-25706
Trace reactions and the ambient temperature --- organism, organ and tissue thermoregulatory reactions p0209 A82-28454
Regional redistribution of blood flow in the cat under conditions of high ambient temperature p0231 A82-29697
Task categorization and the limits of human performance in extreme heat p0321 A82-40439
Skin temperature and thermal comfort in weightlessness p0334 A82-40726
Effect of high ambient temperature on carbohydrate metabolism in rat liver and skeletal muscles p0351 N82-28975

AMBIGUITY
Ambiguity and the evolution of the genetic code p0305 A82-38120

AMBULANCES
Physical and physiological features of long-range flight and its impact on patients p0087 A82-19012

AMIDES
NT ACETAZOLAMIDE
NT CYANAMIDES
NT NICOTINAMIDE
NT UREAS
Principles of enzyme stabilization - Polyacrylamide-gel-immobilized trypsin and chymotrypsin with high catalytic activity at elevated temperatures p0228 A82-29846
Environmental and health aspects of acrylamide: A comprehensive bibliography of published literature [PB82-110123] p0181 N82-19835

AMINES
NT AMPHETAMINES
NT CATECHOLAMINE
NT CYSTEAMINE
NT DIMETHYLHYDRAZINES
NT HISTIDINE
NT HYOSCINE
NT SEROTONIN
Biogenic monoamine concentrations in autonomic nervous system ganglia during acute experimental emotional stress p0054 A82-16817
Brain monoamine oxidase activity during cold adaptation and under the combined effects of cold and hyperbaric oxygenation p0090 A82-19746
The effect of low temperature on the activity and substrate specificity of monoamine oxidases in rat brain mitochondria p0112 A82-21735
The effect of repeated episodes of emotional stress on heart activity and the content of monoamines in the heart p0307 A82-38163
Polyamines and plant stress - Activation of putrescine biosynthesis by osmotic shock p0376 A82-44450
The effect of cholestyramine on the metabolism of lipoproteins in the blood of rats p0413 A82-46887
Carcinogenic effects of coal-conversion materials [DE81-028108] p0076 N82-14803
Biogenic monoamine content of the ganglia in the autonomic nervous system of rabbits during acute experimental emotional stress [NASA-TM-76900] p0383 N82-30875

AMINO ACIDS
NT ALANINE
NT CYSTEINE
NT GLUTATHIONE
NT GLYCINE
NT HISTIDINE
NT LEUCINE
NT MELANOIDIN
NT METHIONINE
NT PEPTIDES
NT POLYPEPTIDES
NT THYROXINE
NT TRYPTOPHAN
A working hypothesis on the interdependent genesis of nucleotide bases, protein amino acids, and primitive genetic code p0020 A82-13839
Are there structural analogies between amino acids and nucleic acids p0020 A82-13840
Molecular complexes of amino acids with porphyrins as possible procursors of pigment-protein systems p0020 A82-13841
Primordial transport of sugars and amino acids via Schiff bases --- role in the origin of an early protocell p0021 A82-13844
The effects of bicycle ergometer exercise on plasma amino acid contents in athletes p0062 A82-17145
The effects of hypokinesia on the spectral characteristics of free amino acids in the skeletal muscles and the blood p0071 A82-18661
Free amino acid concentrations in the livers of animals subjected to certain extremal factors p0072 A82-18662
Amino acids derivatives synthesis from nitrogen, carbon and water by electric discharges p0090 A82-20018
Search for effect of longitudinally polarized protons on optically active amino acids p0091 A82-20021
Origin of translation - The hypothesis of permanently attached adaptors --- proposed prebiotic amino acid synthesis p0091 A82-20022
A theory of the origin of life p0091 A82-20023
The Strecker synthesis in the primitive ocean --- chemical evolution p0099 A82-20919
Synthesis and degradation of amino acids by contact glow discharge electrolysis, a possible route for prebiotic formation of bio-organic compounds p0100 A82-20924
Genesis of amino acids in the primeval sea - Formation of amino acids from sugars and ammonia in a modified sea medium p0100 A82-20925
Factors influencing the rate of non-enzymatic activation of carboxylic and amino acids by ATP p0101 A82-20929
Cyanamide mediated syntheses of leu, ala, and phe peptides under plausible primitive earth conditions p0101 A82-20931
The polymerization products of alpha-aminopropionitrile - The component separation using cation-exchange resin p0101 A82-20934
Terrestrial evolution of polymerization of amino acids - Heat to ATP p0101 A82-20937
Potentiometric titration behavior of polyamino acids prepared by thermal polycondensation p0102 A82-20938
On the polycondensation of amino acid adenylates on montmorillonites p0102 A82-20939
Polymerization of serine guanylate in the presence of montmorillonite p0102 A82-20940
Quantum mechanical conformational analysis of aminoacyladenylates - Implication in the origin of life

p0102 A82-20941
Environmental conditions for the formation of marigranules and kinetic studies on the formation --- chemical evolution of amino acids in sea medium
p0102 A82-20942
Resolution of underivatized amino acids by high pressure liquid chromatography, using chiral eluants
p0102 A82-20944
Possible selective adsorption of enantiomers by Na-montmorillonite
p0103 A82-20946
Origin and evolution of the genetic code
p0103 A82-20955
Evolutionary processes of the genetic code
p0104 A82-20957
Summary of evidence for an anticodonic basis for the origin of the genetic code
p0104 A82-20958
Selective acylability of amino acids by non-enzymic model reactions of biochemical transacylations
p0104 A82-20965
The multiple forms of tyrosine aminotransferase in rat liver cells and their role in cellular homeostasis
p0117 A82-21807
The dynamics and physiological importance of the activation of the gamma-amino-butyric acid system in the brain and cardiac muscle under pain and emotional stress
p0117 A82-21808
Temperature dependence of alanine and aspartate aminotransferase activities in rat brain during hypothermia of various durations and adrenalectomy
p0118 A82-21812
Biochemical keys to the emergence of complex life
p0149 A82-22996
Modeling of the synthesis of peptide-like compounds in the primeval lithosphere of the earth
p0149 A82-23136
A model for protocellular coordination of nucleic acid and protein syntheses
p0195 A82-26583
Copolyamino acid fractionation and protobiochemistry
p0195 A82-26589
Formation of peptides from amino acids by single or multiple additions of ATP to suspensions of nucleoproteinoid microparticles
p0195 A82-26597
Amino acid codes in mitochondria as possible clues to primitive codes
p0206 A82-28227
Distribution and enantiomeric composition of amino acids in the Murchison meteorite
p0253 A82-32210
Effects of acute cold exposure on muscle amino acid and protein in rats
p0256 A82-32840
Kainic acid as a tool in brain research
p0278 A82-35662
Contents of protein and amino acids in methanobacterial biomass
p0284 A82-36011
A specific radioimmunoassay for osteocalcin with advantageous species crossreactivity
p0286 A82-36307
Beta decay and the origins of biological chirality - Experimental results
p0290 A82-37420
The changes in the concentration of free amino acids in muscles during exercise
p0320 A82-40314
Rhythms of electrolytes and hydroxyproline excretion in urine of rats after three weeks of weightlessness - Biosatellite Cosmos-1129
p0330 A82-40693
Molecular basis for the genetic code
p0339 A82-41195
Origins of the protein synthesis cycle
p0408 A82-46330
Neurotransmitter mechanisms in the nucleus accumbens septi and related regions in the rat brain
[NDRE/PUBL-81/1001] p0031 N82-12738
All-Union Conference on New Sources of Food Protein and Their Application
p0082 N82-15765
Protein folding, protein structure and the origin of life: Theoretical methods and solutions of dynamical problems
[NASA-CR-166310] p0245 N82-22867
Effect of 48-day flight on blood amino acid content in the crew of Salyut-5
p0270 N82-25757
Amino acids of femoral quadriceps of rats following flight aboard the Cosmos-936 biosatellite
p0271 N82-25766
Indices of the rat central nervous system metabolism during 36- and 60-day hypokinesia
[NASA-TM-76870] p0384 N82-30883

AMMONIA
Photolysis of CH4-NH3 mixtures and PH3 as models for the photochemical transformations on the primitive earth and Jupiter
p0099 A82-20914
Genesis of amino acids in the primeval sea - Formation of amino acids from sugars and ammonia in a modified sea medium
p0100 A82-20925
Pulmonary oxygen toxicity - Possible role of ammonia in desorbing lung surfactant
p0283 A82-35908
Ways to increase the work capacity of persons subjected to prolonged sensory overloads
p0409 A82-46696
Ammonia health effects
[PB82-116047] p0176 N82-18865
Biochemical, physiological and ecological aspects of ammonium regeneration by marine crustaceans

conductivity of bilayer lipid membranes
p0312 A82-38587
Gramicidin A-induced conductance of the muscle
fiber membrane
p0313 A82-38605
Occult bacterial persistence and resistance to
colonization after antibiotic therapy
p0323 A82-40460
Effects of combination of antibiotic-resistant
bifidobacteria and corresponding antibiotics of
survival of irradiated mice
p0430 N82-33994

**ANTIBODIES**
The effects of successive ionizing radiation and
heat on antibody formation
p0113 A82-21751
A specific radioimmunoassay for osteocalcin with
advantageous species crossreactivity
p0286 A82-36307
The mechanism of the activating effect of
anti-cardiac antibodies on the electrical and
contractile activity of myocardial cells
p0374 A82-43665
USSR report: Life sciences. Effects of
nonionizing electromagnetic radiation, no. 6
[JPRS-81300] p0386 N82-30899
Stimulating effect of exposure of rat sternum to
variable magnetic field on antibody production
in the spleen
p0386 N82-30900

**ANTICHOLINERGICS**
A comparison of the antimuscarinic properties of
aprophen with those of some other
anticholinergic drugs
[MRL-R-794] p0221 N82-21877

**ANTICOAGULANTS**
Age-related features of blood-coagulation changes
in the treatment of cerebral ischemias with
indirect-action anticoagulants
p0201 A82-27754

**ANTIDIURETICS**
Effects of vasopressin administration on diuresis
of water immersion in normal humans
p0088 A82-19491
ADH suppression under immersion combined with
dehydration --- antidiuretic hormone secretion
p0339 A82-40776
Antidiuretic hormone responses to eucapnic and
hypocapnic hypoxia in humans
p0417 A82-47377

**ANTIFOULING**
Mitigation of biofouling using coatings
[DE81-027900] p0030 N82-13647
Technical assessment of the prevention of
micro-fouling on OTEC heat-transfer surfaces
through the use of ultraviolet radiation
[DE82-005489] p0356 N82-29050
Coatings for the prevention of macrofouling in the
OTEC program
[DE82-003238] p0386 N82-30897

**ANTIGENS**
A study of tropomyosins in human muscular and
nonmuscular organs
p0117 A82-21806
Features of the reaction of the blood serum of a
healthy person with epidermis
p0262 A82-34678
Heart antigens
p0374 A82-43666
The effect of a dysentery divaccine as a
therapeutic agent for experimental radiation
sickness on the immune response to a
heterologous antigen
p0411 A82-46854

**ANTIHISTAMINICS**
The effect of dipilodor, diazepam, pipolphen, and
their combinations on the vasomotor reflex and
respiration
p0189 A82-25721

**ANTIHYPERTENSIVE AGENTS**
Changes in regional and central hemodynamics
during the treatment of hypertensive patients
with obsidan, apressin and their combination
p0153 A82-23271
The effect of Clonidine on peripheral vasomotor
reactions during simulated zero gravity
p0337 A82-40763
Cardiovascular effects of Clonidine during 20
hours head down tilt /-5 deg/
p0337 A82-40764
A system of methodological approaches to the
evaluation and prognostication of the
hemodynamic effects of hypotensive and
antianginal compounds
p0413 A82-46889

**ANTIINFECTIVES AND ANTIBACTERIALS**
The use of trenthalam in acute vestibulocochlear
disorders in patients with meningococcal infection
p0280 A82-35609
The effect of a dysentery divaccine as a
therapeutic agent for experimental radiation
sickness on the immune response to a
heterologous antigen
p0411 A82-46854

**ANTIMATTER**
NT POSITRONS

**ANTIOXIDANTS**
Prevention of hypoxic heart damage by the use of
oxypyridine-class antioxidants
p0055 A82-16821
Elevation of hypoxia resistance with the use of
gutimine
p0093 A82-20319
Evaluation of the antioxidant system of the body
p0188 A82-25709
Features of microcirculatory hemostasis and of the
clotting and fibrinolytic properties of blood
and the activity of the antioxidant system in
people of various ABO blood groups
p0307 A82-38164
Protection from O2 toxicity by preexposure to
hypoxia - Lung antioxidant enzyme role
p0341 A82-41217

**ANTIPARTICLES**
NT POSITRONS

**ANTIRADIATION DRUGS**

The effectiveness of various radio-protective agents in protecting the germ cells of male mice against the genetic effects of radiation. II - The incidence of reciprocal translocations in irradiated spermatogonia
p0186 A82-25681

The indication of radiation resistance modified by radio-protective agents. III - Analysis of the relationship between hypoxic and radio-protective effects in the rat bone marrow for hypoxias of different origin
p0186 A82-25682

The therapeutic application of heterologous serum globulin against the acute radiation sickness of mice
p0186 A82-25684

Study of the simultaneous effects of hormones and radioprotectors in the exposure of animals to ionizing radiation
p0234 A82-30032

The survival of dogs irradiated with lethal doses of gamma radiation under conditions of chemical radioprotection and subsequent therapy
p0234 A82-30033

The effect of several pharmacologically active substances on the transformation of cystamine in mouse tissues --- and sulfur-containing antiradiation drug metabolism
p0278 A82-35654

Comparative evaluation of the efficiency of radio-protectors on the basis of criteria of the protection of bone marrow and the gastrointestinal tract
p0278 A82-35658

Investigation of the radio-protective effect of cystamine on a model of thermally induced prophage lambda
p0278 A82-35659

The influence of activators of cAMP accumulation on individual stages of genome expression in animal cells in the presence of acute ionizing radiation. IV - A study of the cytosol factors controlling the transcription and release of RNA from the nuclei in irradiated animals and in conditions of the action of the radioprotective agent serotonin
p0404 A82-45776

The radio protectiveness of cystamine injected intramuscularly in mice
p0404 A82-45781

The metabolism of hydrocortisone in isolated livers of irradiated rats
p0404 A82-45782

The modification of radiation damage by dibasic sulfur-containing phenol acids
p0404 A82-45784

The role of endogenous substances in creating a background of enhanced resistance to radioactivity. XIII - The effect of various radiation protective agents on lipid peroxidation
p0404 A82-45785

The increase in the endurance for static loads in irradiated rats treated with gas hypoxic mixture /GHM-10/, an anti-irradiation agent
p0404 A82-45786

The effect of a dysentery divaccine as a therapeutic agent for experimental radiation sickness on the immune response to a heterologous antigen
p0411 A82-46854

Effect of radioprotective agents on reactivity to space flight factors
p0213 N82-20835

Effects of +G sub z acceleration and adeutron on nuclei acid content and other parameters of mouse peripheral blood
p0395 N82-31909

**ANTISEPTICS**

Comparative evaluation of antimicrobial activity of some urine preservatives
p0132 N82-17830

Study of chlorine dioxide and its metabolites in man [PB82-109356]
p0175 N82-18863

Northern pulmonary arterial hypertension
p0061 A82-17143
Diurnal rhythm of sleep and wakefulness in arctic suslik /Citellus parryi/ during summer season
p0192 A82-25823
Physiological, hygienic and psychological questions in the adaptation of sailors to conditions of year-round arctic navigation
p0206 A82-27805
The ventilation-perfusion relation in residents of the Arctic coast of the north-east USSR
p0236 A82-31154
Stages of the adaptation of human lungs in conditions of the Far North
p0282 A82-35829
Regional changes of pulmonary functions in inhabitants of the North
p0282 A82-35830
The bioenergetics of erythrocytes in inhabitants of the North
p0282 A82-35831
Seasonal variations of human cardiorespiratory indices in the North
p0282 A82-35838
The effect of the natural and climatic conditions of the Far North on the human cardiovascular system
p0342 A82-41466

ARGON LASERS
The significance of the changes in the chorioretinal structures for the mechanism of the therapeutic action of the argon laser /experimental study/
p0410 A82-46712

ARGUMENTS (MATHEMATICS)
U INDEPENDENT VARIABLES

ARID LANDS
Seasonal vascular tension variations in patients with cerebral circulatory disorders under the conditions of an arid zone
p0189 A82-25715
Human adaptation in arid regions
p0281 A82-35820
The ultrastructure of the inner medullary substance of the kidneys in several rodents in arid zones
p0420 A82-48219

ARIP (IMPACT PREDICTION)
U COMPUTERIZED SIMULATION
U IMPACT PREDICTION

ARM (ANATOMY)
NT ELBOW (ANATOMY)
NT FOREARM
Final-position of a single degree-of-freedom tendon arm
p0185 A82-25619
The permeability of the lymphatic vessels of the muscles of the upper extremities in vibration sickness
p0190 A82-25804
Critical assessment of common methods to determine vibrational stress of hand-arm system
p0260 A82-33766
X-ray study of loaded skeletal portions in the upper extremities of athletes engaging in karate
p0325 A82-40490
Transmission of vibrations in the human extremities under vibrational loading --- Russian book
p0421 A82-48250
Determination of maximal aerobic power during upper body exercise
[AD-A111712] p0358 N82-29866

ARMED FORCES
NT ARMED FORCES (FOREIGN)
NT NAVY
Spontaneous pneumothorax in a military environment
p0233 A82-29994

ARMED FORCES (FOREIGN)
Factor calculation of the test variables in use by the legal medicine institutes of the Italian Air Force
p0167 A82-24847
In the struggle for the health of sailors
p0233 A82-30026
Perforated gastric and duodenal ulcers in servicemen
p0234 A82-30031

AROUSAL
Hypoxic arousal in intact and carotid chemodenervated sleeping cats
p0019 A82-13236
Effects of temperature on the duration of arousal episodes during hibernation
p0120 A82-21934
The physiological mechanisms of the arousal response in animals under conditions of hypobiosis
p0320 A82-40311

ARRHYTHMIA
Investigation and evaluation of cardiac arrhythmias in healthy young persons
p0110 A82-21710
The effect of motor activity on the development of cardiac arrhythmias in experimental emotional stress
p0110 A82-21713
The diving response in clinical medicine
p0194 A82-26241
Post-acceleration chaotic atrial rhythm
p0211 A82-28488
The diagnosis and treatment of heart-rhythm disorders - The role of intracardial electrophysiological investigation
p0279 A82-35676
The first clinical experience with a new Soviet antiarrhythmic drug, the diethylamine analog of ethmosine, in patients with different disorders of the heart rhythm
p0279 A82-35678
Rare cases of serious disturbances in cardiac rhythm during a hypoxic functional test
p0280 A82-35684
Electrophysical and hemodynamic factors conditioning cardiac arrhythmias during centrifuging
p0287 A82-36689
Diagnostics of disturbances of heart rhythm and conductance and their professional evaluation in flight personnel
p0319 A82-40309
The effect of diethylamine analog of ethmozine on the functional condition of myocardium /Clinical and experimental study/
p0343 A82-41488
The protective effect of psychotropic drugs diazepam, sodium hydroxybutyrate, and mebicar during experimental arrhythmia

p0413 A82-46885

Ventricular preexcitation syndromes
p0398 N82-31932

Continuous ECG registration according to the Holter method
p0399 N82-31934

ARSENIC

Survey of toxicity and carcinogenicity of mineral deposits
[DE82-003164] p0425 N82-32975

ARSENIC COMPOUNDS

NT ARSENIDES

ARSENIDES

Biological availability of nickel arsenides: Toxic effects of particulate Ni5As2
[DE82-000580] p0391 N82-30932

ARTERIES

NT AORTA

Biaxial finite deformations of arterial and venous segments under + or - G/z/ acceleration stress
p0007 A82-12036

Northern pulmonary arterial hypertension
p0061 A82-17143

The role of extracellular O2 and CO2 tensions in membrane mechanisms of cerebral arterial smooth muscle regulation
p0090 A82-19747

Parameters of the interaction of bradykinin with cardiovascular system receptors
p0095 A82-20332

The effect of blood pressure in the pulmonary artery on gas exchange in functionally heterogeneous lungs
p0112 A82-21738

Criterion for the evaluation of arterial pressure response to bicycle ergometer exercise during treatment for hypertension
p0152 A82-23267

Microcirculatory pathology under conditions of tissue arterial blood flow insufficiency
p0153 A82-23272

Response of the cat femoral artery to increased circulation rate
p0188 A82-25712

Oxygen, carbon dioxide and the calcium control of relaxation mechanisms in cerebral artery smooth muscles
p0196 A82-26754

The effects of systemic arterial and venous pressures on blood volume in the cerebral vessels
p0196 A82-26755

Arterial CO2 response to low levels of inspired CO2 in awake beagle dogs
p0197 A82-26815

Stenoses of the carotid artery and disorders of the cerebral circulation /clinical and angiographic comparisons/
p0201 A82-27752

The use of ultrasonic Doppler techniques in the diagnosis of arterial occlusions in the basis cerebri - A Doppler angiography study
p0201 A82-27756

Incidence of ischemic heart disease and arterial hypertension in sedentary workers
p0205 A82-27793

Velocity and attenuation of sound in arterial tissues
p0254 A82-32423

Thermoregulatory influences on common carotid blood flow in the dog
p0255 A82-32829

The influence of the speed of blood flow in the carotid artery on the hematocrit of the blood being delivered to the brain
p0309 A82-38550

Effect of baroreceptor denervation on +G sub z tolerance in dogs
p0328 A82-40675

Microcirculatory state in the case of chronic obliteration of arteries
p0369 A82-42626

A morphological investigation of the regulatory mechanisms of the intracerebral blood circulation
p0369 A82-42627

The morphological characteristics of the terminal respiratory bronchioles and the arteries accompanying them during individually graded muscular activity
p0420 A82-48220

Three-dimensional stress distribution in arteries: Radial compression experiments of arterial wall; stress concentration in lung near a cylindrical cavity; finite element analysis of pleural surface pressure distribution in dog's lung during electrophrenic stimulation
p0032 N82-12750

Non-invasive pulmonary arterial pressure measurement
[PB81-239410] p0083 N82-15776

Effect of prolonged hypokinesia on resistance of resistive vessels in rats
[NASA-TM-76849] p0383 N82-30878

Examining arterial function by Doppler velocimetry: The advantage in aerospace medicine
p0399 N82-31938

Respiratory adaptation to acute metabolic acidosis in goats with ablated carotid bodies
[AD-A116657] p0428 N82-33984

ARTERIOSCLEROSIS

The effects of immobilization on the development of experimental atherosclerosis in rabbits
p0054 A82-16815

Phasic energy analysis of rheoencephalograms in the detection of the decompensation of cerebral hemodynamics
p0113 A82-21754

Relation between high density lipoprotein cholesterol and coronary artery disease in asymptomatic men
p0169 A82-25134

Velocity and attenuation of sound in arterial tissues
p0254 A82-32423

Glyceroaldehyde phosphatedehydrogenase from human muscles in atherosclerosis
p0262 A82-34681

RNA-content distribution of cells from the normal and atherosclerotic human aorta
p0308 A82-38535

State of adaptation in patients with hypertension
p0324 A82-40476

The use of an audio-frequency magnetic field in certain diseases
p0343 A82-41473

Immunological reactions to lipoproteins and heparin in young men with a hereditary tendency to atherosclerosis
p0343 A82-41487

The use of biochemical monitoring methods in the ergometry of patients with atherosclerosis
p0344 A82-41494

Microcirculatory state in the case of chronic obliteration of arteries
p0369 A82-42626

Computer assessment of atherosclerosis from angiographic images
p0403 A82-45200

Immune complexes and atherosclerosis
p0410 A82-46714

Effect of restricted mobility on the composition and metabolism of blood lipoproteids in rabbits
[NASA-TM-76846] p0382 N82-30871

Effect of immobilization on the development of experimental arteriosclerosis in rabbits
[NASA-TM-76901] p0383 N82-30876

ARTHRITIS

The use of an audio-frequency magnetic field in certain diseases
p0343 A82-41473

Application of laser therapy to patients with osteoarthrosis deformans
p0343 A82-41475

Vertebral arthritis
p0361 N82-29890

Medico-legal aspect of spinal disorders in aviation medicine

ASA
U ACETYLSALICYLIC ACID

ASBESTOS
Testing and evaluation of the US Navy supplied air suit
[LA-8727-MS] p0219 N82-20677

ASCENT
NT CLIMBING FLIGHT
A study of personal physiological protection equipment for a world record balloon ascent
p0400 A82-46311

ASCORBIC ACID
Effects of ascorbic acid on the elevation of human cold tolerance
p0233 A82-30027
The assimilation of vitamin C in seamen during voyages at high latitudes
p0342 A82-41465
Metabolic changes in experimental animals as indicators of biological effects of 50 Hz electromagnetic fields
p0266 N82-24821

ASCORBIC ACID METABOLISM
The effect of potassium orotate on the metabolism of certain vitamins in patients with fractures of the long tubular bones
p0310 A82-38563
Vitamin C, B sub 1 and B sub 6 excretion in urine during 182-day antiorthostatic hypokinesia
p0131 N82-17824

ASPHYXIA
The possible mechanisms of lipid peroxidation in rat liver during the recovery period after mechanical asphyxia
p0413 A82-46883

ASPIRATION
U VACUUM

ASSAYING
Application of ATP assay technique, developed to detect extraterrestrial life, for rapid detection of human infections --- adenosine triphosphate
p0415 A82-47277

ASSEMBLING
NT ORBITAL ASSEMBLY
Preparation of ultraclean gloves for precision assembly operations
p0415 A82-47075

ASSESSMENTS
NT TECHNOLOGY ASSESSMENT
Development of the Automated Performance Assessment and Remedial Training System (APARTS): A landing signal officer training aid
[AD-A106224] p0138 N82-17873
The airline pilot's view of flight deck workload: A preliminary study using a questionnaire
[RAE-TM-FS(B)-465] p0400 N82-31945

ASSOCIATION REACTIONS
Higher integrative systems of the brain --- Russian book
p0326 A82-40642
The role of temporal overlap of visual and auditory material in dual media comprehension
[AD-A115714] p0425 N82-32978

ASSOCIATIONS
U ORGANIZATIONS

ASSUMPTIONS
Application of optimal control principles to describe the supervisory control behavior of AAA crew members
p0381 N82-30864

ASTEROID BELTS
NT ASTEROIDS

ASTEROIDS
Impact of an asteroid or comet in the ocean and extinction of terrestrial life
[NASA-CR-169086] p0293 N82-26955

ASTHMA
Hemodynamics and external respiration in patients with bronchial asthma at rest and during exercise
p0205 A82-27791
Effects of physical factors in the environments on the diurnal and seasonal periodicity of bronchial astama attacks
p0205 A82-27795

ASTIGMATISM
Prevalence of astigmatism among aviators and its limiting effect upon visual performance with the AN/PVS-5 flight vision goggles

[AD-A112836] p0300 N82-27966

Formation of prebiotic precursors from model reducing atmospheres Role of hydrogen escape

p0099 A82-20911
Photolysis of CH4-NH3 mixtures and PH3 as models for the photochemical transformations on the primitive earth and Jupiter
p0099 A82-20914
Possible role of phosphine in chemical evolution
p0099 A82-20915
Organic synthesis from reducing models of the atmosphere of the primitive earth with UV light and electric discharges
p0257 A82-33282
Model systems in photosynthesis research
[DE81-023809] p0009 N82-10706
Overview of the biomedical and environmental programs at the Oak Ridge National Laboratory
[DE81-027864] p0034 N82-12765

ATMOSPHERIC COMPOSITION
NT ATMOSPHERIC MOISTURE
Hydrazines and carbohydrazides produced from oxidized carbon in earth's primitive environment
p0021 A82-14197
Biologically damaging radiation amplified by ozone depletions
p0029 A82-15788
Atmospheres and evolution --- of microbial life on earth
p0148 A82-22981
Constraints on early life by earth's accretional and preaccretional development
p0148 A82-22986
Determination of oxygen content in air on the basis of meterological parameters /pressure, temperature, and moisture/ in order to predict the hypoxic effect of the atmosphere
p0162 A82-24534
The effect of positive and negative ions of air on the content of catecholamines in the brain and adrenal glands
p0287 A82-36690
Methane flux in the Great Dismal Swamp
p0290 A82-37423
Subjective response to negative air ion exposure
p0321 A82-40446
Planetary atmospheres and the search for life
[IAF PAPER 82-268] p0378 A82-44708
Prebiotic organic matter - Possible pathways for synthesis in a geological context
p0408 A82-46413
Cabin ozone and tropopause definition
p0220 N82-21151
Zoological effects of variations in atmospheric oxygen levels
[NASA-CR-169020] p0293 N82-26954
Exposure to atmospheric benzene vapour associated with motor gasoline
[PB82-174244] p0434 N82-34025

ATMOSPHERIC EFFECTS
Principles of biological and medical climatology --- Russian book
p0365 A82-42065

ATMOSPHERIC IMPURITIES
U AIR POLLUTION

ATMOSPHERIC IONIZATION
Removal by negative air ions of changes in mitochondrial respiration under stress
p0028 A82-15716

ATMOSPHERIC MODELS
Abiotic synthesis of phosphoric esters of monosaccharides according to the 'cold model'
p0100 A82-20923
Organic synthesis from reducing models of the atmosphere of the primitive earth with UV light and electric discharges
p0257 A82-33282

ATMOSPHERIC MOISTURE
Indicators of the erythrocytic system of rabbits in hot, humid climates
p0191 A82-25813

ATMOSPHERIC PRESSURE
Caisson disease
p0080 N82-15749
Dangers of explosive decompression
p0080 N82-15750

ATMOSPHERIC TEMPERATURE
Certain features of cerebral hemodynamics in doing mental work at different air temperatures
p0114 A82-21759
Finger temperature after a finger-cooling test - Influence of air temperature and smoking
p0256 A82-32833

ATOMIC BEAMS
Field-ion-microscope observations of radiation effects
[DE81-030934] p0076 N82-14802

ATOMIC ENERGY LEVELS
The mechanism of the interaction of the triplet state of porphyrins and phthalocyanines with electron acceptors
p0228 A82-29432

ATOMS
NT HYDROGEN ATOMS

ATP
U ADENOSINE TRIPHOSPHATE

ATROPHY
Effects of disuse by limb immobilization on different muscle fiber types
p0055 A82-16830
Recovery time course in contractile function of fast and slow skeletal muscle after hindlimb immobilization
p0197 A82-26016
Effect of limb immobilization on skeletal muscle
p0255 A82-32826
Changes in mineralized tissues in the case of calcitonin and somatotropic hormone injections under hypokinesia
p0325 A82-40503
Effect of immobilization on the nonhistone protein composition in different types of skeletal muscles
p0332 A82-40711
Immobilization effects upon aerobic and anaerobic metabolism of the skeletal muscles
p0332 A82-40712
The effects of human growth hormone administration on the functional status of rat atrophied muscle following immobilization
p0332 A82-40715
Atrophy of rat skeletal muscles in simulated weightlessness
p0335 A82-40738
Hindlimb immobilization - Length-tension and contractile properties of skeletal muscle
p0340 A82-41209
The metabolic mechanisms of several types of muscle atrophy during muscle inactivity
p0413 A82-46879
Ultrastructure of blood vessels and muscle fibers of rat skeletal muscles after flights aboard Cosmos-605 and Cosmos-782 biosatellites
p0063 N82-17835
The effect of disuse on fast and slow skeletal muscle
p0430 N82-33997

ATROPINE
Vegetative reactions to the administration of atropine and propranolol in rats that exhibit different types of behavior
p0323 A82-40463
A comparison of the antimuscarinic properties of aprophen with those of some other anticholinergic drugs
[MRL-R-794] p0221 N82-21877

ATTACK AIRCRAFT
NT A-10 AIRCRAFT
NT ALPHA JET AIRCRAFT
NT B-52 AIRCRAFT
NT F-16 AIRCRAFT
NT F-111 AIRCRAFT
NT FIGHTER AIRCRAFT
Ejection of pilots from combat aircraft
p0359 N82-29877

ATTENTION
Control and automatic processing during tasks requiring sustained attention - A new approach to vigilance
p0088 A82-19225
On the training of the sharing skills - An attention viewpoint
p0141 A82-22925
The effects of social facilitation on vigilance performance
p0146 A82-22963
New approaches to the electrophysiological characterization of vigilance behavior
p0146 A82-22965
A selective attention test as a predictor of success in flight training
p0237 A82-31388

The effects of the direction of attention on the transmission of cutaneous information --- French thesis
p0366 A82-42083
A model of the human observer and decision maker
p0046 N82-13719
Modeling human attention allocation strategies with competing criteria
[AD-A108509] p0177 N82-18875
A model of human decision making in multiple process monitoring situations
p0381 N82-30862
A model of human decision making in multiple process monitoring situations
p0440 N82-34065

ATTENUATION
NT ACOUSTIC ATTENUATION
ATTENUATORS
NT THERMISTORS
ATTITUDE (INCLINATION)
NT ROLL
Some contributions of touch, pressure and kinesthesis to human spatial orientation and oculomotor control
p0024 A82-15280
Human orientation in space
[AIAA PAPER 82-0422] p0071 A82-17940
Modifications in systolic time intervals induced by the transition to weightlessness
p0171 A82-25495
Evidence for a boundary effect in roll vection
p0212 A82-28500
Conditioned tilt naming - A modified absolute judgment method is used to measure the oblique effect
p0281 A82-35768
Contrast influence on perceived orientation --- of gratings obtained by dichoptic fusion of two monocular images
p0314 A82-38796
Gravity and the tilt aftereffect --- comparison between monocular, binocular and interocular exposures
p0318 A82-39440
Short term gravity effects on volume homeostasis in man Assessment of transvascular fluid shifts after graded tilt
p0337 A82-40760
Dynamics of the process of the determination of orientation by man
p0371 A82-43231
Phenomena of fluctuation of human reaction to antiorthostatic position
p0125 N82-16721
Psychological aspects of aerospace orientation
p0265 N82-24258

ATTITUDE CONTROL
NT DIRECTIONAL CONTROL
NT LATERAL CONTROL
NT LONGITUDINAL CONTROL
ATTITUDE GYROS
NT GYRO HORIZONS
Pilot reaction to attitude gyro failure: A flight experiment
p0381 N82-30858

ATTITUDE INDICATORS
NT GYRO HORIZONS
ATTITUDE STABILITY
NT LATERAL STABILITY
AUDIO EQUIPMENT
NT MICROPHONES
AUDIO FREQUENCIES
Peculiarities of the middle ear structure in rodents as an index of the frequency tuning of their auditory system
p0110 A82-21718
The use of an audio-frequency magnetic field in certain diseases
p0343 A82-41473
Statistical examination of hearing loss due to gunfire noise and industrial noise: Consequences for screening audiometry with fixed frequencies
[ISP-1981-20] p0273 N82-25785
AUDIO VISUAL EQUIPMENT
U TRAINING DEVICES
U VISUAL AIDS
AUDIOLOGY
Characteristics of the structure and functions of the middle ear of lizards
p0119 A82-21823
Ultrastructural organization of AI and AIV zone projections of the cat auditory cortex to the posterior colliculi of the tectum opticum
p0189 A82-25718
Signal analysis at the periphery of the auditory system --- Russian book
p0277 A82-35248
The reactions of the cat auditory cortex neurons to the electrical stimulation of nerve fibers which innervate the receptor cells of different parts of the organ of Corti in the cochlea
p0411 A82-46725

AUDIOMETRY
Poststimulatory auditory adaptation in humans according to computer audiometry
p0116 A82-21791
Methods for diagnosing hearing loss in workers exposed to high noise levels in accordance with state standards
p0116 A82-21793
Hygienic standards for industrial noise
p0116 A82-21794
The change in certain parameters of operator activity under the influence of alcohol
p0161 A82-24513
A comparative study of the effects of constant and intermittent noise on the acoustic analyzer
p0163 A82-24543
Measurements of tinnitus in transmission and perceptive deafness
p0167 A82-24845
An on-line procedure for the extraction of acoustically evoked potentials from the electroencephalogram --- German thesis
p0365 A82-41688
An investigation of the status of bone conduction audiometer calibration in the National Health Service
[NPL-AC-101] p0034 N82-12769
Temporal integration of acoustic power for interrupted stimuli at suprathreshold levels
p0135 N82-17856
Statistical examination of hearing loss due to gunfire noise and industrial noise: Consequences for screening audiometry with fixed frequencies
[ISP-1981-20] p0273 N82-25785
Initial audiometric investigations in an orbital station
p0363 N82-30277

AUDITORY DEFECTS
The functional condition of the ampullar apparatus in Meniere's disease
p0092 A82-20308
Methods for diagnosing hearing loss in workers exposed to high noise levels in accordance with state standards
p0116 A82-21793
Evaluation of the information content of the clinical signs and the probability of noise sickness
p0160 A82-24511
A comparative study of the effects of constant and intermittent noise on the acoustic analyzer
p0163 A82-24543
Measurements of tinnitus in transmission and perceptive deafness
p0167 A82-24845
A preliminary study on noise induced hearing loss in serving aircrew of Indian Air Force
p0253 A82-32289
Significance of the rehydration rate of the inner ear in the choice of method of surgical intervention in the endolymphatic system in Meniere's disease
p0261 A82-3447
Hormone levels in the blood of patients with Meniere's disease and cochleovestibulopathies
p0262 A82-3447
State of the hearing function in diesel locomotive crewmen
p0280 A82-3568
The use of trenthalum in acute vestibulocochlear disorders in patients with meningococcal infectio
p0280 A82-3568
The landing signal officer - Auditory aspects --- of aircraft carrier flight operations

p0284 A82-35910
Otoneurological symptoms and syndromes --- Russian book
p0317 A82-39286
Potential for interaction of low-level impulse and continuous noise
[AD-A109430] p0222 N82-21883
The effect of noise-induced hearing loss on the ability to understand speech
[IZF-1981-11] p0273 N82-25783
Statistical examination of hearing loss due to gunfire noise and industrial noise: Consequences for screening audiometry with fixed frequencies
[IZF-1981-20] p0273 N82-25785
Possibility of hearing loss from exposure to interior aircraft noise
[AD-A116504] p0424 N82-32973
Five-year research plan for effects of noise on health
[PB82-160972] p0425 N82-32976

AUDITORY FATIGUE
Evaluation of the information content of the clinical signs and the probability of noise sickness
p0160 A82-24511
A comparative study of the effects of constant and intermittent noise on the acoustic analyzer
p0163 A82-24543
Effect of white noise on the auditory cortex ultrastructure in rats
p0188 A82-25711
Effects of acoustic stress on rat sensorimotor cortex morphology
p0202 A82-27765
The state of hearing in pilots in civil aviation
p0240 A82-31520

AUDITORY PERCEPTION
Diurnal variation in vigilance efficiency
p0022 A82-14275
Study of the discrimination capacity of the auditory analyzer in flight personnel
p0071 A82-18523
Functional model of the conversion of stationary signals in the auditory analyzer
p0109 A82-21703
Peculiarities of the middle ear structure in rodents as an index of the frequency tuning of their auditory system
p0110 A82-21714
Auditory depth perception - Localization of nonmoving and moving sound sources
p0111 A82-21727
Cochlear analysis of sound intensity and some mechanisms of auditory sensations
p0116 A82-21792
Influence of interactions of hearing and vibratory sensations on the masking effect
p0151 A82-23254
Clinical-physiological characterization of the auditory-analyzer function of workers of various occupations at the Mikhailovskii concentration mill
p0160 A82-24503
This strange cochlea --- laboratory investigations
p0163 A82-24540
Measurements of tinnitus in transmission and perceptive deafness
p0167 A82-24845
Detection and recognition - Concurrent processes in perception
p0170 A82-25162
Investigation of the mechanism of auditory adaptation by the simultaneous recording of auditory evoked potentials of the brain and neurotropic potentials of the cochlea
p0189 A82-25714
Structural features of the receptor cells of the saccular macula of the common frog
p0228 A82-29433
A selective attention test as a predictor of success in flight training
p0237 A82-31388
Individual sensitivity to noise
p0240 A82-31521
Electrophysiological studies of the auditory-receptor function in the case of the combined injection of kanamycin and lasix
p0242 A82-31537
Signal analysis at the periphery of the auditory system --- Russian book
p0277 A82-35248
Auditory perception of radio-frequency electromagnetic fields
p0281 A82-35811
Application of xylite for the detection of labyrinthine hydrops
p0316 A82-39243
An absolute threshold in psychoacoustics
p0322 A82-40448
Characteristics of human auditory evoked potentials during the lateralization of a 'moving' auditory image
p0323 A82-40465
The effect of general vibration combined with intermittent noise on the human auditory function
p0368 A82-42615
Psychophysical characteristics of perception and bioelectric activity of the brain during micropolarization of the occipital part of the hemispheres
p0371 A82-43235
Equation counting and the interpretation of sensory data
[AD-A103924] p0010 N82-10713
Thresholds of hearing by air conduction and by bone conduction under different masking conditions
[NPL-AC-100] p0034 N82-12768
Hearing protection
[IZF-1980-2] p0084 N82-15783
Temporal integration of acoustic power for interrupted stimuli at suprathreshold levels
p0135 N82-17856
Quantification of psychoacoustic tuning curve sharpness: An analysis of frequency resolution in children and adults
p0135 N82-17857
Forward masking of auditory nerve (N sub 1) and brainstem responses (Wave V) in humans
p0136 N82-17860
Human auditory brainstem electric responses to binaural and monaural stimuli
p0136 N82-17861
The event related brain potential as an index of information processing, cognitive activity, and skill acquisition: A program basic research
[AD-A111057] p0267 N82-24827
The effect of noise-induced hearing loss on the ability to understand speech
[IZF-1981-11] p0273 N82-25783
Epidemiology feasibility study: Effects of noise on the cardiovascular system
[PB82-147752] p0301 N82-27974
The role of temporal overlap of visual and auditory material in dual media comprehension
[AD-A115714] p0425 N82-32978

AUDITORY SIGNALS
Study of the discrimination capacity of the auditory analyzer in flight personnel
p0071 A82-18523
Brain-stem auditory evoked potentials in persons with normal hearing
p0371 A82-43234
Visual/motion cue mismatch in a coordinated roll maneuver
[NASA-CR-166259] p0040 N82-13664
Forward masking of auditory nerve (N sub 1) and brainstem responses (Wave V) in humans
p0136 N82-17860
Theoretical and practical aspects of using acoustic repellants to scare birds. Part 1: Interspecificity and geographic (regional) distinctions of acoustic repellants
p0357 N82-29858

AUDITORY STIMULI
Acoustic-induced eye movements
p0069 A82-17476
Modifications of vestibular nystagmus produced by fixation of visual and nonvisual targets
p0069 A82-17477
Vestibular responses of neurons in the feline anterior suprasylvian gyrus and their interaction with responses to acoustic and facial stimuli
p0092 A82-20309
Electroencephalographic correlates of the differentiation between verbal stimuli during natural night sleep in humans

p0093 A82-20315
Poststimulatory auditory adaptation in humans according to computer audiometry
p0116 A82-21791
Detection and recognition - Concurrent processes in perception
p0170 A82-25162
Neurophysiological basis for determining the biological significance of acoustic stimuli
p0189 A82-25719
Characteristics of human auditory evoked potentials during the lateralization of a 'moving' auditory image
p0323 A82-40465
Core temperature and brainstem auditory evoked potentials as complimentary noninvasive measures of central neural function during exposure to hypergravic fields
p0338 A82-40772
Brain-stem auditory evoked potentials in persons with normal hearing
p0371 A82-43234
The vestibulo-ocular reflex in man during voluntary head oscillation under three visual conditions
p0416 A82-47334
A study of the acoustic reflex as elicited by selected environmental noise stimuli
p0135 N82-17850
Human auditory brainstem electric responses to binaural and monaural stimuli
p0136 N82-17861
Effect of caloric stimulation of vestibular system on hearing
p0349 N82-28963

AUDITORY TASKS
Development of a secondary task method for measuring operator workload. V - Measurement of pilot workload during take off and landing by C-1 jet carrier
p0025 A82-15516
Performance Evaluation Tests for Environmental Research /PETER/ - Auditory digit span task --- number sequence memory
p0142 A82-22932
Detection and recognition - Concurrent processes in perception
p0170 A82-25162
Increase in jammed word intelligibility due to training of listeners
p0193 A82-26235
The formation in human ontogeny of the ability to reproduce a given rhythm
p0240 A82-31523
Stress, information processing and diving
[IZF-1981-4] p0268 N82-24829

AUSTRALIA
Gonadal doses from radiotherapy
[ARL/TR-020] p0034 N82-12762
Genetic and mean bone-marrow doses from medical use of unsealed radioisotopes
[ARL/TR-023] p0034 N82-12763

AUTOCATALYSIS
A theory for the origin of a self-replicating chemical system. II - Computer simulation of the autogen
p0250 A82-33287

AUTOKINESIS
Visually induced self-motion sensation adapts rapidly to left-right reversal of vision
p0067 A82-17455

AUTOMATA THEORY
Control of a walking machine with almost weightless legs. II - A discrete model
p0415 A82-47095

AUTOMATIC CONTROL
NT ADAPTIVE CONTROL
NT AUTOMATIC FLIGHT CONTROL
NT DYNAMIC CONTROL
NT FEEDBACK CONTROL
NT FEEDFORWARD CONTROL
NT LEARNING MACHINES
NT NUMERICAL CONTROL
NT OPTIMAL CONTROL
NT TIME OPTIMAL CONTROL
Automatic planning of manipulator transfer movements
p0025 A82-15391
An approach to algorithms for processing data from the visual sensor of an integrated robot
p0026 A82-15681
Control and automatic processing during tasks requiring sustained attention - A new approach to vigilance
p0088 A82-19225
Development of an automatic data bank for managing physical education of students
p0118 A82-21816
The controlled cultivation of plants in an artificial medium Biotechnological foundations --- Russian book
p0170 A82-25230
Model of the mechanism of the regulation of the human cardiovascular system. I - Concerning the heart-regulation mechanism
p0197 A82-26799
Automatic system for study and measurement of vibration parameters affecting human body
p0260 A82-33765
A survey of vibration control methods
p0261 A82-33768
Synchronized nystagmus calibrator
p0280 A82-35695
An automated system for the collection and processing of cardiovascular information from athletes
p0324 A82-40484
Compilation of cell data bank for automation in diagnostic cytology
[BMFT-FB-T-80-158] p0031 N82-12742
Human control and regulation tasks
p0037 N82-12787
Supervisory control of remote manipulation: A preliminary evaluation
p0041 N82-13675
Human-machine interface issues in the Multisatellite Operations Control Center-1 (MSOCC-1)
[NASA-TM-83826] p0138 N82-17875
Display-control compatibility in 3-D displays. 1: Effects of orientation
[AD-A109421] p0219 N82-20875
A study of interactive control scheduling and economic assessment for robotic systems
[NASA-CR-168652] p0219 N82-20878
Guidelines for man-machine interface design
[VTT-RR-23/81] p0225 N82-21906
Experimental evaluation of the concept of supervisory manipulation
p0382 N82-30869
System for automatic analysis of rheoencephalograms
p0396 N82-31916

AUTOMATIC CONTROL VALVES
NT PRESSURE REGULATORS

AUTOMATIC DATA PROCESSING
U DATA PROCESSING

AUTOMATIC FLIGHT CONTROL
Cockpit automation and workload reduction - Too much of a good thing
p0192 A82-26047
Evaluation of a trajectory command concept for manual control of carrier approaches and landings
p0440 N82-34060

AUTOMATIC PATTERN RECOGNITION
U PATTERN RECOGNITION

AUTOMATIC ROCKET IMPACT PREDICTORS
U COMPUTERIZED SIMULATION
U IMPACT PREDICTION

AUTOMATIC TEST EQUIPMENT
Trial of an automated EKG analysis system in a cardiological clinic
p0052 A82-16804
A method for semi-automatic analysis of eye movements
p0288 A82-36960
Logistics support productivity improvement
p0366 A82-42196
Automated visual field screening in the flying Dutch population
p0408 A82-46535
Pressure suit joint analyzer
[NASA-CASE-ARC-11314-1] p0298 N82-26987

AUTOMATION
Information automation and the Apollo program - A retrospective
p0376 A82-44513

AUTOMOBILE ACCIDENTS
Review of literature and regulation relating to thoracic impact tolerance and injury criteria

[PB82-108697] p0128 N82-16736

**AUTOMOBILES**

Cybernetics and car driving: A mathematical (computer) model for the system to be controlled
[IZF-1980-4] p0035 N82-12775

Cybernetics and car driving: A driver model and its experimental validation
[IZF-1980-13] p0035 N82-12776

Levels of steering control: Reproduction of steering wheel movements
[IZF-1980-16] p0036 N82-12777

Cybernetics and car driving: Perspective perception and the output vector of the system to be controlled
[IZF-1980-19] p0036 N82-12778

The influence of motion cues on driver-vehicle performance in a simulator
p0042 N82-13681

A data collection scheme for identification of parameters in a driver model
p0044 N82-13696

Manual control analysis of drug effects on driving performance
p0046 N82-13709

Stability analysis of automobile driver steering control
p0047 N82-13717

Hydrogen cyanide health effects
[PB82-116039] p0176 N82-18864

Driving experience and task demands in simulator and instrumented car: A validation study
[IZF-1980-9] p0269 N82-24830

Proceedings of the Sixteenth Annual Conference on Manual Control
[NASA-CR-169243] p0379 N82-30833

Comparative evaluation of methods for the measurement of mental workload during a simple simulated car driving task
[PB-51] p0426 N82-32984

Effects of motivation on car-following
p0441 N82-34070

Levels of steering control: Reproduction of steering-wheel movements
p0441 N82-34071

Analysis of driver performance under reduced visibility
p0442 N82-34075

**AUTONOMIC NERVOUS SYSTEM**

NT SYMPATHETIC NERVOUS SYSTEM

Biogenic monoamine concentrations in autonomic nervous system ganglia during acute experimental emotional stress
p0054 A82-16817

The state of the vegetative functions during sleep
p0114 A82-21771

The relationship between cardiac and motor components of a conditioned reflex upon the local cooling of various zones of the cerebral cortex in cats
p0116 A82-21787

Acute experimental emotional stress in rabbits /physiological and cytochemical aspects/
p0119 A82-21825

The nature of autonomic effects produced by sombrevin --- during narcosis
p0187 A82-25693

The diving response in clinical medicine
p0194 A82-26241

The content of RNA in structures of the autonomic nervous system of rabbits under acute emotional stress
p0202 A82-27759

Relation of changes in autonomic reactions to the effectiveness of mental activity under conditions of emotional stress
p0236 A82-31158

Cardiac rhythm regulation at rest and during orthostasis
p0236 A82-31160

Eight-hour rhythm of autonomic regulation

## B

**B-52 AIRCRAFT**

Validating manned system design and engineering change proposals
[AD-A100997] p0022 A82-14703

The semi-automatic instructional system --- of B-52 weapon system trainers
p0095 A82-20539

**BACK INJURIES**

Retro-hyperflexion luxation - Mechanism of

cervical spinal cord contusion injury during ejection sequence p0005 A82-11032
Sequelae of spinal column traumas in aeronautical medicine p0233 A82-29997
Mechanism of vertebral fracture in the F/FB-111 ejection experience p0252 A82-32004
Physiopathology and pathology of spinal ailments in aerospace medicine [AGARD-AG-250-FR] p0011 N82-10720
F/FB-111 ejection experience (1967-1980). Part 1: Evaluation and recommendations [AD-A110199] p0222 N82-21879
Physiopathology and pathology of spinal injuries in aerospace medicine [AGARD-AG-250(ENG)] p0359 N82-29870
Theories of the pathogenesis of fractures of the spine p0359 N82-29874
Aetiology and pathogenesis --- traumatic lesions of the spine p0359 N82-29875
Helicopter accidents p0359 N82-29876
Ejection of pilots from combat aircraft p0359 N82-29877
Parachuting p0359 N82-29878
Fractures of the spine in flight p0360 N82-29880
Accidents in centrifuges and experiments (ejection seat training towers, sleds) p0360 N82-29881
Clinical examination of spinal injuries p0360 N82-29882
Radiology of spinal trauma in aviation medicine p0360 N82-29883
Analytical study of traumatic lesions of C3-C7 p0360 N82-29884
Radiological study of fractures of C1 and C2 p0360 N82-29885
Sequelae of vertebral fractures and trauma p0360 N82-29886
Backache in helicopter pilots p0360 N82-29887
The cervical column of pilots of combat aircraft p0361 N82-29888
A dynamic model of the cervical spine and head [AD-A114887] p0432 N82-34038

BACKGROUND NOISE
The effects of a light blue background on the operator visual analyzer p0052 A82-16727

BACTERIA
NT ESCHERICHIA
NT PSEUDOMONAS
NT STAPHYLOCOCCUS
NT STREPTOCOCCUS
NT STREPTOMYCETES
Comets - A vehicle for panspermia p0097 A82-20060
Carbon isotopic fractionation in the biosynthesis of bacterial fatty acids - Ozonolysis of unsaturated fatty acids as a means of determining the intramolecular distribution of carbon isotopes p0171 A82-25372
Determination of the bacterial endotoxin content of the blood of irradiated animals and humans p0188 A82-25700
Sensing of the proton potential /Delta mu H/ in Halobacterium halobium p0228 A82-29441
Disclosure of the complex structure of the absorption spectrum of bacteriorhodopsin p0231 A82-29806
The role of methylation and Ca/2+/ in the photoaxis of Halobacterium halobium p0243 A82-31598
Taxonomic relations between archaebacteria including 6 novel genera examined by cross hybridization of DNAs and 16S rRNAs p0257 A82-33276
Solar bacterial biomass farm for space vehicles p0261 A82-33895
Magnetic-field effect on photophysical processes in the light-harvesting pigment apparatus of purple photosynthetic bacteria p0264 A82-34917
Cultivation of the luminescent bacterium Photobacterium leiognathi with control by luminescence p0280 A82-35607
Contents of protein and amino acids in methanobacterial biomass p0284 A82-36011
Effect of the combined administration of antibiotic-resistant bifidobacteria and the corresponding antibiotics on the survival of irradiated mice p0311 A82-38581
Is the CH4, H2 and CO venting from submarine hydrothermal systems produced by thermophilic bacteria p0317 A82-39422
Occult bacterial persistence and resistance to colonization after antibiotic therapy p0323 A82-40460
The oxygen effect in E. coli cells. II - The role of the genotype and the suspension medium p0411 A82-46851
The effect of the dispersion of the electric parameters of bacterial cells on their orientation in an alternating electric field p0419 A82-48205
An engineering study of bacterial kinetics and energetics p0031 N82-12740
Patterns of bacterioplankton growth in the sea p0217 N82-20860
Genetic engineering possibilities for CELSS: A bibliography and summary of techniques [NASA-CR-166306] p0219 N82-20876
Primary light-harvesting system: Phycobilisomes and associated membranes [DE81-028326] p0221 N82-21874
Aspects of the body's defence mechanisms as protection against biological agents --- used in biological warfare [DRIC-T-6433] p0223 N82-21886
Some physiological and biochemical features of cells of carrot gall developed in weightlessness p0270 N82-25764

BACTERICIDES
The bactericidal activity of various clothing fabrics and dressing materials p0206 A82-27801
A method for the determination of the antimicrobial activity of clothing fabrics p0206 A82-27803
A hygienic assessment of the possibility of using 1,3-dichloro-5,5-dimethylhydantoin for disinfecting drinking water p0263 A82-34694
Occult bacterial persistence and resistance to colonization after antibiotic therapy p0323 A82-40460

BACTERIOLOGY
Effect of altitude exposure on induction of Streptococcal endocarditis in young and middle-aged rats p0073 A82-18740
Deep-sea bacteria - Isolation in the absence of decompression p0255 A82-32800
Study of the morphological and biological properties of obligate and facultative psychrophylic bacteria found in the Antarctic p0374 A82-43671
An engineering study of bacterial kinetics and energetics p0031 N82-12740
Some physiological and biochemical features of cells of carrot gall developed in weightlessness p0270 N82-25764
Effects of combination of antibiotic-resistant bifidobacteria and corresponding antibiotics of survival of irradiated mice p0430 N82-33994

BACTERIOPHAGES
Investigation of the radio-protective effect of cystamine on a model of thermally induced prophage lambda p0278 A82-35659

BAILOUT
Aerodynamic forces experienced during ejection

[AFAMRL-TR-80-16] p0246 N82-22878
Torso experienced aerodynamic forces experienced during ejection
[AD-A098942] p0267 N82-24823
Limits of human tolerance for impacts in free fall
p0360 N82-29879
BALANCE
Positions, movements and equilibrium of rats after flights aboard biosatellites
p0124 N82-16713
BALANCING
The effects of a flashing light on the spectral composition of brain biopotentials and the biomechanical effectiveness of balancing
p0166 A82-24837
The regulation of equilibrium in humans on a small supporting surface
p0420 A82-48210
BALLISTIC MISSILE SUBMARINES
Work and rest on nuclear submarines
p0021 A82-14274
BALLISTIC TRAJECTORIES
Modeling human tracking error in several different anti-tank systems
p0044 N82-13699
On the internal target model in a tracking task
p0044 N82-13700
BALLISTOCARDIOGRAPHY
Three-dimensional ballistocardiography in weightlessness
p0174 N82-18262
Ballistocardiography: A nonintrusive method moving towards clinical applications
p0400 N82-31940
BALLOON FLIGHT
A study of personal physiological protection equipment for a world record balloon ascent
p0408 A82-46311
Proliferation kinetics of Paramecium Tetraurelia in balloon-borne experiments
p0416 A82-47332
BALLOONS
NT HIGH ALTITUDE BALLOONS
BANDPASS FILTERS
NT TRACKING FILTERS
Expansion of the experimental possibilities of evaluating cardiac output by means of integral rheography using a high-pass filter
p0185 A82-25677
BANDWIDTH
Visual/motion cue mismatch in a coordinated roll maneuver
[NASA-CR-166259] p0040 N82-13668
BANKING FLIGHT
U TURNING FLIGHT
BARDEEN APPROXIMATION
U SURFACE PROPERTIES
BAROMETRIC PRESSURE
U ATMOSPHERIC PRESSURE
BARORECEPTORS
Cardiovascular reflexes during rest and exercise modified by gravitational stresses
p0057 A82-16932
Summated circulatory responses of thermal and baroreflexes in humans
p0120 A82-21933
Modulation of human sinus node function by systemic hypoxia
p0197 A82-26812
Effects of horizontal body casting on the baroreceptor reflex control of heart rate
p0285 A82-36033
Baroreflex regulation of hemodynamics under orthostatic effects /an investigation with a mathematical model/
p0306 A82-38162
Effect of baroreceptor denervation on +G sub z tolerance in dogs
p0328 A82-40675
BAROTRAUMA
Surgical treatment of recurrent frontal sinus barotrauma - A case report
p0073 A82-18743
Laryngocele and barotraumatism
p0408 A82-46310
BARYCENTER
U CENTER OF GRAVITY
BASES (CHEMICAL)
Investigation of correlations between chemical parameters of metal ions and acute toxicity in mice and Drosophila
[DE82-001451] p0423 N82-32966
BEAMS (RADIATION)
NT ATOMIC BEAMS
NT ELECTRON BEAMS

U SYNCHRONISM
BED REST
Status of vestibular function after prolonged bedrest
p0058 A82-16940
Cardiac function in surgical tuberculosis patients under conditions of prolonged bed rest
p0161 A82-24519
Induced venous pooling and cardiorespiratory responses to exercise after bed rest
p0256 A82-32842
Investigation of the combined effects of bedrest and mild hypoxia
p0283 A82-35905
Effect of orthostatic stress on exercise performance after bedrest
p0283 A82-35907
Effects of prolonged bedrest in antiorthostatic position on rCBF measured by 133Xe inhalation technique - Effects of clonidine --- regional Cerebral Blood Flow
p0335 A82-40743
Cardiovascular effects of Clonidine during 20 hours head down tilt /-5 deg/
p0337 A82-40764
Cardiovascular effects of simulated zero-gravity in humans
[IAF PAPER 82-189] p0414 A82-46977
Physiological responses to prolonged bed rest and fluid immersion in man: A compendium of research (1974 - 1980)
[NASA-TM-81324] p0174 N82-18854
BEDDING EQUIPMENT
A criterion for the disposal of M58 sleeping bags
[IZF-1979-15] p0084 N82-15782
BEECH AIRCRAFT
U BEECHCRAFT AIRCRAFT
BEECHCRAFT AIRCRAFT
General aviation cockpit design features related to inadvertent landing gear retraction accidents
p0405 A82-46259
BEES
Chronic exposure of a honey bee colony to 2.45 GHz continuous wave microwaves
p0022 A82-14347
Survival, development, and teratology of honey bee brood /Apis mellifera L./ following exposure to 2.45 GHz continuous wave radiation
p0022 A82-14348
BEHAVIOR
NT HUMAN BEHAVIOR
The dynamics of forming a prediction system in goal-directed behavior
p0111 A82-21730
Change in the nature of the psychotropic effect on the emotional reactivity and behavior in stress situations depending on the state of the catecholaminergic systems of the brain
p0112 A82-21739
Vegetative reactions to the administration of atropine and propranolol in rats that exhibit different types of behavior
p0323 A82-40463
Higher integrative systems of the brain --- Russian book
p0326 A82-40642
Temperature and behavioral responses of squirrel monkeys to 2Gz acceleration
p0338 A82-40774
Contingent decision behavior: A review and discussion of issues
[AD-A111655] p0273 N82-25787
USSR report. Life sciences biomedical and behavioral sciences, no. 16
[JPRS-80789] p0351 N82-28977
Orienting and exploratory behavior of gray rat in open field. Zoopsychological analysis
p0352 N82-28981

Theoretical and practical aspects of using acoustic repellants to scare birds. Part 1: Interspecificity and geographic (regional) distinctions of acoustic repellants
p0357 N82-29858
An experimental study of human pilot's scanning behavior
p0379 N82-30841
A computer simulation approach to measurement of human control strategy
p0380 N82-30843
Plastic properties of motivation as prime component in systemic organization of purposeful behavioral acts
p0391 N82-30937
Dosimetric and behavioral analysis of microwave-drug synergistic effects on operant behavior in the rat
[AD-A115115] p0429 N82-33986
On the modelling of creative behavior
[AD-A116896] p0435 N82-34027
BENCHES
U SEATS
BENDS (PHYSIOLOGY)
U DECOMPRESSION SICKNESS
BENZENE
Evaluation of immunological methods for toxicity studies in animals: Inhalation studies with benzene and halothane in rats
[MBL-1980-4] p0266 N82-24814
Inhalation studies with benzene in rats. Part A: Toxicological data
p0266 N82-24815
BENZENE POISONING
Evaluation of immunological methods for toxicity studies in animals: Inhalation studies with benzene and halothane in rats
[MBL-1980-4] p0266 N82-24814
Inhalation studies with benzene in rats. Part B: Immunological data
p0266 N82-24816
An industrial hygiene evaluation of aircraft refueling inside closed aircraft shelters at elevated ambient temperatures
[AD-A114396] p0353 N82-28994
Exposure to atmospheric benzene vapour associated with motor gasoline
[PB82-174244] p0434 N82-34025
BETA PARTICLES
Chirality of electrons from beta-decay and the left-handed asymmetry of proteins
p0021 A82-13845
Asymmetrical radical formation in beta-irradiated D- and L-alanines
p0103 A82-20949
Beta decay and the origins of biological chirality - Theoretical results
p0290 A82-37421
BEVERAGES
The effectiveness of perspiration in a hot environment
p0307 A82-38178
BIAS
NT RESPONSE BIAS
Performance test objectivity: A comparison of rater accuracy and reliability using three observation forms
[AD-A111077] p0301 N82-27977

Aerospace Medicine and Biology: A continuing bibliography with indexes
[NASA-SP-7011(234)] p0397 N82-31922
Aerospace medicine and biology. A continuing bibliography with indexes, supplement 235, August 1982
[NASA-SP-7011(235)] p0430 N82-33995
BICYCLE
The application of bicycle ergometry to the early detection of ischemic heart disease
p0115 A82-21775
A hand-operated electric bicycle ergometer
p0158 A82-24486
BIFURCATION (BIOLOGY)
Computerized ultrasonic arteriography - A new technique for imaging the carotid bifurcation
p0257 A82-32880
BINARY CODES
INTDOS: A computer code for estimating internal radiation dose using recommendations of the International Commission on Radiological Protection
[DE82-000507] p0075 N82-14799
BINAURAL HEARING
Human auditory brainstem electric responses to binaural and monaural stimuli
p0136 N82-17861
BINDING
The effects of Li, Rb, and temperature on the binding of Na and K by glycerinated frog muscle fibers
p0419 A82-48206
BINOCULAR VISION
The effects of binocular and motion-generated information on the perception of depth and height
p0019 A82-13423
Binocular counterrolling in humans with unilateral labyrinthectomy and in normal controls
p0064 A82-17434
Natural retinal image motion - Origin and change
p0066 A82-17452
A computational model of binocular depth perception
p0264 A82-34834
Contrast influence on perceived orientation --- of gratings obtained by dichoptic fusion of two monocular images
p0314 A82-38796
Gravity and the tilt aftereffect --- comparison between monocular, binocular and interocular exposures
p0318 A82-39440
An analysis and modeling of the binocular system in human sagittal vision --- French thesis
p0366 A82-42090
Threshold models of spatial vision
p0371 A82-43230
Absence of depth processing in the large-frame rod-and-frame effect --- human space perception
p0378 A82-44823
Inhibition of the rod-and-frame effect by circular contours --- human depth perception
p0378 A82-44824

BIOACOUSTICS

Lack of effect of pulsed ultrasound on the mammalian EEG
p0005 A82-11030

Auditory depth perception - Localization of nonmoving and moving sound sources
p0111 A82-21727

Features of the reaction to noise of the spinal capillaries of white rats
p0114 A82-21767

Characteristics of the structure and functions of the middle ear of lizards
p0119 A82-21823

Evaluation of certain indices used in experimental and field conditions to detect the effects of noise
p0188 A82-25703

Neurophysiological basis for determining the biological significance of acoustic stimuli
p0189 A82-25719

Velocity and attenuation of sound in arterial tissues
p0254 A82-32423

Histoenzymological changes in experimental animals exposed to variable noise
p0311 A82-30577

An on-line procedure for the extraction of acoustically evoked potentials from the electroencephalogram --- German thesis
p0365 A82-41688

Potential for interaction of low-level impulse and continuous noise
[AD-A109430] p0222 N82-21083

Variations in noise dosimeter readings of fluctuating noise
[AD-A115763] p0431 N82-34002

BIOASSAY

An attempt at the classification of 'patient pharmacokinetic capacities'
p0310 A82-30562

Inborn anemias in mice
[DE81-029128] p0075 N82-14795

Evaluation of short-term bioassays to predict functional impairment. development of pulmonary bioassays in small animals: Directory of Institutions; individuals involved in utilization
[AD-A103767] p0075 N82-14798

Elemental analysis of samples of biological origin relative to their protein content by means of charged particle bombardment
[KFKI-1981-26] p0269 N82-25752

Freeze-thaw induced damage to endothelial cells in vitro. 1. Development of a suitable system
[AD-A111074] p0293 N82-26957

Modification of method for assaying ozone by the diacetyl dihydrolutidine reaction
p0351 N82-28973

Investigation on the carcinogenic effect of trichlorethylene by inhalation and mechanisms of metabolic bioactivation
[BMFT-FB-HA-82-007] p0391 N82-30933

BIOASTRONAUTICS

Advanced Microbial Check Valve development --- for Space Shuttle
[ASME PAPER 81-ENAS-45] p0005 A82-10929

Human factors of outer space production --- Book
p0029 A82-15851

Basic environmental problems of man in space; Proceedings of the Sixth International Symposium, Bonn, West Germany, November 3-6, 1980
p0056 A82-16926

U.S. manned space flight: The first twenty years - A biomedical status report
p0056 A82-16927

Summary of experiments onboard Soviet biosatellites
p0056 A82-16929

U.S. biological experiments in space
p0056 A82-16930

Hematological and immunological changes during space flight
p0057 A82-16937

Coping with space motion sickness in Spacelab missions
p0058 A82-16939

Pathophysiology of motor functions in prolonged manned space flights
p0058 A82-16945

Bone effects of space flight - Analysis by quantum concept of bone remodelling
p0059 A82-16947

Biomedical aspects of artificial gravity
p0059 A82-16951

Trends in space life support
p0059 A82-16953

Future investigations onboard Soviet biosatellites of the Cosmos series
p0060 A82-16954

Experimental biology and medicine in space
p0060 A82-17123

Man in weightlessness - Physiological problems, clinical aspects, prevention and protection
p0167 A82-24046

Modifications in systolic time intervals induced by the transition to weightlessness
p0171 A82-25495

Problems of the development of life support and safety assurance system for space crews
p0190 A82-27518

Space biology and medicine

Activities of the Institute for Research in Molecular Biology
p0424 N82-32969
USSR Report: Life sciences. Biomedical and behavioral sciences
[JPRS-81775] p0429 N82-33988
New data on metabolism and action mechanism of mycotoxins
p0429 N82-33989

BIOCLIMATOLOGY
Features of biorhythms for patients with chronic nonspecific pulmonary diseases during adaptation to the climato-geographic conditions of the Crimea
p0162 A82-24535
Population mechanisms of adapting to extreme environmental conditions /with Clethrionomys glareolus Schreb considered as an example/
p0187 A82-25692
Seasonal vascular tension variations in patients with cerebral circulatory disorders under the conditions of an arid zone
p0189 A82-25715
Indicators of the erythrocytic system of rabbits in hot, humid climates
p0191 A82-25813

Results of the treatment of patients with chronic bronchitis at health resorts in contrasting climatic zones during different seasons
p0192 A82-25825

Effects of physical factors in the environments on the diurnal and seasonal periodicity of bronchial asthma attacks
p0205 A82-27795

Thermal shock and gene operation
p0234 A82-30302

The effect of the natural and climatic conditions of the Far North on the human cardiovascular system
p0342 A82-41466

Principles of biological and medical climatology --- Russian book
p0365 A82-42065

Study of the morphological and biological properties of obligate and facultative psychrophylic bacteria found in the Antarctic
p0374 A82-43671

BIOCOMPATIBILITY

Disturbances in biological rhythms as a result of a conflict of incompatible stimuli
p0111 A82-21720

BIOCONTROL SYSTEMS

A chamber design for closed ecological systems research
[ASME PAPER 81-ENAS-37] p0004 A82-10923

An approach to the preliminary evaluation of Closed-Ecology Life Support System /CELSS/ scenarios and control strategies
[ASME PAPER 81-ENAS-38] p0004 A82-10924

EEG-correlates of training in the voluntary control of heart rate in man
p0026 A82-15703

The role of biofeedback in the adaptive regulation of pathological bioelectric brain activity
p0094 A82-20328

Pulmonary shunting and its regulation
p0111 A82-21720

A histochemical investigation of the microvascular effectors regulating the supply of blood to the cerebral cortex
p0112 A82-21744

A three-dimensional model for the arrangement of the vascular and tubular components of the renal osmoregulatory apparatus
p0113 A82-21745

Respiratory regulation --- Russian Book
p0139 A82-22400

The statistical structure of EEG rhythm interaction and individual features of brain autoregulation mechanisms
p0157 A82-23643

Directed training of wrestlers in the biofeedback control of physical work intensity according to heat rate
p0158 A82-24480

The role of proprioceptive afferentation in maintaining the equilibrium of unstable mechanical systems
p0166 A82-24838

Final-position of a single degree-of-freedom tendon arm
p0185 A82-25619

Corrective saccades - Effect of shifting the saccade goal
p0185 A82-25647

Comments on the theory for the accuracy of rapid motor acts of Schmidt et al
p0187 A82-25691

The participation of estradiol and progesterone in animal body mass regulation mechanisms
p0189 A82-25801

Regulation of heart rhythm in depressor baroreflex
p0190 A82-25812

Model of the mechanism of the regulation of the human cardiovascular system. I - Concerning the heart-regulation mechanism
p0197 A82-26799

Electromyographic pattern of muscular activity during pushing-off and methods for its directed correction in young ski-jumpers on a trampoline
p0203 A82-27776

Chemoreceptor involvement in cortisol responses to hypoxia in ventilated dogs
p0231 A82-29572

The voluntary regulation of heart rate
p0236 A82-31161

Psychosomatic self-regulation - An effective method for sustaining pilot work capacity during a prolonged flight
p0259 A82-33727

Regulation of the functional activity of stem cells which are the precursors of granulomonopoiesis by polypeptide thymic and bone marrow factors
p0262 A82-34684

The nervous regulation of the liquid state of the blood and its coagulation
p0263 A82-34697

Cultivation of the luminescent bacterium Photobacterium leiognathi with control by luminescence
p0280 A82-35687

The cortical regulation of human motion --- Russian book
p0316 A82-39283

Systemic mechanisms of homeostasis
p0317 A82-39417

The contraction, regulation, and functional role of lymph vessels
p0367 A82-42603

A morphological investigation of the regulatory mechanisms of the intracerebral blood circulation
p0369 A82-42627

Computer simulation of respiratory control system
p0371 A82-43145

Regulation of circadian rhythmicity
p0372 A82-43383

The intracentral connections of the brain structures participating in cardiovascular control
p0372 A82-43627

The role of the integrity of the central synaptic and direct influences in the regulation of hemodynamics
p0373 A82-43628

The adaptive control of vegetative processes --- biofeedback control of cardiovascular system
p0374 A82-43652

Factors inducing periodic breathing in humans - A general model
p0375 A82-44140

BIODEGRADATION

Mitigation of biofouling using coatings
[DE81-027900] p0038 N82-13647

Ecological and technological problem of biodamages
p0082 N82-15766

Fifth International Biodeterioration Symposium
[AD-A109858] p0213 N82-20833

BIODYNAMICS

Concerning a model of human activity
p0050 A82-16704

Possible model representations of the neurophysiological mechanisms for the analysis of the direction and speed of a moving visual object
p0053 A82-16807

A modified kinetic model of muscular contraction
p0054 A82-16818

The effects of hypokinesia in primates and bone strength
p0059 A82-16946

A physical model of human postural dynamics
p0069 A82-17478

Functional characteristics of receptors connected with sustaining the flight of the roach Periplaneta Americana L
p0110 A82-21716

The influence of the type of trophic interactions on the dynamics of a two-level ecosystem
p0190 A82-25803

Diffusion model of the dynamics of initial fibroblast attachment
p0200 A82-27740

A model of the dynamics of athlete condition during the yearly cycle and its role in the management of training
p0204 A82-27780

A mathematical model of the dynamics of the inner ear
p0227 A82-29153

Man under vibration: Suffering and protection --- Book
p0259 A82-33751

Effect of base oscillations on the human skeletal muscle and joint forces in a standing posture
p0259 A82-33754
Mechanoreceptor systems of the organism from the viewpoint of vibrational biomechanics
p0259 A82-33755
Immediate effects of vibration transmitted to the hand
p0260 A82-33756
The determination of the equivalent biomechanical characteristics of the ankle joint muscles by vibration tests
p0260 A82-33760
Non-linear effects connected with the spatial vibrations of biomechanical systems
p0260 A82-33763
Variation of the biomechanical characteristics of an 800-m run under the influence of fatigue
p0279 A82-35671
Discriminative biomechanical characteristics in middle-distance running
p0279 A82-35672
An empirical equation of elementary motion --- of human body
p0279 A82-35674
Gravitational scale effects --- moving organism performance as function of gravity and size
p0326 A82-40650
Dynamics of weight loss during prolonged spaceflight
p0328 A82-40673
An investigation of the mechanical meaning of the surface electromyogram --- French thesis
p0365 A82-42078
The relationship between postural components and voluntary movement
p0372 A82-43239
Internal stresses and contractility of myocardium
p0372 A82-43513
The age-related changes of biochemical and biomechanical parameters of human sclera in normal and myopic individuals
p0410 A82-46713
The elasticity of the foot during the modelling of human movement
p0420 A82-48211
The changes in the mechanical properties of the brain during the development of edema induced by repeated venous congestions
p0420 A82-48216
An engineering study of bacterial kinetics and energetics
p0031 N82-12740
User's guide to BIODYN-80: An interactive software package for modeling biodynamic feedthrough to a pilot's hands, head and eyes
[AD-A104933] p0037 N82-12786
Determination of efficient methods of lift by comparing trained and untrained male and female lifters
[AD-A100349] p0038 N82-13650
NASA biomedical Applications Team Advisory Center for Medical Technology and Systems
[NASA-CR-166755] p0082 N82-15770
F/FB-111 ejection experience (1967-1980). Part 1: Evaluation and recommendations
[AD-A110199] p0222 N82-21879
Physical testing of polymers for use in circulatory assist devices
[PB82-127069] p0223 N82-21888
Preliminary study of the effects of prolonged acceleration on spinal dynamics of baboons. 1: Acceleration. 2: Biomechanical analysis
[AD-A101766] p0245 N82-22871
Fracture and viscoelastic characteristics of the human cervical spine kinematics of the 3 actuator system
[AD-A110980] p0299 N82-27965
Simulation of the motion of the center of mass of an occupant under ejection accelerations
[AD-A113806] p0352 N82-28989
Task analysis and the ability requirements of tasks: Collected papers
[AD-A111181] p0354 N82-29000
Biomechanical analysis of tasks involving manual materials handling
[AD-A113955] p0355 N82-29009
Physiopathology and pathology of spinal injuries in aerospace medicine
[AGARD-AG-250(ENG)] p0359 N82-29870
Biomechanics of the spine
p0359 N82-29872
A software package for evaluating the transmissibility between vehicle vibration and motions of hands (in controls), limb, head and eyes
p0380 N82-30853
Status and prospects of research on biological and therapeutic effects of magnetic fields
p0386 N82-30901
Diffusion mediated localization on membrane surfaces
[NASA-CR-166386] p0393 N82-31088
Geometrical considerations in the separation of biological particles by affinity partitioning
p0402 N82-32069
A dynamic model of the cervical spine and head
[AD-A114887] p0432 N82-34008
Dynamic response of vertebral elements response of the intervertebral joint to torsion
[AD-A115125] p0433 N82-34016
Biodynamic data bank feasibility study
[AD-A117921] p0434 N82-34020
Description/demonstration of BIODYN-80. A software package for evaluating the transmissibility between vehicle vibration and motions of hands (in controls), limbs, head and eyes
p0439 N82-34057
Repeated measures of human performance: A bag of research tools
[AD-A113954] p0444 N82-34084

BIOELECTRIC POTENTIAL
Dipole localization of average and single visual evoked potentials
p0071 A82-17570
Functional model of the temporal and amplitude characteristics of the cardiac electric field
p0072 A82-18699
Analysis of the electrographic correlates of thought activity
p0165 A82-24832
The effects of a flashing light on the spectral composition of brain biopotentials and the biomechanical effectiveness of balancing
p0166 A82-24837
Detection and recognition - Concurrent processes in perception
p0170 A82-25162
Intracellular local changes in resistance in muscle fibers as a function of membrane potential
p0200 A82-27736
Gramicidin A-induced conductance of the muscle fiber membrane
p0313 A82-38605
Changes in the human visually evoked cortical potential in response to chromatic modulation of a sinusoidal grating
p0314 A82-38795
Characteristics of human auditory evoked potentials during the lateralization of a 'moving' auditory image
p0323 A82-40465
Changes of intracellular rest potential and the length of isolated muscle under different loads
p0324 A82-40480
Core temperature and brainstem auditory evoked potentials as complimentary noninvasive measures of central neural function during exposure to hypergravic fields
p0338 A82-40772
On the observability of electrical cardiac sources --- Thesis
p0341 A82-41450
An investigation of the mechanical meaning of the surface electromyogram --- French thesis
p0365 A82-42078
Brain-stem auditory evoked potentials in persons with normal hearing
p0371 A82-43234
The role of the extrapolation and dynamic stereotype in the mechanism of the formation and improvement of adequate motor coordination
p0374 A82-43651
The mechanism of the activating effect of anti-cardiac antibodies on the electrical and contractile activity of myocardial cells
p0374 A82-43665
Steady state visual evoked potentials in the alert primate

p0403 A82-45673
Bioelectrochemical activity of the brain --- Russian book
p0421 A82-48249
BIOELECTRICITY
The effect of adrenergic substances on cardiac activity and brain electrical activity in the rabbit under hypoxia
p0007 A82-12299
Mechanisms of temporal discrimination in the visual analyzer
p0028 A82-15714
The role of biofeedback in the adaptive regulation of pathological bioelectric brain activity
p0094 A82-20328
Electroencephalographic correlates of the hemispheric functional asymmetry in the human brain
p0106 A82-21454
The effects of emotional activation on the spatial synchronization of human brain biopotentials
p0116 A82-21785
The influence of physical stress on the dynamics of work capacity and electrical activity of skeletal muscles in the course of an entire day
p0154 A82-23284
Intraretinal recordings of slow electrical responses to steady illumination in monkey - Isolation of receptor responses and the origin of the light peak
p0185 A82-25649
Dynamics of brain cell oxygen tension and electrical activity in the norm and in hypoxia
p0186 A82-25678
The sensitivity of silent and spontaneously active cat cerebral cortex neurons to anoxia
p0195 A82-26751
Effect of air ions on the ratio between direct and reverse electron transport in mitochondria under stress
p0199 A82-27731
Electrophysiological studies of the auditory-receptor function in the case of the combined injection of kanamycin and lasix
p0242 A82-31537
Characteristics of brain electric activity in different otoneurologic syndromes with vestibular asymmetry
p0280 A82-35693
The effect of acute hypoxia on the EEG and unit impulse activity of neurons of different brain structures in rats
p0286 A82-36172
The impulse activity of neurons in the nodose ganglion during acute hemodynamic and respiratory disorders
p0309 A82-38546
Ion currents through a neuron membrane during the injection of cyclic nucleotides

Biochemical keys to the emergence of complex life
p0149 A82-22996
Gravity, lignification, and land plant evolution
p0149 A82-22997
Evolution of man and its implications for general principles of the evolution of intelligent life
p0149 A82-22998
The effect of the evolution of inherited characteristics on the stability of a predator-prey system - A mathematical model
p0162 A82-24538
Biochemical evolution --- Book
p0170 A82-25220
Copolyamino acid fractionation and protobiochemistry
p0195 A82-26589
Properties of stable dissipative structures in mathematical models of morphogenesis
p0200 A82-27741
The role of membrane structures in the formation of the myofibrillar system in myogenesis
p0200 A82-27743
How life began --- international symposium
p0207 A82-28094
Symbiosis in cell evolution: Life and its environment on the early earth --- Book
p0207 A82-28113
Molecular relationships between closely related strains and species of nematodes
p0208 A82-28228
Comparative biosequence metrics --- molecular evolution
p0208 A82-28230
The current status of REH theory --- Random Evolutionary Hits in biological molecular evolution
p0208 A82-28231
Mass mortality and its environmental and evolutionary consequences --- at end of Cretaceous period
p0227 A82-28596
Taxonomic relations between archaebacteria including 6 novel genera examined by cross hybridization of DNAs and 16S rRNAs
p0257 A82-33276
A theory for the origin of a self-replicating chemical system. II - Computer simulation of the autogen
p0258 A82-33287
Studies on structure and function of chloroplasts - Reconstitution of photophosphorylation activity by combining the deficient membranes of chloroplasts with crista membrane fragments of mitochondria
p0259 A82-33595
Evolutionary significance of the adaptation of animals to heat
p0278 A82-35663
Beta decay and the origins of biological chirality - Experimental results
p0290 A82-37420
Beta decay and the origins of biological chirality - Theoretical results
p0290 A82-37421
Clay and the origin of life
p0305 A82-38115
Evolution of major metabolic innovations in the Precambrian
p0305 A82-38121
Chemical evolution and the origin of life - Bibliography Supplement 1980

p0305 A82-38122
Cellular aspects of gravitational biology
p0336 A82-40754
Embryonic development during chronic acceleration
p0337 A82-40755
Evolution of early mechanisms of translation of genetic information into polypeptides
p0341 A82-41324
A protective function of the coacervates against UV light on the primitive earth
p0403 A82-45592
The problem of aging and death in modern biology
p0414 A82-46895
Historico-epistemological analysis of the concept of 'tissue'
p0420 A82-48218
Life in the Universe
[NASA-CP-2156] p0220 N82-20884
Numerical methods for inferring evolutionary trees
[DE82-002295] p0248 N82-23971
Publications of the exobiology program for 1981: A special bibliography
[NASA-TM-84895] p0299 N82-26995

BIOLOGICAL MODELS
U BIONICS

BIOLOGICAL MODELS (MATHEMATICS)
A discrete model of the circadian kinetics of human bone marrow
p0027 A82-15704
Possible model representations of the neurophysiological mechanisms for the analysis of the direction and speed of a moving visual object
p0053 A82-16807
A modified kinetic model of muscular contraction
p0054 A82-16818
Analysis of retinal work in the discrimination of a contour signal
p0054 A82-16819
Model for the perception of moving and fixed objects
p0054 A82-16820
A physical model of human postural dynamics
p0069 A82-17478
Functional model of the temporal and amplitude characteristics of the cardiac electric field
p0072 A82-18699
Problems of the regulation of hemodynamics during a passive orthostatic test - Study of a mathematical model
p0072 A82-18700
EEG description algorithm for use in clinical practice and studies of work capacity
p0092 A82-20304
Models of a functional lapse in one hemisphere and of the neuropharmocological effects on the deep structures of the brain
p0094 A82-20325
The use of linear models for EEG analysis
p0094 A82-20326
The myenteric plexus - Basic principles of modeling neuronal organization
p0095 A82-20337
Competition, coexistence and irreversibility in models of early molecular evolution
p0103 A82-20951
The origin and evolution of the genetic code
p0103 A82-20956
A mathematical model of cell populations with stem cells
p0109 A82-21702
The relationship between carbohydrate and lipid metabolisms in muscle cell energetics under the influence of ATPase loading - Mathematical model
p0109 A82-21706
The possibility of using mathematical methods for predicting the results of the surgical treatment of patients with vasorenal hypertension
p0109 A82-21709
The mathematics of immunity --- response to viral intrusion
p0119 A82-21824
A computational model for expiratory flow
p0119 A82-21929
Theories of vigilance - A modern perspective
p0146 A82-22964
Modeling interactions between protein molecules Investigating complexes of indole and its derivatives through infrared spectroscopy
p0153 A82-23274
The effect of the evolution of inherited characteristics on the stability of a predator-prey system - A mathematical model
p0162 A82-24538
Psychophysical studies of perception and memory --- Russian book
p0167 A82-24901
Problems of the psychic reflection of the properties of the objective world on the sensory-perception level
p0167 A82-24902
Mathematical models of detection and discrimination --- in psychophysics
p0167 A82-24903
Scales of subjective intensities and judgment processes
p0167 A82-24904
Selective visual adaptation and the feature model
p0168 A82-24906
Mechanisms of motion sickness
p0171 A82-25497
Comments on the theory for the accuracy of rapid motor acts of Schmidt et al
p0187 A82-25691
The influence of the type of trophic interactions on the dynamics of a two-level ecosystem
p0190 A82-25803
Theoretical and experimental analysis of material turnover in a closed microecosystem. I - Construction of a mathematical model
p0191 A82-25821
Statistical mechanics of biomembrane phase transition. I - Excluded volume effects of lipid chains in their conformation change
p0199 A82-27561
A bilocal model of a dissipative structure --- in ecosystems
p0199 A82-27726
The possible role of hydrogen bonds in the mechanism of muscular contraction
p0200 A82-27738
Diffusion model of the dynamics of initial fibroblast attachment
p0200 A82-27740
Properties of stable dissipative structures in mathematical models of morphogenesis
p0200 A82-27741
Central pain mechanisms
p0204 A82-27788
Mathematical modeling of microhemodynamics in the resistant part of the regional vascular bed
p0205 A82-27790
Mathematical modeling and analysis of death dynamics in irradiated mouse populations
p0206 A82-27809
Some neurophysiological correlates of visual perception
p0209 A82-28455
A mathematical model of the dynamics of the inner ear
p0227 A82-29153
A stochastic model of a human operator in the manual control of a dynamic system
p0229 A82-29469
Competition between algae in a flow system
p0240 A82-31517
Mechanism for fluctuations in cell cycle duration
p0241 A82-31529
Experimental model with a supplementary source of endogenous serotonin
p0241 A82-31534
A computer linear regression model to determine ventilatory anaerobic threshold
p0257 A82-32843
Effect of base oscillations on the human skeletal muscle and joint forces in a standing posture
p0259 A82-33754
Mechanoreceptor systems of the organism from the viewpoint of vibrational biomechanics
p0259 A82-33755
Dynamic modeling and vibratory response of human subjects in heave mode
p0260 A82-33761
Some problems of identification and modelling of the human body
p0260 A82-33762
Comparative study of the gas-transport characteristics of models of an extraerythrocytic oxygen carrier

p0262 A82-34680
A computational model of binocular depth perception
p0264 A82-34834
Signal analysis at the periphery of the auditory system --- Russian book
p0277 A82-35248
Modeling of the recovery of cells from radiation damage and the principle of effective-dose reduction. I - Models of the recovery of cells after acute irradiation
p0278 A82-35657
An empirical equation of elementary motion --- of human body
p0279 A82-35674
Parameters of ventilatory and gas exchange dynamics during exercise
p0285 A82-36031
Baroreflex regulation of hemodynamics under orthostatic effects /an investigation with a mathematical model/
p0306 A82-38162
Selecting optimal conditions for heart conservation in weak aldehyde solutions by using mathematical methods of experimental design
p0308 A82-38534
Thermodynamic parameters characterizing interaction between polymer-absorbed ligand molecules
p0313 A82-38609
Absorption characteristics of prolate spheroidal models exposed to the near fields of electrically small apertures
p0314 A82-38802
On the mathematical modelling of microbial age dynamic and some control aspects of microbial growth processes
p0314 A82-38823
Systemic mechanisms of homeostasis
p0317 A82-39417
Model of the accommodative mechanism in the human eye
p0318 A82-39432
Modeling and simulation in the study of certain biological systems
p0319 A82-39570
Increasing the efficiency of running on the basis of learning algorithms and information tools
p0324 A82-40480
Gravitational scale effects --- moving organism performance as function of gravity and size
p0326 A82-40650
A new rat model simulating some aspects of space flight
p0326 A82-40655
Running in circles --- track radius effects on human running speed
p0327 A82-40661
Gravity sensing, polar transport and cytoplasmic streaming in plant cells
p0328 A82-40667
A new rat model for studies of hypokinesia and antiorthostasis
p0331 A82-40706
Gravity perception and asymmetric growth in plants - A model derived from the grass pulvinus
p0339 A82-40775
A nonlinear model combining pulmonary mechanics and gas concentration dynamics
p0341 A82-41230
An examination of heat exchanges in man - Establishment of a reference technique for measuring average cutaneous temperatures using infrared thermometry --- French thesis
p0365 A82-42080
An analysis and modeling of the binocular system in human sagittal vision --- French thesis
p0366 A82-42090
Analysis of load characteristics and development of new indicators of cardiac function
p0367 A82-42606
Computer simulation of respiratory control system
p0371 A82-43145
Threshold models of spatial vision
p0371 A82-43230
Steady state visual evoked potentials in the alert primate
p0403 A82-45673
An investigation of the postirradiation dynamics of lymphopoiesis using a mathematical model
p0404 A82-45778
Models for the recovery of cells from radiation damage and the principle of the diminution of the effective dose. II - A model of the recovery of cells under arbitrary conditions of irradiation
p0411 A82-46855
The problem of aging and death in modern biology
p0414 A82-46895
Mathematical modelling of physiological functions in space flight
[IAF PAPER 82-176] p0414 A82-46976
A model of the regulation of the blood glucose level during physical exercise
p0419 A82-48201
A model for the restoration of the cellular composition of red blood
p0419 A82-48202
A model of monomeric tissue growth
p0419 A82-48203
The effect of the dispersion of the electric parameters of bacterial cells on their orientation in an alternating electric field
p0419 A82-48205
The stability of a model with time lag, with the phytoplankton-phosphorous system considered as an example
p0420 A82-48209
The elasticity of the foot during the modelling of human movement
p0420 A82-48211
An engineering study of bacterial kinetics and energetics
p0031 N82-12740
User's guide to BIODYN-80: An interactive software package for modeling biodynamic feedthrough to a pilot's hands, head and eyes
[AD-A104933] p0037 N82-12786
Model simulation studies to clarify the effect on saccadic eye movements of initial condition velocities set by the Vestibular Ocular Reflex (VOR)
p0046 N82-13712
Benefits of detailed models of muscle activation and mechanics
p0046 N82-13713
Simulation of some of man's movements in different gravity fields
p0124 N82-16712
Models for the estimation of incapacitation times following exposures to toxic gases or vapors
[DE82-000619] p0297 N82-26979

BIOLOGICAL RHYTHMS
U RHYTHM (BIOLOGY)

BIOLOGY
Flow visualization techniques in medical and biological applications
p0096 A82-20778
Physics and biology --- developments in biophysics
p0194 A82-26550
Preliminary characterization of persisting circadian rhythms during space flight: Neurospora as a model system
p0174 N82-18266
USSR report: Space biology and aerospace medicine, volume 16, no. 2, March - April 1982
[JPRS-80822] p0269 N82-25754
Third decade of space biology
p0269 N82-25755
Aerospace Medicine and Biology: A continuing bibliography with indexes
[NASA-SP-7011(234)] p0397 N82-31922
USSR Report: Life sciences. Biomedical and behavioral sciences
[JPRS-81775] p0429 N82-33988
Effects of combination of antibiotic-resistant bifidobacteria and corresponding antibiotics of survival of irradiated mice
p0430 N82-33994

BIOLUMINESCENCE
Cultivation of the luminescent bacterium Photobacterium leiognathi with control by luminescence
p0280 A82-35687

BIOMAGNETISM
The magnetic susceptibility of rhodopsin
p0199 A82-27729
/H-3/-noradrenaline release potentiated in a clonal nerve cell line by low-intensity pulsed magnetic fields

p0207 A82-28099
NMR imaging in medicine
p0231 A82-29574
The organism and magnetic fields
p0263 A82-34696
Magnetic-field effect on photophysical processes in the light-harvesting pigment apparatus of purple photosynthetic bacteria
p0264 A82-34917
The absence of the magnetic-field effect on Na/+/, K/+/-dependent ATPase
p0312 A82-38591
The influence of a constant magnetic field on the epileptogenic foci in the hippocampus of rabbits
p0323 A82-40466
Relation between physiological effects of gravitational forces and that of magnetic forces. II
p0338 A82-40771
The use of an audio-frequency magnetic field in certain diseases
p0343 A82-41473
Sources of an artificial magnetic field for implantation /experimental study/
p0343 A82-41480
Present-day magnetic-field sources, used in medical treatment
p0343 A82-41481
Possible adaptation to strong magnetic fields --- by animals
[IAF PAPER 82-188] p0377 A82-44690
USSR Report. Life sciences: Effects of nonionizing electromagnetic radiation, no. 5
[JPRS-80525] p0266 N82-24819
Pathomorphological reactions of cerebrocortical neural elements to alternating magnetic field
p0266 N82-24820
Metabolic changes in experimental animals as indicators of biological effects of 50 Hz electromagnetic fields
p0266 N82-24821
Effects of experimental stationary magnetic field on metabolism of some ions in blood and myocardium
p0267 N82-24822

BIOMASS
Competition between algae in a flow system
p0240 A82-31517
Solar bacterial biomass farm for space vehicles
p0261 A82-33895
Contents of protein and amino acids in methanobacterial biomass
p0284 A82-36011
On the mathematical modelling of microbial age dynamic and some control aspects of microbial growth processes
p0314 A82-38823
An engineering study of bacterial kinetics and energetics
p0031 N82-12740

[NASA-TM-76520] p0013 N82-11771
Crew cardiovascular profile
p0077 N82-15720
Non-invasive pulmonary arterial pressure measurement
[PB81-239410] p0083 N82-15776
Jugular, right atrial pressure and cerebral hemodynamics of healthy man submitted to postural tests
p0131 N82-17825
Portable medical status and treatment system
[NASA-CR-167496] p0136 N82-17862
A model for essential hypertension: Metabolic studies
p0137 N82-17867
Measurement of central venous pressure and determination of hormones in blood serum during weightlessness
p0173 N82-18259
Venous pressure as an indicator of circulating blood volume
p0272 N82-25777
Perception of effort during isometric contractions as related to heart rate and blood pressure responses
[AD-A111033] p0296 N82-26974
Effect of prolonged hypokinesia on resistance of resistive vessels in rats
[NASA-TM-76849] p0383 N82-30878
Catecholamines in the blood plasma of August and Wistar rats during emotional stress
[NASA-TM-76872] p0384 N82-30885
Changes of blood plasma renin activity in August and Wistar rats under emotional stress
[NASA-TM-76873] p0384 N82-30886
Sustained blood pressure responding during synthetic work
[AD-A115733] p0424 N82-32974

**BLOOD PUMPS**
Fabrication of cardiovascular devices
[PB82-120148] p0218 N82-20869
Evaluation of left ventricular assist device pump bladders cast from ion-sputtered polytetrafluorethylene mandrels
[NASA-CR-167904] p0249 N82-23976

**BLOOD VESSELS**
NT AORTA
NT ARTERIES
NT CAPILLARIES (ANATOMY)
NT VEINS
Biaxial finite deformations of arterial and venous segments under + or - G/z/ acceleration stress
p0007 A82-12036
A three-dimensional model for the arrangement of the vascular and tubular components of the renal osmoregulatory apparatus
p0113 A82-21745
The role of the lung in the metabolism of vasoactive substances
p0150 A82-23171
Structural and functional organization of the microcirculatory bed in skeletal muscle
p0201 A82-27749
A study of cerebral microvessels by means of automatic image analysis
p0202 A82-27766
The information content of indicators of cerebral vascular responses to adequate influences
p0210 A82-28459
Functional-morphological characteristics of microvessels of the rat liver under hypokinesia
p0242 A82-31545
The effect of leienkephalin and thyrosine on the lymphatic and blood microvessels
p0344 A82-41490
Features and variations of the local hematocrit
p0367 A82-42601
The coronary vessels and the contractile apparatus of the myocardium in immune heart damage /Histochemical and ultrastructural studies/
p0367 A82-42605
Biomicroscopy of a microcirculatory bed in experiments - Possibilities, limitations, and prospects
p0368 A82-42611
The responses of the coronary vessels in dogs to hypothalamic stimulation in acute and chronic experiments
p0373 A82-43634
Conjugated changes of the resistance and blood filling of cerebral vessels during shifts in the blood gas composition
p0373 A82-43635
The resistance and capacity function of the vessels of the small intestine and the filtration and absorption relations during short-term myocardial ischemia in cats
p0420 A82-48213
Ultrastructure of blood vessels and muscle fibers of rat skeletal muscles after flights aboard Cosmos-605 and Cosmos-782 biosatellites
p0063 N82-17835
The interaction of Purkinje cells, capillaries and glia in the cerebellar cortex of normal and hypokinetic cats
[NASA-TM-76082] p0382 N82-30873

**BLOOD VOLUME**
Magnetic measurement of cardiac volume changes

p0070 A82-17559
Effect of blood volume on sweating rate and body fluids in exercising humans p0089 A82-19495
The effects of horizontal body casting on blood volume, drug responsiveness, and +Gz tolerance in the rhesus monkey p0108 A82-21682
The effects of systemic arterial and venous pressures on blood volume in the cerebral vessels p0196 A82-26755
Mechanism for the change in pulmonary blood volume upon the stimulation of the vagosympathetic trunk p0231 A82-29698
Acute hypervolemia, cardiac performance, and aerobic power during exercise p0256 A82-32836
Changes in blood volume and response to vaso-active drugs in horizontally casted primates p0327 A82-40657
Effects of lower body negative pressure on the reliability of cardiovascular system using X-ray kymograms p0334 A82-40728
The dynamics of the development of postischemial cerebrovascular phenomena during the perfusion of the cerebral vessels with a stable volume of blood p0366 A82-42173
Microcirculation during acute blood loss and hypoxia p0370 A82-42997
Hematological and immunological analyses p0078 N82-15722
Measurement of central venous pressure and determination of hormones in blood serum during weightlessness p0173 N82-18259
Venous pressure as an indicator of circulating blood volume p0272 N82-25777
Reaction to diminished circulating blood volume in individuals who are susceptible and insusceptible to motion sickness (seasickness) p0349 N82-28960
Mechanisms of change in plasma volume to acute and chronic exercise in man p0430 N82-33999

**BLOOD-BRAIN BARRIER**
An experimental study of the human blood-cerebral barrier using scanning electron microscopy p0369 A82-42630

**BLUE GREEN ALGAE**
The evolution of blue-greens and the origins of chloroplasts p0105 A82-20971

**BLURRING**
Apparent instrument horizon deflection during and immediately following rolling maneuvers p0416 A82-47335

**BMC**
U BONE MINERAL CONTENT

**BOD**
U BIOCHEMICAL OXYGEN DEMAND

**BODY COMPOSITION (BIOLOGY)**
The concentration of adenyl nucleotides and creatine phosphate in the cerebral hemispheres during different manifestations of stress p0319 A82-38560
Dynamics of weight loss during prolonged spaceflight p0328 A82-40673
Plasticity of fast and slow muscle myofibrillar proteins in model experiments simulating weightlessness p0332 A82-40709
Protein composition of mRNA containing 18S-40S subribosomal particles in soleus muscle before and after immobilization p0335 A82-40742
Response of rat body composition to simultaneous exercise and centrifugation at 3.14g p0338 A82-40766
Tritium oxide distribution and excretion kinetics in the exposure of animals to noise p0342 A82-41463
Features and variations of the local hematocrit p0367 A82-42601
Measurement of energy expenditure in humans by doubly labeled water method p0418 A82-47389
The effects of varying exercise intensities and durations on plasma high density lipoprotein-cholesterol, body composition and maximum oxygen consumption p0248 N82-23973

**BODY FLUIDS**
NT BLOOD
NT CEREBROSPINAL FLUID
NT ENDOLYMPH
NT ERYTHROCYTES
NT LEUKOCYTES
NT LYMPH
NT LYMPHOCYTES
NT MUCOUS
NT RETICULOCYTES

NT WHITE BLOOD CELLS
Body fluid and hematologic changes in the toad exposed to 48 h of simulated high altitude p0005 A82-11151
Rhinopneumometric indicators during repeated antiorthostatic exposures p0029 A82-15719
Current views and future programs in cardiovascular physiology in space p0056 A82-16931
Effects of vasopressin administration on diuresis of water immersion in normal humans p0088 A82-19491
Orthostatic fluid-electrolyte and endocrine responses in fainters and nonfainters p0088 A82-19492
Effect of blood volume on sweating rate and body fluids in exercising humans p0089 A82-19495
Evidence for the involvement of central alpha2 mechanisms in intrathoracic volume expansion-induced diuresis - A study with cloridine and propranolol p0210 A82-28481
Body fluid and hematologic adjustments during resting cold acclimation in rhesus monkey p0230 A82-29565
Brain extracellular fluid pH and blood flow during isocapnic and hypocapnic hypoxia p0290 A82-37930
Computer simulations of postural change, water immersion and bedrest - An integrative approach for understanding the spaceflight response p0327 A82-40659
Effect of sustained Gz acceleration on lung fluid balance - An ultrastructural study p0337 A82-40761
Dehydration-induced drinking in humans p0408 A82-46329
The measurements of fluid shifts and of the tissue compliance along body axis in man [BMFT-FB-W-80-011] p0039 N82-13654
Analysis of volatile metabolites in biological fluids as indicators of prodromal disease condition [NASA-CR-167513] p0175 N82-18859
Analysis of evaporative water loss in the Skylab astronauts [NASA-CR-167862] p0178 N82-19014
Current views and future programs in cardiovascular physiology in space --- plethysmography p0179 N82-19018
An evaluation of localized sweating rates for predicting total body sweating rates [AD-A111902] p0300 N82-27968
Effects of low-intensity electromagnetic fields on human and animal erythrocytes p0351 N82-28974

**BODY KINEMATICS**
Articulated hands - Force control and kinematic issues p0010 A82-13110
The phase structure in the process by which a system of motions is formed in gymnasts p0158 A82-24482
Influence of a visual display and frequency of whole-body angular oscillation on incidence of motion sickness p0416 A82-47337

Determination of efficient methods of lift by comparing trained and untrained male and female lifters
[AD-A100349] p0038 N82-13650
Simulation of some of man's movements in different gravity fields
p0124 N82-16712
Positions, movements and equilibrium of rats after flights aboard biosatellites
p0124 N82-16713
Aerodynamic forces experienced during ejection
[AFAMRL-TR-80-16] p0246 N82-22878
The inverse dynamics of three-dimensional hominoid motion
[CSIR-SWISK-24] p0247 N82-22887
Isokinetic, isometric, and isotonic strength relationships
[AD-A111039] p0295 N82-26972

BODY MEASUREMENT (BIOLOGY)
NT ANTHROPOMETRY
NT ELECTROPLETHYSMOGRAPHY
Morphological features of the individual structure of the human brain
p0369 A82-42637
Anthropometric sizing systems for Army women's field clothing
[AD-A102104] p0048 N82-13724
Female and male size, strength and performance: A review of current literature
[AD-A109270] p0218 N82-20060
Measurement of the headband force of circumaural hearing protectors
[RAE-TM-FS-370] p0225 N82-21901
Anthropometric profile of the British car occupant
[MIRA-1979/2] p0225 N82-21904
Anthropometric program analysis of reach and body movement
p0240 N82-23124

BODY SIZE (BIOLOGY)
The effect of athletic training on the mass distribution of athletes' bodies
p0154 A82-23280
Gravitational scale effects --- moving organism performance as function of gravity and size
p0326 A82-40650
Gravity, metabolic rate and body size of mammals
p0328 A82-40678
Anthropometric sizing systems for Army women's field clothing
[AD-A102104] p0048 N82-13724
Anthropometric profile of the British car occupant
[MIRA-1979/2] p0225 N82-21904

BODY SWAY TEST
A physical model of human postural dynamics
p0069 A82-17478
The role of the plantar mechanoreceptor in equilibrium control
p0070 A82-17483
Postural control related to the different tilting body positions
p0334 A82-40732
The regulation of equilibrium in humans on a small supporting surface
p0420 A82-48210
Use of a television multipoint x-y tracker for determining the transmission of vibrations on human beings --- human factors in man machine systems
p0085 N82-15787

BODY TEMPERATURE
Metabolism and thermoregulation during stages of sleep in humans exposed to heat and cold
p0006 A82-11157
Arm and leg intravascular temperatures of man during submaximal exercise
p0018 A82-13227
The theory of radiometric contact measurements of the internal temperature of bodies --- for human body
p0020 A82-13636
Harmful effects of temperature under conditions of elevated pressure in a helium-oxygen environment
p0027 A82-15706
Evaluation of natural convection under hyperbaric conditions
p0029 A82-15720
Enhanced heat production in physically restrained rats in hypoxia
p0089 A82-19496
Body temperature changes during the practice of g Tum-mo yoga
p0106 A82-21213
The effect of synaptically active drugs on the hyperthermic effect of prostaglandin E2 in rats
p0112 A82-21741
Effects of temperature on the duration of arousal episodes during hibernation
p0120 A82-21934
Application of a predictive core temperature model to heat stress experimentation
p0143 A82-22941
Core temperature, heart rate and sweatsuits
p0143 A82-22942
The regulation of body temperature during physical work
p0166 A82-24036
The physiology and hygiene of the individual protection of man from the cold --- Russian book
p0194 A82-26522
Adjustments in metabolic heat production by squirrel monkeys exposed to microwaves
p0230 A82-29569
Effects of decimetric waves on the temperature of the brain and adjoining tissues /Experimental study/
p0239 A82-31510
Head-temperature effects on physiology, comfort, and performance during hyperthermia
p0283 A82-35901
Circadian changes in resting heart rate and body temperature, maximal oxygen consumption and perceived exertion
p0308 A82-38260
Thermoregulation and the menstrual cycle
p0321 A82-40441
Alterations in heat loss and heat production mechanisms in rat exposed to hypergravic fields
p0333 A82-40718
Core temperature and brainstem auditory evoked potentials as complimentary noninvasive measures of central neural function during exposure to hypergravic fields
p0338 A82-40772
Temperature and behavioral responses of squirrel monkeys to 2Gz acceleration
p0338 A82-40774
The role of the extrapolation and dynamic stereotype in the mechanism of the formation and improvement of adequate motor coordination
p0374 A82-43651
Head cooling and heat
p0376 A82-44292
Sleep schedules and peak times of oral temperature and alertness in morning and evening 'types'
p0403 A82-45575
The effect of head cooling on deep body temperature and thermal comfort in man
p0417 A82-47341
Cutaneous vascular response to exercise and acute hypoxia
p0418 A82-47385
The role of skin temperature in the control of sweating in man
p0009 N82-10708
The effects of cold- and exercise-induced alterations in skin and core temperature on substrate mobilization and utilization
p0011 N82-10719
The relationship of body temperature to environmental temperature
p0080 N82-15752
Comfortable temperature and tolerable temperature
p0081 N82-15753
The physiological effect of heat and its prevention
p0081 N82-15754
The effect of cold and the cold prevention
p0081 N82-15755
Ways and means of maintaining heat balance in pilots and cosmonauts
p0123 N82-16706
A statistical model of the controller functions of the human temperature regulating system
p0248 N82-23972
Safe wearing times for impermeable chemical protective clothing
[IZF-1980-11] p0250 N82-23986
Effects of acute plasma volume expansion on altering exercise heat performance

[AD-A110558] p0296 N82-26975

Effects on heat tolerance of physical training in water and on land
[AD-A110556] p0296 N82-26976

Acute albumin-induced plasma volume expansion and exercise in the heat: Effects on hormonal responses in men
[AD-A115100] p0433 N82-34017

**BODY TEMPERATURE REGULATION**
U THERMOREGULATION

**BODY VOLUME (BIOLOGY)**

The importance of volumetric and anthropometric techniques in the measurement of lean body mass
p0007 A82-12313

Short term gravity effects on volume homeostasis in man Assessment of transvascular fluid shifts after graded tilt
p0337 A82-40760

Output and efficiency of the heart in young athletes as a function of the type of athletic training
p0344 A82-41497

Temperature effects on lung mechanics in air- and liquid-filled rabbit lungs
p0375 A82-44134

**BODY WEIGHT**

The importance of volumetric and anthropometric techniques in the measurement of lean body mass
p0007 A82-12313

How important are changes in body weight for mass perception
p0058 A82-16944

The role of the plantar mechanoreceptor in equilibrium control
p0070 A82-17403

Expenditure of energy and the state of the neuromuscular system in athletes who use low-calorie diets to control their weight
p0187 A82-25680

The participation of estradiol and progesterone in animal body mass regulation mechanisms
p0189 A82-25801

Physiological, biochemical, and performance responses to a 24-hour crash diet
p0192 A82-26229

Dynamics of changes in animal body mass and skeletal musculature under conditions of hypokinesia
p0241 A82-31533

Gravity, and metabolic scale effects in mammals
p0286 A82-36319

Dynamics of weight loss during prolonged spaceflight
p0328 A82-40673

Response of rat body composition to simultaneous exercise and centrifugation at 3.14g
p0338 A82-40766

Quantitation of tissue loss during prolonged space flight
[NASA-CR-167460] p0033 N82-12752

Stimulation of body weight increase and epiphyseal cartilage growth by insulin like growth factor
[NASA-TM-84285] p0428 N82-33983

**BONE DEMINERALIZATION**

Bone effects of space flight - Analysis by quantum concept of bone remodelling
p0059 A82-16947

Effect of space flight on bone strength
p0329 A82-40680

Evidence for arrested bone formation during spaceflight
p0338 A82-40767

Measurement of the bone mineral density of trabecular bone by a coherent and Compton scattering technique
p0032 N82-12747

**BONE MARROW**

A discrete model of the circadian kinetics of human bone marrow
p0027 A82-15704

The influence of some triterpenic glycosides on C-14-alanine inclusion into the bone-marrow cells of rats
p0092 A82-20306

Characteristics of the relations of the primary responses of the pentose phosphate pathway to glycolysis in the bone marrow of irradiated rats
p0111 A82-21725

Effects of dioxalin and oxamide on succinate and lactate dehydrogenase activities in rat liver, kidney and brain tissues and on the chromosomal apparatus of bone marrow cells
p0115 A82-21778

The effects of immobilization of mice of various radiation sensitivities and the shielding of portions of their bone marrow on survival rate and the formation of splenic colonies following irradiation
p0152 A82-23265

Lipid levels in the bone marrow megakaryocytes and thrombocytes of healthy people
p0164 A82-24555

Investigation of the effects of space flight factors on rat bone marrow cell chromosomes
p0170 A82-25321

The indication of radiation resistance modified by radio-protective agents. III - Analysis of the relationship between hypoxic and radio-protective effects in the rat bone marrow for hypoxias of different origin
p0186 A82-25682

The dynamics of rat bone marrow CFUc content during prolonged fractionated irradiation
p0206 A82-27011

The role of lymphocytes in the regeneration of hematopoiesis under condition of local irradiation
p0241 A82-31535

Effects of traumatic shock on cytogenetic processes in the epithelial cells of the cornea and tongue and the bone marrow cells of albino rats
p0262 A82-34676

Regulation of the functional activity of stem cells which are the precursors of granulomonopoiesis by polypeptide thymic and bone marrow factors
p0262 A82-34684

The effect of repeated sublethal overheating on cytogenetic processes in the epithelium of the cornea and in bone marrow cells in white rats
p0262 A82-34685

Bone-marrow haemopoiesis in dogs exposed to various repeated total-body nonuniform irradiations
p0270 A82-35656

Comparative evaluation of the efficiency of radio-protectors on the basis of criteria of the protection of bone marrow and the gastrointestinal tract
p0270 A82-35658

The synthesis of nuclear and mitochondrial DNA and RNA, and the synthesis of heme and globin in rabbit bone marrow during the stimulation of erythropoiesis
p0307 A82-38169

Separation of bone marrow cells in mice by free-flow electrophoresis
p0308 A82-38536

The effect of long-wave ultraviolet radiation on cyclophosphamide-induced levels of chromosome aberrations in the bone marrow cells of mice
p0310 A82-38556

The circadian rhythm of the sensitivity of the chromosome apparatus of mice to the mutagenic effect of measles
p0323 A82-40462

The synthesis of nuclear and mitochondrial DNA and RNA, and the synthesis of heme and globin in rabbit bone marrow during the stimulation of erythropoiesis
p0325 A82-40501

Chromosome aberrations in myelocaryocytes caused by the chronic action of tritium oxide at various dose rates
p0411 A82-46856

The determination of the number of stem cells by the number of colonies of undifferentiated cells in the bone marrow of irradiated animals
p0412 A82-46866

Measurement of gonadal and bone-marrow doses from dental radiography
[ARL/TR-022] p0034 N82-12761
Genetic and mean bone-marrow doses from medical use of unsealed radioisotopes
[ARL/TR-023] p0034 N82-12763
Absorbed dose to active red bone marrow from diagnostic and therapeutic uses of radiation
[ARL-TR-021] p0038 N82-13651
Role of immobilization of irradiated rats in the protective effect of bone marrow shielding
[NASA-TM-76828] p0220 N82-21866
Postradiation recovery of human bone marrow and morphological dynamics of undifferentiated cell pool
p0265 N82-24811
Cytogenetic effects of high-energy charged particles
p0396 N82-31911

BONE MINERAL CONTENT
The role of CO2 in the mechanism of the reparative regeneration of bone tissue /a radioisotopic study/
p0117 A82-21800
Bone growth and composition in weanling and mature rats exposed to chronic centrifugation

A comparison of the antimuscarinic properties of aprophen with those of some other anticholinergic drugs
[NRL-R-794]
p0221 N82-21877

Nitrogen compound levels in tissues of rat cerebral hemispheres and cerebellum after flight aboard Cosmos-1129 biosatellite
p0350 N82-28967

Effect of immobilization stress on diacyl- and plasmalogen-derivatives of phospholipids in various rat organs and tissues
[NASA-TM-76852]
p0385 N82-30891

Chromatin of rat brain neurons and nucleic acids of muscles as related to localization of decimeter waves during exercise
p0387 N82-30908

BRAIN CIRCULATION

Potential for the use of biorhythm structures for the prognosis of the course of a disease
p0028 A82-15715

The functional state of some subcortical cerebral structures during adaptation and deadaptation to physical loading
p0055 A82-16823

Models of a functional lapse in one hemisphere and of the neuropharmocological effects on the deep structures of the brain
p0094 A82-20325

Respiration of brain synaptosomes under conditions of depolarization in rats deprived of paradoxal sleep
p0095 A82-20336

Changes in the main characteristics of the central hemodynamics of healthy individuals and hypertension patients during physical exercise
p0110 A82-21711

The effect of low temperature on the activity and substrate specificity of monoamine oxidases in rat brain mitochondria
p0112 A82-21735

A histochemical investigation of the microvascular effectors regulating the supply of blood to the cerebral cortex
p0112 A82-21744

Echoencephalographic indices in patients with hypertensive disease under the effect of functional loads
p0113 A82-21753

Phasic energy analysis of rheoencephalograms in the detection of the decompensation of cerebral hemodynamics
p0113 A82-21754

Certain features of cerebral hemodynamics in doing mental work at different air temperatures
p0114 A82-21759

Effects of pyrroxane and methylapogalantamine on cerebral blood circulation and oxygen regime
p0115 A82-21776

Additional criteria of cerebral hemodynamic disorders limiting physical loads in patients with hypertension
p0159 A82-24495

Changes in peripheral hemodynamics during transient disturbances in cerebral circulation
p0159 A82-24497

Some characteristics of cardiovascular system activity and adaptive antihypoxic mechanisms in keyboard computer operators during the course of a work shift
p0188 A82-25705

Seasonal vascular tension variations in patients with cerebral circulatory disorders under the conditions of an arid zone
p0189 A82-25715

Systemic brain activity /Experimental investigation/ --- Russian book
p0194 A82-26547

Oxygen, carbon dioxide and the calcium control of relaxation mechanisms in cerebral artery smooth muscles
p0196 A82-26754

The effects of systemic arterial and venous pressures on blood volume in the cerebral vessels
p0196 A82-26755

Cerebral hemodynamics in healthy individuals and the recognition of subclinical signs of insufficient blood supply to the brain
p0201 A82-27751

Stenoses of the carotid artery and disorders of the cerebral circulation /clinical and angiographic comparisons/
p0201 A82-27752

Bilateral disturbances of the perception function of the brain in patients with unilateral disorders due to acute disturbances of the cerebral circulation
p0201 A82-27753

Rheoencephalographic signs of inadequate cerebral blood supply in incipient cerebrovascular insufficiency
p0201 A82-27755

The use of ultrasonic Doppler techniques in the diagnosis of arterial occlusions in the basis cerebri - A Doppler angiography study
p0201 A82-27756

A study of cerebral microvessels by means of automatic image analysis
p0202 A82-27766

Mechanisms for the adaptive and trophic effects of the sympathetic nervous system on cerebral vessels and tissue
p0210 A82-28458

The information content of indicators of cerebral vascular responses to adequate influences
p0210 A82-28459

Decimetric waves in the combined therapy of patients with cerebral circulatory insufficiency
p0239 A82-31507

Changes of cardiac activity and regional cerebral circulation under gravitational effects simulated by antiorthostasis
p0239 A82-31513

Dynamics of changes in the prostaglandin content of the brain tissue under cervical sympathectomy and circulatory hypoxia
p0262 A82-34677

Microcirculation and oxygen tension in the rat brain cortex during hemorrhagic shock
p0262 A82-34683

The influence of the speed of blood flow in the carotid artery on the hematocrit of the blood being delivered to the brain
p0309 A82-38550

Diagnosis and organization of the therapy of patients with disorders of blood circulation in the brain
p0310 A82-38554

Prostoglandins and regulation of cerebral circulation under conditions of the altered gaseous composition of the blood
p0310 A82-38561

State of adaptation in patients with hypertension
p0324 A82-40476
Effects of a weightlessness simulation on the velocity curves measured by Doppler sonography at the level of the carotid system
p0327 A82-40656
The effect of hypoxic and hypobaric exercises on the blood-brain barrier in rats
p0332 A82-40713
Effects of prolonged bedrest in antiorthostatic position on rCBF measured by 133Xe inhalation technique - Effects of clonidine --- regional Cerebral Blood Flow
p0335 A82-40743
Involuntary and voluntary mechanisms for preventing cerebral ischemia due to positive /Gz/ acceleration
p0336 A82-40747
Cardiac and cerebral vascular adaptation to gravitational stresses in man
p0337 A82-40765
The dynamics of the development of postischemial cerebrovascular phenomena during the perfusion of the cerebral vessels with a stable volume of blood
p0366 A82-42173
Studies directed toward improving hygienic standards pertaining to total-body vibration resulting from heavy moving equipment
p0368 A82-42619
A morphological investigation of the regulatory mechanisms of the intracerebral blood circulation
p0369 A82-42627
An experimental study of the human blood-cerebral barrier using scanning electron microscopy
p0369 A82-42630
Conjugated changes of the resistance and blood filling of cerebral vessels during shifts in the blood gas composition
p0373 A82-43635
The compensatory reactions following focal vascular lesions of the cerebral hemisphere as evaluated by electroencephalography
p0409 A82-46705
The effect of acute brain hypoxia on the permeability of the blood-opthalmic barrier
p0414 A82-46896
Cerebrovascular responses to CO2 after inhibition of sympathetic activity
p0418 A82-47380
The changes in the mechanical properties of the brain during the development of edema induced by repeated venous congestions
p0420 A82-48216
Regulation of cerebral circulation in erect position
p0348 N82-28957
Regional hemodynamic changes after spaceflights lasting up to eight days
p0394 N82-31895

BRAIN DAMAGE
Potential for the use of biorhythm structures for the prognosis of the course of a disease
p0028 A82-15715
The differential diagnosis of an asymmetrical trend in vestibular responses in peripheral and central hemispheric lesions
p0054 A82-16813
Input-output activity of the primate flocculus during visual-vestibular interaction
p0068 A82-17466
Effect of frontal-eye-field lesion on eye-head coordination in squirrel monkeys
p0069 A82-17875
The role of biofeedback in the adaptive regulation of pathological bioelectric brain activity
p0094 A82-20328
Trial on the use of stabilography in the medical supervision of boxers
p0118 A82-21817
Changes in the posture of healthy rats after the intracranial introduction of brain extracts from animals with experimental vestibulopathy
p0151 A82-23257
Stereotactic biopsy of brain tumors based on computerized tomography
p0165 A82-24561
Impairment of orthostatic posture regulation in boxers following closed craniocerebral injury
p0188 A82-25710
Bilateral disturbances of the perception function of the brain in patients with unilateral disorders due to acute disturbances of the cerebral circulation
p0201 A82-27753
Destructive and reparative processes in the hippocampus upon prolonged exposure to nonionizing microwave radiation
p0241 A82-31536
Intrahemispherical relations of EEG slow-wave components in patients with local brain lesions
p0324 A82-40472
Some of biochemical parameters in rat brain during +Gz acceleration
p0333 A82-40717
Dynamics of the brain electric activity in patients with cerebral insults under the effect of muscle stimulation with sinusoidal modulated currents
p0343 A82-41477
Stereological analysis of interneuronal contacts in the cerebral cortex of rats during the posthypoxic period
p0368 A82-42622
Changes of the functional condition of the neocortex during direct application of optical radiation
p0374 A82-43655
The compensatory reactions following focal vascular lesions of the cerebral hemisphere as evaluated by electroencephalography
p0409 A82-46705
A homeomorphic finite element model of impact head injury
p0009 N82-10707

BRAIN STEM
Cat medial pontine neurons in vestibular nystagmus
p0065 A82-17043
Core temperature and brainstem auditory evoked potentials as complimentary noninvasive measures of central neural function during exposure to hypergravic fields
p0330 A82-40772
Brain-stem auditory evoked potentials in persons with normal hearing
p0371 A82-43234
Forward masking of auditory nerve (N sub 1) and brainstem responses (Wave V) in humans
p0136 N82-17060
Human auditory brainstem electric responses to binaural and monaural stimuli
p0136 N82-17061

BRAZIL
Studies on the flight medical aspects of the German Lufthansa non-stop route from Frankfurt to Rio de Janeiro, part 1
[NASA-TM-76659] p0217 N82-20863

Waveguide technique for the calibration of miniature implantable electric-field probes for use in microwave-bioeffects studies
p0097 A82-20893
An investigation of the status of bone conduction audiometer calibration in the National Health Service
[NPL-AC-101] p0034 N82-12769
CALORIC REQUIREMENTS
Expenditure of energy and the state of the neuromuscular system in athletes who use low-calorie diets to control their weight
p0187 A82-25608
The energy requirements of railway-bridge assemblers
p0240 A82-31515
Energy requirements of workers at an oil field in western Siberia
p0324 A82-40481
Energy expenditure and dietary change
[PB81-218471] p0010 N82-10717
CALORIC STIMULI
A caloric vestibular test using air
p0262 A82-34474
Caloric methods for stimulation of the vestibular apparatus /Survey of the literature/
p0281 A82-35697
Nystagmometry of optovestibular interaction
p0349 N82-28962
Effect of caloric stimulation of vestibular system on hearing
p0349 N82-28963
CALORIMETERS
Microcalorimetry in biomedical investigations
p0342 A82-41471

U HEAT MEASUREMENT
CAMERA TUBES
NT VIDICONS
CAMERAS
NT TELEVISION CAMERAS
Medical thermography with a pyroelectric vidicon camera
[RSRE-3365] p0389 N82-30921
CAMOUFLAGE
Distraction in visual search
[IZF-1981-7] p0260 N82-24830
Visual search: Clutter and proximity effects
[AD-A115799] p0425 N82-32979
CANCER
Electrical stimulation of the urinary bladder following radical surgery for cancer of the rectum
p0343 A82-41479
Radiation physics, biophysics and radiation biology
[DE81-025259] p0009 N82-10704
Cytologic and biochemical genetic effects of chemical carcinogens
[AD-A107615] p0136 N82-17064
Comparative biochemistry and metabolism. Part 1: Carcinogenesis
[AD-A107614] p0136 N82-17065
Probabilistic methodology for estimating radiation induced cancer risk
[DE82-901474] p0398 N82-31929
Hyperthermia heating apparatus --- cancer therapy
[NASA-CASE-NPO-14549-2] p0430 N82-33996
CANOPIES
Canopy induced displacement evaluation --- visual displacement of targets for fighter aircraft
p0145 A82-22950
CAPACITY
The resistance and capacity function of the vessels of the small intestine and the filtration and absorption relations during short-term myocardial ischemia in cats
p0420 A82-48213
CAPILLARIES (ANATOMY)
Features of the reaction to noise of the spinal capillaries of white rats
p0114 A82-21767
The permeability of the lymphatic vessels of the muscles of the upper extremities in vibration sickness
p0190 A82-25804
The determination of capillary resistance
p0279 A82-35667
Biomicroscopy of a microcirculatory bed in experiments - Possibilities, limitations, and prospects
p0360 A82-42611
Pathomorphological reactions of cerebrocortical neural elements to alternating magnetic field
p0266 N82-24820

Influence of fiber type composition and capillary density on onset of blood lactate accumulation
[AD-A111038] p0296 N82-26973
The interaction of Purkinje cells, capillaries and glia in the cerebellar cortex of normal and hypokinetic cats
[NASA-TM-76882] p0382 N82-30873
Changes in transcapillary metabolism in patients with chronic venous insufficiency of legs under influence of static magnetic fields
p0387 N82-30907

CAPILLARY CIRCULATION
U CAPILLARY FLOW

CAPILLARY FLOW
Intrapulmonary blood flow redistribution during hypoxia increases gas exchange surface area
p0285 A82-36036

CARBOHYDRATE METABOLISM
NT HYPERGLYCEMIA
NT HYPOGLYCEMIA
Some indicators of carbohydrate metabolism in rat lung during repeated and chronic hypoxia
p0092 A82-20302
Change in the cytochemical indicators of carbohydrate metabolism in the peripheral blood neutrophils of pilots
p0107 A82-21457
The relationship between carbohydrate and lipid metabolisms in muscle cell energetics under the influence of ATPase loading - Mathematical model
p0109 A82-21706
Characteristics of the relations of the primary responses of the pentose phosphate pathway to glycolysis in the bone marrow of irradiated rats
p0111 A82-21725
Effects of increased carbohydrate resources on aerobic work capacity /Carbohydrate loading method/
p0203 A82-27777
The carbohydrase system of the small intestine of rats of various ages following heat and cold exposures
p0257 A82-33135
Local cerebral glucose utilization in non-rapid eye movement sleep
p0264 A82-34031
Studies of specific hepatic enzymes involved in the conversion of carbohydrates to lipids in rats exposed to prolonged spaceflight aboard Cosmos 1129
p0331 A82-40698
Effects of beta-adrenergic receptor blockade on glycogenolysis during exercise
p0374 A82-44133
Regulation of glycogenolysis in human muscle at rest and during exercise
p0376 A82-44144
A model of the regulation of the blood glucose level during physical exercise
p0419 A82-48201
Quantitation of tissue loss during prolonged space flight
[NASA-CR-167460] p0033 N82-12752
Activity of some enzymes of carbohydrate metabolism in rat skeletal muscles after space flight
p0132 N82-17834
Features of metabolic disturbances in rat myocardium under effect of alternating magnetic fields of different parameters
p0134 N82-17846
Change in blood glucose level in rats after immobilization
[NASA-TM-75997] p0245 N82-22872
Disturbances in the carbohydrate metabolism in shock. 3: Experimental hemorrhagic shock and some shock models. Review of the literature
[NBL-1980-10] p0249 N82-23975
Metabolic distinctions related to intake of low-calorie 'survival' rations consisting only of readily assimilated carbohydrates
p0348 N82-28953
Effect of high ambient temperature on carbohydrate metabolism in rat liver and skeletal muscles
p0351 N82-28975
Insulin resistance for glucose metabolism in disused soleus muscle of mice
[NASA-CR-169353] p0428 N82-33979

Bibliography on carbohydrate synthesis. Selected works, 1861 - 1981
[NASA-CR-168553] p0177 N82-18871

CARBON
NT ACTIVATED CARBON
NT CARBON ISOTOPES
NT CARBON 14
Amino acids derivatives synthesis from nitrogen, carbon and water by electric discharges
p0090 A82-20018

CARBON COMPOUNDS
NT HALOCARBONS
Rates of fixation by lightning of carbon and nitrogen in possible primitive atmospheres
p0090 A82-20016
Evolution of the terrestrial atmosphere and its fossils in biosystems
p0104 A82-20960
Experiments on transfer of organic molecular information into crystal lattice superstructures
p0105 A82-20966

CARBON DIOXIDE
Regenerable CO2 collection for spacecraft application
[ASME PAPER 81-ENAS-20] p0004 A82-10915
Experimental studies on the survival capacity in the sealed environment. III
p0025 A82-15515
Photoassisted carbon dioxide reduction and formation of twoand three-carbon compounds --- prebiological photosynthesis
p0100 A82-20920
The role of CO2 in the mechanism of the reparative regeneration of bone tissue /a radioisotopic study/
p0117 A82-21800
Mass mortality and its environmental and evolutionary consequences --- at end of Cretaceous period
p0227 A82-28596
Role of the carotid chemoreceptors in regulation of inspiratory onset
p0229 A82-29557
Prostoglandins and regulation of cerebral circulation under conditions of the altered gaseous composition of the blood
p0310 A82-38561
Distinctions of regeneration of confined atmosphere by means of photosynthesis of unicellular algae
p0125 N82-16720
Carbon dioxide absorption characteristics of high performance Sodasorb at 1 atmosphere
[AD-A107488] p0298 N82-26989
Position paper: The toxic effects of chronic exposure to low levels of carbon dioxide
[AD-A115053] p0390 N82-30930

CARBON DIOXIDE CONCENTRATION
Breath-by-breath measurement of true alveolar gas exchange
p0089 A82-19498
The elimination of metabolic products in expired air in relation to the carbon dioxide content in a sealed chamber
p0155 A82-23294
Regulation of Pa/CO2/ and ventilation in humans inspiring low levels of CO2
p0168 A82-24912
Instrumentation simultaneously measuring carbon dioxide excretion and oxygen uptake in humans using titration methods
p0197 A82-26819
Mechanical properties of rat lung during prolonged hypercapnia
p0255 A82-32031

Blood-gas CO2 equilibration in lungs of
anaesthetized dogs during hypercapnia
p0256 A82-32834
An automated, indirect assessment of cardiac
output during rest and exercise
p0285 A82-36030

CARBON DIOXIDE LASERS
Sword and scalpel --- laser surgery
p0310 A82-38564
Corneal endothelium after infrared laser exposure.
Evaluation of techniques to study corneal lesions
[AD-A116748] p0423 N82-32964

CARBON DIOXIDE REMOVAL
Development of an advanced Sabatier CO2 reduction
subsystem
[ASME PAPER 81-ENAS-11] p0002 A82-10899
Lightside atmospheric revitalization system for
Space Shuttle Orbiter
[ASME PAPER 81-ENAS-26] p0003 A82-10913
Pulmonary carbonic anhydrase in the human, monkey,
and rat
p0169 A82-24917

CARBON DIOXIDE TENSION
NT HYPERCAPNIA
NT HYPOCAPNIA
The role of extracellular O2 and CO2 tensions in
membrane mechanisms of cerebral arterial smooth
muscle regulation
p0090 A82-19787
The measurement of oxygen and carbon dioxide
partial pressures in tissues by the gas depot
method
p0093 A82-20318
Evaluation of a method for estimating cardiac
output from a single breath in humans
p0419 A82-47392

CARBON FIBER REINFORCED PLASTICS
Carbon fibre reinforced epoxy prepregs and
composites - Health risk aspects
p0165 A82-24823

CARBON FIBERS
Carbon/graphite fibers: Environmental exposures
and potential health implications
[PB81-229692] p0014 N82-11700
Development of the carbon fibre polysulphone
toggle for ligament repair operations
[CSIR-ME-1709] p0246 N82-22881

CARBON ISOTOPES
NT CARBON 14
Comets and the origin of life - The stable isotope
approach
p0096 A82-20884
Carbon isotopic fractionation in the biosynthesis
of bacterial fatty acids - Ozonolysis of
unsaturated fatty acids as a means of
determining the intramolecular distribution of
carbon isotopes
p0171 A82-25372
Conditions leading to kinetic and thermodynamic
isotopic effects in a cell
p0313 A82-38601

CARBON MONOXIDE
ACTH and cortisol responses to hypoxia in dogs
p0019 A82-13235
Rate of uptake of carbon monoxide at different
inspired concentrations in humans
p0120 A82-21930

CARBON MONOXIDE POISONING
Paradoxical akinesia syndrome in cases of acute
carbon monoxide poisoning
p0242 A82-31544
Brain hypoxia and control of breathing - Role of
the vagi
p0290 A82-37928
The combined effect of carbon monoxide and
total-body vibration on the organism
p0324 A82-40475
Toxicity of carbon monoxide, hydrogen cyanide and
low oxygen
p0404 A82-46200
Evaluation of short-term bioassays to predict
functional impairment. development of pulmonary
bioassays in small animals: Directory of
Institutions; individuals involved in utilization
[AD-A103767] p0075 N82-14790
Health effects of carbon monoxide and ozone
[PB82-114265] p0137 N82-17866

CARBON 14
The influence of some triterpenic glycosides on
C-14-alanine inclusion into the bone-marrow
cells of rats
p0092 A82-20306
The role of CO2 in the mechanism of the reparative
regeneration of bone tissue /a radioisotopic
study/
p0117 A82-21800

CARBONACEOUS CHONDRITES
Organic analysis of the Antarctic carbonaceous
chondrites
p0098 A82-20900
Basic nitrogen-heterocyclic compounds in the
Murchison meteorite
p0209 A82-28284

CARBONACEOUS MATERIALS
Could the biochemical metabolism be different
p0106 A82-20976

CARBONACEOUS METEORITES
Nitrogen compounds in carbonaceous meteorites - A
reassessment
p0098 A82-20909
Distribution and enantiomeric composition of amino
acids in the Murchison meteorite
p0253 A82-32210

CARBONIC ANHYDRASE
The importance of carboanhydrase in regulating the
acid-base equilibrium during muscular activity
p0158 A82-24485
Pulmonary carbonic anhydrase in the human, monkey,
and rat
p0169 A82-24917

CARBOXYHEMOGLOBIN TEST
Hypoxic arousal in intact and carotid
chemodenervated sleeping cats
p0019 A82-13236

CARBOXYL GROUP
Potentiometric titration behavior of polyamino
acids prepared by thermal polycondensation
p0102 A82-20938

CARBOXYLIC ACIDS
NT ACETYLSALICYLIC ACID
NT ALANINE
NT TRYPTOPHAN
Factors influencing the rate of non-enzymatic
activation of carboxylic and amino acids by ATP
p0101 A82-20929
The condition of certain glycolytic and
tricarboxylic acid cycle enzymes in intact and
denervated skeletal muscles of the rat during
cooling
p0150 A82-23168

CARCINOGENS
The biological effects of low-level ionizing
radiation
p0091 A82-20146
Mutagens and carcinogens - Occurrence and role
during chemical and biological evolution
p0106 A82-20975
Repair of chemical damage in mammalian cells
[DE81-030823] p0033 N82-12757
Repair of radiation damage in mammalian cells
[DE81-030824] p0075 N82-14800
Carcinogenic effects of coal-conversion materials
[DE81-028108] p0076 N82-14803
Cytologic and biochemical genetic effects of
chemical carcinogens
[AD-A107615] p0136 N82-17864
Comparative biochemistry and metabolism. Part 1:
Carcinogenesis
[AD-A107614] p0136 N82-17865
Molecular interactions of high energy fuels and
jet fuels with oncogenic viruses and endogenous
viruses
[AD-A108377] p0178 N82-18855
Chemical and molecular biological aspects
alkylhydrazine-induced carcinogenesis in human
cells in vitro
[AD-A109088] p0181 N82-19833
National toxicology program
[GPO-85-397] p0217 N82-20865
Biological availability of nickel arsenides:
Toxic effects of particulate Ni5As2
[DE82-000580] p0391 N82-30932
Investigation on the carcinogenic effect of
trichlorethylene by inhalation and mechanisms of
metabolic bioactivation
[BMFT-FB-HA-82-007] p0391 N82-30933
Survey of toxicity and carcinogenicity of mineral
deposits

[DE82-003164] p0425 N82-32975

CARCINOMA
U CANCER

CARDIAC AURICLES
Alterations in responses to drugs of atria from white rats acclimated to hypobaric hypoxia p0089 A82-19497
Limitations of echocardiographic techniques in evaluation of left atrial masses p0169 A82-25135
Two dimensional echocardiographic detection of intraatrial masses p0169 A82-25136
The topography of elements of the cardiac conduction system p0369 A82-42625

CARDIAC VENTRICLES
The electrocardiographic diagnosis of myocardial infarction in the presence of ventricular conduction defects - A new attempt to solve an old problem p0006 A82-11199
The significance of echocardiography in the detection of left ventricular blood supply disorders during bicycle ergometry p0159 A82-24492
Age norms of cardiac chamber volumetric parameters p0163 A82-24541
Mechanical cardiopulmonary interdependence p0168 A82-24915
Acceleration-induced atrioventricular dissociation - Hemodynamic consequences p0251 A82-32002
The effect of nitroglycerine on the functional state of the left ventricle in patients with acute myocardial infarction according to ultrasonic studies of the heart p0279 A82-35679
Effect of habitual exercise on left ventricular response to exercise p0286 A82-36040
Two phases of the inotropic effect of adrenaline - The calcium dependence p0309 A82-38549
A study of the mechanism governing the different types of behavior exhibited by the spiral excitation wave period in auricle and ventricle p0312 A82-38597
Echocardiographic characterization of heart hypertension p0319 A82-40307
The effect of inotropic factors on the postexercise characteristics of the heart p0322 A82-40451
The effects of +Gz acceleration stress on right ventricular pressures in conscious miniature swine. p0328 A82-40676
Effect of warm-up on left ventricular response to sudden strenuous exercise p0340 A82-41212
The significance of postextrasystolic potentiation in the preoperative assessment of the reversal of left-ventricle asynergy in patients with ischemic heart disease p0343 A82-41483
An evaluation of the informativeness of EKG parameters in diagnosing a myocardial infarction of the back wall of the left ventricle p0344 A82-41493
A comparison of echo- and kinetocardiographic indicators of the myocardial contractility of the left ventricle in patients suffering from various forms of ischemic heart disease p0344 A82-41496
The topography of elements of the cardiac conduction system p0369 A82-42625
Internal stresses and contractility of myocardium p0372 A82-43513
The mechanisms of the development of the cardiogenic vagosympathetic reflexes p0373 A82-43631
Right ventricular pressure response to +Gz acceleration stress p0418 A82-47384
Regulation of calcium current and calcium activity in heart cells p0137 N82-17870
Dynamics of left ventricular systolic phase structure during long-term (140-185 days) spaceflights p0348 N82-28954
Ventricular preexcitation syndromes p0398 N82-31932

CARDIOGRAMS
Computer-enhanced thallium scintigrams in asymptomatic men with abnormal exercise tests p0049 A82-16167
The prognostic significance of electrocardiotopogram parameters in macrofocal myocardial infarction p0204 A82-27703
Medical diagnostic application of radiofrequency range electromagnetic waves p0032 N82-12746

p0309 A82-38553

Investigation of the cardiovascular system during prolonged space flights on board the Salyut space stations
p0317 A82-39429

An automated system for the collection and processing of cardiovascular information from athletes
p0324 A82-40404

Methodological aspects of future cardiovascular research in space
p0326 A82-40652

Cardiovascular responses to isometric exercise during simulated zero gravity
p0327 A82-40662

Cardiovascular responses of the chronically instrumented monkey during simulated space flight
p0328 A82-40670

Aspects of cardiovascular adaptation to gravitational stresses
p0329 A82-40687

Body composition of rats flown aboard Cosmos-1129
p0330 A82-40695

Autonomic reactions in labyrinthectomized rabbits during centrifuge acceleration
p0333 A82-40720

Effects of lower body negative pressure on the reliability of cardiovascular system using X-ray kymograms
p0334 A82-40728

Orthostatic tolerance and exercise response before and after 7 days simulated weightlessness
p0334 A82-40731

Analysis of transient cardiovascular response to orthostatic stress using noninvasive methods
p0335 A82-40740

Effects of prolonged bedrest in antiorthostatic position on rCBF measured by 133Xe inhalation technique - Effects of clonidine --- regional Cerebral Blood Flow
p0335 A82-40743

Cardiovascular effects of Clonidine during 20 hours head down tilt /-5 deg/
p0337 A82-40764

Cardiac and cerebral vascular adaptation to gravitational stresses in man
p0337 A82-40765

Effect of warm-up on left ventricular response to sudden strenuous exercise
p0340 A82-41212

The effect of the natural and climatic conditions of the Far North on the human cardiovascular system
p0342 A82-41466

The effect of ultrasound and phonophoresis of ganglioblockers on the cardiovascular system in patients with cervical osteochondrosis
p0343 A82-41476

Sources of an artificial magnetic field for implantation /experimental study/
p0343 A82-41480

Blood circulation and aging
p0367 A82-42609

The condition of the cardiovascular system in air traffic controllers according to data acquired at the workplace
p0368 A82-42614

The intracentral connections of the brain structures participating in cardiovascular control
p0372 A82-43627

The adaptive control of vegetative processes --- biofeedback control of cardiovascular system
p0374 A82-43652

The use of echocardiography for the evaluation of flight fitness of pilots with cardio-vascular anomalies in reference to four cases
p0407 A82-46309

The ultrastructural bases of cardiac insufficiency
p0409 A82-46703

A comparative evaluation of the structural features of the diurnal rhythms of the cardiovascular system in healthy individuals and in patients with ischemic heart disease
p0410 A82-46715

Concerning the investigation of the condition of the cardiovascular system in experiments on animals --- pesticide effects
p0412 A82-46873

Side effects of cardiovascular drugs on the eye
p0414 A82-46898

Presentation of 'echography' experiment --- for monitoring human cardiovascular system under zero-gravity
p0415 A82-47065

Right ventricular pressure response to +Gz acceleration stress
p0418 A82-47384

Cardiorespiratory responses and handgrip isometric component for various wheelchair propulsion systems
p0011 N82-10718

Superconducting magnetometry for cardiovascular studies and an application of adaptive filtering
p0038 N82-13648

Results of study of hemodynamics and phase structure of the cardiac cycle during functional test with lower body negative pressure during 140-day Salyut-6 station flight
p0126 N82-16722

Cardiac output and cardiac cycle phase structure of pilots during flights
p0131 N82-17821

Effects of ambient parameters on man
p0131 N82-17826

Age related distinctions of cosmonauts regional hemodynamics
p0132 N82-17829

Current views and future programs in cardiovascular physiology in space --- plethysmography
p0179 N82-19818

Adaptation to zero gravity as simulated by head-down tilt
p0179 N82-19819

Clinical physiology of the renin-angiotensin-aldosterone system
p0179 N82-19820

Cardiovascular reflexes during upright position
p0179 N82-19821

Volume regulating hormones and their role in the cardiovascular adaptation to zero gravity
p0179 N82-19822

Cardiovascular responses to isometric exercise in sitting and lying position
p0180 N82-19823

Cardiovascular reactions to tilt and lower body positive pressure (LBPP)
p0180 N82-19825

Cerebral hemodynamics at zero gravity
p0180 N82-19827

Use of acetylene rebreathing method for measuring cardiac output during physiological and clinical studies
p0181 N82-19830

A comparison between acetylene and freon rebreathing for measuring cardiac output during exercise --- in space
p0181 N82-19831

Body composition data from the rat subjects of Cosmos 1129 experiment K-316
[NASA-CR-168678] p0213 N82-20832

Physical testing of polymers for use in circulatory assist devices
[PB82-127069] p0223 N82-21088

Cardiovascular adaptations in weightlessness: The influence of in-flight exercise programs on the cardiovascular adjustments during weightlessness and upon returning to Earth
p0248 N82-23110

Response of the cardiovascular system to vibration and combined stresses
[AD-A110494] p0249 N82-23978

Man's adaptive reactions to acoustic parameters of isolated habitats
p0271 N82-25773

Age-related distinctions of echocardiographic parameters of healthy man
p0272 N82-25774

Epidemiology feasibility study: Effects of noise on the cardiovascular system
[PB82-147752] p0301 N82-27974

Epidemiology feasibility study: Effects of noise on the cardiovascular system: Appendix B: Annotated bibliography. Literature. The effects of noise on the cardiovascular system
[PB82-147760] p0301 N82-27975

Epidemiology feasibility study: Effects of noise on the cardiovascular system. Appendix C: Review of non-noise related research of cardiovascular disease
[PB82-147778] p0381 N82-27976
Regional redistributions of the blood in blood loss and mechanical trauma against the background of various functional states of the body
[NASA-TM-76880] p0382 N82-30872
Influence of stress on the blood system reaction in adrenalectomized mice
[NASA-TM-76902] p0383 N82-30877
Reaction of the blood system to single and double effect of a stress agent
[NASA-TM-76066] p0383 N82-30880
Emotional stress as a factor in cardiovascular disturbances
[NASA-TM-76910] p0385 N82-30889
Genetic and individual differences in cardiovascular disturbances of rats during experimental emotional stress
[NASA-TM-76911] p0385 N82-30890
Possible use of magnetobiological effects in neurosurgery
p0387 N82-30905
Detailed research plan: Cardiovascular effects of noise
[PB82-163379] p0391 N82-30934
Morphology and coagulant function of human blood system during long exposure to low ammonia concentrations in a sealed environment
p0394 N82-31903
Noninvasive techniques for cardiovascular examination of interest in aerospace medicine
[AGARD-AG-277(FR)] p0398 N82-31930
Principal electrocardiographic anomalies in the evaluation of pilots
p0398 N82-31931
The contribution of cardiac mechanograms in the evaluation of pilots
p0399 N82-31936
Echocardiography in the examination of pilots
p0399 N82-31937
Ballistocardiography: A nonintrusive method moving towards clinical applications
p0400 N82-31940
The advantage of the lower body negative pressure test in aerospace medicine
p0400 N82-31942
Techniques for cardiovascular examination in human centrifuges and the principal results obtained
p0400 N82-31943
Cybernetic analysis of cardiac rhythm of Salyut-6 orbital station crew during graded exercise test
p0402 N82-32282

CARGO
NT AIR CARGO
CARGO AIRCRAFT
NT C-135 AIRCRAFT
CAROTID SINUS BODY
Hypoxic arousal in intact and carotid chemodenervated sleeping cats
p0019 A82-13236
Role of the carotid chemoreceptors in regulation of inspiratory onset
p0229 A82-29557
Computerized ultrasonic arteriography - A new technique for imaging the carotid bifurcation
p0257 A82-32880
Effects of a weightlessness simulation on the velocity curves measured by Doppler sonography at the level of the carotid system
p0327 A82-40656
The intracentral connections of the brain structures participating in cardiovascular control
p0372 A82-43627
Respiratory adaptation to acute metabolic acidosis in goats with ablated carotid bodies
[AD-A116657] p0428 N82-33984
CAROTID SINUS REFLEX
Modulation of human sinus node function by systemic hypoxia
p0197 A82-26812
Changes in the hemodynamics and efferent activity in the renal nerve with acute hypoxic hypoxia under the stabilization of perfusion pressure in carotid sinuses
p0306 A82-38161
Baroreflex regulation of hemodynamics under orthostatic effects /an investigation with a mathematical model/
p0306 A82-38162

CARTILAGE
Stimulation of body weight increase and epiphyseal cartilage growth by insulin like growth factor
[NASA-TM-84285] p0420 N82-33983
CARTOGRAPHY
U MAPPING
CARTRIDGE ACTUATED DEVICES
U ACTUATORS
CASE HISTORIES
The use of echocardiography for the evaluation of flight fitness of pilots with cardio-vascular anomalies in reference to four cases
p0407 A82-46309

CASTS
The effects of horizontal body casting on blood volume, drug responsiveness, and +Gz tolerance in the rhesus monkey
p0100 A82-21682

CATABOLISM
Increased excretion of urea and N/tau/-methylhistidine by rats and humans after a bout of exercise
p0119 A82-21927
Immobilization effects upon aerobic and anaerobic metabolism of the skeletal muscles
p0332 A82-40712

CATALOGS (PUBLICATIONS)
A catalogue of Performance Evaluation Tests for Environmental Research
p0143 A82-22935

CATALYSIS
NT AUTOCATALYSIS
Template-directed synthesis of oligoguanylic acids - Metal ion catalysis
p0101 A82-20932
On the polycondensation of amino acid adenylates on montmorillonites
p0102 A82-20939
Emergence of flavin catalysis - An approach based on the concept of bioorganic evolution
p0104 A82-20964
Formation of peptides from amino acids by single or multiple additions of ATP to suspensions of nucleoproteinoid microparticles
p0195 A82-26597
Oligonucleotide formation catalyzed by mononucleotide matrices
p0258 A82-33284
CATALYTIC ACTIVITY
Clays as prebiotic photocatalysts
p0099 A82-20916
Template-directed synthesis of oligoguanylic acids - Metal ion catalysis
p0101 A82-20932
Terrestrial evolution of polymerization of amino acids - Heat to ATP
p0101 A82-20937
Polymerization of serine guanylate in the presence of montmorillonite
p0102 A82-20940
Histidyl-histidine catalysis of glycine condensation in fluctuating clay environments
p0103 A82-20952
Experiments on transfer of organic molecular information into crystal lattice superstructures
p0105 A82-20966
Modeling of the synthesis of peptide-like compounds in the primeval lithosphere of the earth
p0149 A82-23136
Principles of enzyme stabilization - Polyacrylamide-gel-immobilized trypsin and chymotrypsin with high catalytic activity at elevated temperatures
p0228 A82-29446
Reactions of O-18 exchange in the myosin systems of skeletal, cardiac, and smooth muscles
p0313 A82-38614

CATARACTS
Aphakia in the flier - Its consequences and correction
p0008 A82-12316
Comparative analysis of the biological effects of electromagnetic radiation. II - Eye damage. Cataractogenesis
p0371 A82-43222

Laser retinometry for cataracts
p0410 A82-46711
CATECHOLAMINE
NT EPINEPHRINE
Activation of succinate dehydrogenation in rat liver by noradrenalin, cAMP and acute cooling
p0112 A82-21734
Change in the nature of the psychotropic effect on the emotional reactivity and behavior in stress situations depending on the state of the catecholaminergic systems of the brain
p0112 A82-21739
The effects of cold on catecholamine fluorescence in several structures of the rat brain
p0150 A82-23172
Variation in catecholamine excretion in adolescents under mountain conditions
p0150 A82-23174
Changes of the catecholamine level in epinephrine-synthesizing oblongatal structures of rats, reacting differently to prolonged single immobilization
p0155 A82-23296
Free and conjugated catecholamines and metabolites in cat urine after hypoxia
p0168 A82-24913
The effect of adapting to high-altitude hypoxia on certain indicators of catecholamine metabolism in rats in the case of spontaneous hereditary hypertension
p0202 A82-27758
Changes in the level of catecholamines in the noradrenaline-synthesizing structures of the rat brain following immobilization
p0202 A82-27764
Effects of novodrine and physical exercise on hemodynamics and coronary blood supply in the healthy human --- catecholamine effects
p0236 A82-31157
Early diagnosis of overstrain of the cardiovascular system in athletes engaging in cyclic forms of sport
p0278 A82-35664
Change in plasma cAMP and catecholamines in men subjected to the same relative amount of physical work stress
p0284 A82-35912
The effect of positive and negative ions of air on the content of catecholamines in the brain and adrenal glands
p0287 A82-36690
Effects of beta-adrenergic receptor blockade on glycogenolysis during exercise
p0374 A82-44133
Catecholamines and their enzymes in discrete brain areas of rats after space flight on biosatellites Cosmos
[IAF PAPER 82-180] p0377 A82-44688
Catecholamine levels in fit and nonfit males when exposed to an emotional stress
p0178 N82-19813
Catecholamine content of rat blood after flight aboard Cosmos-936 biosatellites
p0216 N82-20855
Catecholamines and enzymes of their metabolism in rat myocardium after flight aboard the Cosmos-936 biosatellite
p0350 N82-28966
Catecholamines in the blood plasma of August and Wistar rats during emotional stress
[NASA-TM-76872] p0384 N82-30885
Changes of blood plasma renin activity in August and Wistar rats under emotional stress
[NASA-TM-76873] p0384 N82-30886
Activity of rat adrenal medula after flight aboard Cosmos-1129 biosatellite
p0395 N82-31905
CATEGORIES
Task categorization and the limits of human performance in extreme heat
p0321 A82-40439
CATHETERIZATION
A modification of Sones' method of selective coronarography
p0343 A82-41485
CATHODE RAY TUBES
Eye movement measurement of readability of CRT displays
p0017 A82-12869
Visual fatigue and cathode ray tube display terminals
p0017 A82-12870
An evaluation of alphanumeric, graphic, and color information displays
p0017 A82-12871
Effects of extended practice on dual-task tracking performance
p0017 A82-12875
Visual acuity in color contrast on cathode ray tubes - Role of luminance, hue, and saturation contrasts
p0252 A82-32010
Health hazards of visual display units with particular reference to office environments
[PB82-120627] p0249 N82-23979
CATIONS
NT METAL IONS
Mechanisms for the regulation of the intracellular calcium distribution
p0115 A82-21774
Specificity of action of monovalent cations on the ATPase activity of myosin HMM-S-1
p0312 A82-38594
The effect of monovalent cations on the ATPase activity and superprecipitation of actomyosin
p0314 A82-38615
Serum and urinary cation changes on acute induction to high altitude /3200 and 3771 metres/
p0417 A82-47339
CATS
Condition of meningeal nervous system during repeated exposure to transverse accelerations
p0127 N82-16730
CELESTIAL BODIES
NT ASTEROIDS
NT CARBONACEOUS CHONDRITES
NT CARBONACEOUS METEORITES

CELL DIVISION
A discrete model of the circadian kinetics of human bone marrow
p0027 A82-15704
A mathematical model of cell populations with stem cells
p0109 A82-21702
An electron microscope study of hyperplasia in fibers of the skeletal muscles of athletes
p0114 A82-21764
The source of reparative regeneration in skeletal muscle tissue
p0114 A82-21768
Approaches to the removal of G2-chalone from the liver of rats
p0118 A82-21810
Mechanism for fluctuations in cell cycle duration
p0241 A82-31529
Diurnal changes in the duration of the S and G2 phases of the mitotic cycle in mononuclear and binuclear hepatocytes of normal and thyroxine-treated rats
p0323 A82-40459
The synthesis of nuclear and mitochondrial DNA and RNA, and the synthesis of heme and globin in rabbit bone marrow during the stimulation of erythropoiesis
p0325 A82-40501
Morphogenesis of a higher plant from cultured cells and embryos in space
p0327 A82-40666
Suppression of osteoblast differentiation during weightlessness
p0337 A82-40756
Myosatellocytes and cambial properties of skeletal and muscular tissue
p0342 A82-41469
Proliferation kinetics of Paramecium Tetraurelia in balloon-borne experiments
p0416 A82-47332

A model of monomeric tissue growth
p0419 A82-48203

Molecular events basic to cellular radiation response
[DE81-027898]
p0014 N82-11776

CELLS (BIOLOGY)

The effects of space flight factors on the stress reaction of the nuclear nucleic acids in the rat liver
p0007 A82-12279

Nucleic acid and protein concentrations in rat raphe nuclei neurons and gliocytes during complete sleep deprivation in the cylindrical tretbahn
p0024 A82-15352

DNA and RNA synthesis in the isolated nuclei of rat skeletal muscle fibers during hypokinesia
p0024 A82-15353

Neurotrophic factor - Characterization and partial purification
p0026 A82-15690

The function of the endolymphatic duct - An experimental study using ionic lanthanum as a tracer: A preliminary report
p0063 A82-17428

Visual-vestibular interactions in visual cortical cells in the cat
p0066 A82-17448

Estimating cell populations
p0072 A82-18684

The influence of some triterpenic glycosides on C-14-alanine inclusion into the bone-marrow cells of rats
p0092 A82-20306

Phylogenetic sequence of metabolic pathways in Procambrian cellular life
p0105 A82-20967

DNA-protein complex from an extreme halophile - A histone-like protein in archaebacteria
p0105 A82-20970

On the origin of photosynthetic eukaryotic cells - Cyanidium caldarium as a 'bridge' alga between prokaryotic cyanobacteria and eukaryotic rhodophytes: Evidence from environmental, polysaccharide biochemistry and ultrastructural studies
p0106 A82-20973

Cellular mechanisms of the Frank-Starling phenomenon
p0107 A82-21456

Changes in the structure and cellular composition of the inguinal lymph nodes of white rats subjected to static and dynamic stresses
p0114 A82-21761

Cellular and molecular bases of local immunity
p0115 A82-21773

Mechanisms for the regulation of the intracellular calcium distribution
p0115 A82-21774

The existence of an endogenous biorhythm in chromatin-positive cells of the buccal epithelium in women
p0116 A82-21783

The multiple forms of tyrosine aminotransferase in rat liver cells and their role in cellular homeostasis
p0117 A82-21807

The modeling of membranes and membrane engineering --- incorporation of foreign substances into cells
p0159 A82-24498

Dynamics of brain cell oxygen tension and electrical activity in the norm and in hypoxia
p0186 A82-25670

Models for protocellular photophosphorylation
p0195 A82-26596

Intracellular local changes in resistance in muscle fibers as a function of membrane potential
p0200 A82-27736

Symbiosis in cell evolution: Life and its environment on the early earth --- Book
p0207 A82-28113

Effects of space flight factors at the cellular level - Results of the Cytos experiment
p0211 A82-28405

Structural features of the receptor cells of the saccular macula of the common frog
p0228 A82-29433

The effect of abnormal cell proportion on specimen classifier performance
p0234 A82-30296

Evidence for a biological clock
p0234 A82-30301

Effects of high-frequency ultrasound on adaptive changes in cell resistance
p0242 A82-31546

Cell morphological, ontogenic, and genetic reactions to 0-g simulation and hyper-g
p0253 A82-32154

Reduction of the edema of acute hyperoxic lung injury by granulocyte depletion
p0256 A82-32838

Encapsulation of macromolecules by lipid vesicles under simulated prebiotic conditions
p0258 A82-33286

The nature of radiation damage of haemopoietic stem cells under continuous irradiation at low dose rate
p0259 A82-33600

Regulation of the functional activity of stem cells which are the precursors of granulomonopoiesis by polypeptide thymic and bone marrow factors
p0262 A82-34684

Distribution of nucleolar nucleic acids in Purkinje cells under vestibular stimulation and immobilization of rats
p0262 A82-34686

Ultracytochemical changes in the brain and liver under the influence of low-intensity nonionizing microwave radiation
p0262 A82-34687

Magnetic-field effect on photophysical processes in the light-harvesting pigment apparatus of purple photosynthetic bacteria
p0264 A82-34917

Structural changes of the thymus of irradiated animals that were also subjected to heat trauma
p0278 A82-35651

Modeling of the recovery of cells from radiation damage and the principle of effective-dose reduction. I - Models of the recovery of cells after acute irradiation
p0278 A82-35657

Omega potential: Quantitative index of states of brain and organism structures. I - The physiological significance of the omega potential when it is recorded from deep structures and from the scalp
p0282 A82-35834

Cell-mediated immune reactions in ground squirrels in winter lethargy - Two-way transplantation reaction
p0286 A82-36229

The effect of space flight factors on quiescent nuclei of certain plant and animal test objects
p0290 A82-37372

Optimization of the conditions of modified cell irradiation
p0306 A82-38154

Radiation damage and recovery of mouse T-cells. IV - Elimination of radiation-induced migration abnormalities in T-lymphocytes
p0306 A82-38156

Effects of cAMP accumulation activators on certain stages of genome expression in cells upon acute radiation damage to the organism. III Comparative study of the properties of RNA synthesized in a system of isolated liver and spleen cell nuclei from irradiated rats and animals having been treated with serotonin prior to irradiation
p0306 A82-38157

The dynamics of quantitative changes of RNA in rat cerebellum Purkinje cells in different

functional states
p0300 A82-38538
The concentration of adenyl nucleotides and creatine phosphate in the cerebral hemispheres during different manifestations of stress
p0310 A82-38560
Temperature characteristics of the ouabain-insensitive sodium flux in frog muscles
p0312 A82-38600
Conditions leading to kinetic and thermodynamic isotopic effects in a cell
p0313 A82-38601
F-actin is a helix with a random variable twist
p0314 A82-38694
The regulation of calcium exchange in the cells of different regions of the warm-blooded animal heart
p0320 A82-40313
The toxic properties of rabbit and dog sera under controlled hyperthermia
p0322 A82-40450
Changes of intracellular rest potential and the length of isolated muscle under different loads
p0324 A82-40480
Some of biochemical parameters in rat brain during +Gz acceleration
p0333 A82-40717
Changes of periodic protoplasmic movements on the fast clinostat
p0334 A82-40725
Root cell gravireaction - Hormone interaction
p0336 A82-40745
Cellular aspects of gravitational biology
p0336 A82-40754
The intracellular responses of frog eggs to novel orientations to gravity
p0337 A82-40758
Gravity sensing system formation in tadpoles /Rana temporaria/ developed in weightlessness simulation
p0337 A82-40759
Response of cultured cells to hyper- and hypogravity
p0338 A82-40773
A hygienic evaluation of the biological effects of nonionizing microwave radiation
p0342 A82-41468
The mechanism of the activating effect of anti-cardiac antibodies on the electrical and contractile activity of myocardial cells
p0374 A82-43665
The early reactions of cells to ionizing radiation and their role in protection and sensitization --- Russian book
p0404 A82-45772
The oxygen effect in E. coli cells. II - The role of the genotype and the suspension medium
p0411 A82-46851
Models for the recovery of cells from radiation damage and the principle of the diminution of the effective dose. II - A model of the recovery of cells under arbitrary conditions of irradiation
p0411 A82-46855
The nonadditive effects of neutron and gamma radiation on Ehrlich ascites tumor cells
p0411 A82-46857
The microdosimetric characteristics of sources of monoenergetic neutrons
p0411 A82-46862
Several new features of the comparison of cell survival dose parameters /statistical analysis and extrapolation number modification factor/
p0411 A82-46863
Different modifiability of point and structural radiation mutations in eukaryotes --- under radioprotective agents
p0412 A82-46864
The molecular mechanisms of the interphase death of lymphoid cells. V - Determination of the lifespan of nuclear and polysomal RNA in irradiated thymocytes
p0412 A82-46867
The cellular composition of lymphoid organs and the parameters of the immune response of mice at later times following irradiation
p0412 A82-46868
Cell dynamics in the lymphoid organs during long-term administration of tritium oxide in varying doses
p0412 A82-46869
The activity of the microsomal hydroxylases according to age in healthy individuals
p0413 A82-46878
The relationship between the formation of ATP that is stimulated by insulin and the effect of insulin on the accumulation of creatine in cytoplasmic-membrane-enriched particles from rat skeletal muscles
p0413 A82-46880
The induction of the formation of morphine-binding spleen cells as a manifestation of the immune response
p0413 A82-46888
The effect of humoral factors of the lymph tissues on hemopoietic stem cells
p0413 A82-46890
The transformation of lipids into glycogen in animal and human cells
p0413 A82-46892
A study in motion sickness - Saccular hair cells in the adult bullfrog
p0416 A82-47200
The effect of the dispersion of the electric parameters of bacterial cells on their orientation in an alternating electric field

p0068 A82-17467
The interaction between accuracy of gaze with and without head movements in patients with cerebellar ataxia
p0069 A82-17472

The dynamics of quantitative changes of RNA in rat cerebellum Purkinje cells in different functional states p0308 A82-38538
Spatial organization of the vestibular influences on the cerebellar fastigial neurons of cats p0320 A82-40312
The effect of a physiological load on the exchange and phosphorylation of cell membrane proteins in the brain of rats p0374 A82-43654
Nitrogen compound levels in tissues of rat cerebral hemispheres and cerebellum after flight aboard Cosmos-1129 biosatellite p0350 N82-28967

CEREBRAL CORTEX
Frequency analysis of EEG in rats during the preconvulsive period of O2 poisoning p0005 A82-11029
The functional state of some subcortical cerebral structures during adaptation and deadaptation to physical loading p0055 A82-16823
Visual-vestibular interactions in visual cortical cells in the cat p0066 A82-17448
Frequency characteristics of visual evoked potentials in different regions of the human cerebral cortex p0093 A82-20314
Models of a functional lapse in one hemisphere and of the neuropharmocological effects on the deep structures of the brain p0094 A82-20325
A histochemical investigation of the microvascular effectors regulating the supply of blood to the cerebral cortex p0112 A82-21744
Neuronal-glial alterations in the cerebral cortex of animals under the influence of white noise p0114 A82-21769
The relationship between cardiac and motor components of a conditioned reflex upon the local cooling of various zones of the cerebral cortex in cats p0116 A82-21787
Correlation of behavioral rest-activity phases and the characteristics of the spatial organization of cortical potentials in the case of experimental neurosis p0155 A82-23291
Neuromorphological evidence of individual differences in human vision p0159 A82-24500
Dynamics of brain cell oxygen tension and electrical activity in the norm and in hypoxia p0186 A82-25670
Effect of white noise on the auditory cortex ultrastructure in rats p0188 A82-25711
Ultrastructural organization of AI and AIV zone projections of the cat auditory cortex to the posterior colliculi of the tectum opticum p0189 A82-25718
The sensitivity of silent and spontaneously active cat cerebral cortex neurons to anoxia p0195 A82-26751
Effects of acoustic stress on rat sensorimotor cortex morphology p0202 A82-27765
Mechanisms for the adaptive and trophic effects of the sympathetic nervous system on cerebral vessels and tissue p0210 A82-28458
The effect of decimeter waves and sinusoidal modulated currents on the nuclear DNA content of cerebral nerve cells /Experimental study/ p0239 A82-31509
Microcirculation and oxygen tension in the rat brain cortex during hemorrhagic shock p0262 A82-34683
The effect of acute hypoxia on the EEG and unit impulse activity of neurons of different brain structures in rats p0286 A82-36172
Local cerebral blood flow dynamics during experimental ischemia p0309 A82-38544
The cholinergic nature of hypothalamo-cortical excitatory influence p0309 A82-38551
Ultrastructural changes in the brains of rats subjected to acute emotional stress p0310 A82-38558
Prostoglandins and regulation of cerebral circulation under conditions of the altered gaseous composition of the blood p0310 A82-38561
Changes in the human visually evoked cortical potential in response to chromatic modulation of a sinusoidal grating p0314 A82-38795
The cortical regulation of human motion --- Russian book p0316 A82-39283
Neurons in cat visual cortex tuned to the direction of motion in depth - Effect of positional disparity p0318 A82-39434
Participation of the prefrontal cortex in delayed spatial choice and differentiation of time intervals in rhesus monkeys p0323 A82-40470
Afferent associative and commissural projections of the cortical vestibular zone VI of cats p0325 A82-40495
Age changes in the cerebral cortex of humans and cats /A comparative electron-microscopical investigation/ p0325 A82-40496
Stereological analysis of interneuronal contacts in the cerebral cortex of rats during the posthypoxic period p0368 A82-42622
A morphological investigation of the regulatory mechanisms of the intracerebral blood circulation p0369 A82-42627
Functional conditions of the brain and cerebral pathology p0369 A82-42634
The influence of afferent visual impulses on the morphological and biochemical parameters of the development of the neurons of the visual, motor, and parietal cerebral cortices p0369 A82-42636
The morphology of the connections of the cortical vestibular zone --- Russian book p0372 A82-43611
Changes of the functional condition of the neocortex during direct application of optical radiation p0374 A82-43655
The sequence of the pathomorphological reactions to the effect of an alternating magnetic field p0420 A82-48222
Muscle, motor cortex, cerebellar nuclear, and spindle afferent during slow hold-ramp-hold position-tracking movements of the monkey's wrist p0135 N82-17854
Cerebral hemodynamics at zero gravity p0180 N82-19827
USSR Report. Life sciences: Effects of nonionizing electromagnetic radiation, no. 5 [JPRS-80525] p0266 N82-24819
Pathomorphological reactions of cerebrocortical neural elements to alternating magnetic field p0266 N82-24820
The production of specified electrocortical activity as a measurable task [AD-A111422] p0294 N82-26965
The interaction of Purkinje cells, capillaries and glia in the cerebellar cortex of normal and hypokinetic cats [NASA-TM-76882] p0382 N82-30873
Reaction to hypokinesia and hyperkinesia of somatochrome neurons in the motor zone of the cerebral cortex in rabbits [NASA-TM-76885] p0390 N82-30925
Significance of magnetic field parameters to change in evoked bioelectric activity of the brain p0395 N82-31910

CEREBRAL VASCULAR ACCIDENTS
Seasonal vascular tension variations in patients with cerebral circulatory disorders under the conditions of an arid zone p0189 A82-25715

Rheoencephalographic signs of inadequate cerebral blood supply in incipient cerebrovascular insufficiency
p0201 A82-27755
State of adaptation in patients with hypertension
p0324 A82-40476
The dynamics of the development of postischemial cerebrovascular phenomena during the perfusion of the cerebral vessels with a stable volume of blood
p0366 A82-42173
The changes in the mechanical properties of the brain during the development of edema induced by repeated venous congestions
p0420 A82-48216
CEREBROSPINAL FLUID
An experimental study of the human blood-cerebral barrier using scanning electron microscopy
p0369 A82-42630
CEREBRUM
The role of extracellular O2 and CO2 tensions in membrane mechanisms of cerebral arterial smooth muscle regulation
p0090 A82-19747
Activation of the metabolism of the gamma-aminobutyric acid system in the cerebral hemispheres under various types of stress
p0113 A82-21746
Certain features of cerebral hemodynamics in doing mental work at different air temperatures
p0114 A82-21759
Changes in peripheral hemodynamics during transient disturbances in cerebral circulation
p0159 A82-24497
Characteristics of the functional state of health
p0161 A82-24520
Cerebral hemodynamics in healthy individuals and the recognition of subclinical signs of insufficient blood supply to the brain
p0201 A82-27751
Age-related features of blood-coagulation changes in the treatment of cerebral ischemias with indirect-action anticoagulants
p0201 A82-27754
Local cerebral glucose utilization in non-rapid eye movement sleep
p0264 A82-34031
The role of central gray matter in the activation of antipain systems of the rat's brain under stress
p0309 A82-38547
The concentration of adenyl nucleotides and creatine phosphate in the cerebral hemispheres during different manifestations of stress
p0310 A82-38560
The dynamics of the development of postischemial cerebrovascular phenomena during the perfusion of the cerebral vessels with a stable volume of blood
p0366 A82-42173
The organization of the afferent subcortical inputs of the visual region of the cat cerebrum
p0368 A82-42621
Conjugated changes of the resistance and blood filling of cerebral vessels during shifts in the blood gas composition
p0373 A82-43635
Cerebral hemispheric activity and autonomic nervous function
p0137 N82-17868
Correlation between individual distinctions of functional asymmetry of cerebral hemispheres and pilot performance
p0215 N82-20844
CERTIFICATION
An adaptive private pilot certification exam

CHLOROETHYLENE
Investigation on the carcinogenic effect of trichlorethylene by inhalation and mechanisms of metabolic bioactivation
[BMFT-FB-HA-82-007] p0391 N82-30933
CHLOROFORM
Environmental and health aspects of chloroform: A comprehensive bibliography of published literature, 1930 - 1981
[PB82-110115] p0218 N82-20070
CHLOROPHYLLS
Antenna form of photosystem-2 chlorophyll in chloroplasts
p0199 A82-27730
Participation of pheophytin in primary electron transfer processes in the reaction centers of photosystem II --- photoreduction reactions of chlorophyll derivative
p0201 A82-27746
Effects of reversible manganese extraction on the light reactions of photosystem II preparations
p0231 A82-29816
Model systems in photosynthesis research
[DE81-023889] p0009 N82-10706
The structure and function of chlorophyll-proteins in photosystem 1 and the light harvesting complex of photosystem 2
p0129 N82-17811
Orientation and energy-transfer studies on chlorophyll in the photosynthetic membrane
[DE82-010180] p0356 N82-29852
CHLOROPLASTS
The evolution of blue-greens and the origins of chloroplasts
p0105 A82-20971
Antenna form of photosystem-2 chlorophyll in chloroplasts
p0199 A82-27730
Linear dichroism of absorption changes upon the photoreduction of pheophytin in oriented preparations of photosystem II
p0228 A82-29442
Studies on structure and function of chloroplasts - Reconstitution of photophosphorylation activity by combining the deficient membranes of chloroplasts with crista membrane fragments of mitochondria
p0259 A82-33595
CHOLESTEROL
Relation between high density lipoprotein cholesterol and coronary artery disease in asymptomatic men
p0169 A82-25134
A measurement of the size distribution of lipoproteins in the plasma of human blood
p0313 A82-38603
The inhibition of the biosynthesis of cholesterol and phospholipids by hydrocortisone in the liver of rats
p0413 A82-46882
The effects of varying exercise intensities and durations on plasma high density lipoprotein-cholesterol, body composition and maximum oxygen consumption
p0248 N82-23973
Effect of restricted mobility on the composition and metabolism of blood lipoproteids in rabbits
[NASA-TM-76846] p0382 N82-30871
CHOLINE
The effect of cholinomimetics on the development of hypothermia
p0115 A82-21781
Nutrients that modify brain function
p0189 A82-25722
Synthesis of phosphatidylcholine under possible primitive earth conditions
p0258 A82-33285

The circadian organization of the circulatory and respiratory systems of Antarctic workers
p0061 A82-17139
The effects of operator activity on the diurnal rhythm of physiological functions
p0061 A82-17142
The circadian rhythm of activity of adrenergic nerve fibers in the dura mater of rats
p0112 A82-21743
Dynamics of the condition of granulation tissue after injuries sustained at different times of the day
p0114 A82-21763
The existence of an endogenous biorhythm in chromatin-positive cells of the buccal epithelium in women
p0116 A82-21783
Comparative study of several physiological parameters in the evaluation of functional condition in nurses
p0119 A82-21826
Biological rhythm aspects of adaptation mechanisms
p0153 A82-23277

Diurnal and seasonal rhythms in adrenal cortex activity in albino rats undergoing physical training
p0155 A82-23295
Circadian rhythm of changes of phospholipid content and the activity of nonspecific phosphomonoesterases in the rat liver
p0155 A82-23300
Characteristics of the functional state of health
p0161 A82-24520
Circadian and seasonal rhythms in plasma androgen levels in the rhesus macaque monkey
p0161 A82-24525
Suprachiasmatic stimulation phase shifts rodent circadian rhythms
p0165 A82-24799
Diurnal rhythm of sleep and wakefulness in arctic suslik /Citellus parryi/ during summer season
p0192 A82-25823
The effect of the circadian rhythm of physiological functions on the mental work capacity of operators
p0203 A82-27769
Daily rhythms of physiological functions during shift work
p0203 A82-27771
Altitude and hypoxia as phase shift inducers --- of human circadian rhythms
p0210 A82-28480
The relationship between circadian and circanian rhythms of some parameters of the heart contractile function and vascular tension
p0231 A82-29807
Circadian rhythm dynamics under conditions of an altered gaseous medium and hypokinesia
p0235 A82-31151
Effects of geomagnetic field disturbances on the diurnal rhythm of physiological functions
p0235 A82-31152
Human body clocks and the timing of sleep
p0253 A82-32213
Some characteristics of the diurnal rhythm of physiological functions of sailors in the tropics
p0308 A82-38180
Circadian changes in resting heart rate and body temperature, maximal oxygen consumption and perceived exertion
p0308 A82-38268
Rotating shift work schedules that disrupt sleep are improved by applying circadian principles
p0308 A82-38325
Diurnal changes in the duration of the S and G2 phases of the mitotic cycle in mononuclear and binuclear hepatocytes of normal and thyroxine-treated rats
p0323 A82-40459
The circadian rhythm of the sensitivity of the chromosome apparatus of mice to the mutagenic effect of measles
p0323 A82-40462
Influences of horizontal hypokinesia on performance and circadian physiological rhythms in female humans
p0329 A82-40682
Biorhythms of rats during and after space flight
p0330 A82-40692
Rhythms of electrolytes and hydroxyproline excretion in urine of rats after three weeks of weightlessness - Biosatellite Cosmos-1129
p0330 A82-40693
Diurnal dynamics of the indicators of the capacity for physical work and of physiological functions
p0342 A82-41460
Regulation of circadian rhythmicity
p0372 A82-43383
Sleep schedules and peak times of oral temperature and alertness in morning and evening 'types'
p0403 A82-45575
A comparative evaluation of the structural features of the diurnal rhythms of the cardiovascular system in healthy individuals and in patients with ischemic heart disease
p0410 A82-46715
The effect of microgravitation on the reproduction rhythm of plant cells
p0415 A82-4706[illegible]
Preliminary characterization of persisting circadian rhythms during space flight: Neurospora as a model system
p0174 N82-18266
Behavioral study of ultradian activity periods of mice enclosed in experimental cages of different dimensions
[NASA-TM-76848] p0245 N82-22870
Local serial correlation in behavioral states in the mouse
[AD-A111021] p0294 N82-26959
Sleep and wakefulness handbook for flight medical officers
[AGARD-AG-270(E)] p0303 N82-27972
USSR report. Space biology and aerospace medicine, volume 16, no. 3, May - June 1982
[JPRS-81197] p0347 N82-28949
Sleep, circadian cycles of physiological functions and parameters of human work capacity on first day after changing from altered to usual sleep-waking cycle
p0348 N82-28951
Synchronization of cardiovascular accidents with physical clocks

Medical emergencies on board airliners - Ground management
p0315 A82-38846
Causes of fatigue among crews of civil aviation helicopters
p0124 N82-16708

CLAMPS
Prosthetic occlusive device for an internal passageway
[NASA-CASE-MFS-25640-1] p0294 N82-26962

CLASSIFICATIONS
NT INDEXES (DOCUMENTATION)
The classification of hypoxic conditions
p0027 A82-15708
Method for improving the reliability of the recognition and classification of worker physiological condition in problems of work physiology
p0236 A82-31156
A classification of behavioral adaptation
p0281 A82-35827
Classification of pathological states of the stato-kinetic /vestibular/ analyzer
p0369 A82-42630

CLASSIFIERS
The effect of abnormal cell proportion on specimen classifier performance
p0234 A82-30296

CLASSIFYING
Principles of the definition and classification of tissues
p0368 A82-42620

CLAYS
NT MONTMORILLONITE
Clays as prebiotic photocatalysts
p0099 A82-20916
Clay-mediated reactions of HCN oligomers - The effect of the oxidation state of the clay
p0099 A82-20917
Histidyl-histidine catalysis of glycine condensation in fluctuating clay environments
p0103 A82-20952
Clay and the origin of life
p0305 A82-38115
Chemical evolution. XL - Clay-mediated oxidation of diaminomaleonitrile
p0339 A82-41196

CLEANERS
NT AIR FILTERS

CLEANING
NT ULTRASONIC CLEANING
Biofouling countermeasure evaluations for OTEC heat exchangers
[DE82-003918] p0386 N82-30896

CLIMATE
Population mechanisms of adapting to extreme environmental conditions /with Clethrionomys glareolus Schreb considered as an example/
p0187 A82-25692
A psychophysiological analysis of the memory changes undergone by humans in adapting to new climatic and geographic conditions
p0187 A82-25694
Recording basic climatic parameters and their processing into integrated heat stress indices
[DRIC-T-6292] p0223 N82-21885

CLIMATOLOGY
NT BIOCLIMATOLOGY

CLIMBING FLIGHT
Apparent instrument horizon deflection during and immediately following rolling maneuvers
p0416 A82-47335

CLINICAL MEDICINE
The electrocardiographic diagnosis of myocardial infarction in the presence of ventricular conduction defects - A new attempt to solve an old problem
p0006 A82-11199
Trial of an automated EKG analysis system in a cardiological clinic
p0052 A82-16804
The ergometric determination of myocardial reserves
p0052 A82-16805
Investigation of the otolith apparatus in clinical practice
p0053 A82-16812
Monitoring the condition of the organism under hyperoxic conditions
p0061 A82-17141
EEG description algorithm for use in clinical practice and studies of work capacity
p0092 A82-20304
The functional condition of the ampullar apparatus in Meniere's disease
p0092 A82-20308
Deontology in the practice of otorhinolaryngology
p0093 A82-20312
Special and clinical physiology of hypoxic states
p0093 A82-20317
Elevation of hypoxia resistance with the use of gutimine
p0093 A82-20319
Some indicators of protein metabolism in erythrocytes during radiation sickness and following cystamine injection
p0111 A82-21724
Clinical results on thymectomy in patients with myopathy in relation to the degree of muscular weakness
p0113 A82-21755
Mechanisms of compensation and adaptation in relation to the hyperfunction of the heart
p0113 A82-21756
The role of urokinase in the regulation of the fibrinolytic activity of blood under normal conditions
p0117 A82-21799
Predicting the potentials of young swimmers based on clinical and physiological data
p0118 A82-21814
Criterion for the evaluation of arterial pressure response to bicycle ergometer exercise during treatment for hypertension
p0152 A82-23267
A sino-auricular block with Samoilov-Wenkeback periods - Diagnosis with the aid of an automated analysis of the structure of heart rhythms and clinical assessment
p0153 A82-23270
Changes in regional and central hemodynamics during the treatment of hypertensive patients with obsidan, apressin and their combination
p0153 A82-23271
The central hemodynamics of patients with sepsis and acute renal insufficiency
p0153 A82-23276
Improving the medical care of navy personnel
p0155 A82-23301
A discussion of the nature of sports medicine
p0158 A82-24484
Changes in peripheral hemodynamics during transient disturbances in cerebral circulation
p0159 A82-24497
Clinical-physiological characterization of the auditory-analyzer function of workers of various occupations at the Mikhailovskii concentration mill
p0160 A82-24503
Progress in the study of occupational diseases at the F. F. Erisman Hygiene Research Institute in Moscow
p0160 A82-24505
Evaluation of the information content of the clinical signs and the probability of noise sickness
p0160 A82-24511
Evaluation of the effectiveness of the complex treatment of patients with ischemic heart disease by the bicycle ergometer method
p0161 A82-24517
Cardiac function in surgical tuberculosis patients under conditions of prolonged bed rest
p0161 A82-24519
Combined rehabilitative and therapeutic measures in space medicine
p0163 A82-24547
Stereotactic biopsy of brain tumors based on computerized tomography
p0165 A82-24561
Tissue hypoxia and its correction --- Russian book
p0168 A82-24910
Basic principles of hypoxia control during shock
p0185 A82-25676
Clinical characteristics of neurotic disorders in female long-distance telephone operators

p0187 A82-25697
Clinical and epidemiologic analysis of ischemic EKG responses to physical exercise in males p0188 A82-25707
The combined use of sulfamonomethoxine and UV radiation in the treatment of chronic pneumonia p0190 A82-25808
Clinical and experimental evidence for the use of hypothermia in decompression sickness p0193 A82-26239
Electroacupuncture in the complex treatment of trifacial neuralgia p0203 A82-27775
The norm and pathology in sports p0204 A82-27782
Use of a constant magnetic field for the treatment of vibration sickness p0205 A82-27796
NMR imaging in medicine p0231 A82-29574
Current clinical approaches to mediastino-pulmonary sarcoidosis p0232 A82-29993
The organization of blood transfusions and blood substitutes on board ships at sea p0233 A82-30029
The value of spiroergography in the diagnosis of the initial stage of cardiac insufficiency p0233 A82-30030
Perforated gastric and duodenal ulcers in servicemen p0234 A82-30031
Clinical features of the effect of factory noise as a function of its type and spectral characteristics p0240 A82-31519
Foreign body extraction from the left ptergopalatine fossa under fluoroscope control p0242 A82-31539
Psychotherapeutic use of sleep deprivation in treating insomnia produced by psychic soporific dependence p0242 A82-31543
Rapid diagnostic systems - A principle for diagnostic preparations and an analysis of the rapid systems --- for disease-causing microorganisms p0243 A82-31548
Reducing motion sickness - A comparison of autogenic-feedback training and an alternative cognitive task p0252 A82-32005
Reduction of the edema of acute hyperoxic lung injury by granulocyte depletion p0256 A82-32838
An autoradiographic and electron-microscope experimental study of the effect on wound healing of various Soviet dressings p0263 A82-34688
The first clinical experience with a new Soviet antiarrhythmic drug, the diethylamine analog of ethmosine, in patients with different disorders of the heart rhythm p0279 A82-35678
Mechanisms of the development of hypersensitivity to strophanthin in experimental myocardial infarction and its pharmacological correction p0280 A82-35683
Postural vertigo as a specific symptom of Meniere's disease p0280 A82-35690
Classification of vestibular disorders as a function of the phase of the disease and the degree of vestibular compensation p0280 A82-35691

Development of the carbon fibre polysulphone toggle for ligament repair operations [CSIR-ME-1709] p0246 N82-22881
Survey of the experimental shock research performed at the Medical Biological Laboratory TNO and at the Pharmacological Laboratory, University of Amsterdam [MBL-1981-9] p0273 N82-25782
Clinical examination of spinal injuries p0360 N82-29882
USSR report: Life sciences. Effects of nonionizing electromagnetic radiation, no. 6 [JPRS-81302] p0386 N82-30899
Efficacy of cimetidin in the prevention of ulcer formation in the stomach during immobilization stress [NASA-TM-76864] p0389 N82-30923
Effect of optokinetic stimulation on operator's functional state and professional work capacity p0394 N82-31896
Implantable, remotely-programmable insulin infussion system [DE82-003084] p0398 N82-31927
Ballistocardiography: A nonintrusive method moving towards clinical applications p0400 N82-31940
Effects of combination of antibiotic-resistant bifidobacteria and corresponding antibiotics of survival of irradiated mice p0430 N82-33994
Remote Medical Diagnosis System (RMDS) Advanced Development Model (ADM) laboratory test results [AD-A114073] p0432 N82-34012

CLOSED ECOLOGICAL SYSTEMS
A regenerative life support system for Space Operations Center /SOC/ A probable first flight application [ASME PAPER 81-ENAS-12] p0002 A82-10900
Treatment of CELSS and PCELSS waste to produce nutrients for plant growth --- Controlled Ecological Life Support Systems and Partially Controlled Ecological Life Support Systems [ASME PAPER 81-ENAS-19] p0003 A82-10907
The potential role of aerobic biological waste treatment in regenerative life support systems [ASME PAPER 81-ENAS-20] p0003 A82-10908
Ion-exchange chromatography separation applied to mineral recycle in closed systems [ASME PAPER 81-ENAS-21] p0003 A82-10909

Wet oxidation as a waste treatment in closed systems
[ASME PAPER 81-ENAS-22] p0003 A82-10910
Generic waste management requirements for a controlled ecological life support system /CELSS/
[ASME PAPER 81-ENAS-23] p0003 A82-10911
Regenerable CO2 collection for spacecraft application
[ASME PAPER 81-ENAS-28] p0004 A82-10915
Unconventional processes for food regeneration in space - An overview
[ASME PAPER 81-ENAS-35] p0004 A82-10921
The CELSS program - An overview of its structure and use of computer modelling
[ASME PAPER 81-ENAS-36] p0004 A82-10922
A chamber design for closed ecological systems research
[ASME PAPER 81-ENAS-37] p0004 A82-10923
An approach to the preliminary evaluation of Closed-Ecology Life Support System /CELSS/ scenarios and control strategies
[ASME PAPER 81-ENAS-38] p0004 A82-10924
Oxygen generation subsystem for spacecraft
[ASME PAPER 81-ENAS-40] p0004 A82-10925
Design and control strategies for CELSS - Integrating mechanistic paradigms and biological complexities
[ASME PAPER 81-ENAS-43] p0005 A82-10927
Nutritional criteria for closed-loop space food systems
p0030 A82-15856
Rationale for evaluating a closed food chain for space habitats
p0030 A82-15857
Theoretical and experimental analysis of material turnover in a closed microecosystem. I - Construction of a mathematical model
p0191 A82-25821
Competition between algae in a flow system
p0240 A82-31517
The stability of a model with time lag, with the phytoplankton-phosphorous system considered as an example
p0420 A82-48209
Genetic engineering possibilities for CELSS: A bibliography and summary of techniques
[NASA-CR-166306] p0219 N82-20876
Sensitivity analysis as an aid in modelling and control of (poorly-defined) ecological systems --- closed ecological systems
[NASA-CR-166308] p0224 N82-21895
An approach to the mathematical modelling of a controlled ecological life support system
[NASA-CR-166331] p0250 N82-23984
Nutritional and cultural aspects of plant species selection for a controlled ecological life support system
[NASA-CR-166324] p0250 N82-23985
Plant diversity to support humans in a CELSS ground based demonstrator
[NASA-CR-168918] p0268 N82-24833
Controlled Ecological Life Support System: Use of Higher Plants
[NASA-CP-2231] p0268 N82-24834
Controlled Ecological Life Support System: Research and Development Guidelines
[NASA-CP-2232] p0268 N82-24835
Controlled ecological life support system - biological problems
[NASA-CP-2233] p0268 N82-24836
Evaluation of engineering foods for closed Ecological Life Support System (CELSS)
[NASA-CR-167626] p0354 N82-29003
Nutrition and food technology for a Controlled Ecological Life Support System (CELSS)
[NASA-CR-167392] p0354 N82-29004
Evaluation of engineering foods for Controlled Ecological Life Support Systems (CELSS)
[NASA-CR-166359] p0355 N82-29006
An approach to the preliminary evaluation of Closed Ecological Life Support System (CELSS) scenarios and control strategies
[NASA-CR-166368] p0361 N82-29897
Algal culture studies related to a Closed Ecological Life Support System (CELSS)
[NASA-CR-166375] p0392 N82-30943
Workshop on Closed System Ecology
[NASA-CR-169280] p0393 N82-31887
Mineral separation and recycle in a Controlled Ecological Life Support System (CELSS)
[NASA-CR-166388] p0426 N82-32987
Preparation and analysis of standardized waste samples for Controlled Ecological Life Support Systems (CELSS)
[NASA-CR-166392] p0426 N82-32988
Application of control theory to dynamic systems simulation
[NASA-CR-166383] p0442 N82-34077

p0192 A82-25824
The physiology and hygiene of the individual protection of man from the cold --- Russian book
p0194 A82-26522
The state of alpha 1- and beta 1-adrenergic reactions upon cold acclimatization
p0196 A82-26752
Physiological, hygienic and psychological questions in the adaptation of sailors to conditions of year-round arctic navigation
p0206 A82-27805
Thermal insulation and shivering threshold in Greek sponge divers
p0229 A82-29555
Adaptive changes in cats after long-term exposure to various temperatures
p0230 A82-29563
Body fluid and hematologic adjustments during resting cold acclimation in rhesus monkey
p0230 A82-29565
The ventilation-perfusion relation in residents of the Arctic coast of the north-east USSR
p0236 A82-31154
Problems of human biology in Polish polar research
p0251 A82-31837
Stages of the adaptation of human lungs in conditions of the Far North
p0282 A82-35829
The bioenergetics of erythrocytes in inhabitants of the North
p0282 A82-35831
The physiological mechanisms of the arousal response in animals under conditions of hypobiosis
p0320 A82-40311
Trace reactions of the frog tissue metabolism on changes of ambient temperature in the frog Rana ridibunda Pall
p0320 A82-40316
The role of nutrition in the changes of energy metabolism during stress
p0324 A82-40482
Leucine and urea metabolism in acute human cold exposure
p0340 A82-41211
The effect of the natural and climatic conditions of the Far North on the human cardiovascular system
p0342 A82-41466
Analysis of methods for evaluating thermal stress --- effects on human beings
p0370 A82-42994
Thermogenesis and muscle activity during the adaptation to cold --- Russian book
p0372 A82-43610
Hormone response of normal and intermittent cold-preadapted humans to continuous cold
p0375 A82-44137
The effect of cold and the cold prevention
p0081 N82-15755
COLD PLASMAS
The cold theory of the origins of life - Assumptions for the theory and experimental evidence
p0101 A82-20935
The appearance of protobiopolymers and protomembranes in accordance with the 'cold theory' of the origins of life
p0101 A82-20936
COLD TOLERANCE
Adaptation to high-altitude hypoxia at different ambient temperatures /before and during adaptation/
p0110 A82-21715
The possibility of maintaining the temperature and work capacity of the extremities
p0206 A82-27806
Effects of ascorbic acid on the elevation of human cold tolerance
p0233 A82-30027
Finger temperature after a finger-cooling test - Influence of air temperature and smoking
p0256 A82-32833
Effects of acute cold exposure on muscle amino acid and protein in rats
p0256 A82-32840
The carbohydrase system of the small intestine of rats of various ages following heat and cold exposures
p0257 A82-33135
Effects of endogenous glucagon on glucose kinetics in shivering dogs
p0285 A82-36029
Hormone response of normal and intermittent cold-preadapted humans to continuous cold
p0375 A82-44137
The effects of cold- and exercise-induced alterations in skin and core temperature on substrate mobilization and utilization
p0011 N82-10719
The physiological effect of heat and its prevention
p0081 N82-15754
The effect of cold and the cold prevention
p0081 N82-15755
COLD WATER
Thermal insulation and shivering threshold in Greek sponge divers
p0229 A82-29555
Superficial shell insulation in resting and exercising men in cold water
p0285 A82-36034
COLD WEATHER
Effect of physical training in cool and hot environments on +Gz acceleration tolerance in women
p0327 A82-40664
Cold weather goggles. 1: Optical evaluation
[AD-A111333] p0274 N82-25794
Cold weather goggles. Part 3: Resistance to fogging
[AD-A115898] p0443 N82-34078
COLLAGENS
Dynamics of the condition of granulation tissue after injuries sustained at different times of the day
p0114 A82-21763
The temperature dependence of the H-1 NMR spectrum of hydrated collagen
p0313 A82-38611
Oxygen toxicity and lung collagenous protein
[AD-A104702] p0033 N82-12756

Condition of rats connective tissue during long-term hypokinesia and in recovery period
p0350 N82-28969
COLLIMATION
Other biological effects of radiation
p0081 N82-15757
COLLISION AVOIDANCE
Automatic planning of manipulator transfer movements
p0025 A82-15391
Separation monitoring with four types of predictors on a cockpit display of traffic information
p0440 N82-34063
COLLISION WARNING DEVICES
U COLLISION AVOIDANCE
COLLISIONS
Review of human and operational factors affecting the feasibility of the see-and-avoid concept
[DFVLR-MITT-81-13] p0036 N82-12780
COLLOIDS
NT AEROSOLS
NT FOG
COLONIES
The dynamics of rat bone marrow CFUc content during prolonged fractionated irradiation
p0206 A82-27811
Effects of combination of antibiotic-resistant bifidobacteria and corresponding antibiotics of survival of irradiated mice
p0430 N82-33994
COLOR CODING
Color coding of information on electronic display devices --- German thesis
p0365 A82-41681
An evaluation of the effectiveness of color coded tactical symbology applied to military maps
[AD-A109675] p0210 N82-20872
The effects of color and contrast on target recognition performance using monochromatic television displays
[AD-A116238] p0401 N82-31946
COLOR PERCEPTION
U COLOR VISION
COLOR VISION
Disappearance of stabilized chromatic gratings --- visual contrast sensitivity
p0049 A82-16125
Psychophysical evidence for more than two kinds of cone in dichromatic color blindness
p0089 A82-19608
The effect of inter-stimulus intervals on the perception of short flashes of red and green light
p0142 A82-22927
Recognition of VDU presented colors by color defective observers --- Visual Display Unit
p0146 A82-22966
Comparison of flicker-photometric and flicker-threshold spectral sensitivities while the eye is adapted to colored backgrounds
p0208 A82-28123
Evidence for transient luminance and quasi-sustained color mechanisms --- in human vision
p0235 A82-30871
Color fusion under conditions of equal brightness
p0237 A82-31164
Visual acuity in color contrast on cathode ray tubes - Role of luminance, hue, and saturation contrasts
p0252 A82-32010
Changes in the human visually evoked cortical potential in response to chromatic modulation of a sinusoidal grating
p0314 A82-38795
Color vision in the peripheral retina under photopic conditions
p0314 A82-38798
Field sensitivity of the 'red' mechanism derived from primate local electroretinogram
p0318 A82-39431
Effect of chromatic adaptation on the achromatic locus - The role of contrast, luminance and background color
p0318 A82-39433
Discrimination and detection thresholds - The effect of observer criterion on the spatial properties of chromatic and achromatic mechanisms
p0318 A82-39438
Detection/discrimination in the long-wavelength pathways --- human color vision tests
p0318 A82-39439
Color vision and image intensities: When are changes material?
[AD-A103926] p0010 N82-10711
COMBAT
Acceleration induced voltage variations in the electrocardiogram during exhaustive simulated aerial combat maneuvering
p0108 A82-21683
Findings from a study of tactical symbology for fighter aircraft displays
p0139 A82-22903
Aerial combat simulation in the U.S. Air Force
p0369 A82-42794
Development and application of air combat performance assessment methods
p0407 A82-46277
COMBINATORIAL ANALYSIS
NT PARTITIONS (MATHEMATICS)
COMBUSTION PRODUCTS
Plan of action and milestones for Navy combustion toxicity
[AD-A105623] p0075 N82-14796
COMET NUCLEI
Could life have evolved in cometary nuclei
p0091 A82-20025
Nature and origin of organic molecules in comets
p0098 A82-20906
COMETS
NT COMET NUCLEI
Comets and the origin of life; Proceedings of the Fifth College Park Colloquium on Chemical Evolution, University of Maryland, College Park, MD, October 29-31, 1980
p0096 A82-20853
Comets and the origin of life - The stable isotope approach
p0096 A82-20864
Are comets connected to the origin of life
p0096 A82-20865
Comets and the photochemistry of the paleoatmosphere
p0097 A82-20866
Cometary material and the origins of life on earth
p0097 A82-20867
Comets - A vehicle for panspermia
p0097 A82-20868
Extreme environments - Are there any limits to life
p0097 A82-20869
Comets and the origin of life - Bibliography
p0097 A82-20871
Comets and the origin of life
p0098 A82-20905
Comets - Chemistry and chemical evolution
p0257 A82-33280
Impact of an asteroid or comet in the ocean and extinction of terrestrial life
[NASA-CR-169086] p0293 N82-26955
COMFORT
Discomfort judgments of translational and angular whole-body vibrations
p0252 A82-32006
Vibration and comfort. I - Translational seat vibration
p0370 A82-42829
Vibration and comfort. II - Rotational seat vibration
p0370 A82-42830
Vibration and comfort. III - Translational vibration of the feet and back. IV - Application of experimental results
p0374 A82-43674
Comfortable temperature and tolerable temperature
p0081 N82-15753
An evaluation of helicopter noise and vibration ride qualities criteria
[NASA-TM-83251] p0137 N82-17871
Effect of tactile vibration on annoyance to synthesized propfan noise
[NASA-TM-83258] p0176 N82-18866
COMMAND AND CONTROL
Simplicity in command and control systems - A human factors consideration --- for man computer interface design
p0198 A82-27222
A command and control device for a man-machine system - Fabrication of a platform and trials --- French thesis

p0365 A82-41699
Voice control of the space shuttle video system
p0047 N82-13719
Initiation into the utilization of programmable industrial robots: Grafcet --- graphic engineering language
p0076 N82-14805
Models and mockups as design aids, revision A
[AD-A109511]
p0219 N82-20881
Proceedings of the Sixteenth Annual Conference on Manual Control
[NASA-CR-169243]
p0379 N82-30833
Supervisory control: Problems, theory and experiment for application to human-computer interaction in undersea remote systems
[AD-A116236]
p0401 N82-31949
COMMAND-CONTROL
U COMMAND AND CONTROL
COMMERCIAL AIRCRAFT
A model-based technique for predicting pilot opinion ratings for large commercial transports
p0438 N82-34050

COMMUNICATION THEORY
NT WORDS (LANGUAGE)
COMMUNITIES
NT MOUNTAIN INHABITANTS
COMPARISON
A comparison of display formats for the electronic master monitor and advisory display system
[AD-A115127]
p0392 N82-30946
Prolonged self-paced hard physical exercise comparing trained and untrained men
[AD-A116608]
p0431 N82-34006
Comparison of rhesus and human spectral dynamic visual acuity
[AD-A115258]
p0433 N82-34018
COMPARTMENTS
NT AIRCRAFT COMPARTMENTS
NT HYPERBARIC CHAMBERS
NT PRESSURE CHAMBERS
NT PRESSURIZED CABINS
NT SPACECRAFT CABINS
NT TEST CHAMBERS
NT VACUUM CHAMBERS
COMPATIBILITY
NT BIOCOMPATIBILITY
Evaluation of the psychological compatibility of drivers in a rally team
p0158 A82-24477
COMPENSATION
Investigation of physiological compensation processes following the surgical destruction of the labyrinth
p0053 A82-16811
COMPENSATORY TRACKING
Comparative analysis of human and subhuman operator performance in a control loop
p0260 A82-33759
A study on human tracking performance in a complex G field experiment
p0277 A82-34971
Modeling of human operator dynamics in simple manual control utilizing time series analysis --- tracking (position)
p0436 N82-34038
COMPETITION
The role of sleep in the adaptation system and in the prognosis of psychological readiness of athletes in competition
p0154 A82-23279
Evaluation of the psychological compatibility of drivers in a rally team
p0158 A82-24477
Adapting a scale for measuring competition anxiety
p0322 A82-40450
Certain psychological and tactical aspects of athlete activities during competitions
p0345 A82-41506
COMPLEX SYSTEMS
The finite intersection test - A new multivariate statistical technique applicable to the evaluation of complex systems --- of man and machine
p0144 A82-22947
The role of multiple recording devices in the complex equipping of functional-diagnostic facilities
p0163 A82-24545
A complex of instruments for psychophysiological studies
p0163 A82-24546
Linguistic decision structures for hierarchical systems
p0277 A82-34968

Interruption as a test of the user-computer interface
p0047 N82-13721
A model for the control mode man-computer interface dialogue
p0047 N82-13722
Display-control compatibility in 3-D displays. 1: Effects of orientation
[AD-A109491] p0219 N82-20875
Human capital adjustments to technological change in the computer industry: The case of scientists and engineers
[PB82-180969] p0436 N82-34036
**CONCENTRATION (COMPOSITION)**
NT ATMOSPHERIC MOISTURE
NT CARBON DIOXIDE CONCENTRATION
NT MOISTURE CONTENT
Free amino acid concentrations in the livers of animals subjected to certain extremal factors
p0072 A82-18662
Nitrogen compound levels in tissues of rat cerebral hemispheres and cerebellum after flight aboard Cosmos-1129 biosatellite
p0350 N82-28967
Biological availability of nickel arsenides: Toxic effects of particulate Ni5As2
[DE82-000580] p0391 N82-30932
Epinephrine and norepinephrine concentrations in rat cardiac ventricles and atria after flight aboard Cosmos-1129 biosatellite
p0397 N82-31919
**CONCENTRICITY**
An ergometer for concentric and eccentric muscular contraction
[AD-A111061] p0295 N82-26971
**CONCORDE AIRCRAFT**
Cosmic ray measurements on board the Concorde /results after four years/
p0171 A82-25500
**CONDENSER RADIATORS**
U CONDENSERS (LIQUEFIERS)
**CONDENSERS (LIQUEFIERS)**
Application of improved technology to a preprototype vapor compression distillation /VCD/ water recovery subsystem
[ASME PAPER 81-ENAS-10] p0002 A82-10898
**CONDENSING**
Formation of pyrophosphate, tripolyphosphate, and phosphorylimidazole with the thioester, N, S-diacetylcysteamine, as the condensing agent --- molecular evolution
p0208 A82-28229

CONDITIONED REFLEXES
The influence of scopolamine on the formation and fixation of temporary connections in rats with altered brain serotonin levels
p0026 A82-15701
The effect of the motor activity regime on the development, conservation, and regeneration of defensive conditioned reflexes in rats
p0092 A82-20305
The relationship between cardiac and motor components of a conditioned reflex upon the local cooling of various zones of the cerebral cortex in cats
p0116 A82-21787
Systemic brain activity /Experimental investigation/ --- Russian book
p0194 A82-26547
Conditioned reflexes in albino rats during space flight
p0240 A82-31524
Dynamics of a stabilized motor defensive conditioned reflex for different levels of motivation in irradiated rats
p0323 A82-40464
Participation of the prefrontal cortex in delayed spatial choice and differentiation of time intervals in rhesus monkeys
p0323 A82-40470
Particular features of conditioned electrodefensive reflex in white rats on background of constant magnetic field
p0134 N82-17851

CONDITIONED RESPONSES
U CONDITIONING (LEARNING)

CONDITIONING (LEARNING)
Piribedil-induced anti-hypoxic protection in rats
p0073 A82-18738
Conditioned feeding suppression in rats produced by cross-coupled and simple motions
p0192 A82-26230
Conditioned tilt naming - A modified absolute judgment method is used to measure the oblique effect
p0281 A82-35760
The relationship of motion sickness susceptibility to learned autonomic control for symptom suppression
p0417 A82-47338

CONDITIONING (TREATING)
U TREATMENT

CONDITIONS
NT CHRONIC CONDITIONS
NT NONEQUILIBRIUM CONDITIONS
NT RUNWAY CONDITIONS
Working conditions and health of female workers in the sawmill sections of the wood-working industry
p0160 A82-24508

CONDUCTANCE
U RESISTANCE

CONDUCTORS
NT ELECTRIC WIRE
NT ELECTROLYTES
NT ION EXCHANGE MEMBRANE ELECTROLYTES
NT SOLID ELECTROLYTES

CONFERENCES
Basic environmental problems of man in space; Proceedings of the Sixth International Symposium, Bonn, West Germany, November 3-6, 1980
p0056 A82-16926
Vestibular and oculomotor physiology; Proceedings of the International Meeting, New York, NY, September 22-25, 1980
p0063 A82-17426
Comets and the origin of life; Proceedings of the Fifth College Park Colloquium on Chemical Evolution, University of Maryland, College Park, MD, October 29-31, 1980
p0096 A82-20853
Origin of life; Proceedings of the Third ISSOL Meeting and Sixth ICOL Meeting, Jerusalem, Israel, June 22-27, 1980
p0097 A82-20901
Human Factors Society, Annual Meeting, 24th, Los Angeles, CA, October 13-17, 1980, Proceedings
p0139 A82-22901
Life in the universe; Proceedings of the Conference, Moffett Field, CA, June 19, 20, 1979
p0147 A82-22976
Manned systems design: Methods, equipment, and applications; Proceedings of the Conference, Freiburg im Breisgau, West Germany, September 22-25, 1980
p0287 A82-36951
Proceedings of a Meeting of the IUPS Commission on Gravitational Physiology --- Book
p0326 A82-40649
International Union of Physiological Sciences, Annual Meeting, 2nd, Budapest, Hungary, July 13-19, 1980, Proceedings
p0329 A82-40686
International Union of Physiological Sciences, Annual Meeting, 3rd, Innsbruck, Austria, September 29-October 2, 1981, Proceedings
p0335 A82-40734
Symposium on Aviation Psychology, 1st, Ohio State University, Columbus, OH, April 21, 22, 1981, Proceedings
p0405 A82-46251
Proceedings of the Seventeenth Annual Conference on Manual Control
[NASA-CR-165005] p0040 N82-13665
DOT/FAA Human Factors Workshop on Aviation. Transcript, vol 1
[AD-A107802] p0138 N82-17876
DOT/FAA Human Factors Workshop on Aviation. Transcript, volume 2
[AD-A107803] p0138 N82-17877
Human Factors in System Development: Experiences and Trends --- conference proceedings
[FOA-A-56003-H9] p0182 N82-19839
Fifth International Biodeterioration Symposium
[AD-A109858] p0213 N82-20833
Report on a visit to Canada of the 10-17 May 1980 Second International Symposium on Personal Hearing Protection in Industry --- affects of acoustic trauma
[RAE-TM-FS-377] p0225 N82-21900
APU Man-Computer Studies Group Seminar Proceedings 1 --- conference proceedings, Teddington, England, Feb.-Apr., 1980
[AMTE(E)-TM-80109] p0274 N82-25790
The biological effects of nonionizing radiation
[AD-A111898] p0300 N82-27970
The organizing of conferences
[PB82-142696] p0347 N82-28948
Proceedings of the Sixteenth Annual Conference on Manual Control
[NASA-CR-169243] p0379 N82-30833
Workshop on Closed System Ecology
[NASA-CR-169280] p0393 N82-31887
Oxygen transport to human tissues
[AD-A115904] p0432 N82-34007
Sixteenth Annual Conference on Manual Control
[NASA-TM-84273] p0436 N82-34037

CONFIDENCE
Subjective confidence in forecasts
[AD-A109730] p0223 N82-21890

CONFINEMENT
Behavioral and biological interactions with confined microsocieties in a programmed environment
p0277 A82-35639
Neurophysiological characteristics of sensorimotor cortex of rats submitted to early motor deprivation and conditioning
p0271 N82-25770
Experimental analysis of team performance: Methodological developments and research results
[AD-A116915] p0436 N82-34034

CONFLUENCE
U CONVERGENCE

CONGRESSIONAL REPORTS
National toxicology program
[GPO-85-397] p0217 N82-20865
The use of animals in medical research and testing
[GPO-87-598] p0265 N82-24813

CONNECTIONS
U JOINTS (JUNCTIONS)

CONNECTIVE TISSUE
NT CARTILAGE
NT COLLAGENS
Condition of rats connective tissue during long-term hypokinesia and in recovery period
p0350 N82-28969

CONSCIOUSNESS
Systemic mechanisms of human subconscious activity
p0391 N82-30938

CONSERVATION
Selecting optimal conditions for heart conservation in weak aldehyde solutions by using mathematical methods of experimental design
p0308 A82-38534
CONSOLES
Review of health and safety aspects of video display terminals
[CRC-TM-712-E] p0179 N82-19816
CONSTANTS
NT PERCEPTUAL TIME CONSTANT
CONSTRAINTS
NT METEOROLOGICAL PARAMETERS
Effect of motion sweep duration and number of stations upon interpolation in discontinuous motion --- visual tracking motion perception
p0403 A82-45674
CONSTRICTIONS
Effect of prolonged hypokinesia on resistance of resistive vessels in rats
[NASA-TM-76849] p0383 N82-30878
CONSTRUCTION IN SPACE
U ORBITAL ASSEMBLY
CONSUMABLES (SPACECRAFT)
NT CONSUMABLES (SPACECREW SUPPLIES)
NT DEHYDRATED FOOD
NT SPACE RATIONS
CONSUMABLES (SPACECREW SUPPLIES)
NT DEHYDRATED FOOD
NT POTABLE WATER
NT SPACE RATIONS
STS-1 medical report
[NASA-TM-58240] p0076 N82-15711
Food and nutrition
p0078 N82-15724
Experimental study of high density foods for the Space Operations Center
p0248 N82-23109
Diet of crew in Salyut-6 orbital station
p0269 N82-25756
Biological value and shelf life of cultured dairy products in the diet of cosmonauts
p0270 N82-25759
CONSUMPTION
NT ENERGY CONSUMPTION
NT OXYGEN CONSUMPTION
NT WATER CONSUMPTION
CONTACT DERMATITIS
Carbon fibre reinforced epoxy prepregs and composites - Health risk aspects
p0165 A82-24823
Evaluation of materials proposed for use in space flight
[NASA-CR-167537] p0178 N82-19815
CONTACT LENSES
The wearing of hydrophilic contact lenses aboard a commercial jet aircraft. I - Humidity effects on fit
p0193 A82-26234
CONTACT POTENTIALS
Ear-nose-throat electrodiagnostic device for determining the rheobase of human mucosa and skin
p0369 A82-42629
CONTAINMENT
Safety analysis for Naval liquid oxygen life support system
[AD-A115742] p0427 N82-32994
CONTAMINANTS
NT TRACE CONTAMINANTS
Toxicological characteristics of polychlorinated diphenyls /Review of the non-Soviet literature/
p0410 A82-46708
Laser induced fluorescence from algae: Results of a ship-borne field test
[NASA-TM-76626] p0011 N82-11758
New approaches to quantitating the pulmonary effects on inhaled pollutants
[PB81-222382] p0014 N82-11778
Cabin pollution
p0081 N82-15760
Determination of the effects of material from alternate energy sources on the upper respiratory tract clearance mechanism. Part 1: In vitro exposure to particulate pollutants. Part 2: In vivo exposure to ozone
[PB82-117037] p0178 N82-19811
Advanced design linear noise-attenuating earphone-earcup system
[AD-A110820] p0298 N82-26990
The consequences of hydrazine exposition and its treatment
[MBL-1981-2] p0354 N82-28996
Air pollutant production by algal cell cultures
[NASA-CR-166384] p0442 N82-34076
CONTAMINATION
NT SPACECRAFT CONTAMINATION
Mechanical chemical and bio-hazards --- space-probe related planet and earth contaminations
p0316 A82-39159
CONTENT
NT BONE MINERAL CONTENT
CONTINENTS
NT AUSTRALIA
Origin and evolution of continents and oceans
p0148 A82-22982
CONTINUOUS RADIATION
Chronic exposure of a honey bee colony to 2.45 GHz continuous wave microwaves
p0022 A82-14347
Survival, development, and teratology of honey bee brood /Apis mellifera L./ following exposure to 2.45 GHz continuous wave radiation
p0022 A82-14348
The nature of radiation damage of haemopoietic stem cells under continuous irradiation at low dose rate
p0259 A82-33600
CONTINUOUS WAVES
U CONTINUOUS RADIATION
CONTOURS
Evidence relating subjective contours and interpretations involving occlusion
[AD-A103925] p0010 N82-10712
CONTRACT MANAGEMENT
An assessment of PERT as a technique for schedule planning and control
[NASA-TM-83265] p0428 N82-33981
CONTRACTION
A modified kinetic model of muscular contraction
p0054 A82-16818
Effect of calcium on the temporal characteristics of muscle contraction
p0109 A82-21708
Recovery time course in contractile function of fast and slow skeletal muscle after hindlimb immobilization
p0197 A82-26816
The accuracy of laser diffraction measurements of sarcomere lengths in contracting muscles
p0200 A82-27737
An investigation of the mechanical meaning of the surface electromyogram --- French thesis
p0365 A82-42078
The coronary vessels and the contractile apparatus of the myocardium in immune heart damage /Histochemical and ultrastructural studies/
p0367 A82-42605
Analysis of load characteristics and development of new indicators of cardiac function
p0367 A82-42606
The interrelationship between the pressor response and energy metabolism during isometric muscle contractions
p0373 A82-43636
An ergometer for concentric and eccentric muscular contraction
[AD-A111061] p0295 N82-26971
Seismocardiographic evaluation of contractile function of the myocardium of hypokinetic rats
p0394 N82-31902
CONTRAST
NT IMAGE CONTRAST
CONTROL
A model for the control mode man-computer interface dialogue
p0047 N82-13722
A design methodology for nonlinear systems containing parameter uncertainty: Application to nonlinear controller design
[NASA-CR-166358] p0355 N82-29005
CONTROL BOARDS
Ergonomic aspects in cockpit lay-out
p0405 A82-46257
Analysis of pilot input concepts and devices into integrated display/control systems
[MBB-FE-301/S/PUB/40] p0247 N82-22884

CONTROL CONFIGURED VEHICLES
Human tracking performance changes during combined +Gz and + or - Gy stress
p0251 A82-32003
Design, simulation and evaluation of advanced display concepts for the F-16 control configured vehicle
p0440 N82-34062
CONTROL EQUIPMENT
NT PRESSURE REGULATORS
NT TELEOPERATORS
CONTROL PANELS
U CONTROL BOARDS
CONTROL SIMULATION
Computer simulation as a visual aid in a video course --- for ATC system performance
p0088 A82-19248
Computer assisted displays enabling internalization and reduction of operator workload in higher order systems, or, pushing the barrier of human control beyond second order systems
p0140 A82-22910
Discrete models of a human operator /Survey of foreign research/
p0238 A82-31501
Computer simulation of respiratory control system
p0371 A82-43145
In-trail following during profile descents with a cockpit display of traffic information
p0405 A82-46260
Man/machine interface development for the REMOTEX concept
p0042 N82-13678
Identification of multiloop pilot describing functions obtained from simulated approaches to an aircraft carrier
p0043 N82-13686
Driving experience and task demands in simulator and instrumented car: A validation study
[IZF-1980-9] p0269 N82-24838
Combined discrete network continuous control modelling of operator behavior
p0381 N82-30861
CONTROL STABILITY
Stability analysis of automobile driver steering control
p0047 N82-13717
CONTROL SYSTEMS
U CONTROL
CONTROL THEORY
Mode of flight and a mathematical model of pilot activity relating to flight-vehicle control
p0198 A82-27513
Control of a walking machine with almost weightless legs. II - A discrete model
p0415 A82-47095
The magnetostatic force produced by current loops and is medical applications
p0032 N82-12748
Time domain identification of an optimal control pilot model with emphasis on the objective function
[NASA-CR-168487] p0138 N82-17874
Application of optimal control principles to describe the supervisory control behavior of AAA crew members
p0441 N82-34067
Levels of steering control: Reproduction of steering-wheel movements
p0441 N82-34071
A comparison of control modes for time-delayed remote manipulation
p0442 N82-34072
Experimental evaluation of the concept of supevisory manipulation
p0442 N82-34073
Application of control theory to dynamic systems simulation
[NASA-CR-166383] p0442 N82-34077
CONTROLLABILITY
Evaluation of a pilot workload assessment device to test alternate display formats and control handling qualities
p0037 N82-13062
On the use of the OCM's quadratic objective function as a pilot rating metric
p0043 N82-13693
Predicting pilot opinion ratings of flying qualities of highly control augmented aircraft using an optimal pilot model
[AD-A111136] p0268 N82-24837
A model based technique for predicting pilot opinion ratings for large commercial transports
p0380 N82-30846
An analytical prediction of pilot ratings utilizing human pilot model
p0380 N82-30847
CONTROLLED ATMOSPHERES
NT CABIN ATMOSPHERES
NT HELIUM-OXYGEN ATMOSPHERES
NT SPACECRAFT CABIN ATMOSPHERES
CONTROLLED STABILITY
U CONTROL
CONTROLLERS
NT SERVOMECHANISMS
A data collection scheme for identification of parameters in a driver model
p0044 N82-13696
Six degree of freedom manual controls study report
[NASA-CR-167532] p0181 N82-19837
CONVAIR MILITARY AIRCRAFT
U MILITARY AIRCRAFT
CONVECTIVE HEAT TRANSFER
Thermoregulatory responses to local convective and radiative cooling
p0017 A82-12951
Evaluation of natural convection under hyperbaric conditions
p0029 A82-15720
CONVERGENCE
The effect of convergence on the vestibulo-ocular reflex and implications for perceived movement
p0235 A82-30873
CONVERSATION
The representation of knowledge: Pask's L sub p --- artificial intelligence
p0274 N82-25793
CONVERTAPLANES
U V/STOL AIRCRAFT
CONVULSIONS
Frequency analysis of EEG in rats during the preconvulsive period of O2 poisoning
p0005 A82-11029
COOLING
NT AIR COOLING
NT EVAPORATIVE COOLING
NT LIQUID COOLING
NT RADIANT COOLING
NT SOLAR COOLING
NT SWEAT COOLING
The effect of head cooling on deep body temperature and thermal comfort in man
p0417 A82-47341
COOLING SYSTEMS
Development of a microclimate cooling system for combat vehicles
[AD-A112017] p0303 N82-27989
COORDINATION
Active head rotations and eye-head coordination
p0068 A82-17469
Disturbances of eye-head coordination during lateral gaze in labyrinthine disease
p0069 A82-17471
The interaction between accuracy of gaze with and without head movements in patients with cerebellar ataxia
p0069 A82-17472
Control of the number of discharges of individual motor units in skeletal muscles as a test of coordination in athletes
p0154 A82-23282
COPILOTS
U AIRCRAFT PILOTS
COPOLYMERIZATION
Copolyamino acid fractionation and protobiochemistry
p0195 A82-26589
COPPER
Characteristics of iron and copper metabolism during athletic training
p0237 A82-31165
CORIOLIS EFFECT
The significance of the respiratory minute volume index in the evaluation of vestibular stability
p0006 A82-11697
Vestibular tests in the selection of cosmonauts
p0058 A82-16941

Posturography of ataxia induced by Coriolis- and Purkinje-effects p0108 A82-21684
Vestibular screening of cosmonauts p0316 A82-38853
The dynamics of certain psychophysiological indicators under the cumulative effect of Coriolis accelerations p0370 A82-42995
The relationship of motion sickness susceptibility to learned autonomic control for symptom suppression p0417 A82-47338
Investigation of spatial disorientation of F-15 Eagle pilots [AD-A104684] p0014 N82-11781
Validation of predictive tests and countermeasures for space motion sickness p0077 N82-15719

**CORNEA**
Differences in eye movement data recorded by electro-oculography and corneal reflection techniques p0088 A82-19224
Calculation of the isochromatics and isoclinics of the cornea p0241 A82-31530
Effects of traumatic shock on cytogenetic processes in the epithelial cells of the cornea and tongue and the bone marrow cells of albino rats p0262 A82-34676
The effect of repeated sublethal overheating on cytogenetic processes in the epithelium of the cornea and in bone marrow cells in white rats p0262 A82-34685
Mitotic activity and volume of epithelial cell nuclei of rat cornea following spaceflights in biosatellites p0350 N82-28965
Cytogenetic effects of high-energy charged particles p0396 N82-31911
Corneal endothelium after infrared laser exposure. Evaluation of techniques to study corneal lesions [AD-A116740] p0423 N82-32964

**CORONARY ARTERY DISEASE**
Evaluation of abnormal exercise electrocardiogram in apparently healthy subjects - Labile repolarization /ST-T/ abnormalities as a cause of false positive responses p0001 A82-10631
Variations in normal electrocardiographic response to treadmill testing p0001 A82-10632
Noninvasive assessment of T-wave abnormalities on precordial electrocardiograms in middle-aged professional bicyclists p0006 A82-11200
Computer-enhanced thallium scintigrams in asymptomatic men with abnormal exercise tests p0049 A82-16167
The effects of daily blood sampling on creatine phosphokinase, aspartate aminotransferase and alanine aminotransferase activities in the blood serum of the monkey p0118 A82-21811
Relation between high density lipoprotein cholesterol and coronary artery disease in asymptomatic men p0169 A82-25134
Coronary risk in flight personnel: Epidemiologic approach - Incidence upon screening and prevention p0171 A82-25496
Stress testing and coronary artery disease - Study of 140 cases on tread mill p0253 A82-32288
Myocardial perfusion scintigraphy using a new technique, the mesh chamber [DE81-027995] p0083 N82-15773

**CORONARY CIRCULATION**
The significance of echocardiography in the detection of left ventricular blood supply disorders during bicycle ergometry p0159 A82-24492
Comparative physiological responses to exercise stress p0231 A82-29571
Effects of novodrine and physical exercise on hemodynamics and coronary blood supply in the healthy human --- catecholamine effects p0236 A82-31157
Diagnostics of disturbances of heart rhythm and conductance and their professional evaluation in flight personnel p0319 A82-40309
The rate of coronary perfusion as a factor determining the extent to which the contractile function of the heart is decreased in energy formation disorders p0344 A82-41489
The role of the energy transport system in changes of the contractile function of the heart in the case of the measured limitation of coronary blood flow p0344 A82-41499
The coronary vessels and the contractile apparatus of the myocardium in immune heart damage /Histochemical and ultrastructural studies/ p0367 A82-42605
The responses of the coronary vessels in dogs to hypothalamic stimulation in acute and chronic experiments p0373 A82-43634
Effect of exercise conditioning on coronary resistance p0375 A82-44139
Evaluation of a method for estimating cardiac output from a single breath in humans p0419 A82-47392
Informativeness of ultrasonic Doppler cardiography in evaluation of coronary circulation p0132 N82-17828
Physical testing of polymers for use in circulatory assist devices [PB82-127069] p0223 N82-21888

**CORPUSCULAR RADIATION**
NT BETA PARTICLES
NT ELECTRON BEAMS
NT ENERGETIC PARTICLES

**CORRECTION**
Intelligent tutoring for programming tasks: Using plan analysis to generate better hints [AD-A114020] p0302 N82-27983

**CORRELATION**
NT CORRELATION COEFFICIENTS
NT DATA CORRELATION
NT SIGNAL ANALYSIS
NT STATISTICAL CORRELATION
Ultrasonic blood flow imaging using correlation processing p0217 N82-20861

**CORRELATION COEFFICIENTS**
Correlation of behavioral rest-activity phases and the characteristics of the spatial organization of cortical potentials in the case of experimental neurosis p0155 A82-23291
An analysis of the role of genetic and environmental factors in predicting the effectiveness of arterial hypertension treatments p0410 A82-46719
Repeated measures of human performance: A bag of research tools [AD-A113954] p0444 N82-34084

**CORRELATION FUNCTIONS**
U CORRELATION

**CORROSION**
NT FUEL CORROSION
OTEC-1 power system test program: Biofouling and corrosion monitoring on OTEC-1 [DE82-007035] p0356 N82-29851

**CORROSION PREVENTION**
Ecological and technological problem of biodamages p0082 N82-15766
Settlement of fouling organisms at the JITTRE North Barnard Island raft site [MRL-TN-450] p0220 N82-21870
Settlement of fouling organisms at the HMAS STIRLING raft site [MRL-TN-441] p0221 N82-21871

**CORROSION TESTS**
Five OTEC biofouling and corrosion experiments at Keahole Point, 1976 to 1980 [DE82-008086] p0429 N82-33987

**CORTEXES**
Diurnal and seasonal rhythms in adrenal cortex activity in albino rats undergoing physical training

p0155 A82-23295

CORTI ORGAN
  Alterations of histochemical organization in the organ of Corti under the influence of chronic noise
    p0316 A82-39242
  The reactions of the cat auditory cortex neurons to the electrical stimulation of nerve fibers which innervate the receptor cells of different parts of the organ of Corti in the cochlea
    p0411 A82-46725

CORTICOSTEROIDS
 NT ALDOSTERONE
 NT CORTISONE
 NT HYDROXYCORTICOSTEROID
  Certain neurohormonal and blood-coagulation changes in the case of early symptoms of vibration-related pathology in miners
    p0160 A82-24504
  Chemoreceptor involvement in cortisol responses to hypoxia in ventilated dogs
    p0231 A82-29572
  Hormonal mechanisms of seasonal rhythms in rats
    p0240 A82-31518
  The rate at which exogeneous hydrocortisone is eliminated from peripheral blood flow in patients suffering from an acute myocardial infarction
    p0344 A82-41498
  The influence of prostaglandins and polyunsaturated fatty acids on the corticosteroid metabolism of normal and spontaneously hypertensive rats
    p0366 A82-42174
  Influence of stress on the blood system reaction in adrenalectomized mice
  [NASA-TM-76902]    p0383 N82-30877
  Glucocorticoid receptors and metabolic disturbances in the (rat) liver and heart during immobilization
  [NASA-TM-76874]    p0384 N82-30887
  Specific cytoplasmic glucocorticoid receptors of rat liver under conditions of immobilization stress
  [NASA-TM-76863]    p0385 N82-30893
  Specific cytoplasmic glucocorticoid receptors of the rat liver during immobilization stress
  [NASA-TM-76869]    p0385 N82-30894
  Rat blood plasma corticosterone after flight aboard Cosmos-1129 biosatellite
    p0397 N82-31920

CORTISONE
  The gradualness of the reaction of the pituitary-adrenocortical system to activating and inhibiting signals
    p0320 A82-40315
  The metabolism of hydrocortisone in isolated livers of irradiated rats
    p0404 A82-45782
  The inhibition of the biosynthesis of cholesterol and phospholipids by hydrocortisone in the liver of rats
    p0413 A82-46882

COSMIC DUST
  Comets and the origin of life - The stable isotope approach
    p0096 A82-20864
  Organo-siliceous biomolecules and the infrared spectrum of the Trapezium nebula
    p0404 A82-46182

COSMIC RADIATION
 U COSMIC RAYS

COSMIC RADIO WAVES
 U EXTRATERRESTRIAL RADIO WAVES

COSMIC RAYS
  The role of HZE particles in space flight - Results from spaceflight and ground-based experiments
    p0059 A82-16949
  Cosmic ray measurements on board the Concorde /results after four years/
    p0171 A82-25500
  Interpretation of Viking biology experiments
    p0371 A82-43221
  Proliferation kinetics of Paramecium Tetraurelia in balloon-borne experiments
    p0416 A82-47332
  Radiation environment mapping
    p0174 N82-18268
  Advanced biostack experiment
    p0174 N82-18269
  Medical-biological investigations under space conditions: Present and future significance
    p0362 N82-30275
  Cytogenetic effects of heavy charged particles of galactic cosmic radiation in experiments aboard Cosmos-1129 biosatellite
    p0396 N82-31912

COSMOCHEMISTRY
  Possible impact of cosmochemistry on terrestrial biology - Historical introduction
    p0120 A82-21987
  Comets - Chemistry and chemical evolution
    p0257 A82-33280

COSMOGONY
 U COSMOLOGY

COSMOLOGY
  How life began --- international symposium
    p0207 A82-28094

COSMONAUTS
  The otolith reflex and space perception in cosmonauts
    p0028 A82-15717
  Astronaut activity in flight and enhancement of its efficiency --- Russian book
    p0049 A82-16701
  Basic principles and methods for assuring the eficiency of astronaut activity in flight
    p0050 A82-16702
  Current problems in the psychophysiology of space work /status and future prospects/
    p0050 A82-16703
  Certain theoretical features of astronaut preparation
    p0050 A82-16705
  Psychophysiological correlates of the control activity of the astronaut
    p0050 A82-16707
  Certain aspects of the visual activity of astronauts
    p0050 A82-16708
  Problems of the control of operator state
    p0050 A82-16710
  Optimization of astronaut operator activity and systems of semiautomatic control of manned spacecraft on the basis of probabilistic criteria
    p0050 A82-16711
  Investigation of the statistical characteristics of astronaut operator activity directed towards the control of a manned spacecraft
    p0050 A82-16712
  Investigation of astronaut activity under conditions of the hydrosimulation of weightlessness
    p0051 A82-16713
  Information model of the dynamics of autonomous extravehicular activity
    p0051 A82-16718
  Investigation of the functions of an astronaut operator in information systems
    p0051 A82-16721
  Concerning the rationalization of the work and rest schedule of cosmonauts
    p0052 A82-16724
  Vestibular tests in the selection of cosmonauts
    p0058 A82-16941
  Radiation - Risk and protection in manned space flight
    p0059 A82-16948
  Cybernetic analysis of cardiac rhythm during a graded exercise test in Salyut-6 crew members
    p0153 A82-23273
  An investigation of the visual observations made by cosmonauts under experimental and actual conditions
    p0156 A82-23305
  The modeling of operator activity in referenceless space
    p0156 A82-23306
  Scientific-technical and organizational problems of cosmonaut training
    p0198 A82-27503
  Seventy-five days in space --- technical and medico-biological experiments
    p0203 A82-27773
  A contribution to the history of Russian and Soviet aviation psychology: Documents and materials --- Russian book
    p0235 A82-30875

A day off in space
p0281 A82-35698
Orthostatic tests during cosmonaut selection
p0316 A82-38854
Investigation of the cardiovascular system during prolonged space flights on board the Salyut space stations
p0317 A82-39429
As if in weightlessness --- simulation through hypnosis
p0324 A82-40474
Space gastroenterology --- Russian book
p0326 A82-40643
Mechanisms of the effects of weightlessness on the motor system of man
p0336 A82-40752
In class, in the air, and in orbit --- cosmonaut training for remote sensing tasks
p0409 A82-46701
Results of studies of pulmonary ventilation in cosmonauts during the period of acute adaptation to weightlessness
[IAF PAPER 82-431] p0415 A82-47061
Investigations of the vascular reactions or the nasal mucous membranes of cosmonauts
p0419 A82-47576
USSR Space Life Sciences Digest
[NASA-TM-84080] p0076 N82-15708
Ways and means of maintaining heat balance in pilots and cosmonauts
p0123 N82-16706
Serotonin and histamine metabolism in cosmonauts
p0217 N82-20858
Determination of oxygen tension in the subcutaneous tissue of cosmonauts during the Salyut-6 mission
[NASA-TM-76793] p0217 N82-20864
Psychological aspects of aerospace orientation
p0265 N82-24258
Effect of 48-day flight on blood amino acid content in the crew of Salyut-5
p0270 N82-25757
Main directions and principles of psychological expertise of cosmonauts
p0393 N82-31893

COSMOS SATELLITES
NT COSMOS 1129 SATELLITE
Future investigations onboard Soviet biosatellites of the Cosmos series
p0060 A82-16954
Adaptation to weightlessness and its physiological mechanisms - Results of animal experiments aboard biosatellites
p0329 A82-40688
Results of morphological investigations aboard biosatellites Cosmos
p0330 A82-40697
Status of space biomedical programs
p0129 N82-17239

COSMOS 782 SATELLITE
Biomedical aspects of artificial gravity
p0059 A82-16951

COSMOS 936 SATELLITE
Biomedical aspects of artificial gravity
p0059 A82-16951
Ultrastructural qualitative and quantitative evaluation of cytoplasmatic structures of heart muscle of rats living aboard biosputnik Kosmos 936
p0330 A82-40694

COSMOS 1129 SATELLITE
Study of contractile properties and composition of myofibrillar proteins of skeletal muscles in the Cosmos-1129 experiment
p0331 A82-40701

COST ANALYSIS
An evaluation of some experimental data on the cost effectiveness of flight simulators
p0227 A82-29256

COST EFFECTIVENESS
Airline pilot disability - Economic impact of an airline preventive medicine program
p0211 A82-28489
An evaluation of some experimental data on the cost effectiveness of flight simulators
p0227 A82-29256
The aerospace screening electroencephalogram - An analysis of benefits and costs in the U.S. Air Force
p0253 A82-32013

COST ESTIMATES
Life-cycle costing of life support equipment
[AD-A116404] p0401 N82-31948

COSTS
NT LIFE CYCLE COSTS
NT OPERATING COSTS

COTTON
NT COTTON FIBERS

COTTON FIBERS
Evaluation of materials proposed for use in space flight
[NASA-CR-167537] p0178 N82-19815

COUNTERMEASURES
NT JAMMING
Validation of predictive tests and countermeasures for space motion sickness
p0077 N82-15719

COUNTERS
NT NEUTRON COUNTERS
NT RADIATION COUNTERS

COUPLING
NT THERMODYNAMIC COUPLING

COVERALLS
Blue Flight Coverall Program
[AD-A116856] p0443 N82-34082

COVERINGS
Inquiry of field experience with caps for the Royal Dutch Army
[IZF-1981-21] p0275 N82-25799

CRACKING (CHEMICAL ENGINEERING)
NT PYROLYSIS

CRASH INJURIES
Hepato-splenic injury in aircraft accidents
p0072 A82-18735
Spinal stresses in flight
p0359 N82-29873
Theories of the pathogenesis of fractures of the spine
p0359 N82-29874
Aetiology and pathogenesis --- traumatic lesions of the spine
p0359 N82-29875
Helicopter accidents
p0359 N82-29876
Radiology of spinal trauma in aviation medicine
p0360 N82-29883
Analytical study of traumatic lesions of C3-C7
p0360 N82-29884
Radiological study of fractures of C1 and C2
p0360 N82-29885
Sequelae of vertebral fractures and trauma
p0360 N82-29886
Medico-legal aspect of spinal disorders in aviation medicine
p0361 N82-29892

CRASHES
Review of literature and regulation relating to thoracic impact tolerance and injury criteria
[PB82-108697] p0128 N82-16736

CREATINE
The effects of daily blood sampling on creatine phosphokinase, aspartate aminotransferase and alanine aminotransferase activities in the blood serum of the monkey
p0118 A82-21811
Effects of creatine phosphate on action potential duration and myocardial contractile force in the frog under hypoxia
p0241 A82-31532
The concentration of adenyl nucleotides and creatine phosphate in the cerebral hemispheres during different manifestations of stress
p0310 A82-38560
The relationship between the formation of ATP that is stimulated by insulin and the effect of insulin on the accumulation of creatine in cytoplasmic-membrane-enriched particles from rat skeletal muscles
p0413 A82-46880

CREATION
U CREATIVITY

CREATIVITY
On the modelling of creative behavior
[AD-A116896] p0435 N82-34027

CREVASSES
NT GLACIERS

CREW PROCEDURES (INFLIGHT)
An analysis of aircrew procedural compliance
p0406 A82-46263

Crew activities in space p0031 N82-12129
An investigation into pilot and system response to critical in-flight events. Volume 1: Executive summary [NASA-CR-164993] p0036 N82-12782
An investigation into pilot and system response to critical in-flight events. Volume 2: Appendix [NASA-CR-164994] p0036 N82-12783
Studies of planning behavior of aircraft pilots in normal, abnormal and emergency situations [NASA-CR-169319] p0425 N82-32981
CREW STATIONS
NT CREW WORK STATIONS
Factors affecting seat-man dynamics during emergency egress p0024 A82-14964
An application of manned simulation in crew station conceptual development p0144 A82-22943
A systems approach for crew station design and evaluation [AD-A115663] p0443 N82-34080
CREW WORK STATIONS
A strength and anthropometric comparison of young men and women --- examined for work station design p0139 A82-22907
CREWS
NT FLIGHT CREWS
NT SPACECREWS
The work capacity of sailors under conditions of varying work-rest cycles p0071 A82-18524
State of the hearing function in diesel locomotive crewmen p0280 A82-35688
Microclimate cooling for combat vehicle crewmen [AD-A117156] p0443 N82-34083
CRIMPING
U FOLDING
CRITERIA
An evaluation of helicopter noise and vibration ride qualities criteria [NASA-TM-83251] p0137 N82-17871
CRITICAL FLICKER FUSION
Mechanisms of temporal discrimination in the visual analyzer p0028 A82-15714
A procedure for the measurement of the critical flicker fusion frequency p0053 A82-16809
Human vertical fusional response under open and closed loop stimulation to predictable and unpredictable disparity presentations p0071 A82-17571
CROP GROWTH
Interaction of gravitic and mechanical stimuli in tropic and nastic responses in beans p0327 A82-40665
Morphogenesis of a higher plant from cultured cells and embryos in space p0327 A82-40666
Gravity perception and asymmetric growth in plants - A model derived from the grass pulvinus p0339 A82-40775
Literature review of human microbes' interaction with plants [NASA-CR-166330] p0250 N82-23983
Nutritional and cultural aspects of plant species selection for a controlled ecological life support system [NASA-CR-166324] p0250 N82-23985
CROP INVENTORIES
Structure of the knowledge base for an expert labeling system p0047 N82-13723
CROSS SECTIONS
Method for the determination of muscle cross-sectional area and dermato-adipose layer thickness using ultrasonic scanning p0204 A82-27776
CRUDE OIL
Microbiologically-mediated mutagenic activity of crude oil [PB82-105131] p0123 N82-16702
CRUISE MISSILES
Toxicology of high energy fuels [AD-A111686] p0294 N82-26966
CRUSTS
NT EARTH CRUST
CRYOGENIC FLUID STORAGE
Safety analysis for Naval liquid oxygen life support system [AD-A115742] p0427 N82-32994
CRYOGENIC FLUIDS

CRYSTAL LATTICES
Experiments on transfer of organic molecular information into crystal lattice superstructures p0105 A82-20966
CRYSTALS
NT CREATINE
NT LIQUID CRYSTALS
CUES
Required performance levels for autocueing devices --- target acquisition in synthetic aperture radar p0145 A82-22953
Visual depth sensitivities of various cues for depth perception p0238 A82-31447
CUFFS
Logic-controlled occlusive cuff system [NASA-CASE-MSC-14836-1] p0013 N82-11770
Prosthetic occlusive device for an internal passageway [NASA-CASE-MFS-25640-1] p0294 N82-26962
CULTIVATION
The controlled cultivation of plants in an artificial medium Biotechnological foundations --- Russian book p0170 A82-25230
Cultivation of the luminescent bacterium Photobacterium leiognathi with control by luminescence p0280 A82-35687
USSR report. Life sciences biomedical and behavioral sciences, no. 16 [JPRS-80789] p0351 N82-28977
Cultivation of insects as new branch of entomology - industrial entomology p0351 N82-28980
CULTURE TECHNIQUES
The dynamics of rat bone marrow CFUc content during prolonged fractionated irradiation p0206 A82-27811
Occult bacterial persistence and resistance to colonization after antibiotic therapy p0323 A82-40460
Morphogenesis of a higher plant from cultured cells and embryos in space p0327 A82-40666
Method and apparatus for detecting coliform organisms [NASA-CASE-ARC-11322-1] p0031 N82-12739
Chemical protection of cells in culture and mice against X-irradiation [MBL-1979-2] p0032 N82-12743
Genetic engineering possibilities for CELSS: A bibliography and summary of techniques [NASA-CR-166306] p0219 N82-20876
Development of guayule (parthenium argentatum) [NASA-CR-168926] p0265 N82-24812
Technique for the aerobic cultivation of microorganisms in water-in-oil emulsions [NRC/CNR-TT-2031] p0428 N82-33980
CURES
Problems in the therapy of soman poisoning [MBL-1981-1] p0267 N82-24824
CURTISS-WRIGHT MILITARY AIRCRAFT
U MILITARY AIRCRAFT
CURVATURE
Contour curvature analysis - Hyperacuities in the discrimination of detailed shape --- human performance efficiency p0235 A82-30872
CURVE FITTING
Weighting of aptitude components based on differences in technical school difficulty [AD-A102045] p0048 N82-13725
CURVED SURFACES
U CONTOURS
CURVES (GEOMETRY)
Segmentation and analysis of stereophotometric body surface data [AD-A114916] p0358 N82-29868

CUTANEOUS PERCEPTION
U TOUCH
CYANAMIDES
Cyanamide mediated syntheses of leu, ala, and phe peptides under plausible primitive earth conditions p0101 A82-20931
CYANATES
Formation of cyanate and carbamyl phosphate by electric discharges of model primitive gas p0305 A82-38116
CYANIDES
Chemical evolution of model systems of primeval earth periphery and thermal polymerisation of aqueous solutions of cyanides p0101 A82-20933
Chemical evolution. XL - Clay-mediated oxidation of diaminomaleonitrile p0339 A82-41196
Hydrogen cyanide health effects [PB82-116039] p0176 N82-18864
CYANO COMPOUNDS
NT CYANAMIDES
Acceleration of HCN oligomerization by formaldehyde and related compounds - Implications for prebiotic syntheses p0339 A82-41199
CYANOPHYTA
U BLUE GREEN ALGAE
CYBERNETICS
Cybernetic analysis of cardiac rhythm during a graded exercise test in Salyut-6 crew members p0153 A82-23273
A Monte-Carlo simulation investigating means of human-computer communication for dynamic task allocation [AD-A103890] p0011 N82-10721
Cybernetics and car driving: A mathematical (computer) model for the system to be controlled [IZF-1980-4] p0035 N82-12775
Cybernetics and car driving: A driver model and its experimental validation [IZF-1980-13] p0035 N82-12776
Cybernetics and car driving: Perspective perception and the output vector of the system to be controlled [IZF-1980-19] p0036 N82-12778
A model for the control mode man-computer interface dialogue p0047 N82-13722
Identification of the adaptive feedback of the human motor system using the Response Difference Method (RDM) [WTHD-134] p0176 N82-18869
APU Man-Computer Studies Group Seminar Proceedings 1 --- conference proceedings, Teddington, England, Feb.-Apr., 1980 [AMTE(E)-TM-80109] p0274 N82-25790
Three computer roles in a cybernetic learning system --- computerized simulation p0274 N82-25791
CYCLES
NT ACTIVITY CYCLES (BIOLOGY)
NT WORK-REST CYCLE
CYCLIC COMPOUNDS
Emergence of flavin catalysis - An approach based on the concept of bioorganic evolution p0104 A82-20964
Ion currents through a neuron membrane during the injection of cyclic nucleotides p0312 A82-38588
CYSTEAMINE
Some indicators of protein metabolism in erythrocytes during radiation sickness and following cystamine injection p0111 A82-21724
The effect of several pharmacologically active substances on the transformation of cystamine in mouse tissues --- and sulfur-containing antiradiation drug metabolism p0278 A82-35654
Comparative evaluation of the efficiency of radio-protectors on the basis of criteria of the protection of bone marrow and the gastrointestinal tract p0278 A82-35658
Investigation of the radio-protective effect of cystamine on a model of thermally induced prophage lambda p0278 A82-35659
The radio protectiveness of cystamine injected intramuscularly in mice p0404 A82-45781
CYSTEINE
Effect of 48-day flight on blood amino acid content in the crew of Salyut-5 p0270 N82-25757
CYTOCHROMES
The evolution of blue-greens and the origins of chloroplasts p0105 A82-20971
The effect of cold stress on the level and activity of microsomal cytochrome P-450 in the rat liver p0112 A82-21732
Succinate dehydrogenase and cytochrome oxidase activity in tissues of rats submitted to long-term hypokinesia p0126 N82-16723
CYTOGENESIS
Changes in morphological and cytogenetic hematopoietic indicators in hamadryas baboons exposed to chronic low-level radiation p0111 A82-21726
Effects of traumatic shock on cytogenetic processes in the epithelial cells of the cornea and tongue and the bone marrow cells of albino rats p0262 A82-34676
The effect of repeated sublethal overheating on cytogenetic processes in the epithelium of the cornea and in bone marrow cells in white rats p0262 A82-34685
Cytogenetic effect of 5-fluoro-2desoxy uridine in the G2 phase on intact and X-irradiated crepis capillaris L cells p0323 A82-40461
The circadian rhythm of the sensitivity of the chromosome apparatus of mice to the mutagenic effect of measles p0323 A82-40462
Cytoarchitectronics of the epidermis and the epidermal proliferative units /EPU/ p0325 A82-40491
Suppression of osteoblast differentiation during weightlessness p0337 A82-40756
Effect of weightlessness on lymphocyte proliferation p0173 N82-18261
Methodological aspects of testing erythrocyte balance by counting incubated reticulocytes p0350 N82-28972
Cytogenetic analysis of peripheral blood lymphocytes of individuals exposed to low doses of ionizing radiation p0357 N82-29856
Cytogenetic effects of high-energy charged particles p0396 N82-31911
Cytogenetic effects of heavy charged particles of galactic cosmic radiation in experiments aboard Cosmos-1129 biosatellite p0396 N82-31912
CYTOLOGY
Estimating cell populations p0072 A82-18684
The source of reparative regeneration in skeletal muscle tissue p0114 A82-21768
Study of the initial stage of fibroblast attachment by means of reflective interference microscopy p0200 A82-27739
Symbiosis in cell evolution: Life and its environment on the early earth --- Book p0207 A82-28113
Effects of space flight factors at the cellular level - Results of the Cytos experiment p0211 A82-28485
The interaction of tubulin with G-actin p0228 A82-29444
The effect of abnormal cell proportion on specimen classifier performance p0234 A82-30296
Regulation of the functional activity of stem cells which are the precursors of granulomonopoiesis by polypeptide thymic and bone marrow factors p0262 A82-34684

Distribution of nucleolar nucleic acids in Purkinje cells under vestibular stimulation and immobilization of rats
p0262 A82-34686
Ultracytochemical changes in the brain and liver under the influence of low-intensity nonionizing microwave radiation
p0262 A82-34687
Optimization of the conditions of modified cell irradiation
p0306 A82-38154
Radiation damage and recovery of mouse T-cells. IV - Elimination of radiation-induced migration abnormalities in T-lymphocytes
p0306 A82-38156
Effects of cAMP accumulation activators on certain stages of genome expression in cells upon acute radiation damage to the organism. III Comparative study of the properties of RNA synthesized in a system of isolated liver and spleen cell nuclei from irradiated rats and animals having been treated with serotonin prior to irradiation
p0306 A82-38157
RNA-content distribution of cells from the normal and atherosclerotic human aorta
p0308 A82-38535
Conditions leading to kinetic and thermodynamic isotopic effects in a cell
p0313 A82-38601
Light curves for photosynthesis under intermittent illumination
p0313 A82-38608
Approaches to the study of the hypothalamus-pituitary gland relationship
p0319 A82-39569
Cellular aspects of gravitational biology
p0336 A82-40754
The structure and function of macrophages
p0342 A82-41470
The organization of the afferent subcortical inputs of the visual region of the cat cerebrum
p0368 A82-42621
The early reactions of cells to ionizing radiation and their role in protection and sensitization --- Russian book
p0404 A82-45772
Synthesis of adriamycin-coupled polyglutaraldehyde microspheres and evaluation of their cytostatic activity
p0409 A82-46540
The determination of the number of stem cells by the number of colonies of undifferentiated cells in the bone marrow of irradiated animals
p0412 A82-46866
The ultrastructure of the inner medullary substance of the kidneys in several rodents in arid zones
p0420 A82-48219
The morphology of the submandibular lymph nodes of white rats during adaptation to high-altitude conditions
p0420 A82-48221
Compilation of cell data bank for automation in diagnostic cytology
[BMFT-FB-T-80-156] p0031 N82-12742
Spectrophotometric studies of the RNA structure in E.coli ribosomes. Part 2: Influence of ions and proteins on the RNA secondary structure
[ISS-B-80/3-PT-2] p0079 N82-15735
Possible mechanism for chemical induction of chromosome aberrations in male meiotic and postmeiotic germ cells of mice
[DE81-031999] p0123 N82-16700
Cytologic and biochemical genetic effects of chemical carcinogens
[AD-A107615] p0136 N82-17864
Effect of weightlessness on lymphocyte proliferation
p0173 N82-18261

**CYTOPLASM**
New data on reverse electron transport in the respiratory chains of yeast mitochondria - The induction of reverse transport by exogenous NAD-H
p0228 A82-29445
The dynamics of quantitative changes of RNA in rat cerebellum Purkinje cells in different functional states
p0308 A82-38538
Gravity sensing, polar transport and cytoplasmic streaming in plant cells
p0328 A82-40667
Ultrastructural qualitative and quantitative evaluation of cytoplasmatic structures of heart muscle of rats living aboard biosputnik Kosmos 936
p0330 A82-40694
Specific cytoplasmic glucocorticoid receptors of rat liver under conditions of immobilization stress
[NASA-TM-76863] p0385 N82-30893
Specific cytoplasmic glucocorticoid receptors of the rat liver during immobilization stress
[NASA-TM-76869] p0385 N82-30894

p0079 N82-15742
DECIMETER WAVES
Decimetric waves in the combined therapy of patients with cerebral circulatory insufficiency
p0239 A82-31507
The state of vegetative functions with hypertension under the action of decimetric waves on the region of the brain /Experimental study/
p0239 A82-31508
The effect of decimeter waves and sinusoidal modulated currents on the nuclear DNA content of cerebral nerve cells /Experimental study/
p0239 A82-31509
Effects of decimetric waves on the temperature of the brain and adjoining tissues /Experimental study/
p0239 A82-31510
Immunodepressive and immunostimulatory effects of decimetric waves on the primary immunological response
p0239 A82-31511
The effect of decimeter waves on the functional state of the cardiovascular system, and some biochemical and immunological indices of patients with myocardial infarction in the recovery phase

p0239 A82-31512

Chromatin of rat brain neurons and nucleic acids of muscles as related to localization of decimeter waves during exercise
p0387 N82-30908

DECISION MAKING

A methodology for decision augmentation system design --- airborne computer as aircrew performance aid
[AIAA 81-2201] p0001 A82-10139

Microelectronics and computers in medicine
p0106 A82-21268

Design criteria for decision aids - The users perspective
p0140 A82-22912

Application of preference tree methodology to choice behavior in a AAA supervisory control task --- Anti-Aircraft Artillery
p0144 A82-22944

Training athletes to make quick decisions
p0158 A82-24407

Establishing methods of investigating individual characteristics of making decisions in situations of conflict
p0162 A82-24528

A mediation method for solving problems of 'quick-wittedness'
p0162 A82-24530

The dependence of the strategy by which a solution is sought on the type of intellection
p0162 A82-24533

Dynamic approach to the analysis of the signal detection process --- in psychophysics
p0168 A82-24905

A model of human decisionmaking in multiple process monitoring situations
p0231 A82-29671

Linguistic decision structures for hierarchical systems
p0277 A82-34968

A test for the prediction of risk-taking attitude in operators
p0322 A82-40449

Assessing emergency interface design --- operator response-machine interaction model
p0405 A82-46256

A study of decision-making behavior of aircraft pilots deviating from a planned flight
p0406 A82-46262

A Monte-Carlo simulation investigating means of human-computer communication for dynamic task allocation
[AD-A103890] p0011 N82-10721

Pilot estimates of glidepath and aim point during simulated landing approaches
[NASA-TM-81325] p0035 N82-12772

An investigation into pilot and system response to critical in-flight events. Volume 1: Executive summary
[NASA-CR-164993] p0036 N82-12782

The intelligent use of intelligent systems: Problems in engineering man/machine symbiosis
p0037 N82-13058

Identification of cognitive factors related to remote work performance using closed circuit TV displays
p0042 N82-13679

Decision aids for airborne intercept operations in advanced aircrafts
p0042 N82-13683

A model of the human observer and decision maker
p0046 N82-13714

Choosing among alternatives with uncertain outcomes: Effect of prior curing and estimation requirements
[AD-A106143] p0128 N82-16739

Modeling human attention allocation strategies with competing criteria
[AD-A108509] p0177 N82-18875

Guidelines for man-machine interface design
[VTT-RR-23/81] p0225 N82-21906

Recognition of vehicle targets from the air: A field test
[FOA-C-56027-H2] p0247 N82-22889

Contingent decision behavior: A review and discussion of issues
[AD-A111655] p0273 N82-25787

An overview of expert systems --- artificial intelligence
[NASA-CR-169197] p0362 N82-29899

Subjective scaling of mental workload in a multi-task environment
p0380 N82-30844

A model of human decision making in multiple process monitoring situations
p0381 N82-30862

Application of optimal control principles to describe the supervisory control behavior of AAA crew members
p0381 N82-30864

A theory of diagnostic interference. 1: Imagination and the psychophysics of evidence
[AD-A115940] p0435 N82-34026

Sixteenth Annual Conference on Manual Control
[NASA-TM-84273] p0436 N82-34037

Combined discrete network. Continuous control modelling of operator behavior
p0440 N82-34064

A model of human decision making in multiple process monitoring situations
p0440 N82-34065

PROCRU: A model for analyzing flight crew procedures in approach to landing
p0441 N82-34066

Application of optimal control principles to describe the supervisory control behavior of AAA crew members
p0441 N82-34067

Supervision of dynamic systems: Monitoring, decision-making and control
p0441 N82-34069

DECISION THEORY

NT STATISTICAL DECISION THEORY

Choosing among alternatives with uncertain outcomes: Effect of prior curing and estimation requirements
[AD-A106143] p0128 N82-16739

Contingent decision behavior: A review and discussion of issues
[AD-A111655] p0273 N82-25787

A theory of diagnostic interference. 1: Imagination and the psychophysics of evidence
[AD-A115940] p0435 N82-34026

DECODING

A mathematical method for the enumeration of doublet codes --- in genetic coding theory
p0103 A82-20953

DECOMPOSITION

NT GLYCOLYSIS

NT PHOTODECOMPOSITION

NT PHOTOLYSIS

NT PROPELLANT DECOMPOSITION

NT RADIOLYSIS

The stability of a model with time lag, with the phytoplankton-phosphorous system considered as an example

**DETECTION**
NT REMOTE SENSING
NT SIGNAL DETECTION
NT TARGET RECOGNITION
Detection and recognition - Concurrent processes in perception
p0170 A82-25162
The transfer of failure-detection skills between monitoring and controlling dynamic systems
p0196 A82-26776
Detection/discrimination in the long-wavelength pathways --- human color vision tests
p0318 A82-39439
Analytical detection of organic species by means of laser-induced multiphoton ionization
p0038 N82-13646
A model of human decision making in multiple process monitoring situations
p0381 N82-30862
Investigation of behaviorally modified rats for use in explosives detection systems
[AD-A114632] p0386 N82-30895

**DETERIORATION**
Fifth International Biodeterioration Symposium
[AD-A109858] p0213 N82-20833

**DEUTERIUM**
Measurement of energy expenditure in humans by doubly labeled water method
p0418 A82-47389

**DEUTERON IRRADIATION**
Cytogenetic effects of high-energy charged particles
p0396 N82-31911

**DIABETES MELLITUS**
Diabetes mellitus and the examination of flight personnel
p0232 A82-29990
Diabetes and flight personnel - Ophthalmologic aspects
p0232 A82-29991
The prognostic value of the glucose tolerance test
p0263 A82-34698
The transformation of lipids into glycogen in animal and human cells
p0413 A82-46892

**DIAGNOSIS**
Potential for the use of biorhythm structures for the prognosis of the course of a disease
p0028 A82-15715
A sino-auricular block with Samoilov-Wenkeback periods - Diagnosis with the aid of an automated analysis of the structure of heart rhythms and clinical assessment
p0153 A82-23270
Evaluation of the information content of the clinical signs and the probability of noise sickness
p0160 A82-24511
The role of multiple recording devices in the complex equipping of functional-diagnostic facilities
p0163 A82-24545
A complex of instruments for psychophysiological studies
p0163 A82-24546
Computer analysis of tests involving physical stress --- in cardiology
p0190 A82-25807
Follow-up of 14 abnormal electroencephalograms in asymptomatic U.S. Air Force Academy cadets
p0194 A82-26242
NMR-imagery - A new method of biophysical investigation
p0200 A82-27745
The use of ultrasonic Doppler techniques in the diagnosis of arterial occlusions in the basis cerebri - A Doppler angiography study
p0201 A82-27756
Bicycle ergometry in the differential diagnosis of cardialgia

p0205 A82-27792
NMR imaging in medicine
p0231 A82-29574
The value of spiroergography in the diagnosis of the initial stage of cardiac insufficiency
p0233 A82-30030
Rapid diagnostic systems - A principle for diagnostic preparations and an analysis of the rapid systems --- for disease-causing microorganisms
p0243 A82-31548
Myoglobinemia as a criterion for the early diagnosis of acute myocardial infarction /Literature review/
p0259 A82-33726
Early diagnosis of overstrain of the cardiovascular system in athletes engaging in cyclic forms of sport
p0278 A82-35664
Specialized laboratory for the educational and research activity of students and the psychodiagnostic study of athletes
p0279 A82-35673
The diagnosis and treatment of heart-rhythm disorders - The role of intracardial electrophysiological investigation
p0279 A82-35676
Electrocardiographic diagnosis of the chronic pulmonary heart
p0280 A82-35681
Diagnosis and organization of the therapy of patients with disorders of blood circulation in the brain
p0310 A82-38554
Application of xylite for the detection of labyrinthine hydrops
p0316 A82-39243
Diagnostics of disturbances of heart rhythm and conductance and their professional evaluation in flight personnel
p0319 A82-40309
The use of hyperoxic mixtures for the diagnosis of latent disturbances in the external respiration system
p0322 A82-40457
The diagnostic value of phonoenterography in acute renal failure
p0324 A82-40478
The potential of radionuclide diagnosis of acute myocardial infarction
p0341 A82-41458
Functional properties of T-lymphocytes in patients with acute myocardial infarction
p0341 A82-41459
A modification of Souns' method of selective coronarography
p0343 A82-41485
An evaluation of the informativeness of EKG parameters in diagnosing a myocardial infarction of the back wall of the left ventricle
p0344 A82-41493
Morphological criteria for diagnosing pathologies of the thymus with myasthenia
p0369 A82-42633
Ultrasonic scanning in the diagnosis of retinoblastomas
p0410 A82-46710
Remote Medical Diagnosis System RMDS design review meeting minutes
[AD-A104555] p0013 N82-11772
Compilation of cell data bank for automation in diagnostic cytology
[BMFT-FB-T-80-156] p0031 N82-12742
Medical diagnostic application of radiofrequency range electromagnetic waves
p0032 N82-12746
Remote Medical Diagnosis System (RMDS) utilization study
[AD-A105559] p0082 N82-15771
Detection of amblyopia utilizing generated retinal reflexes
[NASA-CR-161944] p0127 N82-16732
Analysis of volatile metabolites in biological fluids as indicators of prodromal disease condition
[NASA-CR-167513] p0175 N82-18859
In vivo X-ray fluorescence analysis for medical diagnosis. A non-invasine method for quantitative determination of kidney function after radiographic examinations with iodinated contrast media
[LUNFD6/NFRA-1013/1-21/(1981)] p0272 N82-25781
Diagnostic use of enzymatic test in experiments on monkeys
p0396 N82-31915
Remote Medical Diagnosis System (RMDS) Advanced Development Model (ADM) laboratory test results
[AD-A114073] p0432 N82-34012

**DIAGRAMS**
A diagram for rapid analysis of albino rat electrocardiograms
p0206 A82-27807

**DIALS**
Screening designs used to estimate the relative effects of display factors on dial reading
p0289 A82-37183

**DIALYSIS**
NT ELECTRODIALYSIS

**DIASTOLIC PRESSURE**
Effect of exercise conditioning on coronary resistance
p0375 A82-44139

**DIBASIC COMPOUNDS**
A comparison between the protonophoric and separating functions of weak dibasic acids --- in mitochondrial respiration
p0312 A82-38590

**DICHROISM**
Linear dichroism of absorption changes upon the photoreduction of pheophytin in oriented preparations of photosystem II
p0228 A82-29442

**DIELECTRIC CONSTANT**
U PERMITTIVITY

**DIELECTRIC PROPERTIES**
NT PERMITTIVITY

**DIENCEPHALON**
Neuromorphological evidence of individual differences in human vision
p0159 A82-24500
Statistical analysis of neuronal impulse activity in the diencephalon during immobilization-produced emotional stress in rats
p0323 A82-40467

**DIETS**
Changes in blood indicators upon the inclusion of trace elements in the diet
p0049 A82-16274
Effects of the diet on brain function
p0058 A82-16942
Expenditure of energy and the state of the neuromuscular system in athletes who use low-calorie diets to control their weight
p0187 A82-25688
Cardiorespiratory assessment of 24-hour crash-diet effects on altitude, +Gz, and fatigue tolerances
p0192 A82-26228
Physiological, biochemical, and performance responses to a 24-hour crash diet
p0192 A82-26229
Energy expenditure and dietary change
[PB81-218471] p0010 N82-10717
In-flight diets and quantitative adequacy thereof to pilot expenditure
p0130 N82-17813
Dynamic of nutritional status during simulation of long-term aircraft flights
p0215 N82-20846
Diet of crew in Salyut-6 orbital station
p0269 N82-25756
Biological value and shelf life of cultured dairy products in the diet of cosmonauts
p0270 N82-25759
Effects of 1 alpha-hydroxycholecalciferol and different amounts of phosphorus in food allowance on some parameters of phosphorus and calcium metabolism in hypokinetic rats
p0270 N82-25762
Plant diversity to support humans in a CELSS ground-based demonstrator
[NASA-CR-166357] p0303 N82-27988

**DIFFERENCE EQUATIONS**
A heat transfer analysis of scald injury
[PB81-238503] p0083 N82-15777

**DIFFERENTIAL EQUATIONS**
NT FOKKER-PLANCK EQUATION
An empirical equation of elementary motion --- of human body

p0279 A82-35674

**DIFFERENTIAL OPERATORS**
U DIFFERENTIAL EQUATIONS

**DIFFERENTIATION**
Effect of weightlessness on lymphocyte proliferation p0173 N82-18261

**DIFFERENTIATION (BIOLOGY)**
Hematopoietic tissue development in Japanese quail embryogenesis p0201 A82-27748
Cytoarchitectronics of the epidermis and the epidermal proliferative units /EPU/ p0325 A82-40491
Suppression of osteoblast differentiation during weightlessness p0337 A82-40756
New methodological aspects of the investigation of organ specificity of the lymphatic pathways p0367 A82-42602
The determination of the number of stem cells by the number of colonies of undifferentiated cells in the bone marrow of irradiated animals p0412 A82-46866
A model of monomeric tissue growth p0419 A82-48203

**DIFFRACTION GRATINGS**
U GRATINGS (SPECTRA)

**DIFFRACTION PATTERNS**
The accuracy of laser diffraction measurements of sarcomere lengths in contracting muscles p0200 A82-27737

**DIFFUSE RADIATION**
Myocardial perfusion scintigraphy using a new technique, the mesh chamber [DE81-027995] p0083 N82-15773

**DIFFUSION**
NT GASEOUS DIFFUSION
NT MOLECULAR DIFFUSION
NT PARTICLE DIFFUSION
A monitor for noninvasive estimation of pulmonary blood flow p0039 N82-13656
Facilitated diffusion of small non-electrolytes in the human red blood cell p0135 N82-17855
Diffusion mediated localization on membrane surfaces [NASA-CR-166386] p0393 N82-31868
Viscosity dependence of the rates of diffusional processes [NASA-CR-166394] p0428 N82-33982

**DIFFUSION EFFECT**
U DIFFUSION

**DIFLUORO COMPOUNDS**
NT POLYTETRAFLUOROETHYLENE

**DIGESTIVE SYSTEM**
NT GASTROINTESTINAL SYSTEM
NT INTESTINES
NT MOUTH
NT RECTUM
NT STOMACH
NT TEETH
The reaction of simulated and true weightlessness on digestive tract of rats p0334 A82-40733

**DIGITAL COMPUTERS**
NT MICROCOMPUTERS
NT MINICOMPUTERS
Progress in computer analysis of the exercise electrocardiogram p0001 A82-10630
Microelectronics and computers in medicine p0106 A82-21268

**DIGITAL DATA**
A functional video-based anthropometric measuring system [NASA-CR-167637] p0361 N82-29896

**DIGITAL FILTERS**
Superconducting magnetometry for cardiovascular studies and an application of adaptive filtering p0038 N82-13648

**DIGITAL SIMULATION**
SAINT, a digital simulation language for the study of manned systems p0287 A82-36957
Cybernetics and car driving: A mathematical (computer) model for the system to be controlled [IZF-1980-4] p0035 N82-12775
VTOL/STOL visual study [NASA-CR-166292] p0137 N82-17872

Some computer applications and digital image processing in nuclear medicine p0431 N82-34000

**DIGITAL TECHNIQUES**
Digital spirometer for automatic pulmonary function p0022 A82-14746
Digital image processing of bone - Problems and potentials p0026 A82-15697
Some computer applications and digital image processing in nuclear medicine p0431 N82-34000

**DIGITALIS**
Regulation of calcium current and calcium activity in heart cells p0137 N82-17870

**DIHEDRAL EFFECT**
U LATERAL STABILITY

**DIMENSIONAL MEASUREMENT**
Cervix-to-rectum measuring device in a radiation applicator for use in the treatment of cervical cancer [NASA-CASE-GSC-12081-2] p0246 N82-22875

**DIMENSIONS**
NT DEPTH
NT HEIGHT

**DIMERIZATION**
Effect of polynucleotides on the dimerization of glycine --- abiological protein synthesis in primitive earth conditions p0021 A82-13843
Ligation of oligonucleotides by pyrimidine dimers - A missing 'link' in the origin of life p0317 A82-39423

**DIMERS**
Statistical mechanics of biomembrane phase transition. I - Excluded volume effects of lipid chains in their conformation change p0199 A82-27561

**DIMETHYLHYDRAZINES**
Chemical and molecular biological aspects alkylhydrazine-induced carcinogenesis in human cells in vitro [AD-A109088] p0181 N82-19833

**DIODES**
NT LIGHT EMITTING DIODES

**DIOXIDES**
NT CARBON DIOXIDE
NT SILICON DIOXIDE

**DIRECT POWER GENERATORS**
NT FUEL CELLS

**DIRECTIONAL CONTROL**
How do we avoid confounding the direction we are looking and the direction we are moving p0071 A82-18024

**DIRECTIVITY**
Display-control compatibility in 3-D displays. 1: Effects of orientation [AD-A109491] p0219 N82-20875

**DISASTERS**
An introduction to disaster - Some considerations of a psychological nature p0193 A82-26236

**DISCHARGERS**
NT STATIC DISCHARGERS

**DISCOVERING**
U EXPLORATION

**DISCRIMINATION**
NT SENSORY DISCRIMINATION
NT TACTILE DISCRIMINATION
NT VISUAL DISCRIMINATION

**DISEASES**
NT ANEMIAS
NT ANGINA PECTORIS

NT PNEUMONIA
NT PULMONARY LESIONS
NT RADIATION SICKNESS
NT RESPIRATORY DISEASES
NT RHEUMATIC DISEASES
NT TACHYCARDIA
NT THROMBOSIS
NT TOXIC DISEASES
NT TUBERCULOSIS
NT TUMORS
NT ULCERS

Disturbances of eye-head coordination during lateral gaze in labyrinthine disease p0069 A82-17471

The functional condition of the ampullar apparatus in Meniere's disease p0092 A82-20308

Connection of motor regimen with morbidity in workers p0187 A82-25695

Coagulopathy in miners with vibration sickness p0188 A82-25704

Rapid diagnostic systems - A principle for diagnostic preparations and an analysis of the rapid systems --- for disease-causing microorganisms p0243 A82-31548

Postural vertigo as a specific symptom of Meniere's disease p0280 A82-35690

Classification of vestibular disorders as a function of the phase of the disease and the degree of vestibular compensation p0280 A82-35691

Application of xylite for the detection of labyrinthine hydrops p0316 A82-39243

Alterations in the labyrinth receptors after laser irradiation as detected by electron microscopy p0316 A82-39244

The circadian rhythm of the sensitivity of the chromosome apparatus of mice to the mutagenic effect of measles p0323 A82-40462

Aeromedical considerations of malaria prophylaxis with mefloquine hydrochloride p0409 A82-46536

Analysis of volatile metabolites in biological fluids as indicators of prodromal disease condition [NASA-CR-167513] p0175 N82-18859

Medical and performance problems of acute high altitude-exposure [AD-A111062] p0295 N82-26970

DISINFECTANTS
U ANTISEPTICS

DISINTEGRATION
Apparatus for disintegrating kidney stones [NASA-CASE-GSC-12652-1] p0294 N82-26961

DISKS (SHAPES)
NT INTERVERTEBRAL DISKS

DISORIENTATION
Investigation of spatial disorientation of F-15 Eagle pilots [AD-A104684] p0014 N82-11781

DISPERSIONS
NT AEROSOLS
NT EMULSIONS
NT FOG
NT SMOKE

DISPLACEMENT MEASUREMENT
Effects of reference lines on displacement thresholds at various durations of movement --- in human visual perception p0314 A82-38797

DISPLAY DEVICES
NT GYRO HORIZONS
NT HEAD-UP DISPLAYS
NT HELMET MOUNTED DISPLAYS

Visual fatigue and cathode ray tube display terminals p0017 A82-12870

An evaluation of alphanumeric, graphic, and color information displays p0017 A82-12871

Effects of visual display units on the eyes - A bibliography /1972-1980/ p0017 A82-12873

The interaction between the edge effect and target conspicuity in visual search p0017 A82-12874

Is recognition accuracy really impaired when the target is repeated in the display p0056 A82-16893

Visual technology and the future --- for flight simulators p0095 A82-20538

What do pilots see in displays p0139 A82-22906

A strength and anthropometric comparison of young men and women --- examined for work station design p0139 A82-22907

Computer assisted displays enabling internalization and reduction of operator workload in higher order systems, or, pushing the barrier of human control beyond second order systems p0140 A82-22910

The event-related brain potential as an index of attention allocation in complex displays p0142 A82-22928

Recognition of VDU presented colors by color defective observers --- Visual Display Unit p0146 A82-22966

The evaluation of information display on the basis of the transinformation --- German book p0209 A82-28394

Perceptual components of computer displays p0254 A82-32413

User response characteristics for sequential displays p0254 A82-32496

Statistical techniques for instrument panel arrangement p0287 A82-36959

Screening designs used to estimate the relative effects of display factors on dial reading p0289 A82-37183

Color coding of information on electronic display devices --- German thesis p0365 A82-41681

Ergonomic aspects in cockpit lay-out p0405 A82-46257

A comparison of tracking with visual and kinesthetic-tactual displays p0405 A82-46258

In-trail following during profile descents with a cockpit display of traffic information p0405 A82-46260

Functional optical invariants - A new methodology for aviation research --- in visual perception psychology p0406 A82-46267

Influence of a visual display and frequency of whole-body angular oscillation on incidence of motion sickness p0416 A82-47337

Color vision and image intensities: When are changes material? [AD-A103926] p0010 N82-10711

How to display digital SONAR signals. Some primary threshold measurements [IZF-1979-16] p0035 N82-12773

Equipment design must incorporate ease of operation p0037 N82-12790

Evaluation of a pilot workload assessment device to test alternate display formats and control handling qualities p0037 N82-13062

Proceedings of the Seventeenth Annual Conference on Manual Control [NASA-CR-165005] p0040 N82-13665

Horizontal conflict resolution maneuvers with a cockpit display of traffic information p0041 N82-13671

Predictor symbology in computer-generated perspective displays

p0041 N82-13674
Modeling of the aircraft in-trail-following task
during profile descent
p0043 N82-13690
Functional structure and dynamics of the human
nervous system
p0043 N82-13692
Information and display requirements for aircraft
terrain following
p0044 N82-13695
Pilot scanning patterns while viewing cockpit
displays of traffic information
p0046 N82-13710
VTOL/STOL visual study
[NASA-CR-166292] p0137 N82-17872
Review of health and safety aspects of video
display terminals
[CRC-TN-712-E] p0179 N82-19816
An evaluation of the effectiveness of color coded
tactical symbology applied to military maps
[AD-A109675] p0218 N82-20872
Display-control compatibility in 3-D displays. 1:
Effects of orientation
[AD-A109491] p0219 N82-20875
System simulation applied to the evaluation of
displays for guidance and control
[ESA-TT-659] p0220 N82-20883
Sourcebook of temporal factors affecting
information transfer from visual displays
[AD-A109907] p0222 N82-21880
Perception of spatial features with stereoscopic
displays
[AD-A110191] p0222 N82-21882
Human engineering guides to design of displays for
underwater applications
[AD-A110317] p0224 N82-21898
Analysis of pilot input concepts and devices into
integrated display/control systems
[MBB-FE-301/S/PUB/40] p0247 N82-22884
Health hazards of visual display units with
particular reference to office environments
[PB82-120627] p0249 N82-23979
The constancy of stereoscopic depth perception
[AD-A111484] p0302 N82-27984
Visual Technology Research Simulator (VTRS) human
performance research: Phase 3
[AD-A112475] p0352 N82-28988
Unconventional visual displays for flight training
[AD-A111392] p0354 N82-28999
Proceedings of the Sixteenth Annual Conference on
Manual Control
[NASA-CR-169243] p0379 N82-30833
A gunner model for an AAA tracking task with
interrupted observations
p0379 N82-30835
The effect of visual information on the manual
approach and landing
p0379 N82-30837
PMP study of pilot workload. Qualification of
workload via instrument scan
[NASA-CR-169254] p0392 N82-30944
A comparison of display formats for the electronic
master monitor and advisory display system
[AD-A115127] p0392 N82-30946
The effects of color and contrast on target
recognition performance using monochromatic
television displays
[AD-A116238] p0401 N82-31946
Reading text from visual display units
[FOA-C-53006-H2] p0402 N82-31951
An experimental evaluation of tactical
symbol-design features
[AD-A115895] p0427 N82-32993
An automated optical display system for visual
physiology experiments
[AD-A116499] p0431 N82-34004
A gunner model for an AAA tracking task with
interrupted observations
p0436 N82-34039
Design, simulation and evaluation of advanced
display concepts for the F-16 control configured
vehicle
p0440 N82-34062
Separation monitoring with four types of
predictors on a cockpit display of traffic
information
p0440 N82-34063
Evaluation of SMART sensor displays for
multidimensional precision control of Space
Shuttle remote manipulator
p0442 N82-34074
Evaluation of four-color plan view display console
[AD-A117897] p0444 N82-34085

**DISPLAY SYSTEMS**
U DISPLAY DEVICES
**DISPOSAL**
NT WASTE DISPOSAL
A criterion for the disposal of M58 sleeping bags
[IZF-1979-15] p0084 N82-15782
**DISSOCIATION**
NT GAS DISSOCIATION
**DISSYMMETRY**
U ASYMMETRY
**DISTANCE**
Visual depth sensitivities of various cues for
depth perception
p0238 A82-31447
Evaluation of the visual acquisition range of
enroute air traffic from cockpit observations
--- collision avoidance
[ESA-TT-691] p0175 N82-18861
Distance estimation in projected photographs ---
visual estimates
[FOA-C-56031-H2] p0426 N82-32982
Effects of motivation on car-following
p0441 N82-34070
**DISTANCE PERCEPTION**
U SPACE PERCEPTION
**DISTILLATION**
Preprototype Vapor Compression Distillation
Subsystem development
[ASME PAPER 81-ENAS-25] p0003 A82-10912
**DISTILLATION EQUIPMENT**
Application of improved technology to a
preprototype vapor compression distillation
/VCD/ water recovery subsystem
[ASME PAPER 81-ENAS-10] p0002 A82-10898
**DISTRIBUTED PARAMETER SYSTEMS**
Vibration defence of man - Questions of modeling
p0260 A82-33764
Operator performance on two office data entry
system testbeds: Preliminary analyses
[AD-A111535] p0274 N82-25795
**DISTRIBUTION (PROPERTY)**
NT BRIGHTNESS DISTRIBUTION
NT DIFFRACTION PATTERNS
NT ENERGY DISTRIBUTION
NT FLOW DISTRIBUTION
NT FREQUENCY DISTRIBUTION
NT MOMENT DISTRIBUTION
NT PRESSURE DISTRIBUTION
NT SPATIAL DISTRIBUTION
NT STRESS CONCENTRATION
NT TEMPERATURE DISTRIBUTION
On the mathematical modelling of microbial age
dynamic and some control aspects of microbial
growth processes
p0314 A82-38823
**DISTRIBUTION FUNCTIONS**
Method for improving the reliability of the
recognition and classification of worker
physiological condition in problems of work
physiology
p0236 A82-31156
**DIURESIS**
Effects of vasopressin administration on diuresis
of water immersion in normal humans
p0088 A82-19491
The role of natriuresis in the prophylactic effect
of adaptation to hypoxia in the case of
hereditary hypertension
p0110 A82-21712
Evidence for the involvement of central alpha2
mechanisms in intrathoracic volume
expansion-induced diuresis - A study with
clonidine and propranolol
p0210 A82-28481
**DIURETICS**
Reissner's membrane and the spiral ligament in
normal rats and those treated with ethacrynic acid
p0055 A82-16833
Effects of vasopressin administration on diuresis
of water immersion in normal humans
p0088 A82-19491
The effect of body position and the administration
of a diuretic on the water-salt status and the
activity of the kidneys
p0372 A82-43238

DIURNAL RHYTHMS
 U CIRCADIAN RHYTHMS
DIURNAL VARIATIONS
 Diurnal variation in vigilance efficiency
 p0022 A82-14275
 The influence of physical stress on the dynamics of work capacity and electrical activity of skeletal muscles in the course of an entire day
 p0154 A82-23284
 The effect of the circadian rhythm of physiological functions on the mental work capacity of operators
 p0203 A82-27769
 Daily rhythms of physiological functions during shift work
 p0203 A82-27771
 Eight-hour rhythm of autonomic regulation
 p0242 A82-31542
 The dark focus of accommodation and pilot performance

The effect of piracetam on the body's resistance to hypoxia
p0115 A82-21777
The effect of the prolonged administration of sodium hydroxybutyrate on the physical work capacity and muscle tissue state of rats
p0115 A82-21779
The nature of autonomic effects produced by sombrevin --- during narcosis
p0187 A82-25693
The combined use of sulfamonomethoxine and UV radiation in the treatment of chronic pneumonia
p0190 A82-25808
Mechanism for the antihypoxic effects of depakin
p0202 A82-27761
The extraction and identification of drugs in aviation toxicology
p0210 A82-28478
The organ of vision and medicines used in treating psychological disorders /Survey/
p0240 A82-31525
Psychotherapeutic use of sleep deprivation in treating insomnia produced by psychic soporific dependence
p0242 A82-31543
Comparative study of the gas-transport characteristics of models of an extraerythrocytic oxygen carrier
p0262 A82-34680
The combined effect of medicines
p0279 A82-35665
Effects of horizontal body casting on the baroreceptor reflex control of heart rate
p0285 A82-36033
Experimental and clinical study of a new immunoregulatory preparation - thymalin
p0307 A82-38177
The influence of the GABA-receptor blocker bicuculline on the effects of fenibut and diazepam
p0308 A82-38539
The effect of potassium orotate on the metabolism of certain vitamins in patients with fractures of the long tubular bones
p0310 A82-38563
Application of xylite for the detection of labyrinthine hydrops
p0316 A82-39243
Participation of the prefrontal cortex in delayed spatial choice and differentiation of time intervals in rhesus monkeys
p0323 A82-40470
In vivo and in vitro characteristics of eccrine sweating in patas and rhesus monkeys
p0340 A82-41214
The effect of diethylamine analog of ethmozine on the functional condition of myocardium /Clinical and experimental study/
p0343 A82-41488
The effect of leienkephalin and thyrosine on the lymphatic and blood microvessels
p0344 A82-41490
Current problems in hypobiosis
p0366 A82-42171
Hemodynamic response to converting enzyme inhibition at rest and exercise in humans
p0375 A82-44135
Aortic body chemoreceptor responses to dopamine, haloperidol, and pargyline
p0375 A82-44136
Synthesis of adriamycin-coupled polyglutaraldehyde microspheres and evaluation of their cytostatic activity
p0409 A82-46540
An analysis of the role of genetic and environmental factors in predicting the effectiveness of arterial hypertension treatments
p0410 A82-46719
Side effects of cardiovascular drugs on the eye
p0414 A82-46898
The use of inosine during resuscitation for the prevention of post-resuscitation circulatory insufficiency
p0420 A82-48215
Manual control analysis of drug effects on driving performance
p0046 N82-13709
Chemicals Identified in Human Biological Media
[DE81-030813] p0127 N82-16735
An examination of the feasibility of administering prophylactic pyridostigmine by the percutaneous route
[NRL-TN-449] p0221 N82-21878
Dosimetric and behavioral analysis of microwave-drug synergistic effects on operant behavior in the rat
[AD-A115115] p0429 N82-33986
DRY HEAT
Acclimatization to dry heat - Active men vs. active woman
p0229 A82-29553
Auxiliary cooling - Comparison of air-cooled vs. water-cooled vests in hot-dry and hot-wet environments
p0321 A82-40440
Effects of whole and partial body exposure to dry heat on certain performance measures
[AD-A100305] p0246 N82-22680
Auxiliary cooling: Comparison of air-cooled versus water cooled vests in hot-dry and hot-wet environments
[AD-A110554] p0275 N82-25797
Effectiveness of five water-cooled undergarments in reducing heat stress of vehicle operating in a hot wet or hot dry environment
[AD-A107105] p0299 N82-26994
DRYING
NT DEHYDRATION
DUALITY THEOREM
The role of temporal overlap of visual and auditory material in dual media comprehension
[AD-A115714] p0425 N82-32978
DUMMIES
Numerical and experimental studies of electromagnetic near-field energy absorption in models of man
p0178 N82-19812
DURABILITY
Zipper rear closure endurance testing
[AD-A104732] p0037 N82-12785
DUST
NT COSMIC DUST
DYES
Acridine orange inhibition of the ATPase activity of myosin and its fragments
p0313 A82-38613
DYNAMIC CHARACTERISTICS
NT CONTROL STABILITY
NT DYNAMIC STABILITY
NT FLOW DISTRIBUTION
NT FLOW VELOCITY
NT LATERAL STABILITY
NT LIFT
NT MOTION STABILITY
NT TRANSIENT RESPONSE
Dynamics of vestibulo-ocular, vestibulocollic, and cervicocollic reflexes
p0067 A82-17458
The dynamics of forming a prediction system in goal-directed behavior
p0111 A82-21730
Determination of efficient methods of lift by comparing trained and untrained male and female lifters
[AD-A100349] p0038 N82-13650
The inverse dynamics of three-dimensional hominoid motion
[CSIR-SWISK-24] p0247 N82-22887
Dynamics of left ventricular systolic phase structure during long-term (140-185 days) spaceflights
p0348 N82-28954
Does man always close the loop in trying to pilot a large ship?
p0441 N82-34068
Supervision of dynamic systems: Monitoring, decision-making and control

p0441 N82-34069

Analysis of driver performance under reduced visibility
p0442 N82-34075

Application of control theory to dynamic systems simulation
[NASA-CR-166383] p0442 N82-34077

**DYNAMIC CONTROL**

Biped walking - Model problems of dynamics and control
p0087 A82-10977

Development of an integrated walking robot
p0087 A82-10988

A stochastic model of a human operator in the manual control of a dynamic system
p0229 A82-29469

Control of a walking machine with almost weightless legs. II - A discrete model
p0415 A82-47095

**DYNAMIC LOADS**

NT BLAST LOADS

A comparative characterization of hemodynamics and respiration under static and dynamic loads
p0238 A82-31503

Dynamic preload as an impact protection concept
p0376 A82-44290

**DYNAMIC MODELS**

Information model of the dynamics of autonomous extravehicular activity
p0051 A82-16718

Simulation of manual autonomous control of an extravehicular propulsion unit /EPU/
p0051 A82-16719

A physical model of human postural dynamics
p0069 A82-17478

Dynamic modeling and vibratory response of human subjects in heave mode
p0260 A82-33761

Non-linear effects connected with the spatial vibrations of biomechanical systems
p0260 A82-33763

Vibration defence of man - Questions of modeling
p0260 A82-33764

Benefits of detailed models of muscle activation and mechanics
p0046 N82-13713

A model of the human observer and decision maker
p0046 N82-13714

Supervision of dynamic systems: Monitoring, decision-making and control
p0441 N82-34069

**DYNAMIC PROPERTIES**

U DYNAMIC CHARACTERISTICS

**DYNAMIC RESPONSE**

NT TRANSIENT RESPONSE

In vitro Ca-45/++/ uptake and exchange by otoconial complexes in high and low K/+/Na/+/ fluids
p0121 A82-22249

Non-linear effects connected with the spatial vibrations of biomechanical systems
p0260 A82-33763

Identification of the adaptive feedback of the human motor system using the response difference method
p0033 N82-12754

User's guide to BIODYN-80: An interactive software package for modeling biodynamic feedthrough to a pilot's hands, head and eyes
[AD-A104933] p0037 N82-12786

Dynamic measurement of human vertical fusional response
p0039 N82-13660

Simulation of the motion of the center of mass of an occupant under ejection accelerations
[AD-A113806] p0352 N82-28989

The role of antagonist coactivation in the control of natural movement
p0382 N82-30867

A dynamic model of the cervical spine and head
[AD-A114887] p0432 N82-34008

Dynamic response of vertebral elements response of the intervertebral joint to torsion
[AD-A115125] p0433 N82-34016

**DYNAMIC STABILITY**

NT CONTROL STABILITY

NT LATERAL STABILITY

NT MOTION STABILITY

Development of an integrated walking robot
p0087 A82-10988

**DYSPNEA**

Dyspnea - What is it
p0342 A82-41461

## E

**EAR**

NT COCHLEA

NT CORTI ORGAN

NT EARDRUMS

NT LABYRINTH

NT MIDDLE EAR

NT SEMICIRCULAR CANALS

NT VESTIBULES

The functional condition of the ampullar apparatus in Meniere's disease
p0092 A82-20308

Vestibulovascular responses in inner ear dysfunction
p0151 A82-23255

Significance of the rehydration rate of the inner ear in the choice of method of surgical intervention in the endolymphatic system in Meniere's disease
p0261 A82-34473

Mechanical impedance of the human outer ear
[RAE-LIB-TRANS-2065] p0013 N82-11767

A hydrodynamic model of an outer hair cell
[NASA-TM-82773] p0129 N82-16743

Preparation of labyrinthectomied animals for flight aboard Cosmos-936 biosatellite
p0350 N82-28971

**EAR PROTECTORS**

The landing signal officer - Auditory aspects --- of aircraft carrier flight operations
p0284 A82-35910

Hearing protection
[IZF-1980-2] p0084 N82-15783

Report on a visit to Canada of the 16-17 May 1980 Second International Symposium on Personal Hearing Protection in Industry --- affects of acoustic trauma
[RAE-TM-FS-377] p0225 N82-21900

Measurement of the headband force of circumaural hearing protectors
[RAE-TM-FS-378] p0225 N82-21901

A test facility for the objective measurement of circumaural hearing protector attenuation
[RAE-TM-FS-379] p0225 N82-21902

The importance of ear-like couplers in the design of an objective test facility for the measurement of earmuff insertion loss
[RAE-TM-FS-380] p0225 N82-21903

Advanced design linear noise-attenuating earphone-earcup system
[AD-A110820] p0298 N82-26990

**EARDRUMS**

Characteristics of the structure and functions of the middle ear of lizards
p0119 A82-21823

Effect of flight on the Eustachian tube function and the tympanic membrane system - A follow-up study
p0211 A82-28483

**EARTH (PLANET)**

From inanimate matter to living systems
p0026 A82-15700

Chemical evolution. XL - Clay-mediated oxidation of diaminomaleonitrile
p0339 A82-41196

**EARTH ATMOSPHERE**

NT BIOSPHERE

NT OZONOSPHERE

NT PRIMITIVE EARTH ATMOSPHERE

NT TROPOPAUSE

Environmental conditions of aviation and space navigation
p0079 N82-15738

**EARTH CRUST**

Are the 3,800-Myr-old Isua objects microfossils, limonite-stained fluid inclusions, or neither
p0001 A82-10550

Origin and evolution of continents and oceans
p0148 A82-22982

**EARTH HYDROSPHERE**

Origin and evolution of continents and oceans
p0148 A82-22982

**EARTH OBSERVATIONS (FROM SPACE)**
An investigation of the visual observations made by cosmonauts under experimental and actual conditions
p0156 A82-23305
In class, in the air, and in orbit --- cosmonaut training for remote sensing tasks
p0409 A82-46701

**EARTH PLANETARY STRUCTURE**
The mass extinctions of the late Mesozoic --- iridium abundance as geologic evidence for celestial body impact
p0071 A82-17620

**EARTH RESOURCES**
NT CRUDE OIL
NT FORESTS
NT FOSSIL FUELS
NT GLACIERS
NT LAND ICE
NT MARINE RESOURCES
NT OIL FIELDS

**EARTH SATELLITES**
NT BIOSATELLITES
NT COSMOS SATELLITES
NT COSMOS 782 SATELLITE
NT COSMOS 936 SATELLITE
NT COSMOS 1129 SATELLITE
NT SOLAR POWER SATELLITES

**EATING**
Conditioned feeding suppression in rats produced by cross-coupled and simple motions
p0192 A82-26230
Comparative antihypoxic efficacy of pressure chamber conditioning and fasting of man
p0127 N82-16729

**ECCENTRICITY**
An ergometer for concentric and eccentric muscular contraction
[AD-A111061] p0295 N82-26971

**ECHO SOUNDING**
Method for the determination of muscle cross-sectional area and dermato-adipose layer thickness using ultrasonic scanning
p0204 A82-27778

**ECHOCARDIOGRAPHY**
The significance of echocardiography in the detection of left ventricular blood supply disorders during bicycle ergometry
p0159 A82-24492
Limitations of echocardiographic techniques in evaluation of left atrial masses
p0169 A82-25135
Two dimensional echocardiographic detection of intraatrial masses
p0169 A82-25136
Computerized ultrasonic arteriography - A new technique for imaging the carotid bifurcation
p0257 A82-32880
Echocardiographic characterization of heart hypertension
p0319 A82-40307
The amplitude of the R wave and the contractile function of the left ventricle in patients with ischemic heart disease
p0343 A82-41486
A comparison of echo- and kinetocardiographic indicators of the myocardial contractility of the left ventricle in patients suffering from various forms of ischemic heart disease
p0344 A82-41496
The use of echocardiography for the evaluation of flight fitness of pilots with cardio-vascular anomalies in reference to four cases
p0407 A82-46309
The echography - Doppler experiment on Salyut 7 --- to monitor cardiac function and cardiovascular circulation by ultrasonic means
[IAF PAPER 82-23] p0414 A82-46916
Presentation of 'echography' experiment --- for monitoring human cardiovascular system under zero-gravity
p0415 A82-47065
Age-related distinctions of echocardiographic parameters of healthy man
p0272 N82-25774
Echocardiography in the examination of pilots
p0399 N82-31937

**ECHOENCEPHALOGRAPHY**
Echoencephalographic indices in patients with hypertensive disease under the effect of functional loads
p0113 A82-21753

**ECHOES**
NT CLUTTER

**ECOLOGICAL SYSTEMS**
U ECOLOGY

**ECOLOGY**
NT COASTAL ECOLOGY
Ecological and technological problem of biodamages
p0082 N82-15766
Biochemical, physiological and ecological aspects of ammonium regeneration by marine crustaceans
p0177 N82-19808
Microbial ecology of extreme environments: Antarctic dry valley yeasts and growth in substrate limited habitats
[NASA-CR-168742] p0220 N82-21869
Application of Guided Inquiry System Technique (GIST) to Controlled Ecological Life Support Systems (CELSS)
[NASA-CR-166312] p0247 N82-22886
CELSS scenario analysis: Breakeven calculations
[NASA-CR-166319] p0250 N82-23982
A design methodology for nonlinear systems containing parameter uncertainty: Application to nonlinear controller design
[NASA-CR-166358] p0355 N82-29005
USSR report. Life sciences: Biomedical and behavioral sciences, no. 19
[JPRS-81442] p0391 N82-30935

**ECONOMIC IMPACT**
Human capital adjustments to technological change in the computer industry: The case of scientists and engineers
[PB82-180969] p0436 N82-34036

**ECOSYSTEMS**
Introduction prognosis and its methodological aspects --- plant growth in new habitats
p0111 A82-21722
The effect of the evolution of inherited characteristics on the stability of a predator-prey system - A mathematical model
p0162 A82-24538
The stability of a very simple freshwater ecosystem model
p0163 A82-24539
The influence of the type of trophic interactions on the dynamics of a two-level ecosystem
p0190 A82-25803
Biophysical methods for the study of ecosystems and the control of biosynthesis within them
p0191 A82-25820
A bilocal model of a dissipative structure --- in ecosystems
p0199 A82-27726
Competition between algae in a flow system
p0240 A82-31517

**EDEMA**
Hypoxic vasoconstriction and fluid filtration in pig lungs
p0018 A82-13226
Renin, aldosterone, and converting enzyme during exercise and acute hypoxia in humans
p0168 A82-24914
Bradykinin-induced increase in pulmonary vascular permeability in hypoxic sheep
p0169 A82-24918
Protective effects of unsaturated fatty acids in adrenaline pulmonary edema and hypobaric hypoxia /The biological significance of catecholamine hyperlipidemia/
p0204 A82-27786
Reduction of the edema of acute hyperoxic lung injury by granulocyte depletion
p0256 A82-32838
Causes of high-altitude acute pulmonary edema
p0307 A82-38167
The cause of high-altitude acute pulmonary edema
p0325 A82-40498
The changes in the mechanical properties of the brain during the development of edema induced by repeated venous congestions
p0420 A82-48216
Fluid distribution in progressive pulmonary edema: A low-temperature scanning electron microscopy study
[DE82-002554] p0398 N82-31928

EDITING ROUTINES (COMPUTERS)
SAM: A configurable experimental text editor for investigating human factors issues in text processing and understanding
[AD-A109331] p0182 N82-19846
EDUCATION
NT ASTRONAUT TRAINING
NT EJECTION TRAINING
NT FLIGHT TRAINING
NT GUNNERY TRAINING
NT MAINTENANCE TRAINING
NT PILOT TRAINING
NT SPACE FLIGHT TRAINING
The physical activity of humans as a social and biological problem
p0114 A82-21760
Development of an automatic data bank for managing physical education of students
p0118 A82-21816
Rationalizing physical regimen of sedentary workers
p0118 A82-21818
Training athletes to make quick decisions
p0158 A82-24487
Specialized laboratory for the educational and research activity of students and the psychodiagnostic study of athletes
p0279 A82-35673
Output and efficiency of the heart in young athletes as a function of the type of athletic training
p0344 A82-41497
Variability in human response to whole-body vibration - The effects of instructions
p0374 A82-43675
Performance measurement and Navy's Tactical Aircrew Training System
[AD-A110669] p0273 N82-25786
Intelligent tutoring for programming tasks: Using plan analysis to generate better hints
[AD-A114020] p0302 N82-27983
Instructor's role in individualized training: A survey of two computer managed courses
[AD-A114917] p0361 N82-29894
Advanced Instructional System: Applications for the future
[AD-A117144] p0425 N82-32980
Human capital adjustments to technological change in the computer industry: The case of scientists and engineers
[PB82-180969] p0436 N82-34036
EEG (ELECTROENCEPHALOGRAMS)
U ELECTROENCEPHALOGRAPHY
EFFECTIVE PERCEIVED NOISE LEVELS
Report on a visit to Canada of the 10-17 May 1980 Second International Symposium on Personal Hearing Protection in Industry --- affects of acoustic trauma
[RAE-TM-FS-377] p0225 N82-21900
EFFECTIVENESS
NT COST EFFECTIVENESS
NT SYSTEM EFFECTIVENESS
Efficacy of kavinton in prevention of motion sickness
p0349 N82-28961
EFFERENT NERVOUS SYSTEMS
Pathophysiology of motor functions in prolonged manned space flights
p0058 A82-16945
The effect of the motor activity regime on the development, conservation, and regeneration of defensive conditioned reflexes in rats
p0092 A82-20305
A systems analysis of human motor reactions in various modes of operation of goal-directed behavioral acts
p0111 A82-21729
The relationship between cardiac and motor components of a conditioned reflex upon the local cooling of various zones of the cerebral cortex in cats
p0116 A82-21787
Perception and performance in the heat
p0143 A82-22940
Control of the number of discharges of individual motor units in skeletal muscles as a test of coordination in athletes
p0154 A82-23282
Comments on the theory for the accuracy of rapid motor acts of Schmidt et al
p0187 A82-25691
Changes in the hemodynamics and efferent activity in the renal nerve with acute hypoxic hypoxia under the stabilization of perfusion pressure in carotid sinuses
p0306 A82-30161
The cortical regulation of human motion --- Russian book
p0316 A82-39283
Mechanisms of the effects of weightlessness on the motor system of man
p0336 A82-40752
A morphological investigation of the regulatory mechanisms of the intracerebral blood circulation
p0369 A82-42627
Neurophysiological mechanisms of the compensation of motor disturbances in the presence of lesions of the pyramid system /An electromyographic analysis/
p0369 A82-42635
Sleep and motor activity: Stages of the ontogenic evolution of the supraspinal motor control in the human sleep cycle --- Russian book
p0372 A82-43607
The role of the integrity of the central synaptic and direct influences in the regulation of hemodynamics
p0373 A82-43628
The influence of motion cues on driver-vehicle performance in a simulator
p0042 N82-13681
Load compensating reactions to perturbations at wrist joint in normal man
p0045 N82-13708
Neurophysiological characteristics of sensorimotor cortex of rats submitted to early motor deprivation and conditioning
p0271 N82-25770
Role of the thyroid gland during adaptation of skeletal muscles to increased motor activity
[NASA-TM-76871] p0384 N82-30884
USSR report: Space Biology and Aerospace Medicine, volume 16, no. 4, July - August 1982
[JPRS-81599] p0393 N82-31892
EFFICIENCY
The deterioration of the working efficiency of stereophotogrammetrists and their professional selection
p0410 A82-46709
Human factors in system development: Status and evaluation
p0182 N82-19841
EFFORT
Perception of effort during isometric contractions as related to heart rate and blood pressure responses
[AD-A111033] p0296 N82-26974
EGGS
Clinostat exposure and symmetrization of frog eggs
p0337 A82-40757
EGRESS
Factors affecting seat-man dynamics during emergency egress
p0024 A82-14964
EJECTION
Harmfulness of violent impact and airflow shocks
p0079 N82-15742
Torso experienced aerodynamic forces experienced during ejection
[AD-A098942] p0267 N82-24823
EJECTION INJURIES
Retro-hyperflexion luxation - Mechanism of cervical spinal cord contusion injury during ejection sequence
p0005 A82-11032
System to measure head motion during parachute opening shock
[AIAA PAPER 81-2517] p0021 A82-13914
Mechanism of vertebral fracture in the F/FB-111 ejection experience
p0252 A82-32004
Significance of bone density to spinal trauma related to pilot ejection
p0215 N82-20849
Aerodynamic forces experienced during ejection
[AFAMRL-TR-80-16] p0246 N82-22878
Analysis of vertebral stress distributions and ejection-related injury mechanisms
[AD-A098639] p0246 N82-22879

Long bone and joint response to mechanical loading
[AD-A111551] p0300 N82-27969
Spinal stresses in flight
p0359 N82-29873
Theories of the pathogenesis of fractures of the spine
p0359 N82-29874
Ejection of pilots from combat aircraft
p0359 N82-29877
EJECTION SEATS
Factors affecting seat-man dynamics during emergency egress
p0024 A82-14964
Harmfulness of violent impact and airflow shocks
p0079 N82-15742
Significance of bone density to spinal trauma related to pilot ejection
p0215 N82-20849
F/FB-111 ejection experience (1967-1980). Part 1: Evaluation and recommendations
[AD-A110199] p0222 N82-21879
Simulation of the motion of the center of mass of an occupant under ejection accelerations
[AD-A113806] p0352 N82-20989
Aircrew windblast protection concepts, development and evaluation
[AD-A115424] p0401 N82-31947
EJECTION TRAINING
Operator indoctrination during introduction of new or modified aviation life support systems /ALSS/
p0291 A82-37968
Accidents in centrifuges and experiments (ejection seat training towers, sleds)
p0360 N82-29881
ELASTIC BODIES
The elasticity of the foot during the modelling of human movement
p0420 A82-48211
ELASTIC DAMPING
The determination of the equivalent biomechanical characteristics of the ankle joint muscles by vibration tests
p0260 A82-33760
ELASTIC DEFORMATION
Biaxial finite deformations of arterial and venous segments under + or - G/x/ acceleration stress
p0007 A82-12036

p0045 N82-13708

ELECTRON BEAMS
Tables of energy-deposition distributions in water phantoms irradiated by point-monodirectional electron beams with energies from 1 to 60 MeV, and applications to broad beams
[PB82-178716] p0434 N82-34023

ELECTRON CAPTURE
Analytical detection of organic species by means of laser-induced multiphoton ionization
p0038 N82-13646

ELECTRON EMISSION
NT FIELD EMISSION

ELECTRON IONIZATION
U IONIZATION

ELECTRON IRRADIATION
Radiogenic changes in the behavior and physiology of the spontaneously hypertensive rat - Evidence for a dissociation between acute hypotension and incapacitation
p0283 A82-35903
Tables of energy-deposition distributions in water phantoms irradiated by point-monodirectional electron beams with energies from 1 to 60 MeV, and applications to broad beams
[PB82-178716] p0434 N82-34023

ELECTRON MICROSCOPES
An electron microscope study of hyperplasia in fibers of the skeletal muscles of athletes
p0114 A82-21764

ELECTRON MICROSCOPY
Electron-histochemical and functional evaluation of the effects of aspirin on the thrombocytes of healthy people and patients with ischemic heart disease
p0204 A82-27784
An electron-microscopic study of the brain of the fruit fly, Drosophila melanogaster, exposed to high-LET krypton /Kr-84/ particle radiation
p0287 A82-36320
Alterations in the labyrinth receptors after laser irradiation as detected by electron microscopy
p0316 A82-39244
Fluid distribution in progressive pulmonary edema: A low-temperature scanning electron microscopy study
[DE82-002554] p0398 N82-31928

ELECTRON PARAMAGNETIC RESONANCE
Electron paramagnetic resonance assignment: An analysis of methods used for biological samples
[ISS-T-82/2] p0393 N82-31889

ELECTRON RADIATION
NT BETA PARTICLES
NT ELECTRON BEAMS

ELECTRON SPIN RESONANCE
U ELECTRON PARAMAGNETIC RESONANCE

ELECTRON TRANSFER
Effect of air ions on the ratio between direct and reverse electron transport in mitochondria under stress
p0199 A82-27731
Participation of pheophytin in primary electron transfer processes in the reaction centers of photosystem II --- photoreduction reactions of chlorophyll derivative
p0201 A82-27746
The mechanism of the interaction of the triplet state of porphyrins and phthalocyanines with electron acceptors
p0228 A82-29432
New data on reverse electron transport in the respiratory chains of yeast mitochondria - The induction of reverse transport by exogenous NAD-H
p0228 A82-29445

ELECTRON TUBES
NT CATHODE RAY TUBES
NT VIDICONS

ELECTRON TUNNELING
Physical model of the initial stages of energy transformation during oxidative phosphorylation
p0200 A82-27738

ELECTRONIC CONTROL
The persistence of a visual dominance effect in a telemanipulator task: A comparison between visual and electrotactile feedback
p0041 N82-13677

ELECTRONIC EQUIPMENT
NT LIGHT EMITTING DIODES
NT MINIATURE ELECTRONIC EQUIPMENT
NT PHOTOVOLTAIC CELLS
NT THERMISTORS
Color coding of information on electronic display devices --- German thesis
p0365 A82-41681

ELECTRONIC WARFARE
Flying skill maintenance --- for combat tasks of fighter pilot and bomber crews
p0141 A82-22915

ELECTRONYSTAGMOGRAPHY
Differences in eye movement data recorded by electro-oculography and corneal reflection techniques
p0088 A82-19224
The use of nondamping sinusoidal rotation in the study of vestibular function
p0280 A82-35692
Nystagmometry of optovestibular interaction
p0349 N82-28962
Measurement of vestibular asymmetry in rotation tests
p0396 N82-31913

ELECTROPHORESIS
Microdisc gel electrophoresis in sodium dodecyl sulfate of organic material from rat otoconial complexes
p0070 A82-17482
Microionophoretic analysis of the chemical sensitivity of neurons of the medial thalamus and ventromedial hypothalamus to acetylcholine in the case of immobilization-produced emotional stress in rats
p0203 A82-27770
Molecular relationships between closely related strains and species of nematodes
p0208 A82-28228
Separation of bone marrow cells in mice by free-flow electrophoresis
p0308 A82-38536
Effect of immobilization on the nonhistone protein composition in different types of skeletal muscles
p0332 A82-40711
Optimization of medicinal electrophoresis --- enhancement of cutaneous penetration
p0343 A82-41472
The use of electrovacuum therapy in certain diseases of the peripheral nervous system
p0343 A82-41478
Zoological effects of variations in atmospheric oxygen levels
[NASA-CR-169020] p0293 N82-26954

ELECTROPHYSICS
NT ELECTRO-OPTICS
The effect of the dispersion of the electric parameters of bacterial cells on their orientation in an alternating electric field
p0419 A82-48205

ELECTROPHYSIOLOGY
The nature of induced EEG activity in the alpha-rhythm range
p0028 A82-15713
Neuronal interaction between ipsilateral medial and lateral vestibular nuclei
p0064 A82-17436
The brain-stem projection to the cerebellar flocculus relevant to optokinetic responses in cats
p0068 A82-17463
Mossy fiber activation of the cerebellar flocculus from the visual system
p0068 A82-17465
New approaches to the electrophysiological characterization of vigilance behavior
p0146 A82-22965
Reactive changes in autonomic synapses upon frequency electrostimulation
p0152 A82-23263

The effect of the beta-adrenergic blocker propranolol and the tranquilizer seduxen on the structure of natural sleep in the cat p0157 A82-23644
Application of electrogustometry for the evaluation of adrenal functional conditions p0163 A82-24548
The nature of autonomic effects produced by sombrevin --- during narcosis p0187 A82-25693
Electroacupuncture in the complex treatment of trifacial neuralgia p0203 A82-27775
Electrical stimulation of the exterior geniculate body induces eye movements p0229 A82-29448
Features of the temporal organization of the activated phase of sleep in frogs and turtles p0240 A82-31522
Electrophysiological studies of the auditory-receptor function in the case of the combined injection of kanamycin and lasix p0242 A82-31537
Investigation of the sensitivity of the vestibular apparatus to galvanic-current stimulation p0242 A82-31541
The diagnosis and treatment of heart-rhythm disorders - The role of intracardial electrophysiological investigation p0279 A82-35676
Electrophysical and hemodynamic factors conditioning cardiac arrhythmias during centrifuging p0287 A82-36689
Electrophysiological measurement techniques p0288 A82-36964
Electromyography and applications p0288 A82-36965
The role of central gray matter in the activation of antipain systems of the rat's brain under stress p0309 A82-38547
Changes in the human visually evoked cortical potential in response to chromatic modulation of a sinusoidal grating p0314 A82-38795
Bioelectrochemical activity of the brain --- Russian book p0421 A82-48249
Studies in in vivo electrochemistry p0075 N82-14793
USSR report. Life sciences biomedical and behavioral sciences, no. 16 [JPRS-80789] p0351 N82-28977
Microelectronic electrode probe for testing brain electrical activity p0352 N82-28982

**ELECTROPLETHYSMOGRAPHY**
Evaluation of the parallel conductor theory for measuring human limb blood flow by electrical admittance plethysmography p0070 A82-17568
Magnetic measurement of cardiac volume changes p0070 A82-17569

**ELECTRORETINOGRAPHY**
Low-level laser light effects - Long-term effects --- on visual acuity of behaviorally trained monkeys p0140 A82-22913
The damaging effects of light on the retina - The role of singlet oxygen and lipid peroxides p0232 A82-29817
Field sensitivity of the 'red' mechanism derived from primate local electroretinogram p0318 A82-39431

**ELECTROSEISMIC EFFECT**
U ELECTRIC CURRENT
U SEISMIC WAVES

**ELECTROSTATIC FIELDS**
U ELECTRIC FIELDS

**ELECTROSTATIC PLASMA**
U PLASMAS (PHYSICS)

**ELECTROSTRICTION**
A possible explanation for the fluctuations in reflectivity exhibited by bilayer liped membranes excited during electrostriction p0313 A82-38602

**ELEMENT ABUNDANCE**
U ABUNDANCE

**ELEMENTARY PARTICLE INTERACTIONS**

EMOTIONAL FACTORS
The effect of emotional stress on astronaut activity in a radio-telegraphy system p0051 A82-16722
Biogenic monoamine concentrations in autonomic nervous system ganglia during acute experimental emotional stress p0054 A82-16817
Acute experimental emotional stress in rabbits in a modulated electromagnetic field p0092 A82-20307
Contractile dysfunction of vascular wall smooth muscle under emotional nociceptive stress p0094 A82-20322
Functional condition of the rat sympato-adrenal system during emotional and nociceptive stress p0095 A82-20335
The effect of motor activity on the development of cardiac arrhythmias in experimental emotional stress p0110 A82-21713
Change in the nature of the psychotropic effect on the emotional reactivity and behavior in stress situations depending on the state of the catecholaminergic systems of the brain p0112 A82-21739
Adaptogenic effect of mebicar during emotional stress, exercise, and hypoxia p0115 A82-21780
The effects of emotional activation on the spatial synchronization of human brain biopotentials p0116 A82-21785
Emotional stress as a factor in cardiovascular disorders p0117 A82-21796
The dynamics and physiological importance of the activation of the gamma-amino-butyric acid system in the brain and cardiac muscle under pain and emotional stress p0117 A82-21808
Genetic and individual differences in cardiovascular disturbances in rats during experimental emotional stress p0153 A82-23278
Intellection and emotions p0161 A82-24526
Changes in blood sodium and potassium concentrations during emotional stress induced by nociceptive stimuli in rats p0164 A82-24550
Correlation of the stress protective and autonomotropic effects of mebicar p0164 A82-24559
Systemic mechanisms of emotional stress --- Russian book p0170 A82-25231
Damage to the Ca/2+/-transporting system in the sarcoplasmic reticulum of the heart during emotional and nociceptive stress p0190 A82-25810
Effects of emotional stress in bus drivers p0191 A82-25819
An introduction to disaster - Some considerations of a psychological nature p0193 A82-26236
The content of RNA in structures of the autonomic nervous system of rabbits under acute emotional stress p0202 A82-27759
Effects of microwaves on acupuncture points under conditions of acute emotional stress in rabbits p0202 A82-27763
Self-stimulation response as an anti-stress factor in animals p0205 A82-27799
Relation of changes in autonomic reactions to the effectiveness of mental activity under conditions of emotional stress p0236 A82-31158
The effect of repeated episodes of emotional stress on heart activity and the content of monoamines in the heart p0307 A82-38163
Ultrastructural changes in the brains of rats subjected to acute emotional stress p0310 A82-38558
A factor of resistance to emotional stress in the brain of rats p0322 A82-40452
The correlations of the central nervous system and thyroid functions in conditions of chronic emotional stress p0322 A82-40453
Statistical analysis of neuronal impulse activity in the diencephalon during immobilization-produced emotional stress in rats p0323 A82-40467
Functional condition of the heart mitochondria in the dynamics of emotional and pain stress p0344 A82-41500
Emotional stress and hypokinesia in the origination of cardiac disorders and hypertensive states p0367 A82-42608
A systems analysis of individual vascular reactions in animals under experimentally induced emotional stress p0367 A82-42610
Electrocardiographic correlates of emotional stress p0371 A82-43236
The mechanisms of hypertensive responses during emotional stress p0373 A82-43630
EEG changes in sleep upon emotional stress p0421 A82-48225
Catecholamine levels in fit and nonfit males when exposed to an emotional stress p0178 N82-19813
Effects of impulse noise on human beings: A pilot study on annoyance ratings in the laboratory [IZF-1981-9] p0267 N82-24825
USSR report. Space biology and aerospace medicine, volume 16, no. 3, May - June 1982 [JPRS-81197] p0347 N82-28949
Role of hormonal compounds in regulation of electrolyte metabolism in the presence of emotional stress p0348 N82-28952
Slow waves of cardiac rhythm in healthy man under different conditions p0348 N82-28955
Biogenic monoamine content of the ganglia in the autonomic nervous system of rabbits during acute experimental emotional stress [NASA-TM-76900] p0383 N82-30875
Catecholamines in the blood plasma of August and Wistar rats during emotional stress [NASA-TM-76872] p0384 N82-30885
Changes of blood plasma renin activity in August and Wistar rats under emotional stress [NASA-TM-76873] p0384 N82-30886
Emotional stress as a factor in cardiovascular disturbances [NASA-TM-76910] p0385 N82-30889
Effect of sensitization on development of stress gastric ulcers in rats [NASA-TM-76868] p0385 N82-30892

EMOTIONS
Informational need of emotional stress --- effect on operator performance of visual tasks p0058 A82-16943
Emotions, sleep, and health p0117 A82-21804

EMULSIONS
Study of the kinetics of oxygen saturation of fluorocarbon emulsions --- blood substitutes [ISSN-0077-5606] p0178 N82-19810
Technique for the aerobic cultivation of microorganisms in water-in-oil emulsions [NRC/CNR-TT-2031] p0428 N82-33980

A statistical model of the controller functions of the human temperature regulating system
p0248 N82-23972
ENZYME ACTIVITY
Could the biochemical metabolism be different
p0106 A82-20976
Change in the cytochemical indicators of carbohydrate metabolism in the peripheral blood neutrophils of pilots
p0107 A82-21457
The relationship between carbohydrate and lipid metabolisms in muscle cell energetics under the influence of ATPase loading - Mathematical model
p0109 A82-21706
Lysosomes under conditions of stress
p0114 A82-21770
Effects of dioxalin and oxamide on succinate and lactate dehydrogenase activities in rat liver, kidney and brain tissues and on the chromosomal apparatus of bone marrow cells
p0115 A82-21778
The role of urokinase in the regulation of the fibrinolytic activity of blood under normal conditions
p0117 A82-21799
The effects of daily blood sampling on creatine phosphokinase, aspartate aminotransferase and alanine aminotransferase activities in the blood serum of the monkey
p0118 A82-21811
Temperature dependence of alanine and aspartate aminotransferase activities in rat brain during hypothermia of various durations and adrenalectomy
p0118 A82-21812
Enzymatic capacities of skeletal muscle - Effects of different types of training
p0121 A82-22246
The condition of certain glycolytic and tricarboxylic acid cycle enzymes in intact and denervated skeletal muscles of the rat during cooling
p0150 A82-23168
Circadian rhythm of changes of phospholipid content and the activity of nonspecific phosphomonoesterases in the rat liver
p0155 A82-23300
The importance of carboanhydrase in regulating the acid-base equilibrium during muscular activity
p0158 A82-24485
Changes in the activity of kidney enzymes during temporary ischemia of the extremities
p0163 A82-24542
The isoenzyme spectrum of serum lactate dehydrogenase as a function of age in healthy individuals
p0164 A82-24554
Beta-acetylglucosaminidase and alpha-mannosidase activity in the blood serum of healthy people of different blood groups
p0164 A82-24556
Effects of vitamin P on the enzyme spectrum of the blood serum of irradiated animals
p0164 A82-24560
Renin, aldosterone, and converting enzyme during exercise and acute hypoxia in humans
p0168 A82-24914
Characteristics of lipid hydrolysis and absorption in rats under motor activity restriction
p0196 A82-26757
The interaction of actin with phosphorylase kinase
p0228 A82-29434
Orientation of Ca/2+/-dependent ATPases in sarcoplasmic reticulum membranes and reconstructed proteoliposomes
p0228 A82-29443
Principles of enzyme stabilization - Polyacrylamide-gel-immobilized trypsin and chymotrypsin with high catalytic activity at elevated temperatures
p0228 A82-29446
Lipoprotein lipase hydrolyzes endogenous triacylglycerols in muscle of exercised rats
p0230 A82-29570
The role of protein phosphorylation in neutral and hormonal control of cellular activity
p0234 A82-30766
Hormonal mechanisms of seasonal rhythms in rats
p0240 A82-31518
The carbohydrase system of the small intestine of rats of various ages following heat and cold exposures
p0257 A82-33135
Enzymatic characterization of peptidic materials isolated from aqueous solutions of ammonium cyanide /pH9/ and hydrocyanic acid /pH6/ exposed to ionizing radiation
p0257 A82-33277
Effect of thymalin on the system of cyclic nucleotides in the mouse spleen
p0262 A82-34679
Glyceroaldehyde phosphatedehydrogenase from human muscles in atherosclerosis
p0262 A82-34681
Effect of dietary fat on pulmonary enzymes and toxicity during normobaric hyperoxia
p0283 A82-35902
State of the lactate dehydrogenase reaction in the muscular tissue of irradiated animals
p0306 A82-38158
Enzymes that detoxify active forms of oxygen and lipoperoxide in experimental ischemia and myocardial infarction
p0308 A82-38540
Evidence of an immune mechanism of enzyme-homostasis regulation
p0309 A82-38552
The absence of the magnetic-field effect on Na/+/, K/+/-dependent ATPase
p0312 A82-38591
Specificity of action of monovalent cations on the ATPase activity of myosin HMM-S-1
p0312 A82-38594
The effect of urea and heat on the activity of lactate dehydrogenase and glucose 6-phosphate dehydrogenase
p0313 A82-38612
The effect of monovalent cations on the ATPase activity and superprecipitation of actomyosin
p0314 A82-38615
The histochemistry of enzymes in specific skin glands of the European hedgehog /Erinaceus europeaus/ during hibernation
p0319 A82-39792
ATPase activity and the potassium ion permeability of erythrocyte membranes in the presence of serotonin and radiation
p0324 A82-40479

Changes in neurons of the spinal cord and spinal ganglia under hypokinesia /neuromorphological and histochemical investigation/
p0325 A82-40494
Stress in space flight - Metabolic aspects
p0330 A82-40696
Effect of prolonged weightlessness on certain aspects of brain metabolism of the rat
p0331 A82-40699
Na/+/-K/+/ dependent ATP-ase modifications of skeletal muscle and myocardium of hypokinetic rats
p0331 A82-40707
Effect of immobilization on the ATPase activities and Ca-uptake of sarcoplasmic reticulum in different types of muscles
p0332 A82-40708
Immobilization effects upon aerobic and anaerobic metabolism of the skeletal muscles
p0332 A82-40712
Some of biochemical parameters in rat brain during +Gz acceleration
p0333 A82-40717
Protection from O2 toxicity by preexposure to hypoxia - Lung antioxidant enzyme role
p0341 A82-41217
Changes in the transaminase activity and several biochemical blood values in the acute period of experimental myocardial infarction in monkeys
p0366 A82-42172
Effect of dosed physical loading on biological oxidation and bioenergy in liver and myocardium
p0370 A82-43046
Hemodynamic response to converting enzyme inhibition at rest and exercise in humans
p0375 A82-44135
Protein kinase activity in liver of heat-acclimated hamsters
p0376 A82-44145
Catecholamines and their enzymes in discrete brain areas of rats after space flight on biosatellites Cosmos
[IAF PAPER 82-180] p0377 A82-44688
The activity of ribosephosphate pyrophosphokinase in the thymus and liver of irradiated mice
p0404 A82-45779
The effect of ionizing radiation on glutathione peroxidase activity in rat tissues
p0404 A82-45780
Immuno-enzymological comparisons in the differential diagnosis of various myocardial lesions
p0409 A82-46704
Isoenzymes following exercise in patients with ischemic heart disease
p0411 A82-46723
The induced synthesis of tyrosine aminotransferase in the liver of irradiated rat embryos
p0411 A82-46852
The dynamics of the amount and several aspects of the exchange of nicotinamide coenzymes in irradiated organisms
p0411 A82-46853
The activity of the microsomal hydroxylases according to age in healthy individuals
p0413 A82-46878
The activities of the dehydrogenases of the Krebs cycle and the enzymes of tissue respiration during myocardial necrosis in stress-impaired rats
p0413 A82-46881
Cathepsin activity of skeletal muscle and myocardia myofibrils after exposure to weightlessness and accelerations
p0124 N82-16714
Norepinephrine and enzymes of synthesis and degradation thereof in the rat hypothalamus following flight aboard the Cosmos-936 biosatellite
p0125 N82-16716
Combined effect of simulated weightlessness and accelerations on energy metabolism enzymes
p0131 N82-17820
Myocardial protein fractions and enzymatic activity thereof in experimental rats flown aboard Cosmos-936 biosatellite
p0132 N82-17832
Metabolic processes in rat skeletal muscles after flight aboard Cosmos-936
p0132 N82-17833
Activity of some enzymes of carbonhydrate metabolism in rat skeletal muscles after space flight
p0132 N82-17834
State of digestive system following long-term space flights
p0270 N82-25758
Functional state of rat gastrointestinal tract organs following flight in Cosmos-1129 biosatellite
p0271 N82-25765
Zoological effects of variations in atmospheric oxygen levels
[NASA-CR-169020] p0293 N82-26954
Catecholamines and enzymes of their metabolism in rat myocardium after flight aboard the Cosmos-936 biosatellite
p0350 N82-28966
Diagnostic use of enzymatic test in experiments on monkeys
p0396 N82-31915

ERYTHROCYTES
NT RETICULOCYTES
Extra-erythrocytic hemoglobin and iron-bearing hemoglobin destruction products - A system for the amplification of the toxic effects of hyperoxia
p0052 A82-16803
Plasma erythropoietins during training for hyperoxic conditions
p0062 A82-17147
Changes of the aggregation and orientation structure of blood in pulsating flow
p0095 A82-20333
Some indicators of protein metabolism in erythrocytes during radiation sickness and following cystamine injection
p0111 A82-21724
The correlation between hematologic and biochemical indicators in the turtles Testudo horsfieldi
p0112 A82-21733
Effect of low-temperature on the membrane permeability of erythrocytes reconstituted in media of different ionic composition
p0112 A82-21737
Erythrocyte indices during a competitive marathon
p0120 A82-21932
Preparation of purified erythropoietin from rabbit blood plasma
p0152 A82-23261
A mechanism for the stimulation of the immune response under the influence of high ambient temperature
p0164 A82-24557
Indicators of the erythrocytic system of rabbits in hot, humid climates
p0191 A82-25813
Some physiological mechanisms for the effects of the hypothalamus on erythron
p0196 A82-26753
Hematopoietic tissue development in Japanese quail embryogenesis
p0201 A82-27748
Studies on the property and transplantation of haemopoietic stem cells from peripheral blood
p0261 A82-34247
Structural changes of the plasmatic membrane under the effect of ionizing radiation
p0278 A82-35661
The bioenergetics of erythrocytes in inhabitants of the North
p0282 A82-35831
The synthesis of nuclear and mitochondrial DNA and RNA, and the synthesis of heme and globin in rabbit bone marrow during the stimulation of erythropoiesis
p0307 A82-38169
A measurement of the size distribution of lipoproteins in the plasma of human blood
p0313 A82-38603
The incorporation of an erythrocyte membrane into planar bilayer lipid membranes
p0313 A82-38606
ATPase activity and the potassium ion permeability of erythrocyte membranes in the presence of serotonin and radiation
p0324 A82-40479
The effect of products erythrocyte destruction on immunological processes
p0325 A82-40500
The synthesis of nuclear and mitochondrial DNA and RNA, and the synthesis of heme and globin in rabbit bone marrow during the stimulation of erythropoiesis
p0325 A82-40501
Effect of induced erythrocythemia on hypoxia tolerance during physical exercise
p0341 A82-41218
A model for the restoration of the cellular composition of red blood
p0419 A82-48202
An investigation of the ultrasound hemolysis of normal and pathological erythrocytes
p0419 A82-48204
Studies in erythropoiesis: The influence of the glycocalyx of the red cell membrane
[DE81-030668] p0033 N82-12760
Cytokinetic evaluation of erythropoiesis during long-term orbital flights
p0125 N82-16715
Effect of space flights of different duration on energy metabolism of human erythrocytes
p0130 N82-17817
Facilitated diffusion of small non-electrolytes in the human red blood cell
p0135 N82-17855
The influence of space flight on erythrokinetics in man
p0173 N82-18258
Structural and functional properties, and energy metabolism of erythrocytes during space flights varying in duration
p0214 N82-20841
Methodological aspects of testing erythrocyte balance by counting incubated reticulocytes
p0350 N82-28972
Effects of low-intensity electromagnetic fields on human and animal erythrocytes
p0351 N82-28974
Effect of hypokinesia on some red blood indices and the condition of regulatory systems
[NASA-TM-76752] p0389 N82-30918
Effects of +G sub z acceleration and adeutron on nuclei acid content and other parameters of mouse peripheral blood
p0395 N82-31909
Some potential blood flow experiments for space
[UR-3490-1720] p0402 N82-32068

EUSTACHIAN TUBES
Effect of flight on the Eustachian tube function and the tympanic membrane system - A follow-up study
p0211 A82-28483

EVACUATING (TRANSPORTATION)
Some characteristics of the aerial evacuation of the sick and otorhinolaryngologically injured
p0028 A82-15711
Physical and physiological features of long-range flight and its impact on patients
p0087 A82-19012

EVALUATION
NT TRAINING EVALUATION
A system for the rapid operational evaluation of pilot performance
p0155 A82-23303
An analytic framework for allocating R and D resources at GRI
[PB82-160428] p0306 N82-30898
Comparative evaluation of methods for the measurement of mental workload during a simple simulated car driving task
[PB-51] p0426 N82-32984
HRTES Human Resources Test and Evaluation System. Volume 1: Test procedures
[AD-A115594] p0435 N82-34029
HRTES Human Resources Test and Evaluation System. Volume 2: Supplement
[AD-A115595] p0435 N82-34030
A model-based technique for predicting pilot opinion ratings for large commercial transports
p0438 N82-34050

EVAPORATION
Analysis of evaporative water loss in the Skylab astronauts
[NASA-CR-167462] p0178 N82-19814

EVAPORATIVE COOLING
NT SWEAT COOLING
Thermoregulatory influences on common carotid blood flow in the dog
p0255 A82-32829
Effect of heating rate on evaporative heat loss in the microwave-exposed mouse
p0340 A82-41208

EVAPORATORS
OTEC biofouling, corrosion, and materials study from a moored platform at Punta Tuna, Puerto Rico
[DE82-007037] p0347 N82-28947

EVENING
Sleep schedules and peak times of oral temperature and alertness in morning and evening 'types'
p0403 A82-45575

EVOKED RESPONSE (PSYCHOPHYSIOLOGY)
Dipole localization of average and single visual evoked potentials
p0071 A82-17570
Frequency characteristics of visual evoked potentials in different regions of the human cerebral cortex
p0093 A82-20314
Coordination of processes in the hierarchic structure of the visual analyzer
p0116 A82-21788
Steady state average evoked potentials as a measure of tracking difficulty
p0147 A82-22973
Characteristics of cerebral somato-sensory evoked potentials under various conditions for the formation of simple motor reactions
p0165 A82-24830
Experience with the application of the method of evoked potentials in psychophysical studies
p0168 A82-24908
Investigation of the mechanism of auditory adaptation by the simultaneous recording of auditory evoked potentials of the brain and neurotropic potentials of the cochlea
p0189 A82-25714
Central nervous system reactivity in the image of the visual evoked potential and the perceptual-motor performance of pilots and cosmonaut candidates under conditions of sleep deprivation
p0251 A82-31831
Changes in the human visually evoked cortical potential in response to chromatic modulation of a sinusoidal grating
p0314 A82-38795
Gravity only dependent receptor field of the vestibular sensors Its significance in orbital flight
p0338 A82-40770
An on-line procedure for the extraction of acoustically evoked potentials from the electroencephalogram --- German thesis
p0365 A82-41688
Steady state visual evoked potentials in the alert primate
p0403 A82-45673

Effect of ventilatory drive on the perceived magnitude of added loads to breathing
p0418 A82-47383

EVOLUTION (DEVELOPMENT)
NT ABIOGENESIS
NT BIOLOGICAL EVOLUTION
NT CHEMICAL EVOLUTION
NT PLANETARY EVOLUTION

Human roles in future space operations
p0060 A82-16955

Amino acid codes in mitochondria as possible clues to primitive codes
p0208 A82-28227

EVOLUTION (LIBERATION)
NT GAS EVOLUTION

EXAMINATION
NT EYE EXAMINATIONS

Clinical examination of spinal injuries
p0360 N82-29882

Preflight examination results used to forecast cosmonaut endurance of orthostatic tests after spaceflight
p0396 N82-31917

EXCAVATION
NT TUNNELING (EXCAVATION)

EXCHANGING
NT GAS EXCHANGE
NT ION EXCHANGING

EXCITATION
NT HARMONIC EXCITATION

EXCRETION

Increased excretion of urea and N/tau/-methylhistidine by rats and humans after a bout of exercise
p0119 A82-21927

Rhythms of electrolytes and hydroxyproline excretion in urine of rats after three weeks of weightlessness - Biosatellite Cosmos-1129
p0330 A82-40693

Tritium oxide distribution and excretion kinetics in the exposure of animals to noise
p0342 A82-41463

Sweating responses of men and women during exercise in humid and dry heat
p0032 N82-12745

Vitamin C, B sub 1 and B sub 6 excretion in urine during 182-day antiorthostatic hypokinesia
p0131 N82-17024

Biochemical, physiological and ecological aspects of ammonium regeneration by marine crustaceans
p0177 N82-19808

EXECUTIVE AIRCRAFT
U GENERAL AVIATION AIRCRAFT
U PASSENGER AIRCRAFT

EXERCISE
U PHYSICAL EXERCISE

EXERCISE PHYSIOLOGY

Plasma norepinephrine response to exercise before and after training in humans
p0005 A82-11152

Endurance training in the rat. I - Myocardial mechanics and biochemistry
p0006 A82-11155

Arm and leg intravascular temperatures of men during submaximal exercise
p0018 A82-13227

Effect of exhaustive exercise on myocardial performance
p0018 A82-13228

Autonomic mechanisms of training bradycardia - Beta-adrenergic receptors in humans
p0019 A82-13233

Cardiovascular responses to mixed static and dynamic exercise
p0022 A82-14803

Cardiovascular reflexes during rest and exercise modified by gravitational stresses
p0057 A82-16932

Effect of physical fitness and training on physiological responses to hypogravity
p0057 A82-16933

The effects of bicycle ergometer exercise on plasma amino acid contents in athletes
p0062 A82-17145

Erythrocyte indices during a competitive marathon
p0120 A82-21932

Cardiac output increase and gas exchange at start of exercise
p0120 A82-21936

Enzymatic capacities of skeletal muscle - Effects of different types of training
p0121 A82-22248

A method for the study of the pharmacodynamics of antianginal drugs with the use of repeated exercise tests
p0152 A82-23266

Criterion for the evaluation of arterial pressure response to bicycle ergometer exercise during treatment for hypertension
p0152 A82-23267

The effect of athletic training on the mass distribution of athletes' bodies
p0154 A82-23280

The role of the vestibular analyzer in the spatial analysis of gymnastic exercises
p0154 A82-23283

Directed training of wrestlers in the biofeedback control of physical work intensity according to heat rate
p0158 A82-24480

Quantitative criteria for evaluating the candidates granted admission and the effectiveness of athletic training among students in institutes of physical culture
p0158 A82-24483

A discussion of the nature of sports medicine
p0158 A82-24484

Energy supply characteristics and blood protein and electrolyte content during submaximal muscular activity in bicyclists
p0158 A82-24488

The significance of echocardiography in the detection of left ventricular blood supply disorders during bicycle ergometry
p0159 A82-24492

Sports morphology on the rise /On the work of the Morphological Section at the International Congress 'Sports in Contemporary Society'/
p0159 A82-24499

Evaluation of the effectiveness of the complex treatment of patients with ischemic heart disease by the bicycle ergometer method
p0161 A82-24517

Combined rehabilitative and therapeutic measures in space medicine
p0163 A82-24547

The regulation of body temperature during physical work
p0166 A82-24836

Renin, aldosterone, and converting enzyme during exercise and acute hypoxia in humans
p0168 A82-24914

Heart contractility at pressure loads induced by ischemia of exercised muscle in humans
p0169 A82-24916

Ventilatory responses at rest and during exercise in marathon runners
p0169 A82-24919

Effect of muscle glycogen content on glucose uptake following exercise
p0169 A82-24921

Guinea pig soleus and gastrocnemius electromyograms at varying speeds, grades, and loads
p0169 A82-24922

Isotopic analysis of leucine and urea metabolism in exercising humans
p0169 A82-24923

Ultrastructural changes in skeletal muscle fibers under the influence of acute physical exercise
p0189 A82-25717

Thermoregulatory responses in the rat to exercise in the heat following prolonged heat exposure
p0197 A82-26818

Electromyographic pattern of muscular activity during pushing-off and methods for its directed correction in young ski-jumpers on a trampoline
p0203 A82-27776

Effects of periodization in the yearly training cycle on cardiac volume in young athletes
p0204 A82-27779

A model of the dynamics of athlete condition during the yearly cycle and its role in the management of training
p0204 A82-27780

The determination of overall physical endurance in athletes
p0204 A82-27781

The norm and pathology in sports p0204 A82-27782
Bicycle ergometry in the differential diagnosis of cardialgia p0205 A82-27792
Suction-type EKG electrodes with a remote vacuum pump for stress testing p0205 A82-27800
Determination of the anaerobic threshold by a noninvasive field test in runners p0229 A82-29558
Time course of ultrastructural changes in skeletal muscle after two types of exercise p0229 A82-29560
Delayed kinetics of respiratory gas exchange in the transition from prior exercise p0230 A82-29561
Hemodynamic responses to methoxamine in exercise-conditioned and aorta-constricted rats p0230 A82-29562
Effect of acid-base status on the kinetics of the ventilatory response to moderate exercise p0230 A82-29564
Lipoprotein lipase hydrolyzes endogenous triacylglycerols in muscle of exercised rats p0230 A82-29570
Comparative physiological responses to exercise stress p0231 A82-29571
Hemodynamic response during combined tilt table-isometric exercise test and +Gz acceleration tolerance p0251 A82-31832
Effect of aerobic conditioning on cardiovascular response to isometric exercise p0256 A82-32841
Induced venous pooling and cardiorespiratory responses to exercise after bed rest p0256 A82-32842
Early diagnosis of overstrain of the cardiovascular system in athletes engaging in cyclic forms of sport p0278 A82-35664
Dynamics of blood flow rate in athletes upon changes in environmental conditions p0279 A82-35669
Characteristics of hemapoiesis in athletes undergoing endurance-training p0279 A82-35670
Variation of the biomechanical characteristics of an 800-m run under the influence of fatigue p0279 A82-35671
Specialized laboratory for the educational and research activity of students and the psychodiagnostic study of athletes p0279 A82-35673
Evaluation of the functional state existing in the adaptation to high-altitude conditions p0282 A82-35836
Hormonal mechanisms of adaptation and training --- Russian book p0289 A82-36976
Circadian changes in resting heart rate and body temperature, maximal oxygen consumption and perceived exertion p0308 A82-38268
The changes in the concentration of free amino acids in muscles during exercise p0320 A82-40314

NT JUPITER ATMOSPHERE
NT PLANETARY ATMOSPHERES
NT PLANETARY ENVIRONMENTS
Extreme environments - Are there any limits to life
p0097 A82-20069
An approach to the mathematical modelling of a controlled ecological life support system
[NASA-CR-166331] p0250 N82-23984
**EXTRATERRESTRIAL INTELLIGENCE**
Evolution of man and its implications for general principles of the evolution of intelligent life
p0149 A82-22998
**EXTRATERRESTRIAL LIFE**
On the place of organic life in the universe and the possibility of extraterrestrial life
p0020 A82-13825
Organic analysis of the Antarctic carbonaceous chondrites
p0098 A82-20908
Possible impact of cosmochemistry on terrestrial biology - Historical introduction
p0120 A82-21987
Life in the universe; Proceedings of the Conference, Moffett Field, CA, June 19, 20, 1979
p0147 A82-22976
Organic chemical evolution
p0147 A82-22978
Sulfur - Fountainhead of life in the universe
p0148 A82-22979
Emergence and radiation of multicellular organisms
p0148 A82-22992
The appearance of life in the universe
p0157 A82-23981
Interpretation of Viking biology experiments
p0371 A82-43221
Planetary atmospheres and the search for life
[IAF PAPER 82-260] p0378 A82-44708
Application of ATP assay technique, developed to detect extraterrestrial life, for rapid detection of human infections --- adenosine triphosphate
p0415 A82-47277
Life in the Universe
[NASA-CP-2156] p0220 N82-20884
Literature review of human microbes' interaction with plants
[NASA-CR-166330] p0250 N82-23983
Cooperative effort suggested for research on extraterrestrial life
p0402 N82-32284
**EXTRATERRESTRIAL MATTER**
On the place of organic life in the universe and the possibility of extraterrestrial life
p0020 A82-13825
**EXTRATERRESTRIAL RADIATION**
NT EXTRATERRESTRIAL RADIO WAVES
NT SOLAR RADIATION

Radiation - Risk and protection in manned space flight
p0059 A82-16948

EXTRATERRESTRIAL RADIO WAVES
Project OASIS: The design of a signal detector for the search for extraterrestrial intelligence [NASA-TM-84738]
p0250 N82-23987

EXTRAVEHICULAR ACTIVITY
The assembly of large structures in space - An evaluation of hardware configurations and assembly techniques through neutral buoyancy simulation
p0141 A82-22918
The modeling of operator activity in referenceless space
p0156 A82-23306
Absorbent product and articles made therefrom [NASA-CASE-MSC-18223-2]
p0294 N82-26960
Study of EVA operations associated with satellite services [NASA-CR-167614]
p0302 N82-27986
Twenty years of manned space flight from the viewpoint of space medicine
p0362 N82-30276

EXTRAVEHICULAR MOBILITY UNITS
NT ASTRONAUT LOCOMOTION
The design of extravehicular propulsion units
p0051 A82-16716
Information model of the dynamics of autonomous extravehicular activity
p0051 A82-16718
Simulation of manual autonomous control of an extravehicular propulsion unit /EPU/
p0051 A82-16719
Study of EVA operations associated with satellite services [NASA-CR-167614]
p0302 N82-27986

EYE (ANATOMY)
NT CHOROID MEMBRANES
NT CORNEA
NT NYSTAGMUS
NT OCULOMOTOR NERVES
NT RETINA
Effects of visual display units on the eyes - A bibliography /1972-1980/
p0017 A82-12873
Veiling glare reduction methods compared for ophthalmic applications
p0019 A82-13289
Eye-muscle geometry and compensatory eye movements in lateral-eyed and frontal-eyed animals
p0063 A82-17429
A transsynaptic autoradiographic study of the pathways controlling the extraocular eye muscles, using /I-124/B-IIb Tetanus toxin fragment
p0065 A82-17441
Organization of the avian accessory optic system
p0065 A82-17445
The pharmacology of ocular hemodynamics /Review/
p0151 A82-23252
Photodamage to the rhodopsin molecule - SH-group oxidation
p0153 A82-23275
Eye modelling
p0254 A82-32525
Model of the accommodative mechanism in the human eye
p0318 A82-39432
The age-related changes of biochemical and biomechanical parameters of human sclera in normal and myopic individuals
p0410 A82-46713
The effect of acute brain hypoxia on the permeability of the blood-opthalmic barrier
p0414 A82-46896
Side effects of cardiovascular drugs on the eye
p0414 A82-46898
Clinical ophthalmic ultrasound improvements [NASA-CR-170432]
p0424 N82-32972

EYE DISEASES
NT ASTIGMATISM
NT CATARACTS
NT HYPEROPIA
Peripheral chorioretinal lesions and aeronautical flight personnel Consequences for fitness
p0008 A82-12315
The organ of vision and medicines used in treating psychological disorders /Survey/
p0240 A82-31525
Effects of high-frequency ultrasound on adaptive changes in cell resistance
p0242 A82-31546
Comparative analysis of the biological effects of electromagnetic radiation. II - Eye damage. Cataractogenesis
p0371 A82-43222
Therapeutic-prophylactic measures in regard to eye diseases among flight personnel
p0409 A82-46697
Ultrasonic scanning in the diagnosis of retinoblastomas
p0410 A82-46710
The significance of the changes in the chorioretinal structures for the mechanism of the therapeutic action of the argon laser /experimental study/
p0410 A82-46712
Clinical aspects of the effects of an alternating magnetic field on post-operation complications --- in eye
p0414 A82-46897
Detection of amblyopia utilizing generated retinal reflexes [NASA-CR-161944]
p0127 N82-16732

EYE EXAMINATIONS
NT ELECTRONYSTAGMOGRAPHY
Familial intermittent diplopia - A report of two cases
p0284 A82-35916

EYE MOVEMENTS
NT ELECTRONYSTAGMOGRAPHY
NT NYSTAGMUS
NT SACCADIC EYE MOVEMENTS
Eye movement measurement of readability of CRT displays
p0017 A82-12869
Eye-muscle geometry and compensatory eye movements in lateral-eyed and frontal-eyed animals
p0063 A82-17429
Physiological mechanisms of the nystagmus produced by rotations about an earth-horizontal axis
p0213 A82-17431
Effects of gravity on rotatory nystagmus in monkeys
p0213 A82-17432
Dynamic characteristics of the otolithic oculomotor system
p0064 A82-17433
Binocular counterrolling in humans with unilateral labyrinthectomy and in normal controls
p0064 A82-17434
Ocular torsion on earth and in weightlessness
p0064 A82-17435
The ascending tract of Deiters' and horizontal gaze --- maintenance during head movement via neurons
p0064 A82-17437
Reticulovestibular organization participating in generation of horizontal fast eye movement
p0065 A82-17439
Horizontal eye movement signals in second-order vestibular nuclei neurons in the cat
p0065 A82-17440
Some thoughts about the three neurons in the vestibular ocular reflex
p0065 A82-17442
Visual-vestibular interaction in vestibular neurons - Functional pathway organization
p0066 A82-17446
Neural activity in the nucleus reticularis tegmenti pontis in the monkey related to eye movements and visual stimulation
p0066 A82-17447
Circularvection - Psychophysics and single-unit recordings in the monkey --- vestibular effects of rotation
p0066 A82-17449
Sigma-movement and Sigma-nystagmus - A new tool to investigate the gaze-pursuit system and visual-movement perception in man and monkey
p0066 A82-17450
Velocity storage, nystagmus, and visual-vestibular interactions in humans
p0067 A82-17460
The role of the dentate nucleus and y-group in the generation of vertical smooth eye movements
p0068 A82-17462
The brain-stem projection to the cerebellar flocculus relevant to optokinetic responses in cats

p0068 A82-17463
Visual mossy fiber inputs to the flocculus of the monkey
p0068 A82-17464
Input-output activity of the primate flocculus during visual-vestibular interaction
p0068 A82-17466
Directional plasticity of the vestibulo-ocular reflex in the cat
p0068 A82-17467
The 'Error' signals subserving adaptive gain control in the primate vestibulo-ocular reflex
p0068 A82-17468
Active head rotations and eye-head coordination
p0068 A82-17469
Disturbances of eye-head coordination during lateral gaze in labyrinthine disease
p0069 A82-17471
Nystagmus, gaze shift, and self-motion perception during sinusoidal head and neck rotation
p0069 A82-17473
A hypothetical explanation for periodic alternating nystagmus - Instability in the optokinetic-vestibular system
p0069 A82-17474
Effect of frontal-eye-field lesion on eye-head coordination in squirrel monkeys
p0069 A82-17475
Acoustic-induced eye movements
p0069 A82-17476
Ocular torsion in the cat after lesions of the interstitial nucleus of Cajal
p0070 A82-17484
The effect of prolonged practice of pursuit eye movement
p0157 A82-24030
Bioengineering approach to the study of the oculomotor apparatus of the human visual analyzer
p0196 A82-26798
Oculoparalytic illusion - Visual-field dependent spatial mislocalizations by humans partially paralyzed with curare
p0208 A82-28250
Electrical stimulation of the exterior geniculate body induces eye movements
p0229 A82-29848
Adaptation in motion perception - Alteration of motion evoked by ocular pursuit
p0237 A82-31412
Simulation of two forms of eye motion and its possible implication for the automatic recognition of three-dimensional objects
p0277 A82-34965
Human visual orientation --- Book
p0277 A82-35272
Measurement of eye movement with a ferromagnetic contact ring
p0281 A82-35810
A procedure for the analysis of nystagmus and other eye movements
p0284 A82-35911
Statistical techniques for instrument panel arrangement
p0287 A82-36959
A method for semi-automatic analysis of eye movements
p0288 A82-36960
Eye movement measurement in the assessment and training of visual performance
p0288 A82-36962
Current problems concerning the vestibulo-ocular interaction
p0317 A82-39416
Retinal location and visual localization during pursuit eye movement
p0318 A82-39436
An analysis and modeling of the binocular system in human sagittal vision --- French thesis
p0366 A82-42090
A new eye movement recording system for vestibular research
[IAF PAPER 82-173] p0418 A82-46973
Dynamic measurement of human vertical fusional response
p0039 N82-13660
Method of recording rotatory eye reflexes
p0126 N82-16727
Optokinetic factors and development of seasickness symptoms
p0215 N82-20851
Purkinje image eyetracking: A market survey
[NASA-CR-166330] p0272 N82-25779
Eye movements and visual information processing
[AD-A112399] p0300 N82-27967
A procedure for the analysis of nystagmus and other eye movements
[AD-A112603] p0352 N82-28987
A software package for evaluating the transmissibility between vehicle vibration and motions of hands (in controls), limb, head and eyes
p0380 N82-30853
Effect of optokinetic stimulation on operator's functional state and professional work capacity
p0394 N82-31896
Clinical ophthalmic ultrasound improvements
[NASA-CR-170432] p0424 N82-32972

EYE PROTECTION
Holographic laser eye protection
p0024 A82-14971
Holographic laser visor mock-up
[AD-A112422] p0303 N82-27990
Cold weather goggles. 2: Performance evaluation
[AD-A114067] p0355 N82-29008

F

F-16 AIRCRAFT
Design, simulation and evaluation of advanced display concepts for the F-16 control configured vehicle
p0440 N82-34062

F-111 AIRCRAFT
Mechanism of vertebral fracture in the F/FB-111 ejection experience
p0252 A82-32004

FAD (PROGRAMMING LANGUAGE)
U FORTRAN

FABRICATION
NT SPACE MANUFACTURING
Fabrication of cardiovascular devices
[PB82-120148] p0210 N82-20869

FABRICS
Use of mathematical modeling for the determination of allowable quantities of chemical fibers in clothing
p0191 A82-25818
The bactericidal activity of various clothing fabrics and dressing materials
p0206 A82-27801
A method for the determination of the antimicrobial activity of clothing fabrics
p0206 A82-27803
An autoradiographic and electron-microscope experimental study of the effect on wound healing of various Soviet dressings
p0263 A82-34688
Heat resistant protective hand covering
[NASA-CASE-MSC-20261-2] p0426 N82-32986

FABRY-PEROT LASERS
U LASERS

FACE (ANATOMY)
NT NOSE (ANATOMY)
Vestibular responses of neurons in the feline anterior suprasylvian gyrus and their interaction with responses to acoustic and facial stimuli
p0092 A82-20309
The existence of an endogenous biorhythm in chromatin-positive cells of the buccal epithelium in women
p0116 A82-21783
Electroacupuncture in the complex treatment of trifacial neuralgia
p0203 A82-27775
Foreign body extraction from the left pterygopalatine fossa under fluoroscope control
p0242 A82-31539
Respiratory movements of the facial muscles and respiratory resistance
p0322 A82-40456
Evaluation of chemical protective facelets and comparison of four prototpyes
[ISP-1980-15] p0084 N82-15784
The etiology of facial pain as related to masticatory muscles
p0180 N82-19828

**FACTOR ANALYSIS**
Factor calculation of the test variables in use by the legal medicine institutes of the Italian Air Force
p0167 A82-24847
Dimensionality of measured achievement over time
[AD-A110955] p0249 N82-23981
The formation of homogeneous item sets when guessing is a factor in item responses
[AD-A107134] p0298 N82-26986
Changes in psychometric coefficients and factor structure due to practicing performance tests
[ESA-TT-686] p0426 N82-32983
**FACTORIAL DESIGN**
Screening designs used to estimate the relative effects of display factors on dial reading
p0289 A82-37183
**FACTORIES**
U INDUSTRIAL PLANTS
**FAILURE**
NT SYSTEM FAILURES
**FAILURE ANALYSIS**
Computer simulations for fault diagnosis training - From simulation to live system performance
p0140 A82-22911
Analysis and classification of human errors in troubleshooting live aircraft power plants
p0277 A82-34970
**FAINTING**
U SYNCOPE
**FAIRCHILD MILITARY AIRCRAFT**
U MILITARY AIRCRAFT
**FALLOUT**
Aircrew ionizing doses from radioactive dust cloud generated by nuclear burst
[AD-A115541] p0390 N82-30929
**FAR ULTRAVIOLET RADIATION**
Far UV photolysis of methane-water gaseous mixtures and the prebiotic synthesis of aldehydes
p0099 A82-20913
**FARM CROPS**
NT LEGUMINOUS PLANTS
Solar bacterial biomass farm for space vehicles
p0261 A82-33895
Conference on plant virology
p0082 N82-15767
**FASTENERS**
NT ZIPPERS
**FATIGUE (BIOLOGY)**
NT AUDITORY FATIGUE

NT MUSCULAR FATIGUE
Visual fatigue and cathode ray tube display terminals
p0017 A82-12870
Effect of exhaustive exercise on myocardial performance
p0018 A82-13228
Certain features of cerebral hemodynamics in doing mental work at different air temperatures
p0114 A82-21759
Functional state of the hippocampal-reticular complex under submaximal physical load and fatigue
p0116 A82-21786
Indicators of the T system of immunity during physical overstraining
p0154 A82-23281
The use of correlation analysis for the detection of signs of changes in the physiological condition of workers exposed to vibration
p0160 A82-24509
Psychophysiological characteristics of the fatigue state based on activation indicators
p0162 A82-24529
Effects of emotional stress in bus drivers
p0191 A82-25819
Variation of the biomechanical characteristics of an 800-m run under the influence of fatigue
p0279 A82-35671
Fatigue and the adaptive possibilities of the organism during work
p0282 A82-35835
Ways to increase the work capacity of persons subjected to prolonged sensory overloads
p0409 A82-46696
Fatigue in Flight Inspection Field Office (FIFO) flight crews
[AD-A106791] p0127 N82-16733
**FATS**
NT CHOLINE
Superficial shell insulation in resting and exercising men in cold water
p0265 A82-36034
**FATTY ACIDS**
NT ACETYLSALICYLIC ACID
NT CARBOXYLIC ACIDS
Nonesterified fatty acid metabolism during exercise in humans
p0117 A82-21809
The fatty acid composition of blood serum from intact rats and rats adapted to hypoxia under the conditions of acute hypoxia
p0161 A82-24523
Carbon isotopic fractionation in the biosynthesis of bacterial fatty acids - Ozonolysis of unsaturated fatty acids as a means of determining the intramolecular distribution of carbon isotopes
p0171 A82-25372
Protective effects of unsaturated fatty acids in adrenaline pulmonary edema and hypobaric hypoxia /The biological significance of catecholamine hyperlipidemia/
p0204 A82-27786
Effect of dietary fat on pulmonary enzymes and toxicity during normobaric hyperoxia
p0283 A82-35902
The influence of prostaglandins and polyunsaturated fatty acids on the corticosteroid metabolism of normal and spontaneously hypertensive rats
p0366 A82-42174
Effect of dosed physical loading on plasma and liver lipids and lipoproteins in rats
p0370 A82-43045
A model for essential hypertension: Metabolic studies
p0137 N82-17867
**FAULT TOLERANCE**
Design and evaluation of an onboard computer-based information system for aircraft
p0376 A82-44512
**FEAR**
NT FEAR OF FLYING
**FEAR OF FLYING**
A study of self-initiated elimination from the flight training. I - Reasons for self-initiated elimination
p0025 A82-15520
**FEASIBILITY ANALYSIS**
Evaluation of synthesized voice approach callouts /SYNCALL/
p0289 A82-36967
An examination of the feasibility of administering prophylactic pyridostigmine by the percutaneous route
[NBL-TN-449] p0221 N82-21878
An analytic framework for allocating R and D resources at GRI
[PB82-168428] p0386 N82-30898
Development of nitrogen sensor for determination of PN(2) in body tissues
[AD-A116607] p0431 N82-34005
Biodynamic data bank feasibility study
[AD-A117921] p0434 N82-34020

**FEEDBACK**
NT SENSORY FEEDBACK
Effects of task feedback and stringency of external pacing on mental load and work performance
p0071 A82-18325
Technique for the self-stimulation of subcortical structures in immobilized rats based on biofeedback
p0155 A82-23290
The production of specified electrocortical activity as a measurable task
[AD-A111422] p0294 N82-26965
**FEEDBACK CONTROL**
The use of a psychophysiological feedback system for purposes of activity optimization
p0050 A82-16706

Robot with sense of touch p0061 A82-17133
Control system analysis and synthesis for a six degree-of-freedom universal Force-Reflecting Hand Controller p0185 A82-25632
Corrective saccades - Effect of shifting the saccade goal p0185 A82-25647
Identification of the human operator in a closed-loop system p0195 A82-26611
Electromyographic pattern of muscular activity during pushing-off and methods for its directed correction in young ski-jumpers on a trampoline p0203 A82-27776
Discrete models of a human operator /Survey of foreign research/ p0238 A82-31501
Reducing motion sickness - A comparison of autogenic-feedback training and an alternative cognitive task p0252 A82-32005
Comparison of closed loop model with flight test results p0043 N82-13691
Functional structure and dynamics of the human nervous system p0043 N82-13692
On the use of the OCM's quadratic objective function as a pilot rating metric p0043 N82-13693
Information and display requirements for aircraft terrain following p0044 N82-13695
The role of manipulator characteristics in selecting the ideal effective vehicle p0045 N82-13704
Computer aided manual tracking p0045 N82-13705
Experimental results with a six-degree-of-freedom force-reflecting hand controller p0045 N82-13707
Control of a direct-drive arm [AD-A114969] p0362 N82-29903

**FEEDFORWARD CONTROL**
Identification of the adaptive feedback of the human motor system using the response difference method p0033 N82-12754
Evaluation of a trajectory command concept for manual control of carrier approaches and landings p0440 N82-34060

**FEELINGS**
U SENSORY FEEDBACK

**FEET (ANATOMY)**
Vibration and comfort. III - Translational vibration of the feet and back. IV - Application of experimental results p0374 A82-43674
The elasticity of the foot during the modelling of human movement p0420 A82-40211

**FEMALES**
The physiological response of anthropometrically selected female military personnel to the test parachuting environment p0023 A82-14957
Comparative study of several physiological parameters in the evaluation of functional condition in nurses p0119 A82-21826
Regulation of blood supply in the extremities during exercise in women p0158 A82-24479
Working conditions and health of female workers in the sawmill sections of the wood-working industry p0160 A82-24508
Acclimatization to dry heat - Active men vs. active women p0229 A82-29553
Women at altitude - Cardiovascular responses to hypoxia p0252 A82-32009
Morphometrical investigations on the reproductive activity of the ovaries in rats subjected to immobilization and to motion activity [NASA-TM-76831] p0220 N82-21867
Inhalation studies with halothane in female rats. Part A: Toxicological data p0266 N82-24817
Inhalation study with halothane in female rats. Part B: Immunological data p0266 N82-24818
Anatomic perspective of the female athlete: An approach to musculoskeletal profiling of women in sports [AD-A110630] p0298 N82-26992
Twenty years of manned space flight from the viewpoint of space medicine p0362 N82-30276

**FEMUR**
Response of the cat femoral artery to increased circulation rate p0188 A82-25712

**FERMIONS**
NT NEUTRONS
NT PROTONS

**FERROMAGNETIC MATERIALS**
Measurement of eye movement with a ferromagnetic contact ring p0281 A82-35810

**FERTILIZERS**
Reference book for the Nitrogen Industry Worker, volume 2 --- producing nitric acid and fertilizers [AD-A113749] p0303 N82-27991

NT CARBON FIBER REINFORCED PLASTICS

**FIBER OPTICS**
Optical fiber multiple sensor for gripping complex objects p0402 N82-32298

**FIBER REINFORCED COMPOSITES**
Carbon fibre reinforced epoxy prepregs and composites - Health risk aspects p0165 A82-24823

**FIBERS**
NT CARBON FIBERS
NT COTTON FIBERS
NT HAIR
NT SYNTHETIC FIBERS
Localization of adeninnucleotides in striated fibers of skeletal muscles p0200 A82-27733
Intracellular local changes in resistance in muscle fibers as a function of membrane potential p0200 A82-27736

**FIBRILLATION**
The role of membrane structures in the formation of the myofibrillar system in myogenesis p0200 A82-27743

**FIBRIN**
Fibrinopeptide A after strenuous physical exercise at high altitude p0293 A82-37926
Studies on structure and function relationship in fibrinogen p0135 N82-17859

**FIBRINOGEN**
The role of urokinase in the regulation of the fibrinolytic activity of blood under normal conditions p0117 A82-21799
Features of microcirculatory hemostasis and of the clotting and fibrinolytic properties of blood and the activity of the antioxidant system in people of various ABO blood groups p0307 A82-38168
Blood fibrinogen as related to immersion in water for seven days and short-term space flight p0133 N82-17836
Studies on structure and function relationship in fibrinogen p0135 N82-17859

**FIBROBLASTS**
NT COLLAGENS
Dynamics of the condition of granulation tissue after injuries sustained at different times of the day p0114 A82-21763
Study of the initial stage of fibroblast attachment by means of reflective interference microscopy p0200 A82-27739
Diffusion model of the dynamics of initial fibroblast attachment p0200 A82-27740

Investigation by means of a fluorescent probe of changes in cellular membranes of fibroblasts of the Chinese hamster under laser and X-ray irradiation
p0278 A82-35660
Radiation physics, biophysics and radiation biology
[DE81-025259] p0009 N82-10704
Chemical and molecular biological aspects alkylhydrazine-induced carcinogenesis in human cells in vitro
[AD-A109088] p0181 N82-19833
FIBROSIS
Morphology of experimental pneumocosiosis arising from the effects of lunar soil
p0055 A82-16824
FIBROUS MATERIALS
U FIBERS
FIELD EMISSION
Field-ion-microscope observations of radiation effects
[DE81-030934] p0076 N82-14802
FIELD OF VIEW
Some effects of Field Of View (FOV) and target size on lateral tracking at hover
p0041 N82-13672
Conceptual ergonomics: Early detection of field of vision restrictions by means of ergoscopy --- photography of scale models through endoscopes
[DRIC-T-6253] p0225 N82-21899
FIELD STRENGTH
NT ELECTRIC FIELD STRENGTH
NT MAGNETIC FLUX
Mechanism of biological effects of magnetic fields
p0387 N82-30903
FIGHTER AIRCRAFT
NT ALPHA JET AIRCRAFT
NT F-16 AIRCRAFT
NT F-111 AIRCRAFT
Kevlar aramid composites in life-saving equipment --- helmets for fighter aircraft crews
p0008 A82-12648
Findings from a study of tactical symbology for fighter aircraft displays
p0139 A82-22903
Canopy induced displacement evaluation --- visual displacement of targets for fighter aircraft
p0145 A82-22958
Operational performance measures for air combat - Development and application
p0145 A82-22959
Aerial combat simulation in the U.S. Air Force
p0369 A82-42794
The cervical column of pilots of combat aircraft
p0361 N82-29888
Structures of memory for critical flight information
[AD-A116510] p0435 N82-34028
FILAMENTS
F-actin is a helix with a random variable twist
p0318 A82-38694
FILTRATION
NT SPATIAL FILTERING
FINGERS
The economy of muscular work during unfused tetanus
p0109 A82-21701
The dynamics of muscular relaxation following unfused tetanuses of different durations
p0109 A82-21707
Finger temperature after a finger-cooling test - Influence of air temperature and smoking
p0256 A82-32833
FINITE DIFFERENCE THEORY
A heat transfer analysis of scald injury
[PB81-238503] p0083 N82-15777
Impact of an asteroid or comet in the ocean and extinction of terrestrial life
[NASA-CR-169086] p0293 N82-26955
FINITE ELEMENT METHOD
Finite element analysis of the visco-elastic interaction of the annulus fibrosis and nucleus pulposis within the human intervertegral joint
[AD-A111161] p0300 N82-27971
FIRE CONTROL
Application of preference tree methodology to choice behavior in a AAA supervisory control task --- Anti-Aircraft Artillery
p0144 A82-22944
FIRE PREVENTION
Oxygen toxication
p0080 N82-15751
FIRE RETARDANTS
U FLAME RETARDANTS
FIREWORKS
U PYROTECHNICS
FIRST AID
First aid for thorax traumas: Thorax drainage through suction - Report on 25 cases
p0087 A82-19016
Diagnosis and organization of the therapy of patients with disorders of blood circulation in the brain
p0310 A82-38554
Medical emergencies on board an airliner - Procedures when a doctor is on board
p0315 A82-38844
Medical emergencies on board airliners - Procedures in the absence of a doctor
p0315 A82-38845
Shuttle orbital medical system
p0077 N82-15718
Anesthesia, surgery and resuscitation during manned spaceflights
p0393 N82-31894
FITNESS
NT FLIGHT FITNESS
NT PHYSICAL FITNESS
Evaluation of crew health
p0077 N82-15712
Catecholamine levels in fit and nonfit males when exposed to an emotional stress
p0178 N82-19813
FITTING
The wearing of hydrophilic contact lenses aboard a commercial jet aircraft. I - Humidity effects on fit
p0193 A82-26234
FIXED-WING AIRCRAFT
U AIRCRAFT CONFIGURATIONS
FLAME INTERACTION
U CHEMICAL REACTIONS
FLAME RETARDANTS
Evaluation of materials proposed for use in space flight
[NASA-CR-167537] p0178 N82-19815
FLAP CONTROL
U AIRCRAFT CONTROL
FLASH LAMPS
The nature of induced EEG activity in the alpha-rhythm range
p0028 A82-15713
FLASH TUBES
U FLASH LAMPS
FLAW DETECTION
U NONDESTRUCTIVE TESTS
FLEXING
Pressure suit joint analyzer
[NASA-CASE-ARC-11314-1] p0298 N82-26987
FLEXURE
U FLEXING
FLICKER
Comparison of flicker-photometric and flicker-threshold spectral sensitivities while the eye is adapted to colored backgrounds
p0208 A82-28123
FLICKER FUSION FREQUENCY
U CRITICAL FLICKER FUSION
FLIGHT
Functional characteristics of receptors connected with sustaining the flight of the roach Periplaneta Americana L
p0110 A82-21716
FLIGHT CHARACTERISTICS
Further tests of a model-based scheme for predicting pilot opinion ratings for large commercial transports
p0043 N82-13687
Comparison of closed loop model with flight test results
p0043 N82-13691
Pilot opinions of sampling effects in lateral-directional control
p0439 N82-34053
FLIGHT CLOTHING
Thermal test of flying helmet for two different types of impact protection devices - Nylon sling and polystyrene liner
p0025 A82-15519
Ways and means of maintaining heat balance in pilots and cosmonauts

p0123 N82-16706
Scatter diagrams based on the anthropometric survey of 2000 Royal Airforce aircrew (1970/1971) [RAE-TR-81017] p0175 N82-18857
Evaluation of materials proposed for use in space flight [NASA-CR-167537] p0178 N82-19815
Absorbent product and articles made therefrom [NASA-CASE-MSC-18223-2] p0294 N82-26960
Development of the helicopter crewman jacket [AD-A115635] p0427 N82-32992

A computer aided workstation assesor for crew operations - WOSTAS
[AD-A116045] p0443 N82-34079

**FLIGHT FATIGUE**

Effect of the Circutone seat on hemodynamic, subjective and thermal responses during prolonged sitting
p0147 A82-22969

Current questions in the problem of flight crew fatigue
p0170 A82-25188

Cardiorespiratory assessment of 24-hour crash-diet effects on altitude, +Gz, and fatigue tolerances
p0192 A82-26228

G stress on A-10 pilots during JAWS II exercises
p0210 A82-28479

Psychosomatic self-regulation - An effective method for sustaining pilot work capacity during a prolonged flight
p0259 A82-33727

Causes of fatigue among crews of civil aviation helicopters
p0124 N82-16708

Physiological and hygienic evaluation of vibration in the cockpit of a cargo helicopter
p0124 N82-16709

DOT/FAA Human Factors Workshop on Aviation. Transcript, volume 2
[AD-A107803] p0138 N82-17877

Some features of evaluation of work capacity and fatigue in helicopter pilots
p0215 N82-20847

Effects of prior physical exertion on tolerance to hypoxia, orthostatic stress, and physical fatigue
[AD-A114741] p0432 N82-34009

**FLIGHT FITNESS**

Aphakia in the flier - Its consequences and correction
p0008 A82-12316

A study of treadmill exercise protocols for Chinese males
p0107 A82-21677

Cybernetic analysis of cardiac rhythm during a graded exercise test in Salyut-6 crew members
p0153 A82-23273

New ideas on the psychological selection of aircraft pilots
p0166 A82-24840

The extraction and identification of drugs in aviation toxicology
p0210 A82-28478

Airline pilot disability - Economic impact of an airline preventive medicine program
p0211 A82-28489

Etiological aspects of in-flight discomforts
p0232 A82-29985

Diabetes mellitus and the examination of flight personnel
p0232 A82-29990

Diabetes and flight personnel - Ophthalmologic aspects
p0232 A82-29991

Sarcoidosis and aeronautical aptitude
p0232 A82-29992

Idiopathic spontaneous pneumothorax and the examination of flight personnel
p0233 A82-29995

Sickle cell anemia and aviation
p0233 A82-29996

Standards of physical condition for private pilots of aircraft and gliders
p0315 A82-38847

Aging and visual function of military pilots - A review
p0320 A82-40435

The use of echocardiography for the evaluation of flight fitness of pilots with cardio-vascular anomalies in reference to four cases
p0407 A82-46309

Statistical tools for determining fitness to fly
[AD-A108559] p0175 N82-18860

Principal electrocardiographic anomalies in the evaluation of pilots
p0398 N82-31931

Ventricular preexcitation syndromes
p0398 N82-31932

The contribution of standard radiography in cardiovascular exploration during the examination of pilots
p0399 N82-31935

The contribution of cardiac mechanograms in the evaluation of pilots
p0399 N82-31936

Echocardiography in the examination of pilots
p0399 N82-31937

Examining arterial function by Doppler velocimetry: The advantage in aerospace medicine
p0399 N82-31938

**FLIGHT HAZARDS**

Effects of long-term exposure to low levels of ozone - A review
p0107 A82-21676

An investigation into pilot and system response to critical in-flight events. Volume 1: Executive summary
[NASA-CR-164993] p0036 N82-12782

An investigation into pilot and system response to critical in-flight events. Volume 2: Appendix
[NASA-CR-164994] p0036 N82-12783

Harmfulness of violent impact and airflow shocks
p0079 N82-15742

Caisson disease
p0080 N82-15749

**FLIGHT INSTRUMENTS**

NT GYRO HORIZONS

**FLIGHT OPERATIONS**

NT CREW PROCEDURES (INFLIGHT)

The measurement of aircrew task loading during operational flights
p0141 A82-22922

Development and inflight testing of a multi-media course for instructing navigation for night nap-of-the-earth flight
p0146 A82-22961

Tennis elbow in aviators
p0194 A82-26243

The airline pilot's view of flight deck workload: A preliminary study using a questionnaire
[RAE-TM-FS(B)-465] p0400 N82-31945

**FLIGHT OPTIMIZATION**

Mode of flight and a mathematical model of pilot activity relating to flight-vehicle control
p0198 A82-27513

**FLIGHT PATHS**

NT GLIDE PATHS

Evaluation of the visual acquisition range of enroute air traffic from cockpit observations --- collision avoidance
[ESA-TT-691] p0175 N82-18861

**FLIGHT PERFORMANCE**

U FLIGHT CHARACTERISTICS

**FLIGHT PLANS**

A study of decision-making behavior of aircraft pilots deviating from a planned flight
p0406 A82-46262

**FLIGHT RULES**

NT INSTRUMENT FLIGHT RULES

**FLIGHT SAFETY**

Kevlar aramid composites in life-saving equipment --- helmets for fighter aircraft crews
p0008 A82-12648

Psychophysiological safety control in long-duration space flights
p0052 A82-16726

Flight simulation - The military need
p0095 A82-20529

Pilot judgment - Training and evaluation
p0196 A82-26777

A longitudinal analysis of TH Index and identification of period of acute heat stress
p0253 A82-32290

Human factor and flight safety
p0339 A82-40885

Human factors and aviation safety - A program of research on human factors in aviation
p0405 A82-46253

Aviation medical guarantees
p0082 N82-15761

Space navigation medical guarantees and medical supervision
p0082 N82-15762

Evaluation of the visual acquisition range of enroute air traffic from cockpit observations --- collision avoidance
[ESA-TT-691] p0175 N82-18861

**FLIGHT SIMULATION**

Evaluation of imbedded radio communications activities as secondary tasks for objective assessment of aircrew workload in simulators, trainers, and actual systems
p0023 A82-14839

Advanced aviation concepts evaluation through computer driven simulation --- human factors consideration in flight training simulator design
p0088 A82-19258

Flight simulation in the current Australian airline scene
p0095 A82-20534

Visual technology and the future --- for flight simulators
p0095 A82-20538

Acceleration induced voltage variations in the electrocardiogram during exhaustive simulated aerial combat maneuvering
p0108 A82-21683

Flight simulator runway visual textural cues for landing
p0142 A82-22926

Flight parameters and observer performance in RPV target acquisition
p0145 A82-22956

Cognitive styles and the acquisition of a complex aerial maneuver
p0146 A82-22962

Orientation perception during aircraft coordinated turns
[AIAA PAPER 82-0258] p0198 A82-27096

Post-acceleration chaotic atrial rhythm
p0211 A82-28488

Fuselage lights as a cause factor of vertigo in night formation flight - Perceiving pattern of fuselage light
p0227 A82-28925

The role of information feedback in aircrew training and its impact on the debriefing facilities
p0227 A82-29257

Studies on the interaction of pemoline and centrophenoxine with some flight factors
p0287 A82-36688

In-trail following during profile descents with a cockpit display of traffic information
p0405 A82-46260

A study of decision-making behavior of aircraft pilots deviating from a planned flight
p0406 A82-46262

An investigation into pilot and system response to critical in-flight events. Volume 1: Executive summary
[NASA-CR-164993] p0036 N82-12782

An investigation into pilot and system response to critical in-flight events. Volume 2: Appendix
[NASA-CR-164994] p0036 N82-12783

Effects of whole-body motion simulation on flight skill development
[AD-A111115] p0297 N82-26984

Optical flow and texture variables useful in simulating self motion
[AD-A117016] p0443 N82-34081

**FLIGHT SIMULATORS**

NT COCKPIT SIMULATORS

Automated item recognition as a secondary task for objective assessment of aircrew workload in flight simulators
p0023 A82-14837

Development of a secondary task method for measuring operator workload. V - Measurement of pilot workload during take off and landing by C-1 jet carrier
p0025 A82-15516

Human orientation in space
[AIAA PAPER 82-0422] p0071 A82-17940

Flight simulation - The military need
p0095 A82-20529

Flight simulation in the current Australian airline scene
p0095 A82-20534

The semi-automatic instructional system --- of B-52 weapon system trainers
p0095 A82-20539

A program for assessing pilot mental state in flight simulators
[AIAA PAPER 82-0257] p0121 A82-22078

Task analytic approach to human performance battery development
p0143 A82-22937

Old and new directions in the engineering psychology of artificial horizons and their effects on the mental hygiene of the student pilot
p0166 A82-24842

An evaluation of the Nimrod Maritime Crew Trainer - A case study
p0227 A82-29255

An evaluation of some experimental data on the cost effectiveness of flight simulators
p0227 A82-29256

Aerial combat simulation in the U.S. Air Force
p0369 A82-42794

Simulation technology and the fixation phase --- skill acquisition during pilot training
p0407 A82-46274

Measures of effectiveness in evaluating a prototype general aviation in-flight simulator
p0407 A82-46278

Conducting studies of transfer of learning: A practical guide
[AD-A110569] p0249 N82-23980

Visual Technology Research Simulator (VTRS) human performance research: Phase 3
[AD-A112475] p0352 N82-28988

Improved procedures training through use of aids developed from learning guidelines
[AD-A113109] p0391 N82-30939

Prediction of short term tracking tasks using an optimal pilot model
[AD-A115543] p0392 N82-30940

Assessment and development of oculomotor flying skills by the application of the channel theory of vision
[AD-A115325] p0436 N82-34035

**FLIGHT STRESS (BIOLOGY)**

NT SPACE FLIGHT STRESS

Biaxial finite deformations of arterial and venous segments under + or - G/z/ acceleration stress
p0007 A82-12036

Performance changes during exposure to +Gz stress
p0025 A82-15517

The reliability of flight personnel during the operation of the Mi-4 helicopter
p0087 A82-19014

Change in the cytochemical indicators of carbohydrate metabolism in the peripheral blood neutrophils of pilots
p0107 A82-21457

Effects of relative metabolic rate and heart rate variation on the performance of flight attendants
p0108 A82-21680

Regional distribution of cardiac output in unanesthetized baboons during +Gz stress with and without an anti-G suit
p0108 A82-21681

A program for assessing pilot mental state in flight simulators
[AIAA PAPER 82-0257] p0121 A82-22078

Effect of flight on the Eustachian tube function and the tympanic membrane system - A follow-up study
p0211 A82-28483

The medical and public health challenge of space
p0228 A82-29266

Studies on the interaction of pemoline and centrophenoxine with some flight factors
p0287 A82-36688

Physiological stresses linked to flight on airliners
p0314 A82-38842

Medical emergencies in flight - Pathogenic aspects
p0315 A82-38843

Aerobatics in light aircraft - Sensations and stresses experienced by the pilot

GALVANIC CELLS
U ELECTROLYTIC CELLS

GALVANIC SKIN RESPONSE
Investigation of the sensitivity of the vestibular apparatus to galvanic-current stimulation

p0242 A82-31541
Phase analysis of dynamics of galvanic skin responses in man
p0357 N82-29861

GAME THEORY
Establishing methods of investigating individual characteristics of making decisions in situations of conflict
p0162 A82-24520
The dependence of the strategy by which a solution is sought on the type of intellection
p0162 A82-24533

GAMMA RADIATION
U GAMMA RAYS

GAMMA RAYS
Gamma facilities for radiobiological investigations /Design and experimental results/ --- Russian book
p0022 A82-14674
The radiolysis and radioracemization of amino acids on silica surfaces
p0090 A82-20019
Absence of the additive effect in the combined irradiation of Crepis capillaris seeds and seedlings by gamma rays and neutrons
p0111 A82-21723
Potentiation of the protective effect of sulfur-containing radioprotectors --- against gamma rays
p0186 A82-25683
Mathematical modeling and analysis of death dynamics in irradiated mouse populations
p0206 A82-27809
The survival of dogs irradiated with lethal doses of gamma radiation under conditions of chemical radioprotection and subsequent therapy
p0234 A82-30033
The induction of reversions to prototrophy in Escherichia coli cells under the influence of neutrons and gamma radiation
p0404 A82-45777
The activity of ribosephosphate pyrophosphokinase in the thymus and liver of irradiated mice
p0404 A82-45779
The modification of radiation damage by dibasic sulfur-containing phenol acids
p0404 A82-45784
The nonadditive effects of neutron and gamma radiation on Ehrlich ascites tumor cells
p0411 A82-46857
The effect of gamma irradiation on the survival rate of Artemia salina /L/
p0411 A82-46861
Use of nuclear resonant scattering of Gamma rays for in vivo measurement of iron
[DE81-026051] p0014 N82-11775
Emission computed tomography: The single photon approach
[PB82-131285] p0297 N82-26980
Specificity of ultrastructural changes in rat cardiomyocytes after local gamma-irradiation and hypokinesia
[NASA-TM-76853] p0384 N82-30882

GANGLIA
NT NERVES
NT NEURONS
Biogenic monoamine concentrations in autonomic nervous system ganglia during acute experimental emotional stress
p0054 A82-16817
The impulse activity of neurons in the nodose ganglion during acute hemodynamic and respiratory disorders
p0309 A82-38546
Neurotransmitter function in the basal ganglia after acute and chronic ethanol treatment
[AD-A103744] p0030 N82-13649
Biogenic monoamine content of the ganglia in the autonomic nervous system of rabbits during acute experimental emotional stress
[NASA-TM-76900] p0383 N82-30875

GARMENTS
Zipper rear closure endurance testing
[AD-A104732] p0037 N82-12785
Thermal garment
[NASA-CASE-XMS-03694-1] p0354 N82-29002

GAS ANALYSIS
NT OZONOMETRY

GAS CHROMATOGRAPHY
The radiolysis and radioracemization of amino acids on silica surfaces
p0090 A82-20019
Analysis of volatile metabolites in biological fluids as indicators of prodromal disease condition
[NASA-CR-167513] p0175 N82-18859

GAS COMPOSITION
NT CARBON DIOXIDE CONCENTRATION
The use of oxygen as the test gas in the determination of the closing volume of respiratory ducts
p0117 A82-21801
Circadian rhythm dynamics under conditions of an altered gaseous medium and hypokinesia
p0235 A82-31151
Prostoglandins and regulation of cerebral circulation under conditions of the altered gaseous composition of the blood
p0310 A82-38561
The use of hyperoxic mixtures for the diagnosis of latent disturbances in the external respiration system
p0322 A82-40457
Domestic swine in physiological research. 3: Blood gas and acid-base values of arterial and venous blood from young anesthetized pigs maintained under steady-state ventilatory conditions
[AD-A111034] p0347 N82-28945

GAS DENSITY
Pulmonary gas exchange during altered density gas breathing
p0120 A82-21935
Respiratory and inert gas exchange during high-frequency ventilation
p0197 A82-26817

GAS DISSOCIATION
High altitude and the oxygen dissociation curve of hemoglobin Modifications in inter-heme cooperativity
p0167 A82-24844
Theoretical analysis of optimal P50 --- for maximizing oxygen unloading in hypoxia
p0230 A82-29568
Bohr effect and slope of the oxygen dissociation curve after physical training
p0285 A82-36032
Preprototype nitrogen supply subsystem development
[NASA-CR-166192] p0084 N82-15780

GAS DYNAMICS
NT AERODYNAMICS
A nonlinear model combining pulmonary mechanics and gas concentration dynamics
p0341 A82-41230

GAS EVOLUTION
Is the CH4, H2 and CO venting from submarine hydrothermal systems produced by thermophilic bacteria
p0317 A82-39422

GAS EXCHANGE
Increased hemoglobin-oxygen affinity does not decrease skeletal muscle oxygen consumption
p0006 A82-11154
Breath-by-breath measurement of true alveolar gas exchange
p0089 A82-19498
Evaluation of safety of decompression from the critical volume of gas bubbles formed in the organism
p0110 A82-21717
The effect of blood pressure in the pulmonary artery on gas exchange in functionally heterogeneous lungs
p0112 A82-21738
Pulmonary gas exchange during altered density gas breathing
p0120 A82-21935
Cardiac output increase and gas exchange at start of exercise
p0120 A82-21936
The significance of the pulmonary gas-exchange response in physical exercise testing for the evaluation of the effectiveness of mitral commissurotomy
p0190 A82-25805
Respiratory and inert gas exchange during high-frequency ventilation

p0197 A82-26817
Delayed kinetics of respitratory gas exchange in the transition from prior exercise
p0230 A82-29561
Characteristics of adjustment of lung diffusing capacity to work
p0255 A82-32827
Blood-gas CO2 equilibration in lungs of unanesthetized dogs during hypercapnia
p0256 A82-32834
A computer linear regression model to determine ventilatory anaerobic threshold
p0257 A82-32843
Parameters of ventilatory and gas exchange dynamics during exercise
p0285 A82-36031
Intrapulmonary blood flow redistribution during hypoxia increases gas exchange surface area
p0285 A82-36036
The effect of helium on gas exchange and tissue respiration
p0307 A82-38165
The use of hyperoxic mixtures for the diagnosis of latent disturbances in the external respiration system
p0322 A82-40457
Mathematical modelling of physiological functions in space flight
[IAF PAPER 82-176] p0414 A82-46974
Distinctions of regeneration of confined atmosphere by means of photosynthesis of unicellular algae
p0125 N82-16720
On-line, real-time determinations of breath-to-breath gas exchange
p0181 N82-19832
Human external respiration and gas exchange in acute period of adaptation to immersion in water
p0349 N82-28959

GAS FLOW
NT AIR FLOW
STS-2 Induced Environment Contamination Monitor (IECM): Quick-look report

GAS MIXTURES
NT AIR
NT ALVEOLAR AIR
NT EXPIRED AIR
Protective effect of a gaseous hypoxic mixture under the combined effect on the organism of radiation and physical stress
p0278 A82-35653
Formation of cyanate and carbamyl phosphate by electric discharges of model primitive gas
p0305 A82-38116
Study of the radioprotective effectiveness of an hypoxic gas mixture during combined radiation and thermal injuries to rats
p0306 A82-38159
The use of hyperoxic mixtures for the diagnosis of latent disturbances in the external respiration system
p0322 A82-40457
A respirator for training in conditions of changeable respiratory mixture
p0324 A82-40485
The increase in the endurance for static loads in irradiated rats treated with gas hypoxic mixture /GHM-10/, an anti-irradiation agent
p0404 A82-45786
A Trimix saturation dive to 660 meters: Studies of cognitive performance, mood and sleep quality
[NPS-2/82] p0397 N82-31923

GAS PRESSURE
The measurement of oxygen and carbon dioxide partial pressures in tissues by the gas depot method
p0093 A82-20318
Effect of breathing patterns on the perceived magnitude of added loads to breathing
p0197 A82-26813
Temperature effects on lung mechanics in air- and liquid-filled rabbit lungs
p0375 A82-44134
Homogeneous nucleation of gas bubbles in vivo
p0418 A82-47387
Preprototype nitrogen supply subsystem development
[NASA-CR-166379] p0427 N82-32989

GAS TRANSPORT
Oxygen transport in dogs native to high altitudes during exercise
p0110 A82-21719
Comparative study of the gas-transport characteristics of models of an extraerythrocytic oxygen carrier
p0262 A82-34680
Changes of the oxygen transport function of the blood and some metabolic values in patients with hypertension and chronic ischemic heart diseases during ergometric exercise
p0279 A82-35666
A critical value for O2 transport in the rat
p0375 A82-44141
Study of the kinetics of oxygen saturation of fluorocarbon emulsions --- blood substitutes
[ISSN-0077-5606] p0178 N82-19810

GAS-GAS INTERACTIONS
NT ASSOCIATION REACTIONS

GASEOUS CAVITATION
U GAS FLOW

GASEOUS DIFFUSION
Factors determining temporal pattern of isobaric supersaturation --- in tissue blood gas transport models of bubble production
p0006 A82-11153
Pulmonary diffusing capacity under conditions of restricted motor activity
p0061 A82-17140
Rate of uptake of carbon monoxide at different inspired concentrations in humans
p0120 A82-21930
The ventilation-perfusion relation in residents of the Arctic coast of the north-east USSR
p0236 A82-31154
Characteristics of adjustment of lung diffusing capacity to work
p0255 A82-32827

GENETIC CODE
A working hypothesis on the interdependent genesis of nucleotide bases, protein amino acids, and primitive genetic code
p0020 A82-13839
Origin of translation - The hypothesis of permanently attached adaptors --- proposed prebiotic amino acid synthesis
p0091 A82-20022
A theory of the origin of life
p0091 A82-20023
A mathematical method for the enumeration of doublet codes --- in genetic coding theory
p0103 A82-20953
Origin and evolution of the genetic code
p0103 A82-20955
The origin and evolution of the genetic code
p0103 A82-20956
Evolutionary processes of the genetic code
p0104 A82-20957
Summary of evidence for an anticodonic basis for the origin of the genetic code
p0104 A82-20958
Evolution of the terrestrial atmosphere and its fossils in biosystems
p0104 A82-20960
Emergence of flavin catalysis - An approach based on the concept of bioorganic evolution
p0104 A82-20964
Biochemical keys to the emergence of complex life
p0149 A82-22996
The effectiveness of various radio-protective agents in protecting the germ cells of male mice against the genetic effects of radiation. II - The incidence of reciprocal translocations in irradiated spermatogonia
p0186 A82-25681
A model for protocellular coordination of nucleic acid and protein syntheses
p0195 A82-26583
Amino acid codes in mitochondria as possible clues to primitive codes
p0208 A82-28227
Comparative biosequence metrics --- molecular evolution
p0208 A82-28230
The current status of REH theory --- Random Evolutionary Hits in biological molecular evolution
p0208 A82-28231
Ambiguity and the evolution of the genetic code
p0305 A82-38120
Molecular basis for the genetic code
p0339 A82-41195
Evolution of early mechanisms of translation of genetic information into polypeptides
p0341 A82-41324
Origins of the protein synthesis cycle
p0408 A82-46330
The chemical basis for the origin of the genetic code and the process of protein synthesis
[NASA-CR-168748] p0220 N82-21868

GENETIC ENGINEERING
Taxonomic relations between archaebacteria including 6 novel genera examined by cross hybridization of DNAs and 16S rRNAs
p0257 A82-33276
Repair of chemical damage in mammalian cells
[DE81-030823] p0033 N82-12757

GENETICS
NT GENETIC CODE
NT MUTATIONS
Genetic damage in Escherichia coli K12 AB2480 by broad-spectrum near-ultraviolet radiation
p0121 A82-22200
Genetic and individual differences in cardiovascular disturbances in rats during experimental emotional stress
p0153 A82-23278
Strain difference in thermoregulation of rats surviving extreme heat
p0169 A82-24920
Investigation of the effects of space flight factors on rat bone marrow cell chromosomes
p0170 A82-25321
Cell morphological, ontogenic, and genetic reactions to 0-g simulation and hyper-g
p0253 A82-32154
Similar genes for a mitochondrial ATPase subunit in the nuclear and mitochondrial genomes of Neurospora crassa
p0314 A82-38698
Sickle cell trait and aviation
p0409 A82-46539
An analysis of the role of genetic and environmental factors in predicting the effectiveness of arterial hypertension treatments
p0410 A82-46719
Biological effects of low doses of ionizing radiation: Three review papers
[AECL-7059] p0033 N82-12758
Genetic and mean bone-marrow doses from medical use of unsealed radioisotopes
[ARL/TR-023] p0034 N82-12763
Possible mechanism for chemical induction of chromosome aberrations in male meiotic and postmeiotic germ cells of mice
[DE81-031999] p0123 N82-16700
Cytologic and biochemical genetic effects of chemical carcinogens
[AD-A107615] p0136 N82-17864
Third decade of space biology
p0269 N82-25755
Natural and social determination of human psyche
p0352 N82-28983
Genetic and individual differences in cardiovascular disturbances of rats during experimental emotional stress
[NASA-TM-76911] p0385 N82-30890

Cytogenetic and gonadotoxic effects of static
electric fields
p0388 N82-30915

GENITOURINARY SYSTEM
NT BLADDER
NT OVARIES
NT TESTES
NT UTERUS
The effectiveness of using various radioprotective
agents for protecting the genital cells of male
mice from the genetic effects of radiation. I -
Investigation of the yield of dominant lethal
mutations in postspermatogonial cells
p0155 A82-23289

GEOCHEMISTRY
NT BIOGEOCHEMISTRY
Mass mortality and its environmental and
evolutionary consequences --- at end of
Cretaceous period
p0227 A82-28596
Publications of the exobiology program for 1981:
A special bibliography
[NASA-TM-84895] p0299 N82-26995

GEOCHRONOLOGY
The mass extinctions of the late Mesozoic ---
iridium abundance as geologic evidence for
celestial body impact
p0071 A82-17620

GEOLOGY
NT GEOCHRONOLOGY
NT PETROLOGY
NT TECTONICS
NT VOLCANOES
Are the 3,800-Myr-old Isua objects microfossils,
limonite-stained fluid inclusions, or neither
p0001 A82-10550

GEOMAGNETIC EFFECTS
U MAGNETIC EFFECTS

GEOMAGNETIC FIELD
U GEOMAGNETISM

GEOMAGNETISM
Effects of geomagnetic field disturbances on the
diurnal rhythm of physiological functions
p0235 A82-31152
The relation between cardiac and respiratory
rhythms as a function of the state of the
geomagnetic field
p0236 A82-31153
Mortality in acute myocardial infarction as
function of geomagnetic field activity in Yerevan
p0134 N82-17852
Effect of hypogeomagnetic field on activity of
some cerebral enzymes
p0135 N82-17853
Synchronization of cardiovascular accidents with
physical clocks
p0348 N82-28956

GEOTROPISM
Interaction of gravitic and mechanical stimuli in
tropic and nastic responses in beans
p0327 A82-40665
Initiation of nutation in sunflower hypocotyls
p0333 A82-40724
The effect of gravity on the distribution of plant
growth substances in plant tissues
p0336 A82-40746
Gravity perception and asymmetric growth in plants
- A model derived from the grass pulvinus
p0339 A82-40775
Nutation of Helianthus Annuus in a microgravity
environment
p0174 N82-18265

GERMICIDES
U BACTERICIDES

GERMINATION
The ultraviolet radiation environment of pollen
and its effect on pollen germination
p0213 N82-20829

GLACIERS
The microflora of the central Antarctica glacier
and control methods for the sterile isolation of
an ice core for microbiological analyses
p0318 A82-39430

GLANDS (ANATOMY)
NT ADRENAL GLAND
NT ENDOCRINE GLANDS
NT GONADS
NT OVARIES
NT PITUITARY GLAND
NT TESTES
NT THYMUS GLAND
NT THYROID GLAND
Innervation of skin glands of the hedgehog
/Erinaceus europaeus/ and its histochemical
changes induced by hibernation
p0170 A82-25244
The histochemistry of enzymes in specific skin
glands of the European hedgehog /Erinaceus
europeaus/ during hibernation
p0319 A82-39792
In vivo and in vitro characteristics of eccrine
sweating in petas and rhesus monkeys
p0340 A82-41214
Heat-activated sweat gland densities detected
through macrophotography in lean and obese men
exposed to a warm, humid environment
p0246 N82-22876

GLARE
Veiling glare reduction methods compared for
ophthalmic applications
p0019 A82-13289

GLAUERT COEFFICIENT
U AERODYNAMIC FORCES

GLIDE ANGLES
U GLIDE PATHS

GLIDE PATHS
Pilot estimates of glidepath and aim point during
simulated landing approaches
[NASA-TM-81325] p0035 N82-12772

GLIDE SLOPES
U GLIDE PATHS

GLIDERS
Physiological stresses in flying a sailplane
p0315 A82-38850

GLOBAL AIR POLLUTION
Effects of ultraviolet-B irradiances on soybean.
IV - Leaf ontogeny as a factor in evaluating
ultraviolet-B irradiance effects on net
photosynthesis
p0195 A82-26602

GLOBULINS
The therapeutic application of heterologous serum
globulin against the acute radiation sickness of
mice
p0186 A82-25684
An investigation of the conformational stability
of immunoglobulin G in the monolayers at the
phase boundary between aqueous solutions of NaCl
and octane
p0313 A82-38607

GLOVES
Preparation of ultraclean gloves for precision
assembly operations
p0415 A82-47075
Heat resistant protective hand covering
[NASA-CASE-MSC-20261-1] p0426 N82-32985
Heat resistant protective hand covering
[NASA-CASE-MSC-20261-2] p0426 N82-32986

GLOW DISCHARGES
Synthesis and degradation of amino acids by
contact glow discharge electrolysis, a possible
route for prebiotic formation of bio-organic
compounds
p0100 A82-20924

GLUCOSE
Glucocorticoid receptors and metabolic
disturbances in the liver and heart during
immobilization
p0002 A82-10750
Effect of muscle glycogen content on glucose
uptake following exercise
p0169 A82-24921
The prognostic value of the glucose tolerance test
p0263 A82-34690
Local cerebral glucose utilization in non-rapid
eye movement sleep
p0264 A82-34831
Effects of endogenous glucagon on glucose kinetics
in shivering dogs

Mapping the primate visual system with /2 - C-14/deoxyglucose
p0285 A82-36029

A model of the regulation of the blood glucose level during physical exercise
p0403 A82-45626

Change in blood glucose level in rats after immobilization
[NASA-TM-75997]
p0419 A82-48201

Testosterone enhances C-14 2-deoxyglucose uptake by striated muscle --- sex hormones and muscle
[NASA-CR-169101]
p0245 N82-22872

Hypo-and hyperglycemia in rats: Effects on the ability to work in the heat
[AD-A111711]
p0352 N82-28986

Insulin resistance for glucose metabolism in disused soleus muscle of mice
[NASA-CR-169353]
p0356 N82-29849

**GLUCOSIDES**

The influence of some triterpenic glycosides on C-14-alanine inclusion into the bone-marrow cells of rats
p0428 N82-33979

Condition of rats connective tissue during long-term hypokinesia and in recovery period
p0092 A82-20306

**GLUTAMATES**

Neurotransmitter mechanisms in the nucleus accumbens septi and related regions in the rat brain
[NDRE/PUBL-81/1001]
p0350 N82-28969

**GLUTATHIONE**

The effect of ionizing radiation on glutathione peroxidase activity in rat tissues
p0031 N82-12738

**GLYCERIDES**

Chylomicron triglyceride metabolism in resting and exercising fed dogs
p0404 A82-45780

**GLYCERINS**

U GLYCEROLS

**GLYCEROLS**

Lipoprotein lipase hydrolyzes endogenous triacylglycerols in muscle of exercised rats
p0229 A82-29551

**GLYCINE**

Effect of polynucleotides on the dimerization of glycine --- abiological protein synthesis in primitive earth conditions
p0230 A82-29570

Histidyl-histidine catalysis of glycine condensation in fluctuating clay environments
p0021 A82-13843

Interaction between ATP, metal ions, glycine, and several minerals
p0103 A82-20952

**GLYCOGENS**

Glycogen and nonspecific adaptation to cold
p0257 A82-33283

Change in the cytochemical indicators of carbohydrate metabolism in the peripheral blood neutrophils of pilots
p0089 A82-19494

Effect of muscle glycogen content on glucose uptake following exercise
p0107 A82-21457

Sparing effect of chronic high-altitude exposure on muscle glycogen utilization
p0169 A82-24921

The role of protein phosphorylation in neutral and hormonal control of cellular activity
p0229 A82-29556

Effects of glycogen depletion and pedaling speed on 'anaerobic threshold'
p0234 A82-30766

Effects of beta-adrenergic receptor blockade on glycogenolysis during exercise
p0286 A82-36038

Regulation of glycogenolysis in human muscle at rest and during exercise
p0374 A82-44133

The transformation of lipids into glycogen in animal and human cells
p0376 A82-44144

Metabolic changes in experimental animals as indicators of biological effects of 50 Hz electromagnetic fields
p0413 A82-46892

p0266 N82-24821

Sparing effect of chronic high-altitude exposure on muscle glycogen utilization during exercise
[AD-A111063]
p0295 N82-26969

**GLYCOLS**

The subchronic inhalation toxicity of polyethylene glycol 200 in the rat and mouse
[AD-A110668]
p0293 N82-26956

**GLYCOLYSIS**

Characteristics of the relations of the primary responses of the pentose phosphate pathway to glycolysis in the bone marrow of irradiated rats
p0111 A82-21725

The condition of certain glycolytic and tricarboxylic acid cycle enzymes in intact and denervated skeletal muscles of the rat during cooling
p0150 A82-23168

**GLYCOSIDES**

U GLUCOSIDES

**GNOTOBIOTICS**

Medical microbiology of crewmembers
p0078 N82-15723

**GOALS**

A systems analysis of human motor reactions in various modes of operation of goal-directed behavioral acts
p0111 A82-21729

Information of mission and functions of the National Bureau of Standards
[PB81-228207]
p0012 N82-11761

**GOGGLES**

PAVE LOW III - Interior lighting reconfiguration for night lighting and night vision goggle compatibility
p0405 A82-46261

Cold weather goggles. 1: Optical evaluation
[AD-A111333]
p0274 N82-25794

Prevalence of astigmatism among aviators and its limiting effect upon visual performance with the AN/PVS-5 flight vision goggles
[AD-A112836]
p0300 N82-27966

Cold weather goggles. 2: Performance evaluation
[AD-A114067]
p0355 N82-29008

Cold weather goggles. Part 3: Resistance to fogging
[AD-A115898]
p0443 N82-34078

**GONADS**

Circadian and seasonal rhythms in plasma androgen levels in the rhesus macaque monkey
p0161 A82-24525

The effectiveness of various radio-protective agents in protecting the germ cells of male mice against the genetic effects of radiation. II - The incidence of reciprocal translocations in irradiated spermatogonia
p0186 A82-25681

The effect of the intravenous injection of neptunium-237 oxalate on the gonads of rats and on their progeny
p0412 A82-46871

Measurement of gonadal and bone-marrow doses from dental radiography
[ARL/TR-022]
p0034 N82-12761

Gonadal doses from radiotherapy
[ARL/TR-020]
p0034 N82-12762

Influence of level of mineralization of desalinated, high quality water of the hydrocarbonate class on functional state of male white rat gonads
p0270 N82-25763

Cytogenetic and gonadotoxic effects of static electric fields
p0388 N82-30915

**GOSS (SUPPORT SYSTEM)**

U GROUND OPERATIONAL SUPPORT SYSTEM

**GRADIENTS**

NT PRESSURE GRADIENTS

NT TEMPERATURE GRADIENTS

**GRADUATION**

U CALIBRATING

**GRAPH THEORY**

The representation of knowledge: Goldstein's genetic graph --- related to computer assisted instruction
p0274 N82-25792

**GRAPHITE**

NT PYROLYTIC GRAPHITE

Carbon/graphite fibers: Environmental exposures and potential health implications

[PB81-229692] p0014 N82-11780

GRAPHS (CHARTS)
A diagram for rapid analysis of albino rat electrocardiograms
p0206 A82-27807

GRASSES
Gravity perception and asymmetric growth in plants - A model derived from the grass pulvinus
p0339 A82-40775

GRATINGS
A single-channel model does not predict visibility of asynchronous gratings
p0024 A82-15358
Contrast influence on perceived orientation --- of gratings obtained by dichoptic fusion of two monocular images
p0314 A82-38796

GRATINGS (SPECTRA)
Holographic laser eye protection
p0024 A82-14971
Disappearance of stabilized chromatic gratings --- visual contrast sensitivity
p0049 A82-16125

GRAVIRECEPTORS
NT OTOLITH ORGANS
In vitro Ca-45/++/ uptake and exchange by otoconial complexes in high and low K/+/Na/+/ fluids
p0121 A82-22249
Gravity sensing, polar transport and cytoplasmic streaming in plant cells
p0328 A82-40667
Receptors signaling gravity orientation in an insect
p0328 A82-40668
Otoconial complexes as ion reservoirs in endolymph
p0328 A82-40674
Gravity sensing system formation in tadpoles /Rana temporaria/ developed in weightlessness simulation
p0337 A82-40759
Gravity only dependent receptor field of the vestibular sensors Its significance in orbital flight
p0338 A82-40770

GRAVITATION
NT ARTIFICIAL GRAVITY
NT REDUCED GRAVITY

GRAVITATIONAL EFFECTS
Cardiovascular reflexes during rest and exercise modified by gravitational stresses
p0057 A82-16932
How important are changes in body weight for mass perception
p0058 A82-16944
Effects of gravity on rotatory nystagmus in monkeys
p0213 A82-17432
Gravity, lignification, and land plant evolution
p0149 A82-22997
Biological effects of space travel /The W. Rupert Turnbull Lecture/
p0157 A82-23769
Mechanism for the change in pulmonary blood volume upon the stimulation of the vagosympathetic trunk
p0231 A82-29698
For a prolonged stay in space
p0234 A82-30298
Biological experiments in space biology and gravitation
p0254 A82-32349
Gravity, and metabolic scale effects in mammals
p0286 A82-36319
Gravity and the tilt aftereffect --- comparison between monocular, binocular and interocular exposures
p0318 A82-39440
Lockheed involvement in Shuttle life sciences flight experiments
p0319 A82-39541
Rapid perceptual adaptation to high gravitoinertial force levels Evidence for context-specific adaptation
p0320 A82-40436
Proceedings of a Meeting of the IUPS Commission on Gravitational Physiology --- Book
p0326 A82-40649
Gravitational scale effects --- moving organism performance as function of gravity and size
p0326 A82-40650
Study of high-g effects in animals
p0326 A82-40651
Methodological aspects of future cardiovascular research in space
p0326 A82-40652
Research opportunities and limitations of protracted hypogravity simulations for plant gravitational physiology
p0326 A82-40653
Human lymphocyte activation is depressed at low-g and enhanced at high-g
p0327 A82-40658
Interaction of gravitic and mechanical stimuli in tropic and nastic responses in beans
p0327 A82-40665
Gravity sensing, polar transport and cytoplasmic streaming in plant cells
p0328 A82-40667
Gravity, metabolic rate and body size of mammals
p0328 A82-40678
Simulated gravitational field influences on the aging process
p0329 A82-40685
International Union of Physiological Sciences, Annual Meeting, 2nd, Budapest, Hungary, July 13-19, 1980, Proceedings
p0329 A82-40686
Aspects of cardiovascular adaptation to gravitational stresses
p0329 A82-40687
Artificial gravity in space flight
p0330 A82-40691
Effect of spaceflight on lymphocyte stimulation
p0331 A82-40700
Variability of physiological properties of rat skeletal muscles at different gravity levels

Alterations in heat loss and heat production mechanisms in rat exposed to hypergravic fields
p0333 A82-40718
Labyrinth plugging as a model of suspended vestibular sensory input
p0333 A82-40721
Initiation of nutation in sunflower hypocotyls
p0333 A82-40724
Relation between physiological effects of gravitational forces and that of magnetic forces
p0334 A82-40730
Postural control related to the different tilting body positions
p0334 A82-40732
International Union of Physiological Sciences, Annual Meeting, 3rd, Innsbruck, Austria, September 29-October 2, 1981, Proceedings
p0335 A82-40734
Reduction in renal artery blood flow impedance during upright tilt in man
p0335 A82-40735
Root cell gravireaction - Hormone interaction
p0336 A82-40745
The effect of gravity on the distribution of plant growth substances in plant tissues
p0336 A82-40746
Results of biosatellite studies of gravity-dependent changes in the musculo-skeletal system of mammals
p0336 A82-40751
Cellular aspects of gravitational biology
p0336 A82-40754
Clinostat exposure and symmetrization of frog eggs
p0337 A82-40757
The intracellular responses of frog eggs to novel orientations to gravity
p0337 A82-40758
Short term gravity effects on volume homeostasis in man Assessment of transvascular fluid shifts after graded tilt
p0337 A82-40760
Cardiac and cerebral vascular adaptation to gravitational stresses in man
p0337 A82-40765
Gravity only dependent receptor field of the vestibular sensors Its significance in orbital flight
p0338 A82-40770
Relation between physiological effects of gravitational forces and that of magnetic forces. II
p0338 A82-40771

Core temperature and brainstem auditory evoked potentials as complimentary noninvasive measures of central neural function during exposure to hypergravic fields
p0338 A82-40772
Response of cultured cells to hyper- and hypogravity
p0338 A82-40773
Gravity perception and asymmetric growth in plants - A model derived from the grass pulvinus
p0339 A82-40775
Medical problems of gravitational changes and powered flight
p0079 N82-15740
Injury and protection of overweightness
p0079 N82-15741
Simulation of some of man's movements in different gravity fields
p0124 N82-16712
Three-dimensional ballistocardiography in weightlessness
p0174 N82-18262
Nutation of Helianthus Annuus in a microgravity environment
p0174 N82-18265
Human tolerance of rotation at different levels of hypergravity
p0216 N82-20852
Anthropometric program analysis of reach and body movement
p0248 N82-23124
Endurance of +Gz G forces by middle-aged people before and after 7-day immersion
p0349 N82-28958
The influence of varied gravito-inertial fields on the cardiac response of orb-weaving spiders
[NASA-CR-169314] p0423 N82-32963

HALOPHILES
DNA-protein complex from an extreme halophile - A histone-like protein in archaebacteria
p0105 A82-20970
HAND (ANATOMY)
The effects of left hand fatigue on right hand performance
p0147 A82-22970
Immediate effects of vibration transmitted to the hand
p0260 A82-33756
Critical assessment of common methods to determine vibrational stress of hand-arm system
p0260 A82-33766
The effect of certain characteristics of work motions on the tolerance of hand muscles to static exertions
p0311 A82-38568
The conditions attending muscular strain in work involving only a few types of movements
p0311 A82-38569
Transmission of vibrations in the human extremities under vibrational loading --- Russian book
p0421 A82-48250
Workshop on the Design and Control of Dexterous Hands
[AD-A114973] p0362 N82-29901
A software package for evaluating the transmissibility between vehicle vibration and motions of hands (in controls), limb, head and eyes
p0380 N82-30853
HANDBOOKS
NT USER MANUALS (COMPUTER PROGRAMS)
HANDICAPS
A data collection scheme for identification of parameters in a driver model
p0044 N82-13696
HANDLING QUALITIES
U CONTROLLABILITY
HARMONIC EXCITATION
Responses to harmonic acceleration with varying head positions
[AD-A114736] p0432 N82-34010
HARMONIC MOTION
Motion sickness incidence induced by complex periodic waveforms
p0416 A82-47336
HARMONICS
NT HARMONIC EXCITATION
HAZARDS
NT AIRCRAFT HAZARDS
NT FLIGHT HAZARDS
NT OPERATIONAL HAZARDS
NT RADIATION HAZARDS
NT TOXIC HAZARDS
Methods for diagnosing hearing loss in workers exposed to high noise levels in accordance with state standards
p0116 A82-21793
Mechanical chemical and bio-hazards --- space-probe related planet and earth contaminations
p0316 A82-39159
Airborne ultrasound: Measurement and possible adverse effects
[PB81-240459] p0083 N82-15775
Nonauditory effects of high intensity noise on ground crews at a naval air station
[AD-A108996] p0181 N82-19834
Health hazards of visual display units with particular reference to office environments
[PB82-120627] p0249 N82-23979
Holographic laser visor mock-up
[AD-A112422] p0303 N82-27990
HEAD (ANATOMY)
NT OCCIPITAL LOBES
Head-temperature effects on physiology, comfort, and performance during hyperthermia
p0283 A82-35901
Head cooling and heat
p0376 A82-44292
The effect of head cooling on deep body temperature and thermal comfort in man
p0417 A82-47381
A homeomorphic finite element model of impact head injury
p0009 N82-10707
Evaluation of man's endurance of local pressure to the head and objective assessment of hygienic specifications for protective helmets
p0124 N82-16710
Effects of whole and partial body exposure to dry heat on certain performance measures
[AD-A100305] p0246 N82-22880

A dynamic model of the cervical spine and head
[AD-A114887] p0432 N82-34008
Responses to harmonic acceleration with varying head positions
[AD-A114736] p0432 N82-34010
HEAD MOVEMENT
The effects of binocular and motion-generated information on the perception of depth and height
p0019 A82-13423
System to measure head motion during parachute opening shock
[AIAA PAPER 81-2517] p0021 A82-13914
Dynamic characteristics of the otolithic oculomotor system
p0064 A82-17433
Binocular counterrolling in humans with unilateral labyrinthectomy and in normal controls
p0064 A82-17434
The ascending tract of Deiters' and horizontal gaze --- maintenance during head movement via neurons
p0064 A82-17437
Some thoughts about the three neurons in the vestibular ocular reflex
p0065 A82-17442
The role of the dentate nucleus and y-group in the generation of vertical smooth eye movements
p0068 A82-17462
Directional plasticity of the vestibulo-ocular reflex in the cat
p0068 A82-17467
The 'Error' signals subserving adaptive gain control in the primate vestibulo-ocular reflex
p0068 A82-17468
Active head rotations and eye-head coordination
p0068 A82-17469
Vestibular influence upon head-eye coordination
p0069 A82-17470
Disturbances of eye-head coordination during lateral gaze in labyrinthine disease
p0069 A82-17471
The interaction between accuracy of gaze with and without head movements in patients with cerebellar ataxia
p0069 A82-17472
Nystagmus, gaze shift, and self-motion perception during sinusoidal head and neck rotation
p0069 A82-17473
Effect of frontal-eye-field lesion on eye-head coordination in squirrel monkeys
p0069 A82-17475
Modifications of vestibular nystagmus produced by fixation of visual and nonvisual targets
p0069 A82-17477
Different effects involved in the interaction of saccades and the vestibulo-ocular reflex
p0070 A82-17480
Ocular torsion in the cat after lesions of the interstitial nucleus of Cajal
p0070 A82-17484
Method for the analysis of pilot postural behavior based on head-up - head-down simulations
p0171 A82-25494
The effect of convergence on the vestibulo-ocular reflex and implications for perceived movement
p0235 A82-30873
Dynamics of subjective discomfort in motion sickness as measured with a magnitude estimation method
p0321 A82-40438
Gravity only dependent receptor field of the vestibular sensors Its significance in orbital flight
p0338 A82-40770
The vestibulo-ocular reflex in man during voluntary head oscillation under three visual conditions
p0416 A82-47334
A comparison of head and manual control for a position-control pursuit tracking task
p0047 N82-13720
A software package for evaluating the transmissibility between vehicle vibration and motions of hands (in controls), limb, head and eyes
p0380 N82-30853
HEAD-UP DISPLAYS
A case for early objective evaluation of candidate display formats --- of head-up displays based on pilot performance experiments
p0139 A82-22904
Application of a pilot control strategy identification technique to a joint FAA/NASA ground-based simulation of head-up displays for CTOL aircraft
p0440 N82-34061
Design, simulation and evaluation of advanced display concepts for the F-16 control configured vehicle
p0440 N82-34062
HEALING
NT WOUND HEALING
Basic principles of hypoxia control during shock
p0105 A82-25676
Efficacy of cimetidin in the prevention of ulcer formation in the stomach during immobilization stress
[NASA-TM-76864] p0389 N82-30923
HEALTH
NT HEALTH PHYSICS
NT MENTAL HEALTH
NT PUBLIC HEALTH
Emotions, sleep, and health
p0117 A82-21804
Physical health of truck drivers in the open-pit mining industry of the far north
p0117 A82-21805
Morbidity involving a temporary loss of work capacity among drivers of automotive passenger vehicles
p0161 A82-24522
Cerebral hemodynamics in healthy individuals and the recognition of subclinical signs of insufficient blood supply to the brain
p0201 A82-27751
STS-1 medical report
[NASA-TM-58240] p0076 N82-15711
Evaluation of crew health
p0077 N82-15712
Health stabilization program
p0077 N82-15715
Hydrogen cyanide health effects
[PB82-116039] p0176 N82-18864
Ammonia health effects
[PB82-116047] p0176 N82-18865
An industrial hygiene evaluation of aircraft refueling inside closed aircraft shelters at elevated ambient temperatures
[AD-A114396] p0353 N82-28994
Airline pilot age, health, and performance: Scientific and medical considerations
[PB82-161506] p0361 N82-29895
STS-3 medical report
[NASA-TM-58247] p0423 N82-32961
HEALTH PHYSICS
NT PUBLIC HEALTH
An empirical relationship for electromagnetic energy absorption in man for near-field exposure conditions
p0018 A82-13175
Working conditions and health of female workers in the sawmill sections of the wood-working industry
p0160 A82-24508
Hematological and chromosomal analysis of a sample population working at radar installations
p0167 A82-24843
Meteorological radars as a source of microwave electromagnetic field energy and questions of environmental health
p0206 A82-27802
In the struggle for the health of sailors
p0233 A82-30026
Industrial hygiene and the prophylaxis of occupational diseases in work with lasers --- Russian book
p0258 A82-33394
The health condition of apparently healthy workers at oil-processing plants
p0414 A82-46893
Contributions to the genetic and mean bone-marrow doses of the Australian population from radiological procedures
[ARL/TR-017] p0034 N82-12764
Health and safety research division
[DE81-026088] p0038 N82-13652
Radiological health
p0078 N82-15727
Problems in evaluating health effects of occupational and environmental exposures

[DE81-020440] p0083 N82-15774
Airborne ultrasound: Measurement and possible adverse effects
[PB81-240459] p0083 N82-15775
Mechanisms of cadmium absorption in rats
[PB82-108184] p0123 N82-16703
Clinical distinctions of radiation sickness with exposure of different parts of the human body to radiation
p0126 N82-16726
Health hazards of visual display units with particular reference to office environments
[PB82-120627] p0249 N82-23979
Five-year research plan for effects of noise on health
[PB82-168972] p0425 N82-32976

HEARING
NT ACOUSTIC FATIGUE
NT BINAURAL HEARING
Characteristics of the structure and functions of the middle ear of lizards
p0119 A82-21823
Neurophysiological basis for determining the biological significance of acoustic stimuli
p0189 A82-25719
Clinical features of the effect of factory noise as a function of its type and spectral characteristics
p0240 A82-31519
The state of hearing in pilots in civil aviation
p0240 A82-31520
The landing signal officer - Auditory aspects --- of aircraft carrier flight operations
p0284 A82-35910
Thresholds of hearing by air conduction and by bone conduction under different masking conditions
[NPL-AC-100] p0034 N82-12768
An investigation of the status of bone conduction audiometer calibration in the National Health Service
[NPL-AC-101] p0034 N82-12769
Noise and sense of hearing
p0080 N82-15747
Potential for interaction of low-level impulse and continuous noise
[AD-A109430] p0222 N82-21883
Effect of caloric stimulation of vestibular system on hearing
p0349 N82-28963
Possibility of hearing loss from exposure to interior aircraft noise
[AD-A116504] p0424 N82-32973

HEART
NT CARDIAC AURICLES
NT CARDIAC VENTRICLES
NT EPICARDIUM
NT MYOCARDIUM
Pathological anatomy and ultrastructure of the heart /Combined morphological investigation of the general pathological process in the myocardium/ --- Russian book
p0194 A82-26525
The regulation of calcium exchange in the cells of different regions of the warm-blooded animal heart
p0320 A82-40313
On the observability of electrical cardiac sources --- Thesis
p0341 A82-41450
The variations in the content of histamine in the tissues of the heart and stomach during the excessive stimulation of the organism and the influence of hexamethonium on these variations
p0413 A82-46806
On the active part played by the heart in the venous return of the blood
[RAE-LIB-TRANS-2017] p0012 N82-11766
Investigation of radiofrequency radiation effects on excitable tissues
[AD-A109813] p0221 N82-21873
Effect of immobilization stress on diacyl- and plasmalogen-derivatives of phospholipids in various rat organs and tissues
[NASA-TM-76852] p0385 N82-30891
The contribution of standard radiography in cardiovascular exploration during the examination of pilots
p0399 N82-31935

HEART DISEASES
NT ANGINA PECTORIS
NT CORONARY ARTERY DISEASE
Computer quantitation of Q-T and terminal T wave /aT-eT/ intervals during exercise - Methodology and results in normal men
p0002 A82-10633
Glucocorticoid receptors and metabolic disturbances in the liver and heart during immobilization
p0002 A82-10750
Sarcoidosis and aeronautical risk
p0007 A82-12310
Trial of an automated EKG analysis system in a cardiological clinic
p0052 A82-16804
Prevention of hypoxic heart damage by the use of oxypyridine-class antioxidants
p0055 A82-16821
Damage and repair of heart muscle DNA during emotional-pain stress
p0055 A82-16822
The role of physical training in the prevention of ischemic heart disease
p0071 A82-18525
Effect of altitude exposure on induction of Streptococcal endocarditis in young and middle-aged rats
p0073 A82-18740
A study of treadmill exercise protocols for Chinese males
p0107 A82-21677
Investigation and evaluation of cardiac arrhythmias in healthy young persons
p0110 A82-21710
The effect of motor activity on the development of cardiac arrhythmias in experimental emotional stress
p0110 A82-21713
Effect of cooling of the rhythmo-inotropic ratio in a pathologically altered myocardium
p0112 A82-21740
Mechanisms of compensation and adaptation in relation to the hyperfunction of the heart
p0113 A82-21756
The application of bicycle ergometry to the early detection of ischemic heart disease
p0115 A82-21775
Emotional stress as a factor in cardiovascular disorders
p0117 A82-21796
Seasonal rhythm of the immune reactivity and heart tolerance to physical load in patients with ischemic heart disease
p0117 A82-21802
Evaluation of the functional state of the cardiovascular system in patients with ischemic heart disease with reference to the nature of their occupational activity
p0117 A82-21803
A sino-auricular block with Samoilov-Wenkeback periods - Diagnosis with the aid of an automated analysis of the structure of heart rhythms and clinical assessment
p0153 A82-23270
The significance of echocardiography in the detection of left ventricular blood supply disorders during bicycle ergometry
p0159 A82-24492
Oxygen supply of the muscle tissue in patients with chronic ischemic heart disease during graded physical loads
p0159 A82-24496
Evaluation of the effectiveness of the complex treatment of patients with ischemic heart disease by the bicycle ergometer method
p0161 A82-24517
Limitations of echocardiographic techniques in evaluation of left atrial masses
p0169 A82-25135
A bicycle-ergometer evaluation of the physical adjustment made by patients after an inner mitral commissurotomy
p0187 A82-25690
Bicycle ergometry in the differential diagnosis of cardialgia
p0205 A82-27792
Incidence of ischemic heart disease and arterial hypertension in sedentary workers

p0205 A82-27793
Relationship of personality factors and some social habits to cardiovascular risk in submariners
p0211 A82-28487
The value of spiroergography in the diagnosis of the initial stage of cardiac insufficiency
p0233 A82-30030
The role of stress in the pathogenesis of ischemic heart disease
p0279 A82-35677
Recent developments in assessing the myocardial dystrophy encountered in athletes as a consequence of chronic physical overexertion
p0280 A82-35680
Electrocardiographic diagnosis of the chronic pulmonary heart
p0280 A82-35681
The protective role of the forebrain with respect to pathological cardiac reflexes
p0309 A82-38543
The impulse activity of neurons in the nodose ganglion during acute hemodynamic and respiratory disorders
p0309 A82-38546
The detection of premorbid states and cardiovascular diseases during medical examinations of seamen
p0309 A82-38553
A study of temporary absences from work arising from disorders of the circulatory system
p0310 A82-38555
Diagnostics of disturbances of heart rhythm and conductance and their professional evaluation in flight personnel
p0319 A82-40309
The significance of postextrasystolic potentiation in the preoperative assessment of the reversal of left-ventricle asynergy in patients with ischemic heart disease
p0343 A82-41483
A modification of Souns' method of selective coronarography
p0343 A82-41485
The rate of coronary perfusion as a factor determining the extent to which the contractile function of the heart is decreased in energy formation disorders
p0344 A82-41489
The achievements of investigations carried out in the years 1976-1980 on the problem of insufficient blood circulation and heart rhythm disturbances
p0344 A82-41501
The coronary vessels and the contractile apparatus of the myocardium in immune heart damage /Histochemical and ultrastructural studies/
p0367 A82-42605
Emotional stress and hypokinesia in the origination of cardiac disorders and hypertensive states
p0367 A82-42608
The ultrastructural bases of cardiac insufficiency
p0409 A82-46703
The results of the exercise test and further outcomes in patients with chronic ischemic heart disease
p0410 A82-46720
Characteristics of the blood rheology, platelet function, and hemodynamics in patients with ischemic heart disease during extended hypokinesia following amputations of the limbs

Pathogenesis and prevention of the hypoxic contraction of the heart
p0164 A82-24552
Expansion of the experimental possibilities of evaluating cardiac output by means of integral rheography using a high-pass filter
p0185 A82-25677
Damage to the Ca/2+/-transporting system in the sarcoplasmic reticulum of the heart during emotional and nociceptive stress
p0190 A82-25810
Regulation of heart rhythm in depressor baroreflex
p0190 A82-25812
Model of the mechanism of the regulation of the human cardiovascular system. I - Concerning the heart-regulation mechanism
p0197 A82-26799
Effects of periodization in the yearly training cycle on cardiac volume in young athletes
p0204 A82-27779
Effects of exercise adaptation on the age variation of human cardiac contractile function and left ventricular mass
p0204 A82-27785
The relationship between circadian and circanian rhythms of some parameters of the heart contractile function and vascular tension
p0231 A82-29007
The first clinical experience with a new Soviet antiarrhythmic drug, the diethylamine analog of ethmosine, in patients with different disorders of the heart rhythm
p0279 A82-35678
The effect of nitroglycerine on the functional state of the left ventricle in patients with acute myocardial infarction according to ultrasonic studies of the heart
p0279 A82-35679
Effect of habitual exercise on left ventricular response to exercise
p0286 A82-36040
The effect of repeated episodes of emotional stress on heart activity and the content of monoamines in the heart
p0307 A82-38163

The effect of hypokinesia on the resistance of the
heart to hypoxia
p0307 A82-38170

Alterations in heart work rhythm during
hyperactivation of the anterior amygdaline nucleus
p0309 A82-38545

Morphological and functional factors contributing
to a hypertonic heart
p0310 A82-38557

A study of the mechanism governing the different
types of behavior exhibited by the spiral
excitation wave period in auricle and ventricle
p0312 A82-38597

The effect of inotropic factors on the
postexercise characteristics of the heart
p0322 A82-40451

Prevention of heart function abnormalities during
reoxygenation after ischemia by adaptation to
altitude hypoxia
p0322 A82-40455

The effect of hypokinesia on the resistance of the
heart to hypoxia
p0325 A82-40502

Effects of lower body negative pressure on the
reliability of cardiovascular system using X-ray
kymograms
p0334 A82-40728

The amplitude of the R wave and the contractile
function of the left ventricle in patients with
ischemic heart disease
p0343 A82-41486

The effect of diethylamine analog of ethmozine on
the functional condition of myocardium /Clinical
and experimental study/
p0343 A82-41488

A comparison of echo- and kinetocardiographic
indicators of the myocardial contractility of
the left ventricle in patients suffering from
various forms of ischemic heart disease
p0344 A82-41496

Output and efficiency of the heart in young
athletes as a function of the type of athletic
training
p0344 A82-41497

The role of the energy transport system in changes
of the contractile function of the heart in the
case of the measured limitation of coronary
blood flow
p0344 A82-41499

Functional condition of the heart mitochondria in
the dynamics of emotional and pain stress
p0344 A82-41500

Analysis of load characteristics and development
of new indicators of cardiac function
p0367 A82-42606

Internal stresses and contractility of myocardium
p0372 A82-43513

Functional means for the regulation of heart
rhythm during burst stimulation of the vagus
nerves
p0373 A82-43632

The participation of the hypothalamus in the
regulation of parasympathetic cardiac reflexes
in unanesthetized cats
p0373 A82-43633

Hematological and immunological changes during
space flight
p0057 A82-16937
Changes in morphological and cytogenetic
hematopoietic indicators in hamadryas baboons
exposed to chronic low-level radiation
p0111 A82-21726
The correlation between hematologic and
biochemical indicators in the turtles Testudo
horsfieldi
p0112 A82-21733
Blood serum nuclease activity in healthy persons
and patients with various hematological diseases
p0118 A82-21813
Preparation of purified erythropoietin from rabbit
blood plasma
p0152 A82-23261
Reaction of the blood system to single and double
exposure to a stress agent
p0154 A82-23287
Hematological and chromosomal analysis of a sample
population working at radar installations
p0167 A82-24843
Effects of pharmacological agents on the
development of hematic hypoxia
p0189 A82-25720
Indicators of the erythrocytic system of rabbits
in hot, humid climates
p0191 A82-25813
Body fluid and hematologic adjustments during
resting cold acclimation in rhesus monkey
p0230 A82-29565
The prognostic value of the glucose tolerance test
p0263 A82-34698
Hematological and immunological analyses
p0078 N82-15722
Hematogical lesions as a function of dosage of
long-term radiation
p0216 N82-20857
Inhalation studies with halothane in female rats.
Part A: Toxicological data
p0266 N82-24817

HEMATOPOIESIS
Plasma erythropoietins during training for
hyperoxic conditions
p0062 A82-17147
Hematopoietic tissue development in Japanese quail
embryogenesis
p0201 A82-27740
The role of lymphocytes in the regeneration of
hematopoiesis under condition of local irradiation
p0241 A82-31535
The nature of radiation damage of haemopoietic
stem cells under continuous irradiation at low
dose rate
p0259 A82-33600
Characteristics of hemapoiesis in athletes
undergoing endurance-training
p0279 A82-35670
The radiation sensitivity of animals exposed to a
modified gas environment. IV - A comparative
study of the effect of the respiration of pure
oxygen at normal pressures on the proliferating
activity of hemopoietic tissues and epithelial
cells of the small intestine
p0404 A82-45783
The recovery of mouse hemopoiesis at long
intervals following extended external /Cs-137/
and internal /H-3/ irradiation
p0412 A82-46865
The determination of the number of stem cells by
the number of colonies of undifferentiated cells
in the bone marrow of irradiated animals
p0412 A82-46866
The effect of humoral factors of the lymph tissues
on hemopoietic stem cells
p0413 A82-46890
A model for the restoration of the cellular
composition of red blood
p0419 A82-48202
Inborn anemias in mice
[DE81-029128] p0009 N82-10705
Postradiation recovery of human bone marrow and
morphological dynamics of undifferentiated cell
pool
p0265 N82-24811
Possible use of magnetobiological effects in
neurosurgery

p0387 N82-30905

Effects of microwave radiation on mouse hemopoietic stem cells and on animal resistance to ionizing radiation
p0388 N82-30912

HEMATOPOIETIC SYSTEM

Changes in blood indicators upon the inclusion of trace elements in the diet
p0049 A82-16274

Morphological changes in the hematopoietic organs of rats under the influence of adrenalin
p0150 A82-23167

Studies on the property and transplantation of hemopoietic stem cells from peripheral blood
p0261 A82-34247

Changes in the relations of pyrimidine blocks in DNA of the hematopoietic system immediately following gamma irradiation of the animal
p0306 A82-38152

Early reaction of the hemopoietic organs depending on the condition of the peripheral M-cholinergic systems
p0307 A82-38160

The early reaction of the hemopoietic organs to stress, depending on the condition of the peripheral M-cholinergic systems
p0325 A82-40499

The role of the hypophysis in early reaction of hemopoietic organs to stress
[NASA-TM-76865] p0390 N82-30924

HEMOCYTES

Separation of bone marrow cells in mice by free-flow electrophoresis
p0308 A82-38536

HEMODYNAMIC RESPONSES

Analysis of lung vasomotor responses to alveolar hypoxia and hypercapnia
p0002 A82-10749

The application of a combined passive orthostatic test in the flight medical examination
p0020 A82-13550

Comparison of impedance ventricular function indices with systolic time intervals
p0023 A82-14806

Rhinopneumometric indicators during repeated antiorthostatic exposures
p0029 A82-15719

Changes in Hageman factor system indicators during human adaptation to intense physical loading
p0054 A82-16816

Cardiovascular reflexes during rest and exercise modified by gravitational stresses
p0057 A82-16932

States of vestibular function after prolonged bedrest
p0058 A82-16940

Problems of the regulation of hemodynamics during a passive orthostatic test - Study of a mathematical model
p0072 A82-18700

Changes of the aggregation and orientation structure of blood in pulsating flow
p0095 A82-20333

Changes in the main characteristics of the central hemodynamics of healthy individuals and hypertension patients during physical exercise
p0110 A82-21711

Mechanisms of compensation and adaptation in relation to the hyperfunction of the heart
p0113 A82-21756

A comparative evaluation of the hemodynamic effects of large doses of morphine, dipidolor, pentazocine, and phentanyl
p0117 A82-21795

Computer-aided analysis of the effect of the initial narcosis on the central hemodynamics
p0117 A82-21797

Effect of the Circutone seat on hemodynamic, subjective and thermal responses during prolonged sitting
p0147 A82-22969

Changes in regional and central hemodynamics during the treatment of hypertensive patients with obsidan, apressin and their combination
p0153 A82-23271

Pathogenesis and prevention of the hypoxic contraction of the heart
p0164 A82-24552

Exploration of cardiovascular function in subjects exposed to plus Gz accelerations in a human centrifuge by new noninvasive techniques
p0166 A82-24639

Mechanical cardiopulmonary interdependence
p0168 A82-24915

Some characteristics of cardiovascular system activity and adaptive antihypoxic mechanisms in keyboard computer operators during the course of a work shift
p0180 A82-25705

Response of the cat femoral artery to increased circulation rate
p0180 A82-25712

The significance of the pulmonary gas-exchange response in physical exercise testing for the evaluation of the effectiveness of mitral commissurotomy
p0190 A82-25805

Cardiorespiratory assessment of 24-hour crash-diet effects on altitude, +Gz, and fatigue tolerances
p0192 A82-26228

Hemodynamic responses in orthostasis following 5 hours of sitting
p0192 A82-26232

The effects of systemic arterial and venous pressures on blood volume in the cerebral vessels
p0196 A82-26755

The participation of adrenergic mechanisms in microcirculation changes under stress
p0202 A82-27757

Complex technique for studying the oxygen regimen and hemodynamics of the oral mucosa under hypoxia
p0204 A82-27789

Mechanisms for the adaptive and trophic effects of the sympathetic nervous system on cerebral vessels and tissue
p0210 A82-28458

The information content of indicators of cerebral vascular responses to adequate influences
p0210 A82-28459

Hemodynamic responses to methoxamine in exercise-conditioned and aorta-constricted rats
p0230 A82-29562

Regional redistribution of blood flow in the cat under conditions of high ambient temperature
p0231 A82-29697

Mechanism for the change in pulmonary blood volume upon the stimulation of the vagosympathetic trunk
p0231 A82-29698

Comparative characteristics of respiratory and circulatory changes upon acute hyperthermia in cats
p0231 A82-29699

The relationship between circadian and circannian rhythms of some parameters of the heart contractile function and vascular tension
p0231 A82-29807

A comparative characterization of hemodynamics and respiration under static and dynamic loads
p0238 A82-31503

Changes of cardiac activity and regional cerebral circulation under gravitational effects simulated by antiorthostasis
p0239 A82-31513

Hemodynamic response during combined tilt table-isometric exercise test and +Gz acceleration tolerance
p0251 A82-31832

Acceleration-induced atrioventricular dissociation - Hemodynamic consequences
p0251 A82-32002

Thermoregulatory influences on common carotid blood flow in the dog
p0255 A82-32829

Induced venous pooling and cardiorespiratory responses to exercise after bed rest
p0256 A82-32842

Blood circulation in weightlessness
p0281 A82-35700

The characteristics of hemodynamic shifts under physical stress at mountain elevations
p0307 A82-38166

The impulse activity of neurons in the nodose ganglion during acute hemodynamic and respiratory disorders
p0309 A82-38546

Effect of the Circutone seat on hemodynamic, subjective, and thermal responses to prolonged sitting p0321 A82-40442

The effect of inotropic factors on the postexercise characteristics of the heart p0322 A82-40451

The response of the venous walls in the extremities to a disturbed venous outflow p0325 A82-40493

Effects of a weightlessness simulation on the velocity curves measured by Doppler sonography at the level of the carotid system p0327 A82-40656

Changes in blood volume and response to vaso-active drugs in horizontally casted primates p0327 A82-40657

Cardiovascular responses to isometric exercise during simulated zero gravity p0327 A82-40662

Cardiovascular responses of the chronically instrumented monkey during simulated space flight p0328 A82-40670

Effect of baroreceptor denervation on +G sub z tolerance in dogs p0328 A82-40675

Sparing effect of chronic high-altitude exposure on muscle glycogen utilization
p0229 A82-29556
Changes in the hemodynamics and efferent activity in the renal nerve with acute hypoxic hypoxia under the stabilization of perfusion pressure in carotid sinuses
p0306 A82-38161
Altitude-induced changes in plasma thyroxine, 3,5,3 prime-triiodothyronine, and thyrotropin in rats
p0340 A82-41207
Factors inducing periodic breathing in humans - A general model
p0375 A82-44140
Altitude hypoxia and hypercapnic mixtures
p0407 A82-46308
Control of ventilation in climbers to extreme altitude
p0416 A82-47301
Differentiated ratings of perceived exertion are influenced by high altitude exposure [AD-A111075] p0295 N82-26967
HIGH ALTITUDE ENVIRONMENTS
Variability of oxygen affinity of blood - Human subjects native to high altitude
p0088 A82-19493
Adaptation to high-altitude hypoxia at different ambient temperatures /before and during adaptation/
p0110 A82-21715
Variation in catecholamine excretion in adolescents under mountain conditions
p0150 A82-23174
High altitude and the oxygen dissociation curve of hemoglobin modifications in inter-heme cooperativity
p0167 A82-24844
Women at altitude - Cardiovascular responses to hypoxia
p0252 A82-32009
The characteristics of hemodynamic shifts under physical stress at mountain elevations
p0307 A82-38166
Causes of high-altitude acute pulmonary edema
p0307 A82-38167
The accuracy of venturi masks at altitude
p0321 A82-40445
The cause of high-altitude acute pulmonary edema
p0325 A82-40498
The speed of blood flow in athletes subjected to the combined action of a training regime and high-altitude climatic factors
p0344 A82-41505
Sparing effect of chronic high-altitude exposure on muscle glycogen utilization during exercise [AD-A111063] p0295 N82-26969
Medical and performance problems of acute high altitude-exposure [AD-A111062] p0295 N82-26970
HIGH ALTITUDE FLIGHT
U FLIGHT
U HIGH ALTITUDE
HIGH ALTITUDE TESTS
Psychological testing at high altitudes
p0107 A82-21679
The morphology of the submandibular lymph nodes of white rats during adaptation to high-altitude conditions
p0420 A82-48221
HIGH FREQUENCIES
Biological effects of high-frequency radiation - The concept of the specific absorption rate /SAR/ and its effect on safety regulations
p0235 A82-30952
HIGH GRAVITY (ACCELERATION)
U HIGH GRAVITY ENVIRONMENTS
HIGH GRAVITY ENVIRONMENTS
Cell morphological, ontogenic, and genetic reactions to 0-g simulation and hyper-g
p0253 A82-32154
Human lymphocyte activation is depressed at low-g and enhanced at high-g
p0327 A82-40658
Centrifuge high-g effects on temperature regulation in unanesthetized rats
p0328 A82-40671
Core temperature and brainstem auditory evoked potentials as complimentary noninvasive measures of central neural function during exposure to hypergravic fields
p0330 A82-40772
Response of cultured cells to hyper- and hypogravity
p0330 A82-40773
Injury and protection of overweightness
p0079 N82-15741
HIGH LATITUDES
U POLAR REGIONS
HIGH LEVEL LANGUAGES
Linguistic decision structures for hierarchical systems
p0277 A82-34968
HIGH PRESSURE
Harmful effects of temperature under conditions of elevated pressure in a helium-oxygen environment
p0027 A82-15706
Evaluation of safety of decompression from the critical volume of gas bubbles formed in the organism
p0110 A82-21717
Deep-sea bacteria - Isolation in the absence of decompression
p0255 A82-32800
Possible impairment of respiratory regulation under hyperbaric nitrogen narcosis
p0349 N82-28964
HIGH SPEED
Contrast sensitivity at high velocities --- measurement of visual sensitivity to rapidly moving stimuli
p0235 A82-30874
HIGH SPEED FLIGHT
U FLIGHT
U HIGH SPEED
HIGH SPEED TRANSPORTATION
U RAPID TRANSIT SYSTEMS
HIGH TEMPERATURE ENVIRONMENTS
Changes in the heat resistance of rats under various regimes of cold adaptation
p0018 A82-12952
The effects of elevated environmental temperature combined with radiation on the organism
p0113 A82-21752
Some indices of the functional physiological state of inspectors at a thermal power plant
p0161 A82-24515
A mechanism for the stimulation of the immune response under the influence of high ambient temperature
p0164 A82-24557
Indicators of the erythrocytic system of rabbits in hot, humid climates
p0191 A82-25813
Regional redistribution of blood flow in the cat under conditions of high ambient temperature
p0231 A82-29697
Evolutionary significance of the adaptation of animals to heat
p0278 A82-35663
Dependence of reactions of the organism to extremal factors on initial state
p0282 A82-35839
The effectiveness of perspiration in a hot environment
p0307 A82-38178
Task categorization and the limits of human performance in extreme heat

p0321 A82-40439
Thermoregulation and the menstrual cycle
p0321 A82-40441
Effect of physical training in cool and hot environments on +Gz acceleration tolerance in women
p0327 A82-40664
Effects of whole and partial body exposure to dry heat on certain performance measures
[AD-A100305] p0246 N82-22080
Auxiliary cooling: Comparison of air-cooled versus water cooled vests in hot-dry and hot-wet environments
[AD-A110554] p0275 N82-25797
Effectiveness of five water-cooled undergarments in reducing heat stress of vehicle operating in a hot wet or hot dry environment
[AD-A107105] p0299 N82-26994

HIGH TEMPERATURE TESTS
Thermal test of flying helmet for two different types of impact protection devices - Nylon sling and polystyrene liner
p0025 A82-15519

HIGH VACUUM
Mechanism of the effects of vacuum on microorganisms
p0164 A82-24551

HIGH VOLTAGES
USSR Report. Life sciences: Effects of nonionizing electromagnetic radiation, no. 5
[JPRS-80525] p0266 N82-24819
Metabolic changes in experimental animals as indicators of biological effects of 50 Hz electromagnetic fields
p0266 N82-24821

HILLER MILITARY AIRCRAFT
U MILITARY AIRCRAFT

HINDRANCE
U CONSTRAINTS

HINGE MOMENTS
U TORQUE

HIPPOCAMPUS
Functional state of the hippocampal-reticular complex under submaximal physical load and fatigue
p0116 A82-21786
Destructive and reparative processes in the hippocampus upon prolonged exposure to nonionizing microwave radiation
p0241 A82-31536
The influence of a constant magnetic field on the epileptogenic foci in the hippocampus of rabbits
p0323 A82-40466
The effect of the electrical stimulation of afferent pathways on neurons in septal slices
p0323 A82-40469
Neurotransmitter mechanisms in the nucleus accumbens septi and related regions in the rat brain
[NDRE/PUBL-81/1001] p0031 N82-12730

HISTAMINES
Histamine in biochemistry and physiology --- Russian book
p0317 A82-39290
The variations in the content of histamine in the tissues of the heart and stomach during the excessive stimulation of the organism and the influence of hexamethonium on these variations
p0413 A82-46886
Serotonin and histamine metabolism in cosmonauts
p0217 N82-20858

HISTIDINE
Histidyl-histidine catalysis of glycine condensation in fluctuating clay environments
p0103 A82-20952
Increased excretion of urea and N/tau/-methylhistidine by rats and humans after a bout of exercise
p0119 A82-21927

HISTOCHEMICAL ANALYSIS
A histochemical investigation of the microvascular effectors regulating the supply of blood to the cerebral cortex
p0112 A82-21744
Innervation of skin glands of the hedgehog /Erinaceus europaeus/ and its histochemical changes induced by hibernation
p0170 A82-25244
Electron-histochemical and functional evaluation of the effects of aspirin on the thrombocytes of healthy people and patients with ischemic heart disease
p0204 A82-27784
Histoenzymological changes in experimental animals exposed to variable noise
p0311 A82-38577
Alterations of histochemical organization in the organ of Corti under the influence of chronic noise
p0316 A82-39242
The histochemistry of enzymes in specific skin glands of the European hedgehog /Erinaceus europeaus/ during hibernation
p0319 A82-39792
Changes in neurons of the spinal cord and spinal ganglia under hypokinesia /neuromorphological and histochemical investigation/
p0325 A82-40494
A hygienic evaluation of the biological effects of nonionizing microwave radiation
p0342 A82-41464
The organization of the afferent subcortical inputs of the visual region of the cat cerebrum
p0368 A82-42621
Inborn anemias in mice
[DE81-029128] p0075 N82-18795
Electron paramagnetic resonance assignment: An analysis of methods used for biological samples
[ISS-T-82/2] p0393 N82-31889

HISTOLOGY
Digital image processing of bone - Problems and potentials
p0026 A82-15697
A study of cerebral microvessels by means of automatic image analysis
p0202 A82-27766
Regeneration of skeletal muscle after mechanical trauma in reptiles
p0203 A82-27767
Principles of the definition and classification of tissues
p0368 A82-42620
The topography of elements of the cardiac conduction system
p0369 A82-42625
Historico-epistemological analysis of the concept of 'tissue'
p0420 A82-48218

HISTORIES
NT CASE HISTORIES
Contribution to the history of the theoretical evolution of the psychological selection of aircraft pilots in Italy
p0166 A82-24841
The developmental history of aeronautical and aerospace medical science
p0079 N82-15737
X-ray measurements and protection, 1913-1964: The role of the National Bureau of Standards and the national radiological organization
[PB82-165036] p0425 N82-32977

HOLOGRAPHY
Holographic laser eye protection
p0024 A82-14971

HOMEOSTASIS
An investigation of the biological activity of chalones separated from normal livers and from livers that are being regenerated
p0112 A82-21742
The multiple forms of tyrosine aminotransferase in rat liver cells and their role in cellular homeostasis
p0117 A82-21807
Enzymatic capacities of skeletal muscle - Effects of different types of training
p0121 A82-22248
Competition between algae in a flow system
p0240 A82-31517
Evolutionary significance of the adaptation of animals to heat
p0270 A82-35663
Physiological adaptations and maintenance of vegetative homeostasis
p0281 A82-35826
A classification of behavioral adaptation
p0281 A82-35827
Evidence of an immune mechanism of enzyme-hemostasis regulation
p0309 A82-38552

Systemic mechanisms of homeostasis
p0317 A82-39417
Short term gravity effects on volume homeostasis in man Assessment of transvascular fluid shifts after graded tilt
p0337 A82-40760
Biomicroscopy of a microcirculatory bed in experiments - Possibilities, limitations, and prospects
p0368 A82-42611
Ways and means of maintaining heat balance in pilots and cosmonauts
p0123 N82-16706
Volume regulating hormones and their role in the cardiovascular adaptation to zero gravity
p0179 N82-19022
Recording basic climatic parameters and their processing into integrated heat stress indices
[DRIC-T-6292] p0223 N82-21885
A statistical model of the controller functions of the human temperature regulating system
p0248 N82-23972
Effect of high ambient temperature on carbohydrate metabolism in rat liver and skeletal muscles
p0351 N82-28975
Formation of systemic adaptation reactions in static magnetic fields
p0387 N82-30904

HOMING
Study of homing pigeons in Brazil: Some preliminary results
[INPE-2248-PRE/032] p0133 N82-17839

HOMOGENEITY
The formation of homogeneous item sets when guessing is a factor in item responses
[AD-A107134] p0298 N82-26986

HOMOGENIZATION
U HOMOGENIZING

HOMOGENIZING
Effects of experimental stationary magnetic field on metabolism of some ions in blood and myocardium
p0267 N82-24822

HORIZONTAL ORIENTATION
The ascending tract of Deiters' and horizontal gaze --- maintenance during head movement via neurons
p0064 A82-17437
Horizontal eye movement signals in second-order vestibular nuclei neurons in the cat
p0065 A82-17440
Effects of horizontal body casting on the baroreceptor reflex control of heart rate
p0285 A82-36033
Changes in blood volume and response to vaso-active drugs in horizontally casted primates
p0327 A82-40657
Influences of horizontal hypokinesia on performance and circadian physiological rhythms in female humans
p0329 A82-40682
Influence of orientation method on quality of pilot's spatial orientation
p0215 N82-20845

HORMONE METABOLISMS
The effect of the prolonged administration of sodium hydroxybutyrate on the physical work capacity and muscle tissue state of rats
p0115 A82-21779
The multiple forms of tyrosine aminotransferase in rat liver cells and their role in cellular homeostasis
p0117 A82-21807
Circadian and seasonal rhythms in plasma androgen levels in the rhesus macaque monkey
p0161 A82-24525
Dynamics of aerobic work capacity and changes in the functional stability of the oxygen-supply mechanism and hypophysical adrenocortical system in skiers
p0187 A82-25696
Thyroid and hypophysial thyrotropic function in athletes during bicycle ergometer exercise
p0189 A82-25716
The participation of estradiol and progesterone in animal body mass regulation mechanisms
p0189 A82-25801
Hormonal mechanisms of seasonal rhythms in rats
p0240 A82-31518
Changes of the oxygen transport function of the blood and some metabolic values in patients with hypertension and chronic ischemic heart diseases during ergometric exercise
p0279 A82-35666
Experimental and clinical study of a new immunoregulatory preparation - thymalin
p0307 A82-38177
Delayed effects of the internal irradiation of endocrine system in female rats
p0311 A82-38582
Stress in space flight - Metabolic aspects
p0330 A82-40696
ADH suppression under immersion combined with dehydration --- antidiuretic hormone secretion
p0339 A82-40776
Altitude-induced changes in plasma thyroxine, 3,5,3 prime-triiodothyronine, and thyrotropin in rats
p0340 A82-41207
Metabolic and cardiovascular adaptations in trained hypophysectomized rats
p0340 A82-41215
Hormone response of normal and intermittent cold-preadapted humans to continuous cold
p0375 A82-44137
The sympathico-adrenal and the hypophysial-adrenal systems in the pathogenesis of the post-ischemic syndrome
p0410 A82-46717
The hypophysial-thyroid system in the course of a complicated and an uncomplicated myocardial infarction
p0410 A82-46718
The content of the luteinizing hormone in the hypothalamus depending on the physiological condition of rats
p0412 A82-46877
Human endocrine responses to acceleration stress
p0416 A82-47333
Antidiuretic hormone responses to eucapnic and hypocapnic hypoxia in humans
p0017 A82-47377
Plasma prostaglandins, renin, and catecholamines at rest and during exercise in hypertensive humans
p0418 A82-47382
Minor peptides under normal and pathological conditions
p0420 A82-48214
Sympathoadrenal system of cosmonauts following 7-day flights
p0272 N82-25776
Effect of hypokinesia on some red blood indices and the condition of regulatory systems
[NASA-TM-76752] p0389 N82-30918

HORMONES
NT ADRENOCORTICOTROPIN (ACTH)
NT ALDOSTERONE
NT CORTICOSTEROIDS
NT CORTISONE
NT HYDROXYCORTICOSTEROID
NT PITUITARY HORMONES
NT PROSTAGLANDINS
NT THYROXINE
Effects of vasopressin administration on diuresis of water immersion in normal humans
p0088 A82-19491
Mechanisms for the regulation of the intracellular calcium distribution
p0115 A82-21774
Study of the simultaneous effects of hormones and radioprotectors in the exposure of animals to ionizing radiation
p0230 A82-30032
The role of protein phosphorylation in neutral and hormonal control of cellular activity
p0234 A82-30766
Hormone levels in the blood of patients with Meniere's disease and cochleovestibulopathies
p0262 A82-34475
Hormonal mechanisms of adaptation and training --- Russian book
p0289 A82-36976
The regulation of calcium exchange in the cells of different regions of the warm-blooded animal heart
p0320 A82-40313
Changes in mineralized tissues in the case of calcitonin and somatotropic hormone injections under hypokinesia
p0325 A82-40503

Root cell gravireaction - Hormone interaction
p0336 A82-40745
The effect of gravity on the distribution of plant growth substances in plant tissues
p0336 A82-40746
Measurement of central venous pressure and determination of hormones in blood serum during weightlessness
p0173 N82-18259
Volume regulating hormones and their role in the cardiovascular adaptation to zero gravity
p0179 N82-19822
Intracellular mechanism of the action of inhibin on the secretion of follicular stimulating hormone and of luteinizing hormone induced by LH-RH in vitro
[NASA-TM-76847] p0245 N82-22869
Acute heat/exercise stress in rats: Effects on fluid and electrolyte regulatory hormones
[AD-A110559] p0293 N82-26958
Monograph on new direction of chemistry and biology of peptide and protein bioregulators reviewed
p0351 N82-28979
Testosterone enhances C-14 2-deoxyglucose uptake by striated muscle --- sex hormones and muscle
[NASA-CR-169101] p0352 N82-28986
Activity of rat adrenal medula after flight aboard Cosmos-1129 biosatellite
p0395 N82-31905
HOT CORROSION
NT TEMPERATURE DEPENDENCE
HOT WEATHER
Characteristics of skin function in sailors in the tropics
p0170 A82-25189
Indicators of the erythrocytic system of rabbits in hot, humid climates
p0191 A82-25813
Under the hot sun --- human heat acclimatization in deserts
p0234 A82-30303
A longitudinal analysis of TH Index and identification of period of acute heat stress
p0253 A82-32290
Effect of physical training in cool and hot environments on +Gz acceleration tolerance in women
p0327 A82-40664
Individual features of the vegetative regulation of body functions during the adaptation of sailors in the tropics
p0370 A82-42996
HOWITZERS
Recommendations to avoid hearing damage during firing of the M198, FH70, M71 and FH77 towed horwitzers
[IZF-1981-13] p0273 N82-25784
HUGHES MILITARY AIRCRAFT
U MILITARY AIRCRAFT
HUMAN BEHAVIOR
Instructor pilot teaching behavior and student pilot stress in flight training
p0005 A82-11028
Well-being and privacy in space - Anticipating conflicts of interest
p0030 A82-15854
Emotions, sleep, and health
p0117 A82-21804
The effects of social facilitation on vigilance performance

Eye movement measurement of readability of CRT displays p0017 A82-12869
Validating manned system design and engineering change proposals [AD-A100997] p0022 A82-14703
The physiological response of anthropometrically selected female military personnel to the test parachuting environment p0023 A82-14957
In-flight physiological monitoring of tactical jet aircrewmen p0024 A82-14962
Factors affecting seat-man dynamics during emergency egress p0024 A82-14964
Human factors of outer space production --- Book p0029 A82-15851
Basic principles and methods for assuring the eficiency of astronaut activity in flight p0050 A82-16702
A physical model of human postural dynamics p0069 A82-17478
Psychological problems in the mutual adaptation of man and machine in control systems --- Russian book p0087 A82-19000

Evaluation of maximal and submaximal static muscle exertions
p0088 A82-19223

Control and automatic processing during tasks requiring sustained attention - A new approach to vigilance
p0088 A82-19225

Advanced aviation concepts evaluation through computer driven simulation --- human factors consideration in flight training simulator design
p0088 A82-19258

Survival in space --- spacesuit development
p0091 A82-20257

A program for assessing pilot mental state in flight simulators
[AIAA PAPER 82-0257] p0121 A82-22078

Human Factors Society, Annual Meeting, 24th, Los Angeles, CA, October 13-17, 1980, Proceedings
p0139 A82-22901

A case for early objective evaluation of candidate display formats --- of head-up displays based on pilot performance experiments
p0139 A82-22904

A strength and anthropometric comparison of young men and women --- examined for work station design
p0139 A82-22907

Computer assisted displays enabling internalization and reduction of operator workload in higher order systems, or, pushing the barrier of human control beyond second order systems
p0140 A82-22910

The structure of processing resources - Implications for task configuration and workload --- effects on human performance in man machine systems
p0141 A82-22923

Instrument scan - Is it an indicator of the pilot's workload
p0141 A82-22924

The event-related brain potential as an index of attention allocation in complex displays
p0142 A82-22928

Convergence-divergence with extended practice - Three applications --- human psychomotor task correlation with external measures
p0143 A82-22938

An application of manned simulation in crew station conceptual development
p0144 A82-22943

Finding a needle in a haystack when you've never seen a needle - A human factors analysis of SETI
p0144 A82-22950

Required performance levels for autocueing devices --- target acquisition in synthetic aperture radar
p0145 A82-22953

Operational performance measures for carrier landing - Development and application
p0146 A82-22960

Recognition of VDU presented colors by color defective observers --- Visual Display Unit
p0146 A82-22966

Effect of the Circutone seat on hemodynamic, subjective and thermal responses during prolonged sitting
p0147 A82-22969

Some current issues in workload assessment
p0147 A82-22971

Enhancing operator acceptance and noninterference in secondary task measures of workload
p0147 A82-22972

The physiological condition of press operators
p0154 A82-23285

Objectives and structure of a radiation safety service in medical institutions
p0155 A82-23298

A method for automatically evaluating operator performance
p0156 A82-23304

Comparison of some technical methods for the evaluation of whole-body vibration
p0156 A82-23400

Simplicity in command and control systems - A human factors consideration --- for man computer interface design
p0198 A82-27222

The evaluation of information display on the basis of the transinformation --- German book
p0209 A82-28394

The strength-endurance relationship in skeletal muscle - Its application to helmet design
p0211 A82-28484

An empirical equation of elementary motion --- of human body
p0279 A82-35674

Manned systems design: Methods, equipment, and applications; Proceedings of the Conference, Freiburg im Breisgau, West Germany, September 22-25, 1980
p0287 A82-36951

Methods - Past approaches, current trends and future requirements --- in human factors engineering
p0287 A82-36952

The human operator simulator - An overview
p0287 A82-36956

Statistical techniques for instrument panel arrangement
p0287 A82-36959

Analysis of human movements for workplace design
p0288 A82-36966

Screening designs used to estimate the relative effects of display factors on dial reading
p0289 A82-37183

Using realistic sensor, target, and scene characteristics to develop a target acquisition model
p0289 A82-37185

Perceptual discriminability as a basis for selecting graphic symbols
p0289 A82-37186

Achievements and possibilities in the research being carried out to protect workers in the 11th five-year plan from noise and vibration
p0311 A82-38573

Human factors of an RPV ground control station
p0319 A82-39749

From a man-machine system to a social-engineering system
p0322 A82-40447

Psychological investigation of pilot behavior during integration of control systems in the cockpit of passenger airliners --- German thesis
p0326 A82-40560

Human factor and flight safety
p0339 A82-40885

Vibration and comfort. I - Translational seat vibration
p0370 A82-42829

Vibration and comfort. II - Rotational seat vibration
p0370 A82-42830

Habitability support for manned missions of space 2000
[IAF PAPER 82-170] p0377 A82-44685

Symposium on Aviation Psychology, 1st, Ohio State University, Columbus, OH, April 21, 22, 1981, Proceedings
p0405 A82-46251

Human factors and aviation safety - A program of research on human factors in aviation
p0405 A82-46253

Assessing emergency interface design --- operator response-machine interaction model
p0405 A82-46256

Ergonomic aspects in cockpit lay-out
p0405 A82-46257

General aviation cockpit design features related to inadvertent landing gear retraction accidents
p0405 A82-46259

PAVE LOW III - Interior lighting reconfiguration for night lighting and night vision goggle compatibility
p0405 A82-46261

Simulation technology and the fixation phase --- skill acquisition during pilot training
p0407 A82-46274

The effect of morphological adaptation of personal flight equipment on the performance of oxygen systems
p0408 A82-46312

USSR report. Life sciences biomedical and behavioral sciences, no. 12
[JPRS-79338] p0012 N82-11762

Measuring/computing complex for automation of ergonomic experiments
p0012 N82-11765

HUMAN FACTORS ENGINEERING CONTD

Review of human and operational factors affecting
  the feasibility of the see-and-avoid concept
  [DFVLR-MITT-81-13] p0036 N82-12780
Anti-exposure technology identification for
  mission specific operational requirements
  [AD-A105070] p0036 N82-12784
Human control and regulation tasks
  p0037 N82-12787
Methodical study of the contribution of the human
  system to the insecurity of technological systems
  --- computerized accident analysis

China report: Science and technology, no. 128
  [JPRS-79047] p0037 N82-12789
Equipment design must incorporate ease of operation
  p0037 N82-12790
Determination of efficient methods of lift by
  comparing trained and untrained male and female
  lifters
  [AD-A100349] p0038 N82-13650
Linguistic and human performance considerations in
  the design of an anticipatory communication aid
  p0039 N82-13657
An investigation into pilot and system response to
  critical in-flight events, volume 1
  [NASA-CR-166243-VOL-1] p0040 N82-13662
An investigation into pilot and system response to
  critical in-flight events, volume 2
  [NASA-CR-166243-VOL-2] p0040 N82-13663
Visual/motion cue mismatch in a coordinated roll
  maneuver
  [NASA-CR-166259] p0040 N82-13664
Supervisory control of remote manipulation: A
  preliminary evaluation
  p0041 N82-13675
Design and development of a six degree of freedom
  hand controller
  p0045 N82-13706
Human supervision and microprocessor control of an
  optical tracking system
  p0046 N82-13715
A model for the control mode man-computer
  interface dialogue
  p0047 N82-13722
Taxonomy of the human factors in man machine systems
  p0048 N82-13726
Harmfulness of violent impact and airflow shocks
  p0079 N82-15742
Human body reaction to vibration
  p0080 N82-15743
The effects of rotation and oscillation: Aerial
  sickness
  p0080 N82-15744
A criterion for the disposal of M58 sleeping bags
  [IZF-1979-15] p0084 N82-15782
Hearing protection
  [IZF-1980-2] p0084 N82-15783
Evaluation of chemical protective facelets and
  comparison of four prototpyes
  [IZF-1980-15] p0084 N82-15784
Simulator data on human error probabilities
  [DE81-026094] p0085 N82-15786
Use of a television multipoint x-y tracker for
  determining the transmission of vibrations on
  human beings --- human factors in man machine
  systems
  p0085 N82-15787
Evaluation of man's endurance of local pressure to
  the head and objective assessment of hygienic
  specifications for protective helmets
  p0124 N82-16710
Pilot workload: A survey of operational problems
  [AD-A107758] p0129 N82-16745
Human-machine interface issues in the
  Multisatellite Operations Control Center-1
  (MSOCC-1)
  [NASA-TM-83826] p0130 N82-17875
DOT/FAA Human Factors Workshop on Aviation.
  Transcript, vol 1
  [AD-A107802] p0130 N82-17876
DOT/FAA Human Factors Workshop on Aviation.
  Transcript, volume 2
  [AD-A107803] p0130 N82-17877
Scatter diagrams based on the anthropometric
  survey of 2000 Royal Airforce aircrew (1970/1971)
  [RAE-TR-81017] p0175 N82-18857
Flight ergonomics in the aircraft industry
  personnel-ergonomic development
  [MBB-FE-301/S/PUB/44] p0177 N82-18872
Human engineering procedures guide
  [AD-A108643] p0177 N82-18873
Activities of the Committee on Human Factors:
  October 1, 1980 - September 30, 1981
  [AD-A108606] p0177 N82-18874
Review of health and safety aspects of video
  display terminals
  [CRC-TN-712-E] p0179 N82-19816
Human Factors in System Development: Experiences
  and Trends --- conference proceedings
  [FOA-A-56003-H9] p0182 N82-19833
Human factors and the real world --- limitations
  on the man machine systems design process
  p0182 N82-19840
Human factors in system development: Status and
  evaluation
  p0182 N82-19841
Ergonomic considerations in product design and
  evaluation --- product adaptation to man and his
  real needs and abilities
  p0182 N82-19842
Human factors and safety in nuclear power plant
  operation
  p0182 N82-19843
Work paradigms in human factors research
  p0182 N82-19844
Human factors for the future: Trends and
  speculations
  p0182 N82-19845
SAM: A configurable experimental text editor for
  investigating human factors issues in text
  processing and understanding
  [AD-A109331] p0182 N82-19846
Sourcebook of temporal factors affecting
  information transfer from visual displays
  [AD-A109907] p0222 N82-21880
Human engineering guides to design of displays for
  underwater applications
  [AD-A110317] p0224 N82-21898
Conceptual ergonomics: Early detection of field
  of vision restrictions by means of ergoscopy ---
  photography of scale models through endoscopes
  [DRIC-T-6253] p0225 N82-21899
Measurement of the headband force of circumaural
  hearing protectors
  [RAE-TM-FS-378] p0225 N82-21901
Anthropometric profile of the British car occupant
  [MIRA-1979/2] p0225 N82-21904
The role of biotechnology in the development of
  technical systems: A reference background
  [FOA-C-56026-H2] p0246 N82-22874
Analysis of pilot input concepts and devices into
  integrated display/control systems
  [MBB-FE-301/S/PUB/40] p0247 N82-22884
Study of protective mask type 33
  [FOA-C-40134-C2] p0247 N82-22888
Recognition of vehicle targets from the air: A
  field test
  [FOA-C-56027-H2] p0247 N82-22889
Psychological aspects of aerospace orientation
  p0265 N82-24258
Visual ergonomics in cartographic and lithographic
  work at the Topographic Service. Part 2:
  Requirements and recommendation for work stations
  [IZF-1981-14-PT-2] p0275 N82-25798
Direct and neighboring sensitivity changes
  produced by red and blue-white adapting fields
  [AD-A111080] p0299 N82-26993
Design and validation of a tracking test for
  forming matched groups for continuous tracking
  experiments
  [PB-49] p0302 N82-27985
Vibration and assessment of this flight factor by
  pilots
  p0351 N82-28976
Thermal garment
  [NASA-CASE-XMS-03694-1] p0354 N82-29002
Cold weather goggles. 2: Performance evaluation
  [AD-A114067] p0355 N82-29008
Flight crewmember workload evaluation
  [AD-A114167] p0356 N82-29012
Parametric identification of human operator models
  p0380 N82-30842
Control of muscle activity in unloaded conditions
  [NASA-TM-76883] p0390 N82-30927
USSR report. Life sciences: Biomedical and
  behavioral sciences, no. 19
  [JPRS-81442] p0391 N82-30935

Human factors and robotics: Current status and future prospects
[AD-A115042] p0392 N82-30945

A comparison of display formats for the electronic master monitor and advisory display system
[AD-A115127] p0392 N82-30946

Overview of a procedure for human-reliability analysis
[DE81-030016] p0392 N82-30947

Main directions and principles of psychological expertise of cosmonauts
p0393 N82-31893

Aircrew windblast protection concepts, development and evaluation
[AD-A115424] p0401 N82-31947

Advanced Instructional System: Applications for the future
[AD-A117144] p0425 N82-32980

An experimental evaluation of tactical symbol-design features
[AD-A115895] p0427 N82-32993

Five papers on human-machine interaction
[AD-A116031] p0427 N82-32995

Stress, anxiety, and cognitive interference: Reactions to tests
[AD-A113564] p0435 N82-34031

The effect of stimulus-central processing-response compatibility and resource competition on pilot performance
[AD-A113754] p0435 N82-34032

Parametric identification of human operator models
p0437 N82-34045

Analysis of driver performance under reduced visibility
p0442 N82-34075

A computer aided workstation assessor for crew operations - WOSTAS
[AD-A116045] p0443 N82-34079

A systems approach for crew station design and evaluation
[AD-A115663] p0443 N82-34080

Blue Flight Coverall Program
[AD-A116056] p0443 N82-34082

Repeated measures of human performance: A bag of research tools

Evaluation of four-color plan view display console
[AD-A117097] p0444 N82-34085

A pilot study of human factors in SAR
[AD-A117917] p0444 N82-34087

HUMAN PATHOLOGY

Potential for the use of biorhythm structures for the prognosis of the course of a disease
p0028 A82-15715

Disturbances of eye-head coordination during lateral gaze in labyrinthine disease
p0069 A82-17471

A hypothetical explanation for periodic alternating nystagmus - Instability in the optokinetic-vestibular system
p0069 A82-17474

Temporal bone characteristics in Meniere's disease
p0070 A82-17481

Liver pathology in aircrew
p0072 A82-18734

Forensic dentistry --- in aircraft accident fatalities identification
p0073 A82-18737

The healthy and the diseased human brain --- Russian book
p0087 A82-18872

Changes in microcirculatory flow with respiratory insufficiency
p0094 A82-20323

The role of biofeedback in the adaptive regulation of pathological bioelectric brain activity
p0094 A82-20328

Investigation and evaluation of cardiac arrhythmias in healthy young persons
p0110 A82-21710

Effect of cooling of the rhythmo-inotropic ratio in a pathologically altered myocardium
p0112 A82-21740

Summary of a discussion on the problem of the 'biological norm' /in relation to an assessment of criteria of the harmfulness of chemical effects/
p0113 A82-21750

Clinical results on thymectomy in patients with myopathy in relation to the degree of muscular weakness
p0113 A82-21755

Hygienic standards for industrial noise
p0116 A82-21794

Blood serum nuclease activity in healthy persons and patients with various hematological diseases
p0118 A82-21813

Trial on the use of stabilography in the medical supervision of boxers
p0118 A82-21817

Vestibulovascular responses in inner ear dysfunction
p0151 A82-23255

Phase phenomena in the vestibular analyzer - Vestibular recruitment
p0151 A82-23256

Changes with age in the cholin- and adrenergic innervation of the human heart
p0152 A82-23268

Microcirculatory pathology under conditions of tissue arterial blood flow insufficiency
p0153 A82-23272

The central hemodynamics of patients with sepsis and acute renal insufficiency
p0153 A82-23276

Improving the medical care of navy personnel
p0155 A82-23301

Neurohumoral regulation of microcirculation in ischemic illness
p0159 A82-24493

Investigation of noise sickness
p0159 A82-24494

Additional criteria of cerebral hemodynamic disorders limiting physical loads in patients with hypertension
p0159 A82-24495

Certain neurohormonal and blood-coagulation changes in the case of early symptoms of vibration-related pathology in miners
p0160 A82-24504

Progress in the study of occupational diseases at the F. F. Erisman Hygiene Research Institute in Moscow
p0160 A82-24505

The differential diagnosis of peripheral vasomotor impairments of vibrational and nonvibrational origin
p0160 A82-24507

Human predictive ability in univocally determined situations for normal and pathological states
p0162 A82-24532

Chronobiological aspects in the science of health resorts and physiotherapy
p0162 A82-24536

Combined rehabilitative and therapeutic measures in space medicine
p0163 A82-24547

The prognostic value of the central hemodynamic parameters in patients with acute myocardial infarction
p0164 A82-24553

Tissue hypoxia and its correction --- Russian book
p0168 A82-24910

Relation between high density lipoprotein cholesterol and coronary artery disease in asymptomatic men
p0169 A82-25134

Limitations of echocardiographic techniques in evaluation of left atrial masses
p0169 A82-25135

Two dimensional echocardiographic detection of intraatrial masses
p0169 A82-25136

Characteristics of skin function in sailors in the tropics
p0170 A82-25189

Main trends in combatting oxygen hunger
p0186 A82-25686

Connection of motor regimen with morbidity in workers
p0187 A82-25695

Seasonal vascular tension variations in patients with cerebral circulatory disorders under the conditions of an arid zone
p0189 A82-25715

Thermoregulation and morbidity in coal miners
p0191 A82-25815

Phenytoin - Ineffective against acute mountain sickness
p0192 A82-26231

Sarcoidosis in aircrew
p0194 A82-26240

Follow-up of 14 abnormal electroencephalograms in asymptomatic U.S. Air Force Academy cadets
p0194 A82-26242

Pathological anatomy and ultrastructure of the heart /Combined morphological investigation of the general pathological process in the myocardium/ --- Russian book
p0194 A82-26525

Stenoses of the carotid artery and disorders of the cerebral circulation /clinical and angiographic comparisons/
p0201 A82-27752

Rheoencephalographic signs of inadequate cerebral blood supply in incipient cerebrovascular insufficiency
p0201 A82-27755

The use of ultrasonic Doppler techniques in the diagnosis of arterial occlusions in the basis cerebri - A Doppler angiography study
p0201 A82-27756

Problems of the operational medical in-flight monitoring of pilots
p0203 A82-27768

Electroacupuncture in the complex treatment of trifacial neuralgia
p0203 A82-27775

The norm and pathology in sports
p0204 A82-27782

Physiological criteria and methods for increasing the effectiveness of correction of hypoxic states
p0205 A82-27797

Decimetric waves in the combined therapy of patients with cerebral circulatory insufficiency
p0239 A82-31507

Foreign body extraction from the left ptergopalatine fossa under fluoroscope control
p0242 A82-31539

Paradoxical akinesia syndrome in cases of acute carbon monoxide poisoning
p0242 A82-31544

An analysis of the risk of human cardiac damage during +Gz stress - A review
p0251 A82-32001

Myoglobinemia as a criterion for the early diagnosis of acute myocardial infarction /Literature review/
p0259 A82-33726

Glyceroaldehyde phosphatedehydrogenase from human muscles in atherosclerosis
p0262 A82-34681

The use of trenthalum in acute vestibulocochlear disorders in patients with meningococcal infection
p0280 A82-35689

Some questions open to discussion in clinical labyrinthology
p0280 A82-35694

Affections of the upper respiratory tracts in transport-fleet sailors and the prophylaxis of these affections on long voyages
p0281 A82-35696

Familial intermittent diplopia - A report of two cases
p0284 A82-35916

The protective role of the forebrain with respect to pathological cardiac reflexes
p0309 A82-38543

Diagnosis and organization of the therapy of patients with dirorders of blood circulation in the brain
p0310 A82-38554

A study of temporary absences from work arising from disorders of the circulatory system
p0310 A82-38555

Use of the thermovision method in the prophylactic examination of polar workers
p0310 A82-38565

Central nervous dysfunctions after near-miss accidents in diving
p0321 A82-40443

The achievements of investigations carried out in the years 1976-1980 on the problem of insufficient blood circulation and heart rhythm disturbances
p0344 A82-41501

The anatomy and topography of the human bronchopulmonary lymph nodes
p0368 A82-42624

Classification of pathological states of the stato-kinetic /vestibular/ analyzer
p0369 A82-42630

Morphological criteria for diagnosing pathologies of the thymus with myasthenia
p0369 A82-42633

Functional conditions of the brain and cerebral pathology
p0369 A82-42634

Neurophysiological mechanisms of the compensation of motor disturbances in the presence of lesions of the pyramid system /An electromyographic analysis/
p0369 A82-42635

Synthesis of adriamycin-coupled polyglutaraldehyde microspheres and evaluation of their cytostatic activity
p0409 A82-46540

The compensatory reactions following focal vascular lesions of the cerebral hemisphere as evaluated by electroencephalography
p0409 A82-46705

Clinical-EEG comparisons during vegetative-vascular and visceral paroxysms
p0410 A82-46706

The transformation of lipids into glycogen in animal and human cells
p0413 A82-46892

Application of ATP assay technique, developed to detect extraterrestrial life, for rapid detection of human infections --- adenosine triphosphate
p0415 A82-47277

Minor peptides under normal and pathological conditions
p0420 A82-48214

Physiopathology and pathology of spinal injuries in aerospace medicine
[AGARD-AG-250(ENG)] p0359 N82-29070

HUMAN PERFORMANCE
NT ASTRONAUT PERFORMANCE
NT BLACKOUT PREVENTION
NT OPERATOR PERFORMANCE
NT PILOT PERFORMANCE

A comparison between over-the-shoulder and computer-derived measurement procedures in assessing student performance in radar air traffic control
p0005 A82-11027

An evaluation of alphanumeric, graphic, and color information displays
p0017 A82-12871

Effects of extended practice on dual-task tracking performance
p0017 A82-12875

Performance changes during exposure to +Gz stress
p0025 A82-15517

Changes in blood indicators upon the inclusion of trace elements in the diet
p0049 A82-16274

Concerning a model of human activity
p0050 A82-16704

An investigation of memory during the process of adaptation to mountain conditions
p0061 A82-17138

Sigma-movement and Sigma-nystagmus - A new tool to investigate the gaze-pursuit system and visual-movement perception in man and monkey
p0066 A82-17450

Differences in eye movement data recorded by electro-oculography and corneal reflection techniques
p0088 A82-19224

Control and automatic processing during tasks requiring sustained attention - A new approach to vigilance
p0088 A82-19225

Effects of relative metabolic rate and heart rate variation on the performance of flight attendants
p0108 A82-21680

Changes in the main characteristics of the central hemodynamics of healthy individuals and hypertension patients during physical exercise
p0110 A82-21711

The effects of elevated environmental temperature combined with radiation on the organism

p0113 A82-21752
The physical activity of humans as a social and biological problem
p0114 A82-21760
The effects of emotional activation on the spatial synchronization of human brain biopotentials
p0116 A82-21785
A study of tropomyosine in human muscular and nonmuscular organs
p0117 A82-21806
Predicting the potentials of young swimmers based on clinical and physiological data
p0118 A82-21814
Human Factors Society, Annual Meeting, 24th, Los Angeles, CA, October 13-17, 1980, Proceedings
p0139 A82-22901
The effects of noise - A review --- on human performance of complex tasks
p0141 A82-22921
The structure of processing resources - Implications for task configuration and workload --- effects on human performance in man machine systems
p0141 A82-22923
Selection of Performance Evaluation Tests for Environmental Research --- human performance measures
p0142 A82-22930
The validity of task analytic information to human performance research in unusual environments
p0142 A82-22931
A catalogue of Performance Evaluation Tests for Environmental Research
p0143 A82-22935
Comparison of memory tests for environmental research
p0143 A82-22936
Finding a needle in a haystack when you've never seen a needle - A human factors analysis of SETI
p0144 A82-22950
The effects of social facilitation on vigilance performance
p0146 A82-22963
The effects of left hand fatigue on right hand performance
p0147 A82-22970
Variation in catecholamine excretion in adolescents under mountain conditions
p0150 A82-23174
Vibration sensitivity of workers in the main occupations of shipbuilding
p0155 A82-23299
The work capacity of seamen under an altered schedule of work and rest
p0155 A82-23302
Effects of attitudes on the performance of supervisors
p0156 A82-23310
The effect of prolonged practice of pursuit eye movement
p0157 A82-24030
The phase structure in the process by which a system of motions is formed in gymnasts
p0158 A82-24482
A mediation method for solving problems of 'quick-wittedness'
p0162 A82-24530
A comparative study of the effects of constant and intermittent noise on the acoustic analyzer
p0163 A82-24543
The effects of noise on the physiological condition of blood leucocytes
p0163 A82-24544
The isoenzyme spectrum of serum lactate dehydrogenase as a function of age in healthy individuals
p0164 A82-24554
Characteristics of cerebral somato-sensory evoked potentials under various conditions for the formation of simple motor reactions
p0165 A82-24830
Regulation of Pa/CO2/ and ventilation in humans inspiring low levels of CO2
p0168 A82-24912
Renin, aldosterone, and converting enzyme during exercise and acute hypoxia in humans
p0168 A82-24914
Heart contractility at pressure loads induced by ischemia of exercised muscle in humans
p0169 A82-24916
A psychophysiological analysis of the memory changes undergone by humans in adapting to new climatic and geographic conditions
p0187 A82-25694
Comprehensive evaluation of the human functional state using ergometry
p0206 A82-27804
Sleep loss, recovery sleep, and military performance
p0207 A82-28025
Altitude and hypoxia as phase shift inducers --- of human circadian rhythms
p0210 A82-28480
Sparing effect of chronic high-altitude exposure on muscle glycogen utilization
p0229 A82-29556
A model of human decisionmaking in multiple process monitoring situations
p0231 A82-29671
Effects of novodrine and physical exercise on hemodynamics and coronary blood supply in the healthy human --- catecholamine effects
p0236 A82-31157
Performance effects of noise intensity, psychological set, and task type and complexity
p0237 A82-31389
Reflection of individual characteristics of human and animal higher nervous activity in the nature of heart rate changes
p0238 A82-31486
Some indicators of human adaptation to humid tropical conditions
p0238 A82-31495
A comparative characterization of hemodynamics and respiration under static and dynamic loads
p0238 A82-31503
The functional reserves of athletes
p0239 A82-31504
Changes in the peroxide metabolism of weight-lifters and wrestlers under the conditions of systematic muscular activity
p0239 A82-31505
The effects of social isolation on human functioning

Head-temperature effects on physiology, comfort, and performance during hyperthermia
p0283 A82-35901
Exercise performance after ventilatory work
p0286 A82-36037
Analysis of human movements for workplace design
p0288 A82-36966
Factors of the natural resistance of the body and methods for studying them
p0319 A82-40308
Task categorization and the limits of human performance in extreme heat
p0321 A82-40439
Thermoregulation and the menstrual cycle
p0321 A82-40441
Physical activity and human requirements for energy and food substances
p0324 A82-40487
Running in circles --- track radius effects on human running speed
p0327 A82-40661

Mode of mutual influence of stimulation-characteristics in the visual processing system --- German thesis
p0381 A82-41445

The assimilation of vitamin C in seamen during voyages at high latitudes
p0382 A82-41865

A command and control device for a man-machine system - Fabrication of a platform and trials --- French thesis
p0365 A82-41699

Hemodynamic response to converting enzyme inhibition at rest and exercise in humans
p0375 A82-44135

The activity of the microsomal hydroxylases according to age in healthy individuals
p0413 A82-46878

Cardiovascular effects of simulated zero-gravity in humans
[IAF PAPER 82-189] p0414 A82-46977

The human spirit in space --- long duration space flight stress
p0416 A82-47279

Control of ventilation in climbers to extreme altitude
p0418 A82-47381

Pulmonary function in normal humans with exercise and temperature-humidity stress
p0419 A82-47391

Evaluation of a method for estimating cardiac output from a single breath in humans
p0419 A82-47392

Linguistic and human performance considerations in the design of an anticipatory communication aid
p0039 N82-13657

The influence of motion cues on driver-vehicle performance in a simulator
p0042 N82-13681

Multiple man-machine interfaces
p0042 N82-13682

A model of the human observer and decision maker
p0046 N82-13714

Comparative antihypoxic efficacy of pressure chamber conditioning and fasting of man
p0127 N82-16729

An analysis of cognitive mapping skill
[AD-A106185] p0128 N82-16740

Ability differences and cognitive mapping skill
[AD-A106389] p0128 N82-16741

Pilot workload: A survey of operational problems
[AD-A107758] p0129 N82-16745

Physical performance tasks required of U. S. Marines operating in a desert environment
[AD-A107866] p0136 N82-17063

Time-sharing manual control and memory search: The joint effects of input and output modality competition, priorities and control order
[AD-A108721] p0176 N82-18867

Identification of the adaptive feedback of the human motor system using the Response Difference Method (RDM)
[WTHD-134] p0176 N82-18869

First All-Union Symposium on Problems of Evaluating and Forecasting Man's Functional States in Applied Physiology
p0217 N82-20859

Female and male size, strength and performance: A review of current literature
[AD-A109270] p0218 N82-20868

Computer-Managed Instruction in Navy Technical training: An attitudinal survey
[AD-A109660] p0218 N82-20871

Diagnosticity and the base-rate effect
[AD-A109731] p0223 N82-21091

Effects of whole and partial body exposure to dry heat on certain performance measures
[AD-A100305] p0246 N82-22880

Anthropometric program analysis of reach and body movement
p0248 N82-23124

Dimensionality of measured achievement over time
[AD-A110955] p0249 N82-23981

Individual differences in dual task performance
[AD-A110760] p0267 N82-24826

The event related brain potential as an index of information processing, cognitive activity, and skill acquisition: A program basic research
[AD-A111057] p0267 N82-24827

A rationale for the development of cut-off scores --- task mastering
[IZF-1981-3] p0267 N82-24828

Search times in two-dimensional tables
[IZF-1981-10] p0268 N82-24832

Performance measurement and Navy's Tactical Aircrew Training System
[AD-A110669] p0273 N82-25786

The production of specified electrocortical activity as a measurable task
[AD-A111422] p0294 N82-26965

An ergometer for concentric and eccentric muscular contraction
[AD-A111061] p0295 N82-26971

Latent trait model contributions to criterion-referenced testing technology
[AD-A112040] p0297 N82-26985

Performance test objectivity: A comparison of rater accuracy and reliability using three observation forms
[AD-A111077] p0301 N82-27977

Empirical studies of procedural flaws, impasses, and repairs in procedural skills
[AD-A113791] p0302 N82-27981

Organizational climate: Another look at a potentially important constant
[AD-A113953] p0302 N82-27982

Informational need of emotional stress --- effect on operator performance of visual tasks
p0058 A82-16943
Vestibular influence upon head-eye coordination
p0069 A82-17470
Human vertical fusional response under open and closed loop stimulation to predictable and unpredictable disparity presentations
p0071 A82-17571
Electroencephalographic correlates of the differentiation between verbal stimuli during natural night sleep in humans
p0093 A82-20315
The effects of narcotic analgesics on animal sensitivity to hypoxia
p0093 A82-20316
A systems analysis of human motor reactions in various modes of operation of goal-directed behavioral acts
p0111 A82-21729
The thermal response of a human in the near-zone of a resonant thin-wire antenna
p0121 A82-22206
Theories of vigilance - A modern perspective
p0146 A82-22964
Evaluation of the psychological compatibility of drivers in a rally team
p0158 A82-24477
Establishing methods of investigating individual characteristics of making decisions in situations of conflict
p0162 A82-24528
Psychophysical studies of perception and memory --- Russian book
p0167 A82-24901
Scales of subjective intensities and judgment processes
p0167 A82-24904
Dynamic approach to the analysis of the signal detection process --- in psychophysics
p0168 A82-24905
Systemic mechanisms of emotional stress --- Russian book
p0170 A82-25231
An introduction to disaster - Some considerations of a psychological nature
p0193 A82-26236
Trace reactions and the ambient temperature --- organism, organ and tissue thermoregulatory reactions
p0209 A82-28454
Effects of geomagnetic field disturbances on the diurnal rhythm of physiological functions
p0235 A82-31152
Electrometric studies of the human gustatory analyzer in healthy persons and in the simulation of weightlessness
p0242 A82-31538
Physiological and hygienic analysis of the response of young truck drivers to their work load
p0311 A82-38567
Changes in the human visually evoked cortical potential in response to chromatic modulation of a sinusoidal grating
p0314 A82-38795
Dynamics of subjective discomfort in motion sickness as measured with a magnitude estimation method
p0321 A82-40438
Psychic stress in athletic activity
p0325 A82-40489
Certain psychological and tactical aspects of athlete activities during competitions
p0345 A82-41506
Variability in human response to whole-body vibration - The effects of instructions
p0374 A82-43675
Assessing emergency interface design --- operator response-machine interaction model
p0405 A82-46256
Load compensating reactions to perturbations at wrist joint in normal man
p0045 N82-13708
Phenomena of fluctuation of human reaction to antiorthostatic position
p0125 N82-16721
Human reactions to elf electric and magnetic fields: An annotated bibliography of current literature
[PB82-102567] p0128 N82-16737
Catecholamine levels in fit and nonfit males when exposed to an emotional stress
p0178 N82-19813
Development and persistence of adaptation to ozone exposure in ozone-sensitive Southern California residents
[PB82-125899] p0223 N82-21889
Man's adaptive reactions to acoustic parameters of isolated habitats
p0271 N82-25773
Human external respiration and gas exchange in acute period of adaptation to immersion in water
p0349 N82-28959
Reaction to diminished circulating blood volume in individuals who are susceptible and insusceptible to motion sickness (seasickness)
p0349 N82-28960
A comprehensive system model for motion/space sickness: Preliminary results
p0381 N82-30855
New aspects of functional system theory
p0391 N82-30936
Effect of synthesized propeller vibration on passenger annoyance in a turboprop interior noise environment
[NASA-TM-84515] p0400 N82-31944

HUMAN RESOURCES
The human role in space
[NASA-TM-82482] p0303 N82-27987

HUMAN TOLERANCES
A self-contained, man-borne biomedical instrumentation system in the flight testing of naval weapons systems
[AIAA PAPER 81-2403] p0021 A82-13890
System to measure head motion during parachute opening shock
[AIAA PAPER 81-2517] p0021 A82-13914
The oxygen regime of the human organism under conditions of extreme hypobaric hypoxia
p0027 A82-15709
Influence of 15-day alimentary starvation on human tolerance to the breathing of pure nitrogen
p0027 A82-15710
Changes in Hageman factor system indicators during human adaptation to intense physical loading
p0054 A82-16816
Natural resistance of the organisms of seamen during postcruise rest
p0093 A82-20311
Microcirculation, tolerance to physical strain, and certain homeostasis parameters in patients with angina pectoris
p0094 A82-20324
Evaluation of safety of decompression from the critical volume of gas bubbles formed in the organism
p0110 A82-21717
Seasonal rhythm of the immune reactivity and heart tolerance to physical load in patients with ischemic heart disease
p0117 A82-21802
Microwave and radio-frequency exposure limits
p0139 A82-22435
Criteria and the quantitative evaluation of human disturbance tolerance --- external electrical stimuli effects on athlete performance
p0158 A82-24478
Methodological aspects of studying the immune system in athletes
p0158 A82-24481
A basis for the optimal duration of work breaks in the presence of noise of various intensities during the course of a work shift
p0160 A82-24510

The relationship between the individual properties of a human operator and work efficiency and tolerance to the monotony of work
p0162 A82-24531
The dependence of the productivity of repetitious activity and tolerance to monotonous labor on the individual characteristics of the human operator
p0165 A82-24833
Basis for the refinement of permissible levels of local vibration
p0188 A82-25702
A comparison of models to predict annoyance reactions to noise from mixed sources
p0227 A82-29168
Effects of ascorbic acid on the elevation of human cold tolerance
p0233 A82-30027
Under the hot sun --- human heat acclimatization in deserts
p0234 A82-30303
Effects of starvation on human tolerance to acute hypoxia
p0236 A82-31159
Individual sensitivity to noise
p0240 A82-31521
Hemodynamic response during combined tilt table-isometric exercise test and +Gz acceleration tolerance
p0251 A82-31832
Discomfort judgments of translational and angular whole-body vibrations
p0252 A82-32006
Increases in plasma beta-endorphin/beta-lipotropin immunoreactivity after treadmill running in humans
p0256 A82-32839
The prevention of dysadaptive changes in sailors at sea
p0259 A82-33728
Human adaptation in arid regions
p0281 A82-35828
Stages of the adaptation of human lungs in conditions of the Far North
p0282 A82-35829
Strain on the regulation systems as a condition of successful adaptation to heat
p0282 A82-35837
Rate of change of physiological functions as an index of the degree of adaptation
p0283 A82-35840
Noise and annoyance - A new methodology
p0289 A82-37187
The effect of certain characteristics of work motions on the tolerance of hand muscles to static exertions
p0311 A82-38568
Dynamics of subjective discomfort in motion sickness as measured with a magnitude estimation method
p0321 A82-40438
Subjective response to negative air ion exposure
p0321 A82-40446
Ultra-high impact free-fall survival
p0329 A82-40684
The tolerance to physical loads in women during menopause complicated by climacteric neurosis with cardialgia
p0344 A82-41495
Studies directed toward improving hygienic standards pertaining to total-body vibration resulting from heavy moving equipment
p0368 A82-42619
Methods of human adaptation to heat
p0370 A82-42993
Analysis of methods for evaluating thermal stress --- effects on human beings
p0370 A82-42994
Hormone response of normal and intermittent cold-preadapted humans to continuous cold
p0375 A82-44137
Dynamic preload as an impact protection concept
p0376 A82-44290
Equipment design must incorporate ease of operation
p0037 N82-12790
Repair of radiation damage in mammalian cells
[DE81-030824] p0075 N82-14800
Noise and sense of hearing
p0080 N82-15747
The physiological effect of low-air-pressure anoxia
p0080 N82-15748
Dangers of explosive decompression
p0080 N82-15750
The relationship of body temperature to environmental temperature
p0080 N82-15752
Evaluation of man's endurance of local pressure to the head and objective assessment of hygienic specifications for protective helmets
p0124 N82-16710
Human tolerance of rotation at different levels of hypergravity
p0216 N82-20852
Comparative evaluation of pressure chamber conditioning and man's adaptation to hypoxia at high altitude
p0216 N82-20853
Human reaction to low frequency motion: Preliminary studies --- slip motion and sea roughness
[RAE-TM-FS-365] p0222 N82-21084
Recording basic climatic parameters and their processing into integrated heat stress indices
[DRIC-T-6292] p0223 N82-21085
Safe wearing times for impermeable chemical protective clothing
[IZF-1980-11] p0250 N82-23986
Sleep deprivation and exercise tolerance
[AD-A113043] p0294 N82-26963
The beginnings of aeromedical acceleration research
[AD-A111040] p0296 N82-26978
Spinal stresses in flight
p0359 N82-29873
Parachuting
p0359 N82-29878
Limits of human tolerance for impacts in free fall
p0360 N82-29879
Effects of prior physical exertion on tolerance to hypoxia, orthostatic stress, and physical fatigue
[AD-A114741] p0432 N82-34009

HUMAN WASTES
NT SWEAT
NT URINE
Treatment of CELSS and PCELSS waste to produce nutrients for plant growth --- Controlled Ecological Life Support Systems and Partially Controlled Ecological Life Support Systems
[ASME PAPER 81-ENAS-19] p0003 A82-10907
Possible use of house fly larvae for utilization of organic waste in biological life-support systems
p0125 N82-16719
Absorbent product and articles made therefrom
[NASA-CASE-MSC-18223-2] p0298 N82-26960
Preparation and analysis of standardized waste samples for Controlled Ecological Life Support Systems (CELSS)
[NASA-CR-166392] p0426 N82-32988

HUMIDITY
The wearing of hydrophilic contact lenses aboard a commercial jet aircraft. I - Humidity effects on fit
p0193 A82-26234
Some indicators of human adaptation to humid tropical conditions
p0230 A82-31495
Auxiliary cooling - Comparison of air-cooled vs. water-cooled vests in hot-dry and hot-wet environments
p0321 A82-40440
Auxiliary cooling: Comparison of air-cooled versus water cooled vests in hot-dry and hot-wet environments
[AD-A110554] p0275 N82-25797
Effectiveness of five water-cooled undergarments in reducing heat stress of vehicle operating in a hot wet or hot dry environment
[AD-A107105] p0299 N82-26994

Complex physiological-hygienic characteristics of a new work-rest regime for seamen
p0113 A82-21748
Summary of a discussion on the problem of the 'biological norm' /in relation to an assessment of criteria of the harmfulness of chemical effects/
p0113 A82-21750
Progress in the study of occupational diseases at the F. F. Erisman Hygiene Research Institute in

Rescue
p0160 A82-24505
Physiological and hygienic characteristics of the work of open-hearth steel smelters
p0187 A82-25700
Physiological and hygienic analysis of the response of young truck drivers to their work load
p0311 A82-38567
Setting hygienic standards to be applied to environmental standards pertaining to the rolling stock of railroads and subway systems
p0311 A82-38578
Mental hygiene of sailors --- Russian book
p0372 A82-43602
Methods used in hygiene for the investigation of the nonspecific resistivity of the body
p0412 A82-46878
The potable water
p0078 N82-15725
Physiological and hygienic evaluation of vibration in the cockpit of a cargo helicopter
p0124 N82-16709
Evaluation of man's endurance of local pressure to the head and objective assessment of hygienic specifications for protective helmets
p0124 N82-16710
Hygienic principles of ongoing monitoring of quality of recycled water during space flights
p0125 N82-16717
Toxicological and hygienic aspects of improving additional purification of water reclaimed from urine
p0125 N82-16718

HYOSCINE
The influence of scopolamine on the formation and fixation of temporary connections in rats with altered brain serotonin levels
p0026 A82-15701
Antimotion-sickness efficacy of scopolamine 12 and 72 hours after transdermal administration
p0320 A82-40437
Neurochemical background and approaches in the understanding of motion sickness
[NASA-CR-3569] p0350 N82-29865

HYPERBARIC CHAMBERS
Evaluation of natural convection under hyperbaric conditions
p0029 A82-15720
Oxygen tension in albino rat abdominal cavity organs in normo- and hyperoxybaria
p0060 A82-16969
Brain monoamine oxidase activity during cold adaptation and under the combined effects of cold and hyperbaric oxygenation
p0090 A82-19746
Deep-sea bacteria - Isolation in the absence of decompression
p0255 A82-32800

HYPERCAPNIA
Analysis of lung vasomotor responses to alveolar hypoxia and hypercapnia
p0002 A82-10749
The role of extracellular O2 and CO2 tensions in membrane mechanisms of cerebral arterial smooth muscle regulation
p0090 A82-19747
The significance of airflow resistance to changes in responses to increasing hypercapnia
p0094 A82-20327
Regulation of Pa/CO2/ and ventilation in humans inspiring low levels of CO2
p0168 A82-24912
Ventilatory responses at rest and during exercise in marathon runners
p0169 A82-24919
Arterial CO2 response to low levels of inspired CO2 in awake beagle dogs
p0197 A82-26815
Mechanical properties of rat lung during prolonged hypercapnia
p0255 A82-32831
Blood-gas CO2 equilibration in lungs of unanesthetized dogs during hypercapnia
p0256 A82-32834
Comparison of human vocal cord movements during isocapnic hypoxia and hypercapnia
p0290 A82-37927
The accuracy of venturi masks at altitude
p0321 A82-40445
Ventilatory and heart rate responses to hypoxia and hypercapnia during sleep in adults
p0339 A82-41206
Pulmonary stretch receptor discharge patterns in eupnea, hypercapnia, and hypoxia
p0340 A82-41210
Conjugated changes of the resistance and blood filling of cerebral vessels during shifts in the blood gas composition
p0373 A82-43635
Altitude hypoxia and hypercapnic mixtures
p0407 A82-46308
Effect of short-term sleep loss on breathing
p0417 A82-47379
Cerebrovascular responses to CO2 after inhibition of sympathetic activity
p0418 A82-47380
A hereditary defect in the sensitivity to hypoxia during normal sensitivity to hypercapnia
p0420 A82-48217
Possible impairment of respiratory regulation under hyperbaric nitrogen narcosis
p0349 N82-28964

HYPERGLYCEMIA
Hypo-and hyperglycemia in rats: Effects on the ability to work in the heat
[AD-A111711] p0356 N82-29849

HYPERKINESIA
The effect of the motor activity regime on the development, conservation, and regeneration of defensive conditioned reflexes in rats
p0092 A82-20305
Reaction to hypokinesia and hyperkinesia of somatochrome neurons in the motor zone of the cerebral cortex in rabbits
[NASA-TM-76885] p0390 N82-30925

HYPEROPIA
Hyperacuity and interpolation by the visual pathways
p0371 A82-43100

HYPEROXIA
Frequency analysis of EEG in rats during the preconvulsive period of O2 poisoning
p0005 A82-11029
Impaired surfactant phospholipid metabolism in hyperoxic mouse lungs
p0018 A82-13230
Pulmonary injury in rats following continuous exposure to 60% O2 for 7 days
p0019 A82-13232
Extra-erythrocytic hemoglobin and iron-bearing hemoglobin destruction products - A system for the amplification of the toxic effects of hyperoxia
p0052 A82-16803
Oxygen tension in albino rat abdominal cavity organs in normo- and hyperoxybaria
p0060 A82-16969
The state of the air-blood barrier in hyperoxia
p0060 A82-16970
Monitoring the condition of the organism under hyperoxic conditions
p0061 A82-17141
Plasma erythropoietins during training for hyperoxic conditions
p0062 A82-17147
Effects of hyperbaric oxygenation on homocarnosine metabolism in the brains of rabbits of various ages
p0240 A82-31526
Reduction of the edema of acute hyperoxic lung injury by granulocyte depletion
p0256 A82-32838
Effect of dietary fat on pulmonary enzymes and toxicity during normobaric hyperoxia
p0283 A82-35902
Pulmonary oxygen toxicity - Possible role of ammonia in desorbing lung surfactant
p0283 A82-35908
Enzymes that detoxify active forms of oxygen and lipoperoxide in experimental ischemia and myocardial infarction
p0308 A82-38540
The use of hyperoxic mixtures for the diagnosis of latent disturbances in the external respiration system
p0322 A82-40457
Protection from O2 toxicity by preexposure to hypoxia - Lung antioxidant enzyme role
p0341 A82-41217

A critical value for O2 transport in the rat
p0375 A82-44141
Hyperoxia inhibits stimulated superoxide release by rat alveolar macrophages
p0376 A82-44143
Oxygen exposure and extrapulmonary respiratory tract ciliogenesis in adult male rats
p0417 A82-47340

**HYPERPNEA**
Regulation of Pa/CO2/ and ventilation in humans inspiring low levels of CO2
p0168 A82-24912
Delayed kinetics of respitratory gas exchange in the transition from prior exercise
p0230 A82-29561
Exercise performance after ventilatory work
p0286 A82-36037
Effects of glycogen depletion and pedaling speed on 'anaerobic threshold'
p0286 A82-36038

**HYPERTENSIN**
BT POLYPEPTIDES

**HYPERTENSION**
A follow-up on blood pressure in two groups of air traffic controllers
p0000 A82-12314
Northern pulmonary arterial hypertension
p0061 A82-17143
The possibility of using mathematical methods for predicting the results of the surgical treatment of patients with vasorenal hypertension
p0109 A82-21709
Changes in the main characteristics of the central hemodynamics of healthy individuals and hypertension patients during physical exercise
p0110 A82-21711
The role of natriuresis in the prophylactic effect of adaptation to hypoxia in the case of hereditary hypertension
p0110 A82-21712
Echoencephalographic indices in patients with hypertensive disease under the effect of functional loads
p0113 A82-21753
Emotional stress as a factor in cardiovascular disorders
p0117 A82-21796
Criterion for the evaluation of arterial pressure response to bicycle ergometer exercise during treatment for hypertension
p0152 A82-23267
Changes in regional and central hemodynamics during the treatment of hypertensive patients with obsidan, apressin and their combination
p0153 A82-23271
Additional criteria of cerebral hemodynamic disorders limiting physical loads in patients with hypertension
p0159 A82-24495
The effect of adapting to high-altitude hypoxia on certain indicators of catecholamine metabolism in rats in the case of spontaneous hereditary hypertension
p0202 A82-27750
Incidence of ischemic heart disease and arterial hypertension in sedentary workers
p0205 A82-27793
Beta adrenergic blocking agents to control hypertension in aviation personnel
p0211 A82-28490
The state of vegetative functions with hypertension under the action of decimetric waves on the region of the brain /Experimental study/
p0239 A82-31508
Changes of the oxygen transport function of the blood and some metabolic values in patients with hypertension and chronic ischemic heart diseases during ergometric exercise
p0279 A82-35666
Radiogenic changes in the behavior and physiology of the spontaneously hypertensive rat - Evidence for a dissociation between acute hypotension and incapacitation
p0283 A82-35903
Comparative study of systemic hemodynamics in normotensive and hypertensive rats
p0309 A82-38542
A study of temporary absences from work arising from disorders of the circulatory system
p0310 A82-38555
Morphological and functional factors contributing to a hypertonic heart
p0310 A82-38557
Echocardiographic characterization of heart hypertension
p0319 A82-40307
State of adaptation in patients with hypertension
p0324 A82-40476
The significance of the bicycle ergometer test for evaluating the work capacity in patients with hypertension
p0324 A82-40477
The influence of psychological and somatic factors on the symptomatics of hypertension
p0344 A82-41492
Telemetry methods for monitoring physiological parameters
p0345 A82-41551
The influence of prostaglandins and polyunsaturated fatty acids on the corticosteroid metabolism of normal and spontaneously hypertensive rats
p0366 A82-42174
The interrelationship of the function of the blood kallikrein-kinin system with the main parameters of central hemodynamics during hypertension
p0366 A82-42175
Emotional stress and hypokinesia in the origination of cardiac disorders and hypertensive states
p0367 A82-42608
An analysis of the role of endogenous opioid peptides in experimental hypertension
p0373 A82-43629
The mechanisms of hypertensive responses during emotional stress
p0373 A82-43630
An analysis of the role of genetic and environmental factors in predicting the effectiveness of arterial hypertension treatments
p0410 A82-46719
Postexercise blood pressure as a predictor of hypertension
p0417 A82-47342
Plasma prostaglandins, renin, and catecholamines at rest and during exercise in hypertensive humans
p0418 A82-47382
Effects of curative treatment emphasizing endurance training on the performance and blood pressure of hypertensive and normotensives
[NASA-TM-76520] p0013 N82-11771
A model for essential hypertension: Metabolic studies
p0137 N82-17867
Five-year research plan for effects of noise on health
[PB82-168972] p0425 N82-32976

**HYPERTHERMIA**
The effect of synaptically active drugs on the hyperthermic effect of prostaglandin E2 in rats
p0112 A82-21741
The effects of successive ionizing radiation and heat on antibody formation
p0113 A82-21751
Core temperature, heart rate and sweatsuits
p0143 A82-22942
Morphofunctional changes in the rabbit myocardium during chronic solar thermal overheating
p0161 A82-24516
Strain difference in thermoregulation of rats surviving extreme heat
p0169 A82-24920
Regional redistribution of blood flow in the cat under conditions of high ambient temperature
p0231 A82-29697
Comparative characteristics of respiratory and circulatory changes upon acute hyperthermia in cats
p0231 A82-29699
The effect of repeated sublethal overheating on cytogenetic processes in the epithelium of the cornea and in bone marrow cells in white rats
p0262 A82-34685
Head-temperature effects on physiology, comfort, and performance during hyperthermia
p0283 A82-35901

Splanchnic vasoconstriction in heat-stressed man -
Role of renin-angiotensin system
p0285 A82-36028
The effect of serotonin on the development of
acute hyperthermia in rats
p0311 A82-38583
The toxic properties of rabbit and dog sera under
controlled hyperthermia
p0322 A82-40458
Head cooling and heat
p0376 A82-44292
Hyperthermia heating apparatus --- cancer therapy
[NASA-CASE-NPO-14549-2] p0430 N82-33996
HYPERTONIA
U OSMOSIS
HYPERTROPHY
U GROWTH
HYPERVENTILATION
ACTH and cortisol responses to hypoxia in dogs
p0019 A82-13235
The effects of hyperventilation on EEG
alpha-rhythm depression induced by a suggested
visual representation
p0052 A82-16801
Effects of hyperventilation on pulmonary blood
flow and recirculation time of humans
p0255 A82-32832
HYPERVOLEMIA
Acute hypervolemia, cardiac performance, and
aerobic power during exercise
p0256 A82-32836
HYPNOSIS
Comparative psychophysiological evaluation of the
effectiveness of psychic models of body hypo-
and hyperponderousness
p0052 A82-16723
The activity of psychic models of hypogravity
during 30-day experiments
p0052 A82-16725
As if in weightlessness --- simulation through
hypnosis
p0324 A82-40474
HYPOBARIC ATMOSPHERES
The oxygen regime of the human organism under
conditions of extreme hypobaric hypoxia
p0027 A82-15709
The pathophysiology, presentation, and triage of
altitude-related decompression sickness
associated with hypobaric chamber operation
p0253 A82-32012
Measurement of cardiopulmonary performance during
acute exposure to a 2440-m equivalent atmosphere
p0283 A82-35904
The heart rate of aspirant air pilots in a
hypobaric chamber
[IZF-1979-35] p0035 N82-12770
HYPOCAPNIA
Brain extracellular fluid pH and blood flow during
isocapnic and hypocapnic hypoxia
p0290 A82-37930
HYPODYNAMIA
Management by means of muscular activity under
unloaded conditions
p0028 A82-15712
Effect of athletic training on physical fitness
under hypodynamics
p0327 A82-40663
A compendium of hypokinetic and hypodynamic animal
studies
[NASA-CR-3485] p0076 N82-15709
Combined effect of simulated weightlessness and
accelerations on energy metabolism enzymes
p0131 N82-17820
Metabolic processis in rat skeletal muscles after
flight aboard Cosmos-936
p0132 N82-17833
Activity of some enzymes of carbohydrate
metabolism in rat skeletal muscles after space
flight
p0132 N82-17834
Neurophysiological characteristics of sensorimotor
cortex of rats submitted to early motor
deprivation and conditioning
p0271 N82-25770
Reaction to hypokinesia and hyperkinesia of
somatochrome neurons in the motor zone of the
cerebral cortex in rabbits
[NASA-TM-76805] p0390 N82-30925
HYPOGLYCEMIA
Effects of endogenous glucagon on glucose kinetics
in shivering dogs
p0285 A82-36029
Hypo- and hyperglycemia in rats: Effects on the
ability to work in the heat
[AD-A111711] p0356 N82-29849
HYPOKINESIA
DNA and RNA synthesis in the isolated nuclei of
rat skeletal muscle fibers during hypokinesia
p0024 A82-15353
Structural changes in motor neurons during hind
limb immobilization
p0027 A82-15707
The effects of immobilization stress on diacyl and
plasmogenic phospholipids in various organs and
tissues of the rat
p0052 A82-16802
The effects of immobilization on the development
of experimental atherosclerosis in rabbits
p0054 A82-16815
Effects of disuse by limb immobilization on
different muscle fiber types
p0055 A82-16830
Status of vestibular function after prolonged
bedrest
p0058 A82-16940
The effects of hypokinesia in primates and bone
strength
p0059 A82-16946
Pulmonary diffusing capacity under conditions of
restricted motor activity
p0061 A82-17140
The effects of hypokinesia on the spectral
characteristics of free amino acids in the
skeletal muscles and the blood
p0071 A82-18661
The effect of the motor activity regime on the
development, conservation, and regeneration of
defensive conditioned reflexes in rats
p0092 A82-20305
The morphology of the lungs of dogs whose movement
is completely restricted
p0114 A82-21765
Age morphofunctional characteristics of chromaffin
tissue in the celiac nodes, both in the norm and
with hypokinesia
p0114 A82-21766
Rationalizing physical regimen of sedentary workers
p0118 A82-21818
Use of botanical and vitamin preparations in the
prevention of gastric ulcers induced in rats by
immobilization, noise and vibration
p0150 A82-23175
Energy-dependent transport of Ca/2+/ and lipid
peroxidation in sarcoplasmatic reticular muscle
membranes in hypokinetic rats
p0151 A82-23258
The physiological condition of press operators
p0154 A82-23285
Reaction of the blood system to single and double
exposure to a stress agent
p0154 A82-23287
Technique for the self-stimulation of subcortical
structures in immobilized rats based on
biofeedback
p0155 A82-23290
Combined rehabilitative and therapeutic measures
in space medicine
p0163 A82-24547
Characteristics of lipid hydrolysis and absorption
in rats under motor activity restriction
p0196 A82-26757
Effect of air ions on the ratio between direct and
reverse electron transport in mitochondria under
stress
p0199 A82-27731
The participation of adrenergic mechanisms in
microcirculation changes under stress
p0202 A82-27757
Changes in the level of catecholamines in the
noradrenaline-synthesizing structures of the rat
brain following immobilization
p0202 A82-27764
Microionophoretic analysis of the chemical
sensitivity of neurons of the medial thalamus
and ventromedial hypothalamus to acetylcholine
in the case of immobilization-produced emotional
stress in rats

p0203 A82-27770
Contribution of the kallikrein-kinin system to microcirculation disorders in the case of immobilization stress
p0204 A82-27787
Incidence of ischemic heart disease and arterial hypertension in sedentary workers
p0205 A82-27793
Circadian rhythm dynamics under conditions of an altered gaseous medium and hypokinesia
p0235 A82-31151
Dynamics of changes in animal body mass and skeletal musculature under conditions of hypokinesia
p0241 A82-31533
Paradoxical akinesia syndrome in cases of acute carbon monoxide poisoning
p0242 A82-31544
Functional-morphological characteristics of microvessels of the rat liver under kypokinesia
p0242 A82-31545
Distribution of nucleolar nucleic acids in Purkinje cells under vestibular stimulation and immobilization of rats
p0262 A82-34686
Early reaction of the hemopoietic organs depending on the condition of the peripheral N-cholinergic systems
p0307 A82-38168
The effect of hypokinesia on the resistance of the heart to hypoxia
p0307 A82-38170
Serotonin content of peripheral organs and tissues in rats under normal conditions and under stress during postnatal development
p0311 A82-38584
Changes in man's constant electric field in the course of adaptation to hypokinesia
p0312 A82-38595
The anti-stress role of the gamma-aminobutyric acid system of the brain
p0323 A82-40468
Changes in neurons of the spinal cord and spinal ganglia under hypokinesia /neuromorphological and histochemical investigation/
p0325 A82-40494
The early reaction of the hemopoietic organs to stress, depending on the condition of the peripheral N-cholinergic systems
p0325 A82-40499
The effect of hypokinesia on the resistance of the heart to hypoxia
p0325 A82-40502
Changes in mineralized tissues in the case of calcitonin and somatotropic hormone injections under hypokinesia
p0325 A82-40503
Influences of horizontal hypokinesia on performance and circadian physiological rhythms in female humans
p0329 A82-40682
A new rat model for studies of hypokinesia and antiorthostasis
p0331 A82-40706
Na/+/-K/+/ dependent ATP-ase modifications of skeletal muscle and myocardium of hypokinetic rats
p0331 A82-40707
Effect of immobilization on the ATPase activities and Ca-uptake of sarcoplasmic reticulum in different types of muscles
p0332 A82-40708
Plasticity of fast and slow muscle myofibrillar proteins in model experiments simulating weightlessness
p0332 A82-40709
Effect of immobilization of the excitatory parameters of different type skeletal muscle
p0332 A82-40710
The effect of hypokinesis and hypoxia on the function of muscles
p0335 A82-40739
Antiorthostatic hypokinesia and circulation in the rat
p0335 A82-40741
Suspension restraint - Induced hypokinesia and antiorthostasis as a simulation of weightlessness
p0336 A82-40744
Restraint of animals in space research
p0336 A82-40748
Hindlimb immobilization - Length-tension and contractile properties of skeletal muscle
p0346 A82-41209
Skeletal abnormalities in rats induced by simulated weightlessness
p0345 A82-41548
Emotional stress and hypokinesia in the origination of cardiac disorders and hypertensive states
p0367 A82-42608
Characteristics of the blood rheology, platelet function, and hemodynamics in patients with ischemic heart disease during extended hypokinesia following amputations of the limbs
p0410 A82-46721
Cyclic nucleotides in tissues during long-term hypokinesia
[NASA-TM-76726] p0011 N82-11757
Electron microscopical and histochemical studies on the transverse striated muscles of birds after prolonged hypokinesia
[NASA-TM-76717] p0012 N82-11759
Polyploidization delay in rat hepatocytes under liver growth inhibition by hypokinesia
[NASA-TM-76515] p0075 N82-14794
A compendium of hypokinetic and hypodynamic animal studies
[NASA-CR-3485] p0076 N82-15709
Succinate dehydrogenase and cytochrome oxidase activity in tissues of rats submitted to long-term hypokinesia
p0126 N82-16723
Human lipid metabolism during confinement in pressure chamber
p0131 N82-17822
Vitamin C, B sub 1 and B sub 6 excretion in urine during 182-day antiorthostatic hypokinesia
p0131 N82-17824
The efficiency coefficient of the rat heart and muscular system after physical training and hypokinesia
[NASA-TM-76843] p0245 N82-22868
Change in blood glucose level in rats after immobilization
[NASA-TM-75997] p0245 N82-22872
Effect of hypokinesia on man's nutritional status
p0270 N82-25760
Clinicophysiological changes in man during long-term antiorthostatic hypokinesia
p0270 N82-25761
Effects of 1 alpha-hydroxycholecalciferol and different amounts of phosphorus in food allowance on some parameters of phosphorus and calcium metabolism in hypokinetic rats
p0270 N82-25762
Condition of rats connective tissue during long-term hypokinesia and in recovery period
p0350 N82-28969
Effect of restricted mobility on the composition and metabolism of blood lipoproteids in rabbits
[NASA-TM-76846] p0382 N82-30871
Regional redistributions of the blood in blood loss and mechanical trauma against the background of various functional states of the body
[NASA-TM-76880] p0382 N82-30872
The interaction of Purkinje cells, capillaries and glia in the cerebellar cortex of normal and hypokinetic cats
[NASA-TM-76882] p0382 N82-30873
Influence of hypokinesia on the content of electrolytes in animal organs
[NASA-TM-76899] p0383 N82-30874
Effect of immobilization on the development of experimental arteriosclerosis in rabbits
[NASA-TM-76901] p0383 N82-30876
Effect of prolonged hypokinesia on resistance of resistive vessels in rats
[NASA-TM-76849] p0383 N82-30878
Reaction of the blood system to single and double effect of a stress agent
[NASA-TM-76866] p0383 N82-30880
Specificity of ultrastructural changes in rat cardiomyocytes after local gamma-irradiation and hypokinesia
[NASA-TM-76853] p0384 N82-30882
Indices of the rat central nervous system metabolism during 36- and 60-day hypokinesia
[NASA-TM-76870] p0384 N82-30883

DNA and RNA synthesis in isolated nuclei of rat skeletal muscles during hypodynamia [NASA-TM-76875] p0385 N82-30888
Specific cytoplasmic glucocorticoid receptors of rat liver under conditions of immobilization stress [NASA-TM-76863] p0385 N82-30893
Specific cytoplasmic glucocorticoid receptors of the rat liver during immobilization stress [NASA-TM-76869] p0385 N82-30894
Effect of hypokinesia on some red blood indices and the condition of regulatory systems [NASA-TM-76752] p0389 N82-30918
RNA accumulation in the body of neurons as an indicator of their functional deafferentation [NASA-TM-76850] p0389 N82-30922
Reaction to hypokinesia and hyperkinesia of somatochrome neurons in the motor zone of the cerebral cortex in rabbits [NASA-TM-76885] p0390 N82-30925
State of the endocrine glands in hypodynamia (A review of the literature) [NASA-TM-76906] p0390 N82-30926
Seismocardiographic evaluation of contractile function of the myocardium of hypokinetic rats p0394 N82-31902
Morphological distinctions of Macaca rhesus monkey thyroid under normal and various types of hypokinetic conditions p0395 N82-31908
Insulin resistance for glucose metabolism in disused soleus muscle of mice [NASA-CR-169353] p0428 N82-33979

HYPOMETABOLISM
Reflexometry as an additional method of investigating hypoactivity in the thyroid gland p0190 A82-25802
Current problems in hypobiosis p0366 A82-42171

HYPOTENSION
The state of hemodynamics under the effect of laser radiation p0368 A82-42613

HYPOTHALAMUS
Functional characteristics of the pilot hypothalamus-hypophysis-adrenal cortex system p0049 A82-16275
Acute experimental emotional stress in rabbits in a modulated electromagnetic field p0092 A82-20307
Suprachiasmatic stimulation phase shifts rodent circadian rhythms p0165 A82-24799
Some physiological mechanisms for the effects of the hypothalamus on erythron p0196 A82-26753
Microionophoretic analysis of the chemical sensitivity of neurons of the medial thalamus and ventromedial hypothalamus to acetylcholine in the case of immobilization-produced emotional stress in rats p0203 A82-27770
Self-stimulation response as an anti-stress factor in animals p0205 A82-27799
Evidence for a biological clock p0234 A82-30301
Change in the volume density of hypothalamic neurons during prolonged immobilization-nociceptive stress p0243 A82-31549
The protective role of the forebrain with respect to pathological cardiac reflexes p0309 A82-38543
The cholinergic nature of hypothalamo-cortical excitatory influence p0309 A82-38551
Approaches to the study of the hypothalamus-pituitary gland relationship p0319 A82-39569
The intracentral connections of the brain structures participating in cardiovascular control p0372 A82-43627
The participation of the hypothalamus in the regulation of parasympathetic cardiac reflexes in unanesthetized cats p0373 A82-43633
The responses of the coronary vessels in dogs to hypothalamic stimulation in acute and chronic experiments p0373 A82-43634
The content of the luteinizing hormone in the hypothalamus depending on the physiological condition of rats p0412 A82-46877
Norepinephrine and enzymes of synthesis and degradation thereof in the rat hypothalamus following flight aboard the Cosmos-936 biosatellite p0125 N82-16716
State of the endocrine glands in hypodynamia (A review of the literature) [NASA-TM-76906] p0390 N82-30926
Significance of magnetic field parameters to change in evoked bioelectric activity of the brain p0395 N82-31910

HYPOTHERMIA
Artificial hypobiosis as a stable functional state of reduced vital activity p0020 A82-13699
Effect of cooling of the rhythmo-inotropic ratio in a pathologically altered myocardium p0112 A82-21740
The effect of cholinomimetics on the development of hypothermia p0115 A82-21781
The relationship between cardiac and motor components of a conditioned reflex upon the local cooling of various zones of the cerebral cortex in cats p0116 A82-21787
Temperature dependence of alanine and aspartate aminotransferase activities in rat brain during hypothermia of various durations and adrenalectomy p0118 A82-21812
Clinical and experimental evidence for the use of hypothermia in decompression sickness p0193 A82-26239
Mechanisms of the reaction of dividing cells to hypothermia p0201 A82-27750
Trace reactions and the ambient temperature --- organism, organ and tissue thermoregulatory reactions p0209 A82-28454
Current problems in hypobiosis p0366 A82-42171
Anti-exposure technology identification for mission specific operational requirements [AD-A105070] p0036 N82-12784
The effect of cold and the cold prevention p0081 N82-15755
Effectiveness of ice (water) packets vests in reducing heat stress [AD-A117864] p0434 N82-34021

HYPOVOLEMIA
Effect of blood volume on sweating rate and body fluids in exercising humans p0089 A82-19495
Microcirculatory pathology under conditions of tissue arterial blood flow insufficiency p0153 A82-23272
Decimetric waves in the combined therapy of patients with cerebral circulatory insufficiency p0239 A82-31507

HYPOXEMIA
Oxygen tension in albino rat abdominal cavity organs in normo- and hyperoxybaria p0060 A82-16969
Mechanisms of adaptation to ergothermic hypoxemia in athletes specializing in different sports p0118 A82-21820
The biological significance of physiological hypoxemia p0164 A82-24558
Dependence of reactions of the organism to extremal factors on initial state p0282 A82-35839

HYPOXIA
Analysis of lung vasomotor responses to alveolar hypoxia and hypercapnia p0002 A82-10749
The effect of adrenergic substances on cardiac activity and brain electrical activity in the rabbit under hypoxia p0007 A82-12299
Hypoxic vasoconstriction and fluid filtration in pig lungs

p0018 A82-13226
Steady-state vascular responses to graded hypoxia in isolated lungs of five species
p0018 A82-13231
ACTH and cortisol responses to hypoxia in dogs
p0019 A82-13235
Hypoxic arousal in intact and carotid chemodenervated sleeping cats
p0019 A82-13236
Oxygen deficiency in tissues and their blood supply
p0020 A82-13700
The sensitivity of the retinal nerve fibre layer to elevated intraocular pressure and graded hypoxia in the cat
p0025 A82-15475
Experimental studies on the survival capacity in the sealed environment. III
p0025 A82-15515
The classification of hypoxic conditions
p0027 A82-15708
The oxygen regime of the human organism under conditions of extreme hypobaric hypoxia
p0027 A82-15709
Influence of 15-day alimentary starvation on human tolerance to the breathing of pure nitrogen
p0027 A82-15710
Prevention of hypoxic heart damage by the use of oxypyridine-class antioxidants
p0055 A82-16821
Characteristics of loading hypoxia
p0060 A82-16968
Check your oxygen --- oxygen supply equipment and aircraft safety
p0073 A82-18736
Piribedil-induced anti-hypoxic protection in rats
p0073 A82-18738
The effect of acetazolamide on the proteinuria of altitude
p0073 A82-18739
Enhanced heat production in physically restrained rats in hypoxia
p0089 A82-19496
Alterations in responses to drugs of atria from white rats acclimated to hypobaric hypoxia
p0089 A82-19497
The role of extracellular O2 and CO2 tensions in membrane mechanisms of cerebral arterial smooth muscle regulation
p0090 A82-19747
Some indicators of carbohydrate metabolism in rat lung during repeated and chronic hypoxia
p0092 A82-20302
Physiology and pathology of respiration and means of correcting oxygen deficiencies in an organism /Meeting of the Interdepartmental Commission on the Coordination of Studies in Medicine of the Academy of Sciences of the Ukrainian SSR and the Ministry of Health of the Ukrainian SSR/
p0092 A82-20303
The effects of narcotic analgesics on animal sensitivity to hypoxia
p0093 A82-20316
Special and clinical physiology of hypoxic states
p0093 A82-20317
Elevation of hypoxia resistance with the use of gutimine
p0093 A82-20319
The influence of adaptation on the periodic effect of hypoxia on the poststress activation of the primary immune response
p0093 A82-20320
A combined method for the study of tissue respiration under conditions corresponding to natural gas homeostasis
p0093 A82-20321
Psychological testing at high altitudes
p0107 A82-21679
The role of natriuresis in the prophylactic effect of adaptation to hypoxia in the case of hereditary hypertension
p0110 A82-21712
Adaptation to high-altitude hypoxia at different ambient temperatures /before and during adaptation/
p0110 A82-21715
The effect of piracetam on the body's resistance to hypoxia
p0115 A82-21777
Adaptogenic effect of mebicar during emotional stress, exercise, and hypoxia
p0115 A82-21780
Phase characteristics of the response of the hypophysal-adrenal system under high-altitude conditions
p0150 A82-23166
Variation in catecholamine excretion in adolescents under mountain conditions
p0150 A82-23174
The condition of pulmonary surfactant and the ultrastructure of the blood-air barrier in acute hypoxia
p0151 A82-23259
The blood plasma protein spectrum of dogs under treatment for hypoxia with the membrane oxygenator Sever-OMR
p0152 A82-23264
The fatty acid composition of blood serum from intact rats and rats adapted to hypoxia under the conditions of acute hypoxia
p0161 A82-24523
Determination of oxygen content in air on the basis of meterological parameters /pressure, temperature, and moisture/ in order to predict the hypoxic effect of the atmosphere
p0162 A82-24534
Pathogenesis and prevention of the hypoxic contraction of the heart
p0164 A82-24552
High altitude and the oxygen dissociation curve of hemoglobin Modifications in inter-heme cooperativity
p0167 A82-24844
Tissue hypoxia and its correction --- Russian book
p0168 A82-24910
Free and conjugated catecholamines and metabolites in cat urine after hypoxia
p0168 A82-24913
Renin, aldosterone, and converting enzyme during exercise and acute hypoxia in humans
p0168 A82-24914
Bradykinin-induced increase in pulmonary vascular permeability in hypoxic sheep
p0169 A82-24918
Ventilatory responses at rest and during exercise in marathon runners
p0169 A82-24919
Basic principles of hypoxia control during shock
p0185 A82-25676
Dynamics of brain cell oxygen tension and electrical activity in the norm and in hypoxia
p0186 A82-25678
Elevation of hypoxia tolerance under the influence of prolonged fasting
p0186 A82-25679
The energy supply of serotonin inactivation processes in the lungs
p0186 A82-25680
The indication of radiation resistance modified by radio-protective agents. III - Analysis of the relationship between hypoxic and radio-protective effects in the rat bone marrow for hypoxias of different origin
p0186 A82-25682
Main trends in combatting oxygen hunger
p0186 A82-25686
Some characteristics of cardiovascular system activity and adaptive antihypoxic mechanisms in keyboard computer operators during the course of a work shift
p0188 A82-25705
Effects of pharmacological agents on the development of hepatic hypoxia
p0189 A82-25720
Modulation of human sinus node function by systemic hypoxia
p0197 A82-26812
The effect of adapting to high-altitude hypoxia on certain indicators of catecholamine metabolism in rats in the case of spontaneous hereditary hypertension
p0202 A82-27758
Mechanism for the antihypoxic effects of depakin
p0202 A82-27761
Adaptive changes in the rat hypophysical-adrenal system upon altitude hypoxia
p0203 A82-27772

Protective effects of unsaturated fatty acids in adrenaline pulmonary edema and hypobaric hypoxia /The biological significance of catecholamine hyperlipidemia/
p0204 A82-27786
Complex technique for studying the oxygen regimen and hemodynamics of the oral mucosa under hypoxia
p0204 A82-27789
Physiological criteria and methods for increasing the effectiveness of correction of hypoxic states
p0205 A82-27797
Altitude and hypoxia as phase shift inducers --- of human circadian rhythms
p0210 A82-28480
No effect of naloxone on hypoxia-induced ventilatory depression in adults
p0230 A82-29566
Theoretical analysis of optimal P50 --- for maximizing oxygen unloading in hypoxia
p0230 A82-29568
Chemoreceptor involvement in cortisol responses to hypoxia in ventilated dogs
p0231 A82-29572
Effects of starvation on human tolerance to acute hypoxia
p0236 A82-31159
Effects of creatine phosphate on action potential duration and myocardial contractile force in the frog under hypoxia
p0241 A82-31532
Women at altitude - Cardiovascular responses to hypoxia
p0252 A82-32009
The effects of hypoxia on serial response time
p0254 A82-32390
Dynamics of changes in the prostaglandin content of the brain tissue under cervical sympathectomy and circulatory hypoxia
p0262 A82-34677
Investigation of the general fitness of the progeny of irradiated animals. III - The resistance of mice to irradiation, hypoxia, endotoxin, and physical stress
p0278 A82-35652
Protective effect of a gaseous hypoxic mixture under the combined effect on the organism of radiation and physical stress
p0278 A82-35653
Rare cases of serious disturbances in cardiac rhythm during a hypoxic functional test
p0280 A82-35684
The hemostasis system in man in high-altitude conditions
p0282 A82-35832
Rate of change of physiological functions as an index of the degree of adaptation
p0283 A82-35840
Investigation of the combined effects of bedrest and mild hypoxia
p0283 A82-35905
Postural stability during slow-onset and rapid-onset hypoxia
p0283 A82-35906
Man at extreme altitude
p0284 A82-36026
Evidence for diminished sensitivity of the hamster pulmonary vasculature to hypoxia
p0285 A82-36035
Intrapulmonary blood flow redistribution during hypoxia increases gas exchange surface area
p0285 A82-36036
The effect of acute hypoxia on the EEG and unit impulse activity of neurons of different brain structures in rats
p0286 A82-36172
Comparison of human vocal cord movements during isocapnic hypoxia and hypercapnia
p0290 A82-37927
Brain hypoxia and control of breathing - Role of the vagi
p0290 A82-37928
Brain extracellular fluid pH and blood flow during isocapnic and hypocapnic hypoxia
p0290 A82-37930
Study of the radioprotective effectiveness of an hypoxic gas mixture during combined radiation and thermal injuries to rats
p0306 A82-38159
Changes in the hemodynamics and efferent activity in the renal nerve with acute hypoxic hypoxia under the stabilization of perfusion pressure in carotid sinuses
p0306 A82-38161
The characteristics of hemodynamic shifts under physical stress at mountain elevations
p0307 A82-38166
The effect of hypokinesia on the resistance of the heart to hypoxia
p0307 A82-38170
Study of RNA synthesis rate and DNA content in the myocardium of new-born rats during adaptation to high-altitude hypoxia
p0308 A82-38537
The participation of the lymphatic system in the resistance of an organism to hypoxia
p0319 A82-39793
Prevention of heart function abnormalities during reoxygenation after ischemia by adaptation to altitude hypoxia
p0322 A82-40455
The synthesis of nuclear and mitochondrial DNA and RNA, and the synthesis of heme and globin in rabbit bone marrow during the stimulation of erythropoiesis
p0325 A82-40501
The effect of hypokinesia on the resistance of the heart to hypoxia
p0325 A82-40502
The effect of hypoxic and hypobaric exercises on the blood-brain barrier in rats
p0332 A82-40713
The effect of hypokinesis and hypoxia on the function of muscles
p0335 A82-40739
Ventilatory and heart rate responses to hypoxia and hypercapnia during sleep in adults
p0339 A82-41206
Altitude-induced changes in plasma thyroxine, 3,5,3 prime-triiodothyronine, and thyrotropin in rats
p0340 A82-41207
Pulmonary stretch receptor discharge patterns in eupnea, hypercapnia, and hypoxia
p0340 A82-41210
Protection from O2 toxicity by preexposure to hypoxia - Lung antioxidant enzyme role
p0341 A82-41217
Effect of induced erythrocythemia on hypoxia tolerance during physical exercise
p0341 A82-41218
The rate of coronary perfusion as a factor determining the extent to which the contractile function of the heart is decreased in energy formation disorders
p0344 A82-41409
Stereological analysis of interneuronal contacts in the cerebral cortex of rats during the posthypoxic period
p0368 A82-42622
Changes in the lymphoid organs of rats under the effect of acute hypoxia
p0368 A82-42623
Microcirculation during acute blood loss and hypoxia
p0370 A82-42997
Conjugated changes of the resistance and blood filling of cerebral vessels during shifts in the blood gas composition
p0373 A82-43635
Liver microcirculation in normoxia and hypoxia
p0373 A82-43638
Hypoxic pulmonary vasoconstriction and the size of hypoxic compartment
p0375 A82-44138
A critical value for O2 transport in the rat
p0375 A82-44141
The increase in the endurance for static loads in irradiated rats treated with gas hypoxic mixture /GHM-10/, an anti-irradiation agent
p0404 A82-45786
Toxicity of carbon monoxide, hydrogen cyanide and low oxygen
p0404 A82-46200
Altitude hypoxia and hypercapnic mixtures
p0407 A82-46308
Prevention of stress damage to the heart and its hypoxic contracture with the natural antioxidant alpha-tocopherol

p0410 A82-46716
The effect of acute brain hypoxia on the permeability of the blood-opthalmic barrier
p0414 A82-46896
Antidiuretic hormone responses to eucapnic and hypocapnic hypoxia in humans
p0417 A82-47377
Control of ventilation in climbers to extreme altitude
p0418 A82-47381
Cutaneous vascular response to exercise and acute hypoxia
p0418 A82-47385
A hereditary defect in the sensitivity to hypoxia during normal sensitivity to hypercapnia
p0420 A82-48217
Systemic and cerebral hemodynamics in flight personnel exposed to moderate hypoxia
p0124 N82-16707
Lipid spectrum of the myocardium of white rats exposed to hypoxic hypoxia
p0126 N82-16724
Comparative antihypoxic efficacy of pressure chamber conditioning and fasting of man
p0127 N82-16729
Antihypoxic efficacy of intermittent mode of pressure chamber conditioning of man
p0131 N82-17827
Method of assessing individual resistance of rats to hypoxic hypoxia
p0133 N82-17837
Comparative evaluation of pressure chamber conditioning and man's adaptation to hypoxia at high altitude
p0216 N82-20853
Attenuation of radioprotective effects of acute hypoxia on animals adapted to high altitudes
p0357 N82-29855
Effect of mebicar on animals under extreme conditions
[NASA-TM-76851] p0383 N82-30879
Effects of prior physical exertion on tolerance to hypoxia, orthostatic stress, and physical fatigue
[AD-A114741] p0432 N82-34009

IMMOBILIZATION
Glucocorticoid receptors and metabolic
disturbances in the liver and heart during
immobilization
p0002 A82-10750
Structural changes in motor neurons during hind
limb immobilization
p0027 A82-15707
Removal by negative air ions of changes in
mitochondrial respiration under stress
p0028 A82-15716
The effects of immobilization stress on diacyl and
plasmogenic phospholipids in various organs and
tissues of the rat
p0052 A82-16802
The response of the hematic system of
adrenalectomized mice to stressor activity
p0054 A82-16814
The effects of immobilization on the development
of experimental atherosclerosis in rabbits
p0054 A82-16815
The effects of immobilization of mice of various
radiation sensitivities and the shielding of
portions of their bone marrow on survival rate
and the formation of splenic colonies following
irradiation
p0152 A82-23265
Changes of the catecholamine level in
epinephrine-synthesizing oblongatal structures
of rats, reacting differently to prolonged
single immbolization
p0155 A82-23296
Recovery time course in contractile function of
fast and slow skeletal muscle after hindlimb
immobilization
p0197 A82-26816
Principles of enzyme stabilization -
Polyacrylamide-gel-immobilized trypsin and
chymotrypsin with high catalytic activity at
elevated temperatures
p0228 A82-29446
Change in the volume density of hypothalamic
neurons during prolonged
immobilization-nociceptive stress
p0243 A82-31549
Effect of limb immobilization on skeletal muscle
p0255 A82-32826
Ultrastructural changes in the brains of rats
subjected to acute emotional stress
p0310 A82-38558
Statistical analysis of neuronal impulse activity
in the diencephalon during
immobilization-produced emotional stress in rats
p0323 A82-40467
The early reaction of the hemopoietic organs to
stress, depending on the condition of the
peripheral M-cholinergic systems
p0325 A82-40499
Effect of immobilization on the ATPase activities
and Ca-uptake of sarcoplasmic reticulum in
different types of muscles
p0332 A82-40708
Effect of immobilization of the excitatory
parameters of different type skeletal muscle
p0332 A82-40710
Immobilization effects upon aerobic and anaerobic
metabolism of the skeletal muscles
p0332 A82-40712
The effects of human growth hormone administration
on the functional status of rat atrophied muscle
following immobilization
p0332 A82-40715
Protein composition of mRNA containing 18S-40S
subribosomal particles in soleus muscle before
and after immobilization
p0335 A82-40742
Hindlimb immobilization - Length-tension and
contractile properties of skeletal muscle
p0340 A82-41209
Neuromuscular adaptation in human thenar muscles
following strength training and immobilization
p0340 A82-41213
Daily in vivo neuromuscular stimulation effects on
immobilized rat hindlimb muscles
p0419 A82-47390
Participation of the hypophyseal-adrenal cortex
system in thrombin clearance during
immobilization stress
[NASA-TM-76729] p0012 N82-11760
Succinate dehydrogenase and cytochrome oxidase
activity in tissues of rats submitted to
long-term hypokinesia
p0126 N82-16723
Role of immobilization of irradiated rats in the
protective effect of bone marrow shielding
[NASA-TM-76828] p0220 N82-21866
Morphometrical investigations on the reproductive
activity of the ovaries in rats subjected to
immobilization and to motion activity
[NASA-TM-76831] p0220 N82-21867
Change in blood glucose level in rats after
immobilization
[NASA-TM-75997] p0245 N82-22872
Effect of immobilization on the development of
experimental arteriosclerosis in rabbits
[NASA-TM-76901] p0383 N82-30876
Catecholamines in the blood plasma of August and
Wistar rats during emotional stress
[NASA-TM-76872] p0384 N82-30885
Glucocorticoid receptors and metabolic
disturbances in the (rat) liver and heart during
immobilization
[NASA-TM-76874] p0384 N82-30887
Effect of immobilization stress on diacyl- and
plasmalogen-derivatives of phospholipids in
various rat organs and tissues
[NASA-TM-76852] p0385 N82-30891
IMMUNITY
The influence of adaptation on the periodic effect
of hypoxia on the poststress activation of the

primary immune response
p0093 A82-20320
Stress and immunity in athletes
p0118 A82-21821
Indicators of the T system of immunity during physical overstraining
p0154 A82-23281
Methodological aspects of studying the immune system in athletes
p0158 A82-24481
Natural immunity in athletes of different age groups
p0159 A82-24489
Vitamins and natural immunity
p0159 A82-24490
A mechanism for the stimulation of the immune response under the influence of high ambient temperature
p0164 A82-24557
Experimental and clinical study of a new immunoregulatory preparation - thymalin
p0307 A82-38177
Migration kinetics of hemopoietic stem cells in mice after severe mechanical trauma
p0309 A82-38541
Evidence of an immune mechanism of enzyme-hemostasis regulation
p0309 A82-38552
The influence of a deficit of vitamins on immunity /A review of the literature/
p0344 A82-41504
The coronary vessels and the contractile apparatus of the myocardium in immune heart damage /Histochemical and ultrastructural studies/
p0367 A82-42605
Immuno-enzymological comparisons in the differential diagnosis of various myocardial lesions
p0409 A82-46704
The cellular composition of lymphoid organs and the parameters of the immune response of mice at later times following irradiation
p0412 A82-46868
The effect of humoral factors of the lymph tissues on hemopoietic stem cells
p0413 A82-46890
Effects of prolonged weightlessness on the humoral immune response of humans
p0173 N82-18260
Relationship between microflora and immunity of cosmonauts carrying staphylococcus aureus in the nasal cavity
p0214 N82-20843
Effect of single exposure to microwaves on quantity and functional properties of T and B lymphocytes of guinea pig and mouse spleen
p0388 N82-30913

IMMUNOASSAY

IMMUNOLOGY
Hematological and immunological changes during space flight
p0057 A82-16937
Natural resistance of the organisms of seamen during postcruise rest
p0093 A82-20311
Cellular and molecular bases of local immunity
p0115 A82-21773
Seasonal rhythm of the immune reactivity and heart tolerance to physical load in patients with ischemic heart disease
p0117 A82-21802
A study of tropomyosins in human muscular and nonmuscular organs
p0117 A82-21806
The mathematics of immunity --- response to viral intrusion
p0119 A82-21824
Vitamins and natural immunity
p0159 A82-24490
Immunodepressive and immunostimulatory effects of decimetric waves on the primary immunological response
p0239 A82-31511
The effect of decimeter waves on the functional state of the cardiovascular system, and some biochemical and immunological indices of patients with myocardial infarction in the recovery phase
p0239 A82-31512
The prevention of dysadaptive changes in sailors at sea
p0259 A82-33728
Features of the reaction of the blood serum of a healthy person with epidermis
p0262 A82-34678
Effect of thymalin on the system of cyclic nucleotides in the mouse spleen
p0262 A82-34679
Cell-mediated immune reactions in ground squirrels in winter lethargy - Two-way transplantation reaction
p0286 A82-36229
An investigation of the conformational stability of immunoglobulin G in the monolayers at the phase boundary between aqueous solutions of NaCl and octane
p0313 A82-38607
Factors of the natural resistance of the body and methods for studying them
p0319 A82-40308
The effect of products erythrocyte destruction on immunological processes
p0325 A82-40500
Weightlessness effects on resistance and reactivity of animals
p0330 A82-40690
Effect of spaceflight on lymphocyte stimulation
p0331 A82-40700
Functional properties of T-lymphocytes in patients with acute myocardial infarction
p0341 A82-41459
The structure and function of macrophages
p0342 A82-41470
Immunological reactions to lipoproteins and heparin in young men with a hereditary tendency to atherosclerosis
p0343 A82-41487
Heart antigens
p0374 A82-43666
Immune complexes and atherosclerosis
p0410 A82-46714
The effect of a dysentery divaccine as a therapeutic agent for experimental radiation sickness on the immune response to a heterologous antigen
p0411 A82-46854
Methods used in hygiene for the investigation of the nonspecific resistivity of the body
p0412 A82-46874
The induction of the formation of morphine-binding spleen cells as a manifestation of the immune response
p0413 A82-46888
Current views of anaphylaxis as one of the forms of manifestation of the body's reactivity
p0413 A82-46891
Minor peptides under normal and pathological conditions
p0420 A82-48214
The morphology of the submandibular lymph nodes of white rats during adaptation to high-altitude conditions
p0420 A82-48221
Hematological and immunological analyses
p0078 N82-15722
Effect of weightlessness on lymphocyte proliferation
p0173 N82-18261
Evaluation of immunological methods for toxicity studies in animals: Inhalation studies with benzene and halothane in rats
[MBL-1980-4] p0266 N82-24814
Inhalation studies with benzene in rats. Part A: Toxicological data
p0266 N82-24815
Inhalation studies with benzene in rats. Part B: Immunological data
p0266 N82-24816
Inhalation study with halothane in female rats. Part B: Immunological data
p0266 N82-24818
Stimulating effect of exposure of rat sternum to variable magnetic field on antibody production in the spleen
p0386 N82-30900

IMPACT
NT ECONOMIC IMPACT

IMPACT ACCELERATION
Dynamic preload as an impact protection concept

p0376 A82-44290
A Monte Carlo study of the use of auxiliary
information in the developent of an impact
acceleration injury prediction model
[AD-A105463] p0033 N82-12755
Problem of accelerations in aviation medicine
p0347 N82-28950
IMPACT DAMAGE
Trial on the use of stabilography in the medical
supervision of boxers
p0118 A82-21817
Ultra-high impact free-fall survival
p0329 A82-40684
A homeomorphic finite element model of impact head
injury
p0009 N82-10707
Review of literature and regulation relating to
thoracic impact tolerance and injury criteria
[PB82-108697] p0128 N82-16736

Intraretinal recordings of slow electrical
responses to steady illumination in monkey -
Isolation of receptor responses and the origin
of the light peak
p0185 A82-25649
Bioelectrochemical activity of the brain ---
Russian book
p0421 A82-48249
Implantable electrical device
[NASA-CASE-GSC-12560-1] p0358 N82-29863
A cortically implantable multielectrode array for
investigating the mammalian visual system
[AD-A115484] p0390 N82-30931
IMPULSES
Potential for interaction of low-level impulse and
continuous noise
[AD-A109430] p0222 N82-21883
Effects of impulse noise on human beings: A pilot
study on annoyance ratings in the laboratory
[ISP-1981-9] p0267 N82-24825
IN-FLIGHT MONITORING
A self-contained, man-borne biomedical
instrumentation system in the flight testing of
naval weapons systems
[AIAA PAPER 81-2403] p0021 A82-13090
In-flight physiological monitoring of tactical jet
aircrewmen
p0024 A82-14962
Development of a secondary task method for
measuring operator workload. V - Measurement of
pilot workload during take off and landing by
C-1 jet carrier
p0025 A82-15516
Instrument scan - Is it an indicator of the
pilot's workload
p0141 A82-22924
Problems of the operational medical in-flight
monitoring of pilots
p0203 A82-27768
Development and application of air combat
performance assessment methods
p0407 A82-46277
Inflight observations
p0077 N82-15713
Cardiac output and cardiac cycle phase structure
of pilots during flights
p0131 N82-17821
INCENTIVES
Motivational analysis of human volunteers for
centrifuge acceleration research
p0409 A82-46530
Multiple man-machine interfaces
p0042 N82-13682
INDEPENDENT VARIABLES
A quasi-Newton procedure for identifying
pilot-related parameters of the optimal control
model
p0044 N82-13694
Two-D results on human operator perception
p0044 N82-13697
INDEXES (DOCUMENTATION)
Evaluation of short-term bioassays to predict
functional impairment. development of pulmonary
bioassays in small animals: Directory of
Institutions; individuals involved in utilization
[AD-A103767] p0075 N82-14798

Health and safety research division
[DE81-026088] p0038 N82-13652
Feasibility study (phase A) for a Life Science Double Rack envisaged for the Spacelab mission D1
[BMFT-FB-W-81-037] p0078 N82-15732
USSR report: Life sciences biomedical and behavioral sciences, no. 13
[JPRS-79639] p0082 N82-15763
Life sciences passive GN2 freezer thermal performance test
[NASA-CR-167546] p0178 N82-19809
USSR Space Life Sciences Digest, volume 2, no. 3
[NASA-CR-168582] p0293 N82-26952
USSR Space Life Sciences Digest, volume 2, no. 4
[NASA-CR-168691] p0293 N82-26953
USSR report. Life sciences. Biomedical and behavioral sciences, no. 18
[JPRS-81428] p0357 N82-29857
LIFE SPAN
Mechanism for the antihypoxic effects of depakin
p0202 A82-27761
Evidence for a biological clock
p0234 A82-30301
Radiation-induced shortening of the life span of D. melanogaster. II - Sensitizing effects of 5-bromo-2-deoxyuridine
p0306 A82-38155
Several new features of the comparison of cell survival dose parameters /statistical analysis and extrapolation number modification factor/
p0411 A82-46863
The molecular mechanisms of the interphase death of lymphoid cells. V - Determination of the lifespan of nuclear and polysomal RNA in irradiated thymocytes
p0412 A82-46867
LIFE SUPPORT SYSTEMS
NT CLOSED ECOLOGICAL SYSTEMS
NT EMERGENCY LIFE SUSTAINING SYSTEMS
NT PORTABLE LIFE SUPPORT SYSTEMS

Development status of a preprototype water
electrolysis subsystem
[ASME PAPER 81-ENAS-9] p0002 A82-10897
Application of improved technology to a
preprototype vapor compression distillation
/VCD/ water recovery subsystem
[ASME PAPER 81-ENAS-10] p0002 A82-10898
Development of an advanced Sabatier CO2 reduction
subsystem
[ASME PAPER 81-ENAS-11] p0002 A82-10899
The potential role of aerobic biological waste
treatment in regenerative life support systems
[ASME PAPER 81-ENAS-20] p0003 A82-10908
Generic waste management requirements for a
controlled ecological life support system /CELSS/
[ASME PAPER 81-ENAS-23] p0003 A82-10911
Preprototype Vapor Compression Distillation
Subsystem development
[ASME PAPER 81-ENAS-25] p0003 A82-10912
Lightside atmospheric revitalization system for
Space Shuttle Orbiter
[ASME PAPER 81-ENAS-26] p0003 A82-10913
Nitrogen supply system based on hydrazine
dissociation
[ASME PAPER 81-ENAS-27] p0004 A82-10914
The CELSS program - An overview of its structure
and use of computer modelling
[ASME PAPER 81-ENAS-36] p0004 A82-10922
An approach to the preliminary evaluation of
Closed-Ecology Life Support System /CELSS/
scenarios and control strategies
[ASME PAPER 81-ENAS-38] p0004 A82-10924
Design and control strategies for CELSS -
Integrating mechanistic paradigms and biological
complexities
[ASME PAPER 81-ENAS-43] p0005 A82-10927
Advanced Microbial Check Valve development --- for
Space Shuttle
[ASME PAPER 81-ENAS-45] p0005 A82-10929
U.S. Navy molecular sieve on-board oxygen
generation system - An update
p0024 A82-14973
Trends in space life support
p0059 A82-16953
Survival in space --- spacesuit development
p0091 A82-20257
A new concept in life support systems - The NGL
molecular sieve oxygen generator
p0156 A82-23370
Problems of the development of life support and
safety assurance system for space crews
p0198 A82-27518
Operator indoctrination during introduction of new
or modified aviation life support systems /ALSS/
p0291 A82-37968
Regenerable life support for the space station - A
technology status summary
[IAF PAPER 82-45] p0377 A82-44658
Sensitivity analysis of physiological factors in
space habitat design
[IAF PAPER 82-179] p0414 A82-46975
Life support system considerations for space station
p0415 A82-47276
Evaluation of chemical protective facelets and
comparison of four prototpyes
[IZF-1980-15] p0084 N82-15784
USSR report: Space biology and aerospace
medicine, volume 15, no. 6, November - December
1981
[JPRS-79849] p0123 N82-16704
Toxicological and hygienic aspects of improving
additional purification of water reclaimed from
urine
p0125 N82-16718
Possible use of house fly larvae for utilization
of organic waste in biological life-support
systems
p0125 N82-16719
Distinctions of regeneration of confined
atmosphere by means of photosynthesis of
unicellular algae
p0125 N82-16720
Bibliography on carbohydrate synthesis. Selected
works, 1861 - 1981
[NASA-CR-168553] p0177 N82-18871
Application of Guided Inquiry System Technique
(GIST) to Controlled Ecological Life Support
Systems (CELSS)
[NASA-CR-166312] p0247 N82-22886
CELSS scenario analysis: Breakeven calculations
[NASA-CR-166319] p0250 N82-23982
Controlled Ecological Life Support System: Use of
Higher Plants
[NASA-CP-2231] p0268 N82-24834
Controlled Ecological Life Support System:
Research and Development Guidelines
[NASA-CP-2232] p0268 N82-24835
Nutrition and food technology for a Controlled
Ecological Life Support System (CELSS)
[NASA-CR-167392] p0354 N82-29004
A design methodology for nonlinear systems
containing parameter uncertainty: Application
to nonlinear controller design
[NASA-CR-166358] p0355 N82-29005
Preprototype independent air revitalization
subsystem
[NASA-CR-167703] p0362 N82-29898
Algal culture studies related to a Closed
Ecological Life Support System (CELSS)
[NASA-CR-166375] p0392 N82-30943
Workshop on Closed System Ecology
[NASA-CR-169280] p0393 N82-31887
Life-cycle costing of life support equipment
[AD-A116404] p0401 N82-31948
Safety analysis for Naval liquid oxygen life
support system
[AD-A115742] p0427 N82-32994
Air pollutant production by algal cell cultures
[NASA-CR-166384] p0442 N82-34076
Application of control theory to dynamic systems
simulation
[NASA-CR-166383] p0442 N82-34077
LIFT
Determination of efficient methods of lift by
comparing trained and untrained male and female
lifters
[AD-A100349] p0038 N82-13650
LIFT COEFFICIENTS
U LIFT
LIFT DISTRIBUTION
U LIFT
LIFT FORCES
U LIFT
LIGAMENTS
Development of the carbon fibre polysulphone
toggle for ligament repair operations
[CSIR-ME-1709] p0246 N82-22881
LIGANDS
Thermodynamic parameters characterizing
interaction between polymer-absorbed ligand
molecules
p0313 A82-38609
Ligation of oligonucleotides by pyrimidine dimers
- A missing 'link' in the origin of life
p0317 A82-39423
LIGHT (VISIBLE RADIATION)
NT POLARIZED LIGHT
Rhodopsin aggregation under the damaging effects
of light on the photoreceptor membranes
p0109 A82-21705
The effect of inter-stimulus intervals on the
perception of short flashes of red and green light
p0142 A82-22927
Individual differences in pulse brightness
perception
p0158 A82-24032
Visual problems in aviation and space navigation
p0081 N82-15758
LIGHT ABSORPTION
U ELECTROMAGNETIC ABSORPTION
LIGHT ADAPTATION
Effect of chromatic adaptation on the achromatic
locus - The role of contrast, luminance and
background color
p0318 A82-39433
Pupillometry, a bioengineering overview
p0046 N82-13711
LIGHT AIRCRAFT
Aerobatics in light aircraft - Sensations and
stresses experienced by the pilot
p0315 A82-38848
In-flight incapacitation and pathology for the
light aircraft stunt-flyer
p0315 A82-38851
LIGHT CURVE
Light curves for photosynthesis under intermittent
illumination
p0313 A82-38608

LIGHT EMISSION
NT BIOLUMINESCENCE
NT FLUORESCENCE
NT PHOSPHORESCENCE
NT X RAY FLUORESCENCE
LIGHT EMITTING DIODES
An LED system for the formation of visual stimuli
p0323 A82-40471
LIGHT INTENSITY
U LUMINOUS INTENSITY
LIGHT SCATTERING
Veiling glare reduction methods compared for ophthalmic applications
p0019 A82-13289
LIGHT TRANSMISSION
NT LIGHT SCATTERING
LIGHTING
U ILLUMINATING
LIGHTING EQUIPMENT
NT AIRCRAFT LIGHTS
NT FLASH LAMPS
NT QUARTZ LAMPS
Direct and neighboring sensitivity changes produced by red and blue-white adapting fields
[AD-A111880] p0299 N82-26993
LIGHTNING
Rates of fixation by lightning of carbon and nitrogen in possible primitive atmospheres
p0090 A82-20016
LIGNIN
Gravity, lignification, and land plant evolution
p0149 A82-22997
LIMBS (ANATOMY)
NT ARM (ANATOMY)
NT ELBOW (ANATOMY)
NT FOREARM
NT HAND (ANATOMY)
NT KNEE (ANATOMY)
NT LEG (ANATOMY)
Effects of disuse by limb immobilization on different muscle fiber types
p0055 A82-16830
Evaluation of the parallel conductor theory for measuring human limb blood flow by electrical admittance plethysmography
p0070 A82-17568
Disturbances in biological rhythms as a result of a conflict of incompatible stimuli
p0111 A82-21720
Changes in the activity of kidney enzymes during temporary ischemia of the extremities
p0163 A82-24582
Recovery time course in contractile function of fast and slow skeletal muscle after hindlimb immobilization
p0197 A82-26816
A practical ultrasonic plethysmograph
p0211 A82-28486
Effect of limb immobilization on skeletal muscle
p0255 A82-32826
Daily in vivo neuromuscular stimulation effects on immobilized rat hindlimb muscles
p0419 A82-47390
Long bone and joint response to mechanical loading
[AD-A111551] p0300 N82-27969
Osteoporosis in unsupported extremities
p0350 N82-28970
A software package for evaluating the transmissibility between vehicle vibration and motions of hands (in controls), limb, head and eyes
p0380 N82-30853
The role of antagonist coactivation in the control of natural movement
p0382 N82-30867
LIMITATIONS
U CONSTRAINTS
LIMNOLOGY
The stability of a very simple freshwater ecosystem model
p0163 A82-24539
LIMONITE
Are the 3,800-Myr-old Isua objects microfossils, limonite-stained fluid inclusions, or neither
p0001 A82-10550
LINE OF SIGHT
A method for semi-automatic analysis of eye movements
p0288 A82-36960
Eye movements and visual information processing
[AD-A112399] p0300 N82-27967
Unconventional visual displays for flight training
[AD-A111392] p0354 N82-28999
LINEAR ENERGY TRANSFER (LET)
An electron-microscopic study of the brain of the fruit fly, Drosophila melanogaster, exposed to high-LET krypton /Kr-84/ particle radiation
p0287 A82-36320
LINEAR POLARIZATION
Linear dichroism of absorption changes upon the photoreduction of pheophytin in oriented preparations of photosystem II
p0228 A82-29442
LINEAR PREDICTION
Effects of motivation on car-following
p0441 N82-34070
LINES (GEOMETRY)
Effects of reference lines on displacement thresholds at various durations of movement --- in human visual perception
p0314 A82-38797
LINGUISTICS
NT PSYCHOLINGUISTICS
NT SYNTAX
NT WORDS (LANGUAGE)
Linguistic decision structures for hierarchical systems
p0277 A82-34968
Linguistic and human performance considerations in the design of an anticipatory communication aid
p0039 N82-13657
LIPID METABOLISM
Impaired surfactant phospholipid metabolism in hyperoxic mouse lungs
p0018 A82-13230
The effects of immobilization stress on diacyl and plasmogenic phospholipids in various organs and tissues of the rat
p0052 A82-16802
The effects of immobilization on the development of experimental atherosclerosis in rabbits
p0058 A82-16815
Rhodopsin aggregation under the damaging effects of light on the photoreceptor membranes
p0109 A82-21705
The relationship between carbohydrate and lipid metabolisms in muscle cell energetics under the influence of ATPase loading - Mathematical model
p0109 A82-21706
Activation of the metabolism of the gamma-aminobutyric acid system in the cerebral hemispheres under various types of stress
p0113 A82-21746
The effect of physical training on the lipid and lipoprotein metabolism in people of various ages
p0114 A82-21757
Nonesterified fatty acid metabolism during exercise in humans
p0117 A82-21809
Energy-dependent transport of Ca/2+/ and lipid peroxidation in sarcoplasmatic reticular muscle membranes in hypokinetic rats
p0151 A82-23258
Circadian rhythm of changes of phospholipid content and the activity of nonspecific phosphomonoesterases in the rat liver
p0155 A82-23300
The fatty acid composition of blood serum from intact rats and rats adapted to hypoxia under the conditions of acute hypoxia
p0161 A82-24523
Evaluation of the antioxidant system of the body
p0188 A82-25709
Kinetics of lipid peroxidation in cellular organelle anoxia under different conditions
p0190 A82-25809
Damage to the Ca/2+/-transporting system in the sarcoplasmic reticulum of the heart during emotional and nociceptive stress
p0190 A82-25810
Characteristics of lipid hydrolysis and absorption in rats under motor activity restriction
p0196 A82-26757
Change in protein-lipid interactions upon the peroxide oxidation of blood serum lipoproteins
p0228 A82-29447
Chylomicron triglyceride metabolism in resting and exercising fed dogs

p0229 A82-29551
Sparing effect of chronic high-altitude exposure on muscle glycogen utilization
p0229 A82-29556
The damaging effects of light on the retina - The role of singlet oxygen and lipid peroxides
p0232 A82-29817
Lipid peroxidation and retinal damage under stress
p0262 A82-34682
Study of the relation between the number of sulfhydryl groups and the level of lipid antioxidant activity in the organs of individual animals of different species
p0306 A82-38153
Studies of specific hepatic enzymes involved in the conversion of carbohydrates to lipids in rats exposed to prolonged spaceflight aboard Cosmos 1129
p0331 A82-40698
Space flight effects upon plasma and tissue lipids in rats
p0333 A82-40722
Activation of lipid peroxidation during stress in man, evaluated according to the content of pentane in expired air
p0367 A82-42600
Effect of dosed physical loading on plasma and liver lipids and lipoproteins in rats
p0370 A82-43045
The role of endogenous substances in creating a background of enhanced resistance to radioactivity. XIII - The effect of various radiation protective agents on lipid peroxidation
p0404 A82-45785
The inhibition of the biosynthesis of cholesterol and phospholipids by hydrocortisone in the liver of rats
p0413 A82-46882
The transformation of lipids into glycogen in animal and human cells
p0413 A82-46892
Lipid spectrum of the myocardium of white rats exposed to hypoxic hypoxia
p0126 N82-16724
Human lipid metabolism during confinement in pressure chamber
p0131 N82-17822
A model for essential hypertension: Metabolic studies
p0137 N82-17867
Plasma and tissue lipids of rats following flight aboard Cosmos-936 biosatellite
p0271 N82-25767
Plasma and tissue lipids of rats following flight aboard the Cosmos-1129 biosatellite
p0271 N82-25768
Effect of restricted mobility on the composition and metabolism of blood lipoproteids in rabbits
[NASA-TM-76846] p0382 N82-30871
Effect of immobilization stress on diacyl- and plasmalogen-derivatives of phospholipids in various rat organs and tissues
[NASA-TM-76852] p0385 N82-30891

LIPIDS
NT LIPOPROTEINS
Membrane lipids and the origin of life
p0102 A82-20943
Peroxidation of lipids in the liver and lungs of rats during prolonged adaptation to the cold
p0112 A82-21736
Lipid levels in the bone marrow megakaryocytes and thrombocytes of healthy people
p0164 A82-24555
Study of the viscosity of free and protein-bound membrane lipids
p0199 A82-27732
Effects of a high-frequency electromagnetic field on tetraphenyl borate transport through bilayer lipid membranes
p0200 A82-27744
Mechanism for fluctuations in cell cycle duration
p0241 A82-31529
Encapsulation of macromolecules by lipid vesicles under simulated prebiotic conditions
p0258 A82-33206
The effect of laser radiation on lipid synthesis in yeast
p0311 A82-38585
The mechanics of the microwave effect on the conductivity of bilayer lipid membranes
p0312 A82-38587
A comparison between the protonophoric and separating functions of weak dibasic acids --- in mitochondrial respiration
p0312 A82-38590
A possible explanation for the fluctuations in reflectivity exhibited by bilayer liped membranes excited during electrostriction
p0313 A82-38602
The incorporation of an erythrocyte membrane into planar bilayer lipid membranes
p0313 A82-38606
The possible mechanisms of lipid peroxidation in rat liver during the recovery period after mechanical asphyxia
p0413 A82-46883
The effect of myocardial ischemia on the phospholipid content of heart tissue and mitochondria
p0413 A82-46884
Lipid spectrum of the myocardium of white rats exposed to hypoxic hypoxia
p0126 N82-16724

LIPOPROTEINS
The effect of physical training on the lipid and lipoprotein metabolism in people of various ages
p0114 A82-21757
Relation between high density lipoprotein cholesterol and coronary artery disease in asymptomatic men
p0169 A82-25134
Orientation of Ca/2+/-dependent ATPases in sarcoplasmic reticulum membranes and reconstructed proteoliposomes
p0228 A82-29443
Change in protein-lipid interactions upon the peroxide oxidation of blood serum lipoproteins
p0228 A82-29447
Lipoprotein lipase hydrolyzes endogenous triacylglycerols in muscle of exercised rats
p0230 A82-29570
Determination of blood-lipoproteid dimensions by optical methods
p0312 A82-38593
A measurement of the size distribution of lipoproteins in the plasma of human blood
p0313 A82-38603
The conductivity of model protein-lipid membranes
p0313 A82-38604
Immunological reactions to lipoproteins and heparin in young men with a hereditary tendency to atherosclerosis
p0343 A82-41487
Effect of dosed physical loading on plasma and liver lipids and lipoproteins in rats
p0370 A82-43045
The effect of cholestyramine on the metabolism of lipoproteins in the blood of rats
p0413 A82-46887
The effects of varying exercise intensities and durations on plasma high density lipoprotein-cholesterol, body composition and maximum oxygen consumption
p0248 N82-23973

LIQUEFIED GASES
NT LIQUID OXYGEN

LIQUID CHROMATOGRAPHY
Resolution of underivatized amino acids by high pressure liquid chromatography, using chiral eluants
p0102 A82-20944

LIQUID COOLING
Auxiliary cooling - Comparison of air-cooled vs. water-cooled vests in hot-dry and hot-wet environments
p0321 A82-40440
Auxiliary cooling: Comparison of air-cooled versus water cooled vests in hot-dry and hot-wet environments
[AD-A110554] p0275 N82-25797
Effectiveness of five water-cooled undergarments in reducing heat stress of vehicle operating in a hot wet or hot dry environment
[AD-A107105] p0299 N82-26994

LIQUID CRYSTALS
Liquid-crystal state of nucleic acids in solution
p0243 A82-31597

LIQUID FLOW
NT WATER FLOW
LIQUID OXYGEN
Safety analysis for Naval liquid oxygen life support system
[AD-A115742] p0427 N82-32994
LIQUID PHASES
Liquid water on a planet over cosmic periods
p0098 A82-20907
LIQUID WASTES
NT URINE
NT WASTE WATER
LIQUID-GAS MIXTURES
NT AEROSOLS
NT FOG
LIQUID-LIQUID INTERFACES
An investigation of the conformational stability of immunoglobulin G in the monolayers at the phase boundary between aqueous solutions of NaCl and octane
p0313 A82-38607
LIQUIDS
NT BEVERAGES
NT LIQUID OXYGEN
Temperature effects on lung mechanics in air- and liquid-filled rabbit lungs
p0375 A82-44134
LITERATURE
NT DOCUMENTATION
NT PROCEEDINGS
LITHIUM CHLORIDES
The effects of Li, Rb, and temperature on the binding of Na and K by glycerinated frog muscle fibers
p0419 A82-48206
LITHIUM COMPOUNDS
NT LITHIUM CHLORIDES
NT LITHIUM HYDROXIDES
LITHIUM HYDROXIDES
Lightside atmospheric revitalization system for Space Shuttle Orbiter
[ASME PAPER 81-ENAS-26] p0003 A82-10913
LITHOGRAPHY
Visual ergonomics in cartographic and lithographic work at the Topographic Service. Part 2: Requirements and recommendation for work stations
[IZF-1981-14-PT-2] p0275 N82-25798
LITHOSPHERE
NT EARTH CRUST
Modeling of the synthesis of peptide-like compounds in the primeval lithosphere of the earth
p0149 A82-23136
LIVER
Glucocorticoid receptors and metabolic disturbances in the liver and heart during immobilization
p0002 A82-10750
The effects of space flight factors on the stress reaction of the nuclear nucleic acids in the rat liver
p0007 A82-12279
Free amino acid concentrations in the livers of animals subjected to certain extremal factors
p0072 A82-18662
Liver pathology in aircrew
p0072 A82-18734
Hepato-splenic injury in aircraft accidents
p0072 A82-18735
The effect of cold stress on the level and activity of microsomal cytochrome P-450 in the rat liver
p0112 A82-21732
Activation of succinate dehydrogenation in rat liver by noradrenalin, cAMP and acute cooling
p0112 A82-21734
Peroxidation of lipids in the liver and lungs of rats during prolonged adaptation to the cold
p0112 A82-21736
An investigation of the biological activity of chalones separated from normal livers and from livers that are being regenerated
p0112 A82-21742
Effects of dioxalin and oxamide on succinate and lactate dehydrogenase activities in rat liver, kidney and brain tissues and on the chromosomal apparatus of bone marrow cells
p0115 A82-21778
The ultrastructure of the liver sinusoids of mice under conditions of acute stress - Morphometric study
p0116 A82-21782
The multiple forms of tyrosine aminotransferase in rat liver cells and their role in cellular homeostasis
p0117 A82-21807
Approaches to the removal of G2-chalone from the liver of rats
p0118 A82-21810
Circadian rhythm of changes of phospholipid content and the activity of nonspecific phosphomonoesterases in the rat liver
p0155 A82-23300
Mitotic activity and chromosome aberrations in the regenerated liver of rats after irradiation by X rays
p0190 A82-25811
Ultrasonic method for measuring of hepatic portal blood flow in rats under conditions of contact biomicroscopy
p0202 A82-27760
Effect of sodium fluoroacetate on oxygen consumption in rat and cat liver tissue and skeletal muscles
p0206 A82-27808
The interaction of actin with phosphorylase kinase
p0228 A82-29434
Functional-morphological characteristics of microvessels of the rat liver under hypokinesia
p0242 A82-31545
Ultracytochemical changes in the brain and liver under the influence of low-intensity nonionizing microwave radiation
p0262 A82-34687
Changes in electrically neutral Ca/2+/-H/+/ exchange in rat liver mitochondria following gamma irradiation
p0306 A82-38151
Diurnal changes in the duration of the S and G2 phases of the mitotic cycle in mononuclear and binuclear hepatocytes of normal and thyroxine-treated rats
p0323 A82-40459
Effect of dosed physical loading on plasma and liver lipids and lipoproteins in rats
p0370 A82-43045
Effect of dosed physical loading on biological oxidation and bioenergy in liver and myocardium
p0370 A82-43046
Liver microcirculation in normoxia and hypoxia
p0373 A82-43638
Protein kinase activity in liver of heat-acclimated hamsters
p0376 A82-44145
The activity of ribosephosphate pyrophosphokinase in the thymus and liver of irradiated mice
p0408 A82-45779
The induced synthesis of tyrosine aminotransferase in the liver of irradiated rat embryos
p0411 A82-46852
The inhibition of the biosynthesis of cholesterol and phospholipids by hydrocortisone in the liver of rats
p0413 A82-46882
The possible mechanisms of lipid peroxidation in rat liver during the recovery period after mechanical asphyxia
p0413 A82-46883
Polyploidization delay in rat hepatocytes under liver growth inhibition by hypokinesia
[NASA-TM-76515] p0075 N82-14794
Applications of nuclear techniques for in vivo body composition studies at Brookhaven National Laboratory
[DE81-029922] p0083 N82-15772
Activity of some rat liver enzymes following flight aboard Cosmos-936 biosatellite
p0216 N82-20854
Effect of immobilization stress on diacyl- and plasmalogen-derivatives of phospholipids in various rat organs and tissues
[NASA-TM-76852] p0385 N82-30891
Specific cytoplasmic glucocorticoid receptors of rat liver under conditions of immobilization stress
[NASA-TM-76863] p0385 N82-30893
Specific cytoplasmic glucocorticoid receptors of the rat liver during immobilization stress
[NASA-TM-76869] p0385 N82-30894

**LOAD FACTORS**
U LOADS (FORCES)
**LOAD TESTS**
The effects of hypokinesia in primates and bone strength
p0059 A82-16946

MAN MACHINE SYSTEMS
A methodology for decision augmentation system design --- airborne computer as aircrew performance aid
[AIAA 81-2201] p0001 A82-10139
The CELSS program - An overview of its structure and use of computer modelling
[ASME PAPER 81-ENAS-36] p0004 A82-10922
An approach to the preliminary evaluation of Closed-Ecology Life Support System /CELSS/ scenarios and control strategies
[ASME PAPER 81-ENAS-38] p0004 A82-10924
SADT/SAINT simulation technique --- Structural Analysis Design Technique/System Analysis of Integrated Network of Tasks for man-machine systems
p0022 A82-14677
Automated item recognition as a secondary task for objective assessment of aircrew workload in flight simulators
p0023 A82-14837
Astronaut activity in flight and enhancement of its efficiency --- Russian book
p0049 A82-16701
Basic principles and methods for assuring the eficiency of astronaut activity in flight
p0050 A82-16702
The use of a psychophysiological feedback system for purposes of activity optimization
p0050 A82-16706
Problems of the control of operator state
p0050 A82-16710
Investigation of the statistical characteristics of astronaut operator activity directed towards the control of a manned spacecraft
p0050 A82-16712
Visual scanning behavior and mental workload in aircraft pilots
p0073 A82-18741
Psychological problems in the mutual adaptation of man and machine in control systems --- Russian book
p0087 A82-19000
Advanced aviation concepts evaluation through computer driven simulation --- human factors consideration in flight training simulator design
p0088 A82-19258
Human Factors Society, Annual Meeting, 24th, Los Angeles, CA, October 13-17, 1980, Proceedings
p0139 A82-22901
Evaluating operator performance on automated tactical systems
p0140 A82-22908
Mini-remotely piloted vehicle precision tracking evaluation
p0140 A82-22909
The measurement of aircrew task loading during operational flights
p0141 A82-22922
The structure of processing resources - Implications for task configuration and workload --- effects on human performance in man machine systems
p0141 A82-22923
The event-related brain potential as an index of attention allocation in complex displays
p0142 A82-22928
Item recognition as a Performance Evaluation Test for Environmental Research
p0143 A82-22934
An application of manned simulation in crew station conceptual development
p0144 A82-22943
Task taxonomies and modeling for system performance prediction
p0144 A82-22946
The finite intersection test - A new multivariate statistical technique applicable to the evaluation of complex systems --- of man and machine
p0144 A82-22947
Finding a needle in a haystack when you've never seen a needle - A human factors analysis of SETI
p0144 A82-22950
Cognitive styles and the acquisition of a complex aerial maneuver
p0146 A82-22962
Some current issues in workload assessment
p0147 A82-22971
Identification of the human operator in a closed-loop system
p0195 A82-26611
Simplicity in command and control systems - A human factors consideration --- for man computer interfare design
p0198 A82-27222
Mode of flight and a mathematical model of pilot activity relating to flight-vehicle control
p0198 A82-27513
Statistical optimization of interaction in man-machine systems
p0208 A82-28218
The evaluation of information display on the basis of the transinformation --- German book
p0209 A82-28394
A stochastic model of a human operator in the manual control of a dynamic system
p0229 A82-29469
A model of human decisionmaking in multiple process monitoring situations
p0231 A82-29671
Perceptual components of computer displays
p0254 A82-32413
Man under vibration: Suffering and protection --- Book
p0259 A82-33751
Modern problems of vibrations in the systems 'man-machine-environment'
p0259 A82-33752
Automatic system for study and measurement of vibration parameters affecting human body
p0260 A82-33765
On the measuring of contact forces between human body and equipment
p0261 A82-33767
Optimization of stochastic man-machine systems
p0261 A82-33769
Vibration machines and man
p0261 A82-33770
The direction of the process of computer operator training
p0263 A82-34690
A study on human tracking performance in a complex G field experiment
p0277 A82-34971

MAN MACHINE SYSTEMS CONTD

Manned systems design: Methods, equipment, and applications; Proceedings of the Conference, Freiburg im Breisgau, West Germany, September 22-25, 1980
p0287 A82-36951
Methods - Past approaches, current trends and future requirements --- in human factors engineering
p0287 A82-36952
The human operator simulator - An overview
p0287 A82-36956
SAINT, a digital simulation language for the study of manned systems
p0287 A82-36957
A method for semi-automatic analysis of eye movements
p0288 A82-36960
Physiological monitoring and the concept of adaptive systems
p0288 A82-36963
Analysis of human movements for workplace design
p0288 A82-36966
Evaluating simulator validity

p0040 N82-13666
The cognitive demands of second order manual control: Applications of the event related brain potential
p0040 N82-13667
A study on task difficulty and acceleration stress
p0040 N82-13668

Subjective rating scales as a workload
p0040 N82-13669
Physiological assessment of operator workload during manual tracking. 1: Pupillary responses
p0041 N82-13670
Horizontal conflict resolution maneuvers with a cockpit display of traffic information
p0041 N82-13671
Some effects of Field Of View (FOV) and target size on lateral tracking at hover
p0041 N82-13672
Video framerate, resolution and grayscale tradeoffs for undersea telemanipulator
p0041 N82-13673
Predictor symbology in computer-generated perspective displays
p0041 N82-13674
Multi-axis manual controllers: A state-of-the-art report
p0044 N82-13701
Theoretical linear approach to the combined man-manipulator system in manual control of an aircraft
p0045 N82-13702
The influence of ship motion of manual control skills
p0045 N82-13703
The role of manipulator characteristics in selecting the ideal effective vehicle
p0045 N82-13704
Computer aided manual tracking
p0045 N82-13705
Design and development of a six degree of freedom hand controller
p0045 N82-13706
Manual control analysis of drug effects on driving performance
p0046 N82-13709
A theory of human error
p0046 N82-13716
Stability analysis of automobile driver steering control
p0047 N82-13717
A comparison of head and manual control for a position-control pursuit tracking task
p0047 N82-13720
Time-sharing manual control and memory search: The joint effects of input and output modality competition, priorities and control order
[AD-A108721]
p0176 N82-18867
The effect of visual information on the manual approach and landing
[NLR-TR-80055-U]
p0181 N82-19836
Six degree of freedom manual controls study report
[NASA-CR-167532]
p0181 N82-19837
Biomechanical analysis of tasks involving manual materials handling
[AD-A113955]
p0355 N82-29009
Proceedings of the Sixteenth Annual Conference on Manual Control
[NASA-CR-169243]
p0379 N82-30833
Modeling of human operator dynamics in simple manual control utilizing time series analysis
p0379 N82-30834
A gunner model for an AAA tracking task with interrupted observations
p0379 N82-30835
The effect of visual information on the manual approach and landing
p0379 N82-30837
Pursuit tracking and higher levels of skill development in the human pilot
p0379 N82-30839
An experimental study of human pilot's scanning behavior
p0379 N82-30841
A computer simulation approach to measurement of human control strategy
p0380 N82-30843
Subjective scaling of mental workload in a multi-task environment
p0380 N82-30844
Effect of counting and tracking on verbal and production methods of time estimation
p0380 N82-30845
A model based technique for predicting pilot opinion ratings for large commercial transports
p0380 N82-30846
An analytical prediction of pilot ratings utilizing human pilot model
p0380 N82-30847
A performance analysis study of a complex G field experiment
p0380 N82-30852
Pilot reaction to attitude gyro failure: A flight experiment
p0381 N82-30858
Combined discrete network continuous control modelling of operator behavior
p0381 N82-30861
The role of antagonist coactivation in the control of natural movement
p0382 N82-30867
A comparison of control modes for time-delayed remote manipulation
p0382 N82-30868
Experimental evaluation of the concept of supervisory manipulation
p0382 N82-30869
Sixteenth Annual Conference on Manual Control
[NASA-TM-84273]
p0436 N82-34037
Modeling of human operator dynamics in simple manual control utilizing time series analysis --- tracking (position)
p0436 N82-34038
A gunner model for an AAA tracking task with interrupted observations
p0436 N82-34039
Modeling human target acquisition in ground-to-air weapon systems
p0437 N82-34040
The effect of visual information on the manual approach and landing
p0437 N82-34041
The effects of multiplicative motor noise on the optimal human operator model
p0437 N82-34042
Training aircraft design considerations based on the successive organization of perception in manual control
p0437 N82-34043
An experimental study of human pilot's scanning behavior
p0437 N82-34044
Parametric identification of human operator models
p0437 N82-34045
A computer simulation approach to measurement of human control strategy
p0437 N82-34046
An analytical prediction of pilot ratings utilizing human pilot model
p0438 N82-34051
Description/demonstration of BIODYN-80. A software package for evaluating the transmissibility between vehicle vibration and motions of hands (in controls), limbs, head and eyes
p0439 N82-34057
Levels of steering control: Reproduction of steering-wheel movements
p0441 N82-34071
Experimental evaluation of the concept of supevisory manipulation
p0442 N82-34073

MEMBRANES
NT CHOROID MEMBRANES
NT ION EXCHANGE MEMBRANE ELECTROLYTES
NT MEMBRANE STRUCTURES
The modeling of membranes and membrane engineering --- incorporation of foreign substances into cells
p0159 A82-24498
Statistical mechanics of biomembrane phase transition. I - Excluded volume effects of lipid chains in their conformation change
p0199 A82-27561
Extracellular local changes in resistance in muscle fibers as a function of membrane potential
p0200 A82-27736
Effect of flight on the Eustachian tube function and the tympanic membrane system - A follow-up study
p0211 A82-28483
Studies on structure and function of chloroplasts - Reconstitution of photophosphorylation activity by combining the deficient membranes of chloroplasts with crista membrane fragments of mitochondria
p0259 A82-33595
Affections of the upper respiratory tracts in transport-fleet sailors and the prophylaxis of these affections on long voyages
p0281 A82-35696
Pulmonary oxygen toxicity - Possible role of ammonia in desorbing lung surfactant
p0283 A82-35908
Ion currents through a neuron membrane during the injection of cyclic nucleotides
p0312 A82-38568
A possible explanation for the fluctuations in reflectivity exhibited by bilayer liped membranes excited during electrostriction
p0313 A82-38602
The conductivity of model protein-lipid membranes
p0313 A82-38604
Gramicidin A-induced conductance of the muscle fiber membrane
p0313 A82-38605
The incorporation of an erythrocyte membrane into planar bilayer lipid membranes
p0313 A82-38606
Investigations of the vascular reactions or the nasal mucous membranes of cosmonauts
p0419 A82-47576
The use of phosphorescent probes in studies of model and biological membranes
p0420 A82-48208
Condition of meningeal nervous system during repeated exposure to transverse accelerations
p0127 N82-16730
Facilitated diffusion of small non-electrolytes in the human red blood cell
p0135 N82-17855
Investigation of radiofrequency radiation effects on excitable tissues
[AD-A109813] p0221 N82-21873
The utilization of macromolecules in blood purification systems
[NRC/CNR-TT-2021] p0358 N82-29864
Diffusion mediated localization on membrane surfaces
[NASA-CR-166386] p0393 N82-31888
Viscosity dependence of the rates of diffusional processes
[NASA-CR-166394] p0428 N82-33982
Structural changes in plasma membrane under influence of ionizing radiation
p0430 N82-33993

MEMORY
An investigation of memory during the process of adaptation to mountain conditions
p0061 A82-17138
Performance Evaluation Tests for Environmental Research /PETER/ - Auditory digit span task --- number sequence memory
p0142 A82-22932
Comparison of memory tests for environmental research
p0143 A82-22936
Psychophysical studies of perception and memory --- Russian book
p0167 A82-24901
A psychophysiological analysis of the memory changes undergone by humans in adapting to new climatic and geographic conditions

p0187 A82-25694
  Neurochemical mechanisms of learning and memory --- Russian book p0326 A82-40646
  USSR report. Life sciences biomedical and behavioral sciences, no. 12 [JPRS-79338] p0012 N82-11762
  Time and information model of human Memory Organization p0012 N82-11763
  Time-sharing manual control and memory search: The joint effects of input and output modality competition, priorities and control order [AD-A108721] p0176 N82-18867
  The event related brain potential as an index of information processing, cognitive activity, and skill acquisition: A program basic research [AD-A111057] p0267 N82-24827
  Structures of memory for critical flight information [AD-A116510] p0435 N82-34026
MENINGITIS
  The use of trenthalum in acute vestibulocochlear disorders in patients with meningococcal infection p0280 A82-35689
MENSTRUATION
  Thermoregulation and the menstrual cycle p0321 A82-40441
  The tolerance to physical loads in women during menopause complicated by climacteric neurosis with cardialgia p0344 A82-41495
MENTAL HEALTH
  Characteristics of indicators of cardiac rhythm in the norm and in mental maladjustment p0062 A82-17144
  Human predictive ability in univocally determined situations for normal and pathological states p0162 A82-24532
  Old and new directions in the engineering psychology of artificial horizons and their effects on the mental hygiene of the student pilot p0166 A82-24842
  Mental hygiene of sailors --- Russian book p0372 A82-43602
MENTAL PERFORMANCE
  An investigation of memory during the process of adaptation to mountain conditions p0061 A82-17138
  Effects of task feedback and stringency of external pacing on mental load and work performance p0071 A82-18325
  Electroencephalographic correlates of the hemispheric functional asymmetry in the human brain p0106 A82-21454

p0125 N82-16715
Condition of meningeal nervous system during repeated exposure to transverse accelerations
p0127 N82-16730
Structural and functional properties, and energy metabolism of erythrocytes during space flights varying in duration
p0214 N82-20881
Morphometrical investigations on the reproductive activity of the ovaries in rats subjected to immobilization and to motion activity
[NASA-TM-76831] p0220 N82-21067
Evaluation of left ventricular assist device pump bladders cast from ion-sputtered polytetrafluorethylene mandrels
[NASA-CR-167904] p0249 N82-23976
Morphology and coagulant function of human blood system during long exposure to low ammonia concentrations in a sealed environment
p0394 N82-31903
Morphological distinctions of Macaca rhesus monkey thyroid under normal and various types of hypokinetic conditions
p0395 N82-31908
MORTALITY
Mass mortality and its environmental and evolutionary consequences --- at end of Cretaceous period
p0227 A82-28596
Behavioral studies following ionizing radiation exposures: A data base
[AD-A115825] p0423 N82-32965
MOSS (SPACE STATIONS)
U ORBITAL SPACE STATIONS
MOTILITY
U LOCOMOTION
MOTION
The phase structure in the process by which a system of motions is formed in gymnasts
p0158 A82-24482
Retinal location and visual localization during pursuit eye movement
p0318 A82-39436
The effect of disuse on fast and slow skeletal muscle
p0430 N82-33997
MOTION AFTEREFFECTS
Conditioned feeding suppression in rats produced by cross-coupled and simple motions
p0192 A82-26230
Gravity and the tilt aftereffect --- comparison between monocular, binocular and interocular exposures
p0318 A82-39440
MOTION PERCEPTION
Possible model representations of the neurophysiological mechanisms for the analysis of the direction and speed of a moving visual object
p0053 A82-16807
Model for the perception of moving and fixed objects
p0054 A82-16820
Directional sensitivity of individual vertebrate hair cells to controlled deflection of their hair bundles --- in frog vestibules
p0063 A82-17427
Circularvection - Psychophysics and single-unit recordings in the monkey --- vestibular effects of rotation
p0066 A82-17449
Visually induced self-motion sensation adapts rapidly to left-right reversal of vision
p0067 A82-17455
Early directional influence of visual motion cues on postural control in the falling monkey
p0067 A82-17459
How do we avoid confounding the direction we are looking and the direction we are moving
p0071 A82-18024
Auditory depth perception - Localization of nonmoving and moving sound sources
p0111 A82-21727
The effect of prolonged practice of pursuit eye movement
p0157 A82-24030
The latency of circular vection during different accelerations of the optokinetic stimulus
p0157 A82-24031
Perceived rate of movement depends on contrast
p0185 A82-25648
Orientation perception during aircraft coordinated turns
[AIAA PAPER 82-0258] p0198 A82-27096

Motion and vision. IV - Isotropic and anisotropic spatial responses
p0207 A82-28115
Evidence for a boundary effect in roll vection
p0212 A82-28500
The effect of convergence on the vestibulo-ocular reflex and implications for perceived movement
p0235 A82-30873
Adaptation in motion perception - Alteration of motion evoked by ocular pursuit
p0237 A82-31412
Effects of reference lines on displacement thresholds at various durations of movement --- in human visual perception
p0314 A82-38797
Neurons in cat visual cortex tuned to the direction of motion in depth - Effect of positional disparity
p0316 A82-39434
Characteristics of human auditory evoked potentials during the lateralization of a 'moving' auditory image
p0323 A82-40465
Three stimuli for visual motion perception compared
p0370 A82-42900
Effect of motion sweep duration and number of stations upon interpolation in discontinuous motion --- visual tracking motion perception
p0403 A82-45674
Close-range cine-photogrammetry: A generalized technique for quantifying gross human motion
p0036 N82-12781
Optokinetic factors and development of seasickness symptoms
p0215 N82-20851
Relative depth and local surface orientation from image motions
[AD-A109565] p0218 N82-20873
A comprehensive system model for motion/space sickness: Preliminary results
p0381 N82-30855
Effect of optokinetic stimulation on operator's functional state and professional work capacity
p0394 N82-31896
Comparison of rhesus and human spectral dynamic visual acuity
[AD-A115258] p0433 N82-34018

MOTION SICKNESS

Nausogenic properties of various dynamic and static force environments --- in space
p0058 A82-16938
Coping with space motion sickness in Spacelab missions
p0058 A82-16939
Vestibular tests in the selection of cosmonauts
p0058 A82-16941
Motion sickness due to vision reversal - Its absence in stroboscopic light
p0066 A82-17451
Vestibular habituation in man and monkey during sinusoidal rotation
p0066 A82-17453
Human orientation in space
[AIAA PAPER 82-0422] p0071 A82-17940
A statistical examination of three approaches for predicting motion sickness incidence
p0100 A82-21685
The effect of small rectilinear sign-varying accelerations on the mucous membrane of the small intestine of dogs
p0150 A82-23170
Mechanisms of motion sickness
p0171 A82-25497
Conditioned feeding suppression in rats produced by cross-coupled and simple motions
p0192 A82-26230
Reducing motion sickness - A comparison of autogenic-feedback training and an alternative cognitive task
p0252 A82-32005
Motion sickness, its prevention and treatment --- Russian book
p0289 A82-36971
Antimotion-sickness efficacy of scopolamine 12 and 72 hours after transdermal administration
p0320 A82-40437
Dynamics of subjective discomfort in motion sickness as measured with a magnitude estimation method
p0321 A82-40438
Vestibular effects of water immersion and Clonidine
p0337 A82-40762
Medical monitoring and therapy of space motion sickness
[IAF PAPER 82-169] p0377 A82-44604
A study in motion sickness - Saccular hair cells in the adult bullfrog
p0416 A82-47280
Motion sickness incidence induced by complex periodic waveforms
p0416 A82-47336
Influence of a visual display and frequency of whole-body angular oscillation on incidence of motion sickness
p0416 A82-47337
The relationship of motion sickness susceptibility to learned autonomic control for symptom suppression
p0417 A82-47338
STS-1 medical report
[NASA-TM-58240] p0076 N82-15711
Validation of predictive tests and countermeasures for space motion sickness
p0077 N82-15719
The effects of rotation and oscillation: Aerial sickness
p0080 N82-15744
Acceleration measures and motion sickness incidence
[AD-A107996] p0127 N82-16734
Vestibular experiments
p0173 N82-18256
Significance of vestibular asymmetry to genesis of vestibular dysfunction
p0215 N82-20850
Optokinetic factors and development of seasickness symptoms
p0215 N82-20851
Human reaction to low frequency motion: Preliminary studies --- slip motion and sea roughness
[RAE-TM-FS-365] p0222 N82-21884
Reaction to diminished circulating blood volume in individuals who are susceptible and insusceptible to motion sickness (seasickness)
p0349 N82-28960
Significance of minute volume parameters to evaluation of vestibular stability
p0357 N82-29860
Neurochemical background and approaches in the understanding of motion sickness
[NASA-CR-3569] p0358 N82-29865
A comprehensive system model for motion/space sickness: Preliminary results
p0381 N82-30855
Effect of optokinetic stimulation on operator's functional state and professional work capacity
p0394 N82-31896
Airsickness during Naval flight officer training: Advanced Squadron VT86-RIO (new syllabus)
[AD-A114685] p0432 N82-34011
A comprehensive system model for motion/space sickness. Preliminary results
p0439 N82-34059

MOTION SICKNESS DRUGS

Coping with space motion sickness in Spacelab missions
p0058 A82-16939
The effects of rotation and oscillation: Aerial sickness
p0080 N82-15744
Efficacy of kavinton in prevention of motion sickness
p0349 N82-28961

MOTION SIMULATORS

A command and control device for a man-machine system - Fabrication of a platform and trials --- French thesis
p0365 A82-41699
The influence of motion cues on driver-vehicle performance in a simulator
p0042 N82-13681
The influence of ship motion of manual control skills
p0045 N82-13703
The Link-Miles driver training simulator for tracked vehicles: Influence of cabin motion on gear-change learning
[IZF-1980-24] p0084 N82-15785

Visual/motion cue mismatch during a coordinated roll maneuver
p0439 N82-34055

MOTION STABILITY
NT LATERAL STABILITY
Biped walking - Model problems of dynamics and control
p0087 A82-18977

MOTIVATION
Dynamics of a stabilized motor defensive conditioned reflex for different levels of motivation in irradiated rats
p0323 A82-40464
Motivational analysis of human volunteers for centrifuge acceleration research
p0409 A82-46538
Using rewards and penalties to obtain desired subject performance
p0042 N82-13684
Adapative motivation theory
[AD-A111195] p0354 N82-28997
Plastic properties of motivation as prime component in systemic organization of purposeful behavioral acts
p0391 N82-30937
Experimental analysis of team performance: Methodological developments and research results
[AD-A116915] p0436 N82-34034

MOTOR SYSTEMS (BIOLOGY)
U EFFERENT NERVOUS SYSTEMS

MOTOR VEHICLES
NT AUTOMOBILES
NT TRACKED VEHICLES

MOTORS
NT ASYNCHRONOUS MOTORS
NT ELECTRIC MOTORS

MOUNTAIN INHABITANTS
Oxygen transport in dogs native to high altitudes during exercise
p0110 A82-21719

MOUNTAINS
Functional condition and work capacity under mountain conditions
p0093 A82-20313

MOUTH
Complex technique for studying the oxygen regimen and hemodynamics of the oral mucosa under hypoxia
p0204 A82-27789

MOVEMENT
U MOTION

MOVING TARGET INDICATORS
A finite-state description of coordination in a two-handed target acquisition task
p0376 A82-44514

MTI RADAR
U MOVING TARGET INDICATORS

MUCOUS
The effect of small rectilinear sign-varying accelerations on the mucous membrane of the small intestine of dogs
p0150 A82-23170
Complex technique for studying the oxygen regimen and hemodynamics of the oral mucosa under hypoxia
p0204 A82-27789

MULTIPHOTON ABSORPTION
Analytical detection of organic species by means of laser-induced multiphoton ionization
p0038 N82-13646

MULTIPROPELLANTS
U ROCKET PROPELLANTS

MULTIVARIATE STATISTICAL ANALYSIS
NT BIVARIATE ANALYSIS
NT REGRESSION ANALYSIS
The finite intersection test - A new multivariate statistical technique applicable to the evaluation of complex systems --- of man and machine
p0144 A82-22947
Individual differences in multi-task response strategies
p0407 A82-46273

MUSCLES
NT MYOCARDIUM
Oxygen deficiency in tissues and their blood supply
p0020 A82-13700
DNA and RNA synthesis in the isolated nuclei of rat skeletal muscle fibers during hypokinesia
p0024 A82-15353
Neurotrophic factor - Characterization and partial purification
p0026 A82-15698
Effects of disuse by limb immobilization on different muscle fiber types
p0055 A82-16830
Eye-muscle geometry and compensatory eye movements in lateral-eyed and frontal-eyed animals
p0063 A82-17429
Cellular mechanisms of the Frank-Starling phenomenon
p0107 A82-21456
Differentiation of muscles on the basis of trace-element composition
p0109 A82-21704
The relationship between carbohydrate and lipid metabolisms in muscle cell energetics under the influence of ATPase loading - Mathematical model
p0109 A82-21706
Decussations in the human muscular system
p0114 A82-21762
A study of tropomyosins in human muscular and nonmuscular organs
p0117 A82-21806
The condition of certain glycolytic and tricarboxylic acid cycle enzymes in intact and denervated skeletal muscles of the rat during cooling
p0150 A82-23168
Oxygen supply of the muscle tissue in patients with chronic ischemic heart disease during graded physical loads
p0159 A82-24496
Guinea pig soleus and gastrocnemius electromyograms at varying speeds, grades, and loads
p0169 A82-24922
The interaction of alpha-actinin and tropomyosin with F-actin
p0199 A82-27727
Localization of adeninenucleotides in striated fibers of skeletal muscles
p0200 A82-27733
Intracellular local changes in resistance in muscle fibers as a function of membrane potential
p0200 A82-27736
The role of membrane structures in the formation of the myofibrillar system in myogenesis
p0200 A82-27743
Structural and functional organization of the microcirculatory bed in skeletal muscle
p0201 A82-27749
Sparing effect of chronic high-altitude exposure on muscle glycogen utilization
p0229 A82-29556
Time course of ultrastructural changes in skeletal muscle after two types of exercise
p0229 A82-29560
Lipoprotein lipase hydrolyzes endogenous triacylglycerols in muscle of exercised rats
p0230 A82-29570
Effects of muscle vibration and joint oscillation on human motor mechanisms
p0259 A82-33753
Glyceroaldehyde phosphatedehydrogenase from human muscles in atherosclerosis
p0262 A82-34681
State of the lactate dehydrogenase reaction in the muscular tissue of irradiated animals
p0306 A82-38158
Changes in the microelement content of muscles under denervation
p0312 A82-38598
Temperature characteristics of the ouabain-insensitive sodium flux in frog muscles
p0312 A82-38600
Gramicidin A-induced conductance of the muscle fiber membrane
p0313 A82-38605
The effect of urea and heat on the activity of lactate dehydrogenase and glucose 6-phosphate dehydrogenase
p0313 A82-38612
Acridine orange inhibition of the ATPase activity of myosin and its fragments
p0313 A82-38613
Reactions of O-18 exchange in the myosin systems of skeletal, cardiac, and smooth muscles
p0313 A82-38614

The changes in the concentration of free amino acids in muscles during exercise p0320 A82-40314

The effect of denervation and tendotomy on oxidative phosphorylation in the skeletal muscles of the rabbit and on the resistance of phosphorylation to uncoupling agents p0326 A82-40504

Morphometric analysis of rat muscle fibers following space flight and hypogravity p0331 A82-40703

Na/+/-K/+/ dependent ATP-ase modifications of skeletal muscle and myocardium of hypokinetic rats p0331 A82-40707

Effect of immobilization on the ATPase activities and Ca-uptake of sarcoplasmic reticulum in different types of muscles p0332 A82-40708

Effect of immobilization of the excitatory parameters of different type skeletal muscle p0332 A82-40710

Protein composition of mRNA containing 18S-40S subribosomal particles in soleus muscle before and after immobilization p0335 A82-40742

Regulation of glycogenolysis in human muscle at rest and during exercise p0376 A82-44144

Influence of exercise intensity and duration on biochemical adaptations in skeletal muscle p0417 A82-47378

The effects of Li, Rb, and temperature on the binding of Na and K by glycerinated frog muscle fibers p0419 A82-48206

Cathepsin activity of skeletal muscle and myocardia myofibrils after exposure to weightlessness and accelerations p0124 N82-16714

Activity of some enzymes of carbonhydrate metabolism in rat skeletal muscles after space flight p0132 N82-17834

Ultrastructure of blood vessels and muscle fibers of rat skeletal muscles after flights aboard Cosmos-605 and Cosmos-782 biosatellites p0063 N82-17835

Muscle, motor cortex, cerebellar nuclear, and spindle afferent during slow hold-ramp-hold position-tracking movements of the monkey's wrist p0135 N82-17854

Amino acids of femoral quadriceps of rats following flight aboard the Cosmos-936 biosatellite p0271 N82-25766

An ergometer for concentric and eccentric muscular contraction [AD-A111061] p0295 N82-26971

Influence of fiber type composition and capillary density on onset of blood lactate accumulation [AD-A111036] p0296 N82-26973

Testosterone enhances C-14 2-deoxyglucose uptake by striated muscle --- sex hormones and muscle [NASA-CR-169101] p0352 N82-28986

The effect of disuse on fast and slow skeletal muscle p0430 N82-33997

MUSCULAR FATIGUE

Clinical results on thymectomy in patients with myopathy in relation to the degree of muscular weakness p0113 A82-21755

The effects of left hand fatigue on right hand performance p0147 A82-22970

Cumulative fatigue over long periods caused by localized muscular movements p0160 A82-24502

Heart contractility at pressure loads induced by ischemia of exercised muscle in humans p0169 A82-24916

Effect of muscle glycogen content on glucose uptake following exercise p0169 A82-24921

Physiological effects of low levels of vibration combined with local muscular exercise in the cutting of semiprecious stones p0187 A82-25701

Respiratory muscle fatigue after marathon running p0229 A82-29552

Age characteristics of fatigue during local muscular work in humans p0238 A82-31487

Effect of pH on sensation and vastus lateralis electromyogram during cycling exercise p0256 A82-32835

Exercise performance after ventilatory work p0286 A82-36037

Muscle weakness following dynamic exercise in humans p0290 A82-37929

The effect of certain characteristics of work motions on the tolerance of hand muscles to static exertions p0311 A82-38568

The conditions attending muscular strain in work involving only a few types of movements p0311 A82-38569

Physiological mechanisms of adaptation of rat skeletal muscles to weightlessness and similar functional requirements p0330 A82-40689

Relationship between muscle QO2 and fatigue during repeated isokinetic contractions --- respiratory capacities p0340 A82-41216

Optimal use of electrophysiological indicators of muscular effort and fatigue p0248 N82-23134

Sparing effect of chronic high-altitude exposure on muscle glycogen utilization during exercise [AD-A111063] p0295 N82-26969

MUSCULAR FUNCTION

Management by means of muscular activity under unloaded conditions p0028 A82-15712

A modified kinetic model of muscular contraction p0054 A82-16818

A transsynaptic autoradiographic study of the pathways controlling the extraocular eye muscles, using /I-124/B-IIb Tetanus toxin fragment p0065 A82-17441

Alterations in responses to drugs of atria from white rats acclimated to hypobaric hypoxia p0089 A82-19497

The role of extracellular O2 and CO2 tensions in membrane mechanisms of cerebral arterial smooth muscle regulation p0090 A82-19747

The influence of muscular work on the vestigial effects of cold acclimation p0090 A82-19749

Contractile dysfunction of vascular wall smooth muscle under emotional nociceptive stress p0094 A82-20322

Investigation of recurrent inhibition in the human spinal cord during static skeletal muscle activity p0094 A82-20330

Pulse rate evaluation of the relative physiological intensity of aerobic muscular work p0094 A82-20331

The economy of muscular work during unfused tetanus p0109 A82-21701

Effect of calcium on the temporal characteristics of muscle contraction p0109 A82-21708

Study of the electrical activity of the extraocular muscles p0112 A82-21731

Nucleic acid and protein metabolism in cardiac muscle p0115 A82-21772

The effect of the prolonged administration of sodium hydroxybutyrate on the physical work capacity and muscle tissue state of rats p0115 A82-21779

Types of spontaneous discharges in muscle receptors p0116 A82-21789

Analysis of the effects of isoprenaline on the energy consumption of skeletal muscle p0150 A82-23169

Energy-dependent transport of Ca/2+/ and lipid peroxidation in sarcoplasmatic reticular muscle membranes in hypokinetic rats p0151 A82-23258

Control of the number of discharges of individual motor units in skeletal muscles as a test of coordination in athletes

p0154 A82-23282

Seasonal differences in the adaptive changes of the thermal effect of muscle contraction
p0157 A82-23647

The phase structure in the process by which a system of motions is formed in gymnasts
p0158 A82-24482

The importance of carboanhydrase in regulating the acid-base equilibrium during muscular activity
p0158 A82-24485

Effects of high ambient temperature on athlete adaptation to muscular activity
p0188 A82-25706

The permeability of the lymphatic vessels of the muscles of the upper extremities in vibration sickness
p0190 A82-25804

Oxygen, carbon dioxide and the calcium control of relaxation mechanisms in cerebral artery smooth muscles
p0196 A82-26754

The role of calcium in the activity of the smooth muscles of the pulmonary veins
p0196 A82-26756

Changes in contractile protein composition and properties following space flight
p0199 A82-27728

The possible role of hydrogen bonds in the mechanism of muscular contraction
p0200 A82-27734

Model of a 'two-headed' myosin cross-bridge and the possibility of its motion in skeletal muscles
p0200 A82-27735

The accuracy of laser diffraction measurements of sarcomere lengths in contracting muscles
p0200 A82-27737

Electromyographic pattern of muscular activity during pushing-off and methods for its directed correction in young ski-jumpers on a trampoline
p0203 A82-27776

The possibility of maintaining the temperature and work capacity of the extremities
p0206 A82-27806

Chylomicron triglyceride metabolism in resting and exercising fed dogs
p0229 A82-29551

Changes in the peroxide metabolism of weight-lifters and wrestlers under the conditions of systematic muscular activity
p0239 A82-31505

Calculation of the isochromatics and isoclinics of the cornea
p0241 A82-31530

The Na/+/-induced release of Ca/2+/ from the sarcoplasmic reticulum during the excitation of phasic muscle fibers
p0243 A82-31599

Effect of training on beta-adrenergic receptor number in rat heart
p0255 A82-32828

Effects of acute cold exposure on muscle amino acid and protein in rats
p0256 A82-32840

The determination of the equivalent biomechanical characteristics of the ankle joint muscles by vibration tests
p0260 A82-33760

Investigation of the functional state of the central nervous system and the motor apparatus for various regimes of rest and physical exercise
p0279 A82-35668

Effects of glycogen depletion and pedaling speed on 'anaerobic threshold'
p0286 A82-36038

Electromyography and applications
p0288 A82-36965

Muscle weakness following dynamic exercise in humans
p0290 A82-37929

Proof of the existence of Ca/2+/-induced structural changes in stems of myosin-containing filaments of vertebrate skeletal muscles
p0312 A82-38599

Current problems concerning the vestibulo-ocular interaction
p0317 A82-39416

Respiratory movements of the facial muscles and respiratory resistance
p0322 A82-40456

Changes of intracellular rest potential and the length of isolated muscle under different loads
p0324 A82-40480

Running in circles --- track radius effects on human running speed
p0327 A82-40661

Cardiovascular responses to isometric exercise during simulated zero gravity
p0327 A82-40662

Study of contractile properties and composition of myofibrillar proteins of skeletal muscles in the Cosmos-1129 experiment
p0331 A82-40701

Variability of physiological properties of rat skeletal muscles at different gravity levels
p0331 A82-40702

The effects of human growth hormone administration on the functional status of rat atrophied muscle following immobilization
p0332 A82-40715

The effect of hypokinesis and hypoxia on the function of muscles
p0335 A82-40739

Validation of a new method for studying the effects of vibration on the primate spine
p0338 A82-40768

Hindlimb immobilization - Length-tension and contractile properties of skeletal muscle
p0340 A82-41209

Relationship between muscle QO2 and fatigue during repeated isokinetic contractions --- respiratory capacities
p0340 A82-41216

A new hypothesis for the mechanism of muscle contraction
p0341 A82-41334

Dynamics of the brain electric activity in patients with cerebral insults under the effect of muscle stimulation with sinusoidal modulated currents
p0343 A82-41477

An investigation of the mechanical meaning of the surface electromyogram --- French thesis
p0365 A82-42078

Circulation and energetics of forearm muscles in man
p0367 A82-42604

Physiological mechanisms determining the mechanical work of breathing for different types of muscular activity
p0371 A82-43237

The relationship between postural components and voluntary movement
p0372 A82-43239

Thermogenesis and muscle activity during the adaptation to cold --- Russian book
p0372 A82-43610

The interrelationship between the pressor response and energy metabolism during isometric muscle contractions
p0373 A82-43636

The role of the extrapolation and dynamic stereotype in the mechanism of the formation and improvement of adequate motor coordination
p0374 A82-43651

The metabolic mechanisms of several types of muscle atrophy during muscle inactivity
p0413 A82-46879

Daily in vivo neuromuscular stimulation effects on immobilized rat hindlimb muscles
p0419 A82-47390

The morphological characteristics of the terminal respiratory bronchioles and the arteries accompanying them during individually graded muscular activity
p0420 A82-48220

Electron microscopical and histochemical studies on the transverse striated muscles of birds after prolonged hypokinesis
[NASA-TM-76717] p0012 N82-11759

Benefits of detailed models of muscle activation and mechanics
p0046 N82-13713

Metabolic processes in rat skeletal muscles after flight aboard Cosmos-936
p0132 N82-17833

Muscle, motor cortex, cerebellar nuclear, and spindle afferent during slow hold-ramp-hold position-tracking movements of the monkey's wrist
p0135 N82-17854

The efficiency coefficient of the rat heart and muscular system after physical training and hypokinesia
[NASA-TM-76843] p0245 N82-22068
Condition of rats connective tissue during long-term hypokinesia and in recovery period
p0350 N82-28969
Role of the thyroid gland during adaptation of skeletal muscles to increased motor activity
[NASA-TM-76871] p0384 N82-30884

**MUSCULAR STRENGTH**
Pathophysiology of motor functions in prolonged manned space flights
p0058 A82-16945
Evaluation of maximal and submaximal static muscle exertions
p0088 A82-19223
Bioenergetic characteristics of various kinds of physical loads
p0095 A82-20334
The effect of two years' training of aerobic power and muscle strength in male and female cadets
p0107 A82-21678
Clinical results on thymectomy in patients with myopathy in relation to the degree of muscular weakness
p0113 A82-21755
A strength and anthropometric comparison of young men and women --- examined for work station design
p0139 A82-22907
Regulation of blood supply in the extremities during exercise in women
p0158 A82-24479
Energy supply characteristics and blood protein and electrolyte content during submaximal muscular activity in bicyclists
p0158 A82-24488
Method for the determination of muscle cross-sectional area and dermato-adipose layer thickness using ultrasonic scanning
p0204 A82-27778
The strength-endurance relationship in skeletal muscle - Its application to helmet design
p0211 A82-28484
Muscle weakness following dynamic exercise in humans
p0290 A82-37929
The effect of inotropic factors on the postexercise characteristics of the heart
p0322 A82-40451
Atrophy of rat skeletal muscles in simulated weightlessness
p0335 A82-40738
Neuromuscular adaptation in human thenar muscles following strength training and immobilization
p0340 A82-41213
Morphological criteria for diagnosing pathologies of the thymus with myasthenia
p0369 A82-42633
Regulation of calcium current and calcium activity in heart cells
p0137 N82-17870
Isokinetic, isometric, and isotonic strength relationships
[AD-A111039] p0295 N82-26972
Control of muscle activity in unloaded conditions
[NASA-TM-76883] p0390 N82-30927

**MUSCULAR TONUS**
The dynamics of muscular relaxation following unfused tetanuses of different durations
p0109 A82-21707
Study of the electrical activity of the extraocular muscles
p0112 A82-21731
Effects of muscle vibration and joint oscillation on human motor mechanisms
p0259 A82-33753
Control of muscle activity in unloaded conditions
[NASA-TM-76883] p0390 N82-30927

Increased hemoglobin-oxygen affinity does not decrease skeletal muscle oxygen consumption
p0006 A82-11154
The effects of hypokinesia on the spectral characteristics of free amino acids in the skeletal muscles and the blood
p0071 A82-18661
Investigation of recurrent inhibition in the human spinal cord during static skeletal muscle activity
p0094 A82-20330
Characteristics and patterns of the individual development of male and female rats in the light of the energy rule of skeletal muscles
p0111 A82-21721
Decussations in the human muscular system
p0114 A82-21762
An electron microscope study of hyperplasia in fibers of the skeletal muscles of athletes
p0114 A82-21764
The source of reparative regeneration in skeletal muscle tissue
p0114 A82-21768
LDH isoenzyme spectrum in intact and denervated skeletal muscles of rats of various age during cold adaptation
p0117 A82-21798
Enzymatic capacities of skeletal muscle - Effects of different types of training
p0121 A82-22248
Analysis of the effects of isoprenaline on the energy consumption of skeletal muscle
p0150 A82-23169
The effects of cutting or of stretching skeletal muscle in vitro on the rates of protein synthesis and degradation
p0150 A82-23244
Energy-dependent transport of Ca/2+/ and lipid peroxidation in sarcoplasmatic reticular muscle membranes in hypokinetic rats
p0151 A82-23258
Control of the number of discharges of individual motor units in skeletal muscles as a test of coordination in athletes
p0154 A82-23282
The influence of physical stress on the dynamics of work capacity and electrical activity of skeletal muscles in the course of an entire day
p0154 A82-23284
Morphometric analysis of ultrastructural changes in the skeletal muscles during physical exercise in acute and chronic experiments
p0163 A82-24549
Ultrastructural changes in skeletal muscle fibers under the influence of acute physical exercise
p0189 A82-25717
Recovery time course in contractile function of fast and slow skeletal muscle after hindlimb immobilization
p0197 A82-26816
Changes in contractile protein composition and properties following space flight
p0199 A82-27728
Study of the viscosity of free and protein-bound membrane lipids
p0199 A82-27732
Model of a 'two-headed' myosin cross-bridge and the possibility of its motion in skeletal muscles
p0200 A82-27735
Regeneration of skeletal muscle after mechanical trauma in reptiles
p0203 A82-27767
Effect of sodium fluoroacetate on oxygen consumption in rat and cat liver tissue and skeletal muscles
p0206 A82-27808
Effects of reduced motor activity and water regimen on the growth of animals and their skeletal musculature
p0228 A82-29440
The role of protein phosphorylation in neutral and hormonal control of cellular activity
p0234 A82-30766
Adaptation of skeletal and cardiac muscle to elevated motor activity in hypo- and athyreotic rats

p0241 A82-31527
Dynamics of changes in animal body mass and skeletal musculature under conditions of hypokinesia
p0241 A82-31533
Effect of limb immobilization on skeletal muscle
p0255 A82-32826
Effect of base oscillations on the human skeletal muscle and joint forces in a standing posture
p0259 A82-33754
The effect of denervation and tendotomy on oxidative phosphorylation in skeletal muscles of the rabbit and the resistance of phosphorylation to uncoupling agents
p0307 A82-38171
Proof of the existence of Ca/2+/-induced structural changes in stems of myosin-containing filaments of vertebrate skeletal muscles
p0312 A82-38599
Somatotypology and athletics
p0324 A82-40486
X-ray study of loaded skeletal portions in the upper extremities of athletes engaging in karate
p0325 A82-40490
Physiological mechanisms of adaptation of rat skeletal muscles to weightlessness and similar functional requirements
p0330 A82-40689
Body composition of rats flown aboard Cosmos-1129
p0330 A82-40695
Results of morphological investigations aboard biosatellites Cosmos
p0330 A82-40697
Study of contractile properties and composition of myofibrillar proteins of skeletal muscles in the Cosmos-1129 experiment
p0331 A82-40701
Variability of physiological properties of rat skeletal muscles at different gravity levels
p0331 A82-40702
Plasticity of fast and slow muscle myofibrillar proteins in model experiments simulating weightlessness
p0332 A82-40709
Effect of immobilization on the nonhistone protein composition in different types of skeletal muscles
p0332 A82-40711
Immobilization effects upon aerobic and anaerobic metabolism of the skeletal muscles
p0332 A82-40712
Atrophy of rat skeletal muscles in simulated weightlessness
p0335 A82-40738
Results of biosatellite studies of gravity-dependent changes in the musculo-skeletal system of mammals
p0336 A82-40751
Adaptation of the rat skeleton to weightlessness and its physiological mechanisms - Results of animal experiments aboard the Cosmos-1129 biosatellite
p0336 A82-40753
Hindlimb immobilization - Length-tension and contractile properties of skeletal muscle
p0340 A82-41209
Myosatellocytes and cambial properties of skeletal and muscular tissue
p0342 A82-41469
Skeletal abnormalities in rats induced by simulated weightlessness
p0345 A82-41548
The effect of drugs altering the exchange of cAMP on the bioelectrogenesis of skeletal muscles
p0374 A82-43653
Effects of beta-adrenergic receptor blockade on glycogenolysis during exercise
p0374 A82-44133
A critical value for O2 transport in the rat
p0375 A82-44141
The relationship between the formation of ATP that is stimulated by insulin and the effect of insulin on the accumulation of creatine in cytoplasmic-membrane-enriched particles from rat skeletal muscles
p0413 A82-46880
Influence of exercise intensity and duration on biochemical adaptations in skeletal muscle
p0417 A82-47370
In vivo leucine oxidation at rest and during two intensities of exercise
p0418 A82-47388
Quantitation of tissue loss during prolonged space flight
[NASA-CR-167460] p0033 N82-12752
Applications of nuclear techniques for in vivo body composition studies at Brookhaven National Laboratory
[DE81-029922] p0083 N82-15772
Measurements of intra and extracellular water spaces and electrolyte concentrations in human skeletal muscle
p0180 N82-19829
Body composition data from the rat subjects of Cosmos 1129 experiment K-316
[NASA-CR-168678] p0213 N82-20832
Development of the carbon fibre polysulphone toggle for ligament repair operations
[CSIR-ME-1709] p0246 N82-22881
Anatomic perspective of the female athlete: An approach to musculoskeletal profiling of women in sports
[AD-A110630] p0298 N82-26992
Effect of high ambient temperature on carbohydrate metabolism in rat liver and skeletal muscles
p0351 N82-28975
Anatomy of the spine
p0359 N82-29871
The role of antagonist coactivation in the control of natural movement
p0382 N82-30867
Role of the thyroid gland during adaptation of skeletal muscles to increased motor activity
[NASA-TM-76871] p0384 N82-30884
Chromatin of rat brain neurons and nucleic acids of muscles as related to localization of decimeter waves during exercise
p0387 N82-30908
The effect of disuse on fast and slow skeletal muscle
p0430 N82-33997
A dynamic model of the cervical spine and head
[AD-A114887] p0432 N82-34008

MUTAGENS
Mutagens and carcinogens - Occurrence and role during chemical and biological evolution
p0106 A82-20975
The circadian rhythm of the sensitivity of the chromosome apparatus of mice to the mutagenic effect of measles
p0323 A82-40462
The induction of reversions to prototrophy in Escherichia coli cells under the influence of neutrons and gamma radiation
p0404 A82-45777
Different modifiability of point and structural radiation mutations in eukaryotes --- under radioprotective agents
p0412 A82-46864
Microbiologically-mediated mutagenic activity of crude oil
[PB82-105131] p0123 N82-16702
Lack of induction of single-strand breaks in mammalian cells by sodium azide and its proximal mutagen
[DE82-001721] p0424 N82-32960

MUTATIONS
A mathematical method for the enumeration of doublet codes --- in genetic coding theory
p0103 A82-20953
The effectiveness of using various radioprotective agents for protecting the genital cells of male mice from the genetic effects of radiation. I - Investigation of the yield of dominant lethal mutations in postspermatogonial cells
p0155 A82-23289
Investigation of the radio-protective effect of cystamine on a model of thermally induced prophage lambda
p0278 A82-35659
The effect of long-wave ultraviolet radiation on cyclophosphamide-induced levels of chromosome aberrations in the bone marrow cells of mice
p0310 A82-38556
Different modifiability of point and structural radiation mutations in eukaryotes --- under radioprotective agents
p0412 A82-46864

Possible mechanism for chemical induction of chromosome aberrations in male meiotic and postmeiotic germ cells of mice
[DE81-031999]
p0123 N82-16700

Microbiologically-mediated mutagenic activity of crude oil
[PB82-105131]
p0123 N82-16702

MYOCARDIAL INFARCTION

The electrocardiographic diagnosis of myocardial infarction in the presence of ventricular conduction defects - A new attempt to solve an old problem
p0006 A82-11199

The ergometric determination of myocardial reserves
p0052 A82-16805

The prognostic value of the central hemodynamic parameters in patients with acute myocardial infarction
p0164 A82-24553

Two dimensional echocardiographic detection of intraatrial masses
p0169 A82-25136

Computer analysis of tests involving physical stress --- in cardiology
p0190 A82-25807

The prognostic significance of electrocardiotopogram parameters in macrofocal myocardial infarction
p0204 A82-27783

The effect of decimeter waves on the functional state of the cardiovascular system, and some biochemical and immunological indices of patients with myocardial infarction in the recovery phase
p0239 A82-31512

Myoglobinemia as a criterion for the early diagnosis of acute myocardial infarction /Literature review/
p0259 A82-33726

The effect of nitroglycerine on the functional state of the left ventricle in patients with acute myocardial infarction according to ultrasonic studies of the heart
p0279 A82-35679

The pharmocokinetic characteristics of trimecain as compared to lidocain in patients with myocardial infarction
p0280 A82-35682

Mechanisms of the development of hypersensitivity to strophanthin in experimental myocardial infarction and its pharmacological correction
p0280 A82-35683

Enzymes that detoxify active forms of oxygen and lipoperoxide in experimental ischemia and myocardial infarction
p0308 A82-38540

The potential of radionuclide diagnosis of acute myocardial infarction
p0341 A82-41458

Functional properties of T-lymphocytes in patients with acute myocardial infarction
p0341 A82-41459

Characteristics of night sleep disorders in the case of myocardial infarction according to polygraphic data
p0344 A82-41491

An evaluation of the informativeness of EKG parameters in diagnosing a myocardial infarction of the back wall of the left ventricle
p0344 A82-41493

A comparison of echo- and kinetocardiographic indicators of the myocardial contractility of the left ventricle in patients suffering from various forms of ischemic heart disease
p0344 A82-41496

The rate at which exogeneous hydrocortisone is eliminated from peripheral blood flow in patients suffering from an acute myocardial infarction
p0344 A82-41498

Changes in the transaminase activity and several biochemical blood values in the acute period of experimental myocardial infarction in monkeys
p0366 A82-42172

Immuno-enzymological comparisons in the differential diagnosis of various myocardial lesions
p0409 A82-46704

The hypophysial-thyroid system in the course of a complicated and an uncomplicated myocardial infarction
p0410 A82-46718

The results of the exercise test and further outcomes in patients with chronic ischemic heart disease
p0410 A82-46720

Graded physical-exercise loads in the period right after myocardial infarction
p0411 A82-46722

The activities of the dehydrogenases of the Krebs cycle and the enzymes of tissue respiration during myocardial necrosis in stress-impaired rats
p0413 A82-46881

Mortality in acute myocardial infarction as function of geomagnetic field activity in Yerevan
p0134 N82-17852

Emotional stress as a factor in cardiovascular disturbances
[NASA-TM-76910]
p0385 N82-30889

MYOCARDIUM

Endurance training in the rat. I - Myocardial mechanics and biochemistry
p0006 A82-11155

Effect of exhaustive exercise on myocardial performance
p0018 A82-13228

Damage and repair of heart muscle DNA during emotional-pain stress
p0055 A82-16822

The temperature dependence of the kinetics of isometric myocardium relaxation
p0090 A82-19748

Cellular mechanisms of the Frank-Starling phenomenon
p0107 A82-21456

Effect of cooling of the rhythmo-inotropic ratio in a pathologically altered myocardium
p0112 A82-21740

Clinical results on thymectomy in patients with myopathy in relation to the degree of muscular weakness
p0113 A82-21755

Nucleic acid and protein metabolism in cardiac muscle
p0115 A82-21772

The dynamics and physiological importance of the activation of the gamma-amino-butyric acid system in the brain and cardiac muscle under pain and emotional stress
p0117 A82-21808

Morphofunctional changes in the rabbit myocardium during chronic solar thermal overheating
p0161 A82-24516

Pathological anatomy and ultrastructure of the heart /Combined morphological investigation of the general pathological process in the myocardium/ --- Russian book
p0194 A82-26525

Adaptation of skeletal and cardiac muscle to elevated motor activity in hypo- and athyreotic rats
p0241 A82-31527

Preventing disturbances to the structure of DNA in the cardiac muscle from emotional-nociceptive stress by blocking beta-adrenoreceptors and the peroxidation of lipids
p0241 A82-31528

Effects of creatine phosphate on action potential duration and myocardial contractile force in the frog under hypoxia
p0241 A82-31532

Effect of training on beta-adrenergic receptor number in rat heart
p0255 A82-32828

Recent developments in assessing the myocardial dystrophy encountered in athletes as a consequence of chronic physical overexertion
p0280 A82-35680

Study of RNA synthesis rate and DNA content in the myocardium of new-born rats during adaptation to high-altitude hypoxia
p0308 A82-38537

Two phases of the inotropic effect of adrenaline - The calcium dependence
p0309 A82-38549

Ultrastructural qualitative and quantitative evaluation of cytoplasmatic structures of heart muscle of rats living aboard biosputnik Kosmos 936

p0330 A82-40694
Na/+/-K/+/ dependent ATP-ase modifications of skeletal muscle and myocardium of hypokinetic rats
p0331 A82-40707
The ultrastructure of the myocardium in the restorative period following aorto-coronary shunting in patients with chronic ischemic heart disease
p0343 A82-41484
The effect of diethylamine analog of ethmozine on the functional condition of myocardium /Clinical and experimental study/
p0343 A82-41488
The coronary vessels and the contractile apparatus of the myocardium in immune heart damage /Histochemical and ultrastructural studies/
p0367 A82-42605
Effect of dosed physical loading on biological oxidation and bioenergy in liver and myocardium
p0370 A82-43046
Internal stresses and contractility of myocardium
p0372 A82-43513
The mechanism of the activating effect of anti-cardiac antibodies on the electrical and contractile activity of myocardial cells
p0374 A82-43665
Metabolism of the myocardium in the case of ischemia /Review of the literature/
p0409 A82-46702
The ultrastructural bases of cardiac insufficiency
p0409 A82-46703
The effect of myocardial ischemia on the phospholipid content of heart tissue and mitochondria
p0413 A82-46884
The resistance and capacity function of the vessels of the small intestine and the filtration and absorption relations during short-term myocardial ischemia in cats
p0420 A82-48213
Algorithms for imaging myocardial blood flow using X-ray computed tomography
p0039 N82-13661
Lipid spectrum of the myocardium of white rats exposed to hypoxic hypoxia
p0126 N82-16724
Myocardial protein fractions and enzymatic activity thereof in experimental rats flown aboard Cosmos-936 biosatellite
p0132 N82-17832
Features of metabolic disturbances in rat myocardium under effect of alternating magnetic fields of different parameters
p0134 N82-17846
Effects of experimental stationary magnetic field on metabolism of some ions in blood and myocardium
p0267 N82-24822
Catecholamines and enzymes of their metabolism in rat myocardium after flight aboard the Cosmos-936 biosatellite
p0350 N82-28966
Specificity of ultrastructural changes in rat cardiomyocytes after local gamma-irradiation and hypokinesia
[NASA-TM-76853] p0384 N82-30882
Seismocardiographic evaluation of contractile function of the myocardium of hypokinetic rats
p0394 N82-31902
Epinephrine and norepinephrine concentrations in rat cardiac ventricles and atria after flight aboard Cosmos-1129 biosatellite
p0397 N82-31919

**MYOELECTRIC POTENTIALS**
Regulation of calcium current and calcium activity in heart cells
p0137 N82-17870

**MYOELECTRICITY**
NT MYOELECTRIC POTENTIALS

**MYOGLOBIN**
Myoglobinemia as a criterion for the early diagnosis of acute myocardial infarction /Literature review/
p0259 A82-33726

**MYOPIA**
NT MIOSIS
The age-related changes of biochemical and biomechanical parameters of human sclera in normal and myopic individuals
p0410 A82-46713

## N

**NAP-OF-THE-EARTH NAVIGATION**
Map interpretation and geographic orientation during nap-of-the-earth flight
p0144 A82-22945
Development and inflight testing of a multi-media course for instructing navigation for night nap-of-the-earth flight
p0146 A82-22961

**NAPHTHALENE**
Comparative biochemistry and metabolism. Part 2: Naphthalene lung toxicity
[AD-A107673] p0133 N82-17842

**NARCOSIS**
Computer-aided analysis of the effect of the initial narcosis on the central hemodynamics
p0117 A82-21797
The nature of autonomic effects produced by sombrevin --- during narcosis
p0187 A82-25693
Possible impairment of respiratory regulation under hyperbaric nitrogen narcosis
p0349 N82-28964

**NARCOTICS**
NT MORPHINE
The effects of narcotic analgesics on animal sensitivity to hypoxia
p0093 A82-20316
A comparative evaluation of the hemodynamic effects of large doses of morphine, dipidolor, pentazocine, and phentanyl
p0117 A82-21795

**NASA PROGRAMS**
NT APOLLO PROJECT
NT SKYLAB PROGRAM
NT TERMINAL CONFIGURED VEHICLE PROGRAM
NT VIKING MARS PROGRAM
Design, development, and verification of Life Sciences experiments
p0008 A82-12538
U.S. biological experiments in space
p0056 A82-16930
United States and Soviet Life Sciences factors in long-duration space flights
p0277 A82-35638
Animal models for simulating weightlessness
p0336 A82-40749
Information automation and the Apollo program - A retrospective
p0376 A82-44513

**NATURAL LASERS**
U LASERS

**NAUSEA**
Nausogenic properties of various dynamic and static force environments --- in space
p0058 A82-16938
Coping with space motion sickness in Spacelab missions
p0058 A82-16939

**NAVIGATION**
NT NAP-OF-THE-EARTH NAVIGATION
NT RADAR NAVIGATION
NT SURFACE NAVIGATION
Study of homing pigeons in Brazil: Some preliminary results
[INPE-2248-PRE/032] p0133 N82-17839

**NAVIGATION AIDS**
Horizontal conflict resolution maneuvers with a cockpit display of traffic information
p0041 N82-13671
Separation monitoring with four types of predictors on a cockpit display of traffic information
p0440 N82-34063

**NAVIGATION INSTRUMENTS**
NT GYRO HORIZONS

**NAVY**
Complex physiological-hygienic characteristics of a new work-rest regime for seamen
p0113 A82-21748
Operational performance measures for air combat - Development and application
p0145 A82-22959
Improving the medical care of navy personnel
p0155 A82-23301
The prevention of dysadaptive changes in sailors at sea

p0259 A82-33728

Affections of the upper respiratory tracts in transport-fleet sailors and the prophylaxis of these affections on long voyages
p0281 A82-35696

Levels of physiological reserves of sailors working a 10-hour shift
p0368 A82-42618

Medical research of naval personnel
[RNP-3/81]
p0249 N82-23977

**NEAR FIELDS**

An empirical relationship for electromagnetic energy absorption in man for near-field exposure conditions
p0018 A82-13175

Absorption characteristics of prolate spheroidal models exposed to the near fields of electrically small apertures
p0314 A82-38802

**NEAR ULTRAVIOLET RADIATION**

Genetic damage in Escherichia coli K12 AB2480 by broad-spectrum near-ultraviolet radiation
p0121 A82-22200

**NEBULAE**

Interstellar molecules and the origin of life
p0098 A82-20902

Organo-siliceous biomolecules and the infrared spectrum of the Trapezium nebula
p0404 A82-46182

**NECK (ANATOMY)**

Patterns of vestibular and neck responses and their interaction - A comparison between cat cortical neurons and human psychophysics
p0067 A82-17456

Responses of vestibulospinal neurons to neck and macular vestibular inputs in the presence or absence of the paleocerebellum
p0067 A82-17457

Nystagmus, gaze shift, and self-motion perception during sinusoidal head and neck rotation
p0069 A82-17473

The strength-endurance relationship in skeletal muscle - Its application to helmet design
p0211 A82-28484

Anatomy of the spine
p0359 N82-29871

Clinical examination of spinal injuries
p0360 N82-29882

Research on the development of a statistical impact acceleration injury prediction model from -G(x) accelerator runs
[AD-A116440]
p0431 N82-34003

**NEGATIVE FEEDBACK**

NT SENSORY FEEDBACK

**NEGATIVE IONS**

The effect of positive and negative ions of air on the content of catecholamines in the brain and adrenal glands
p0287 A82-36690

Subjective response to negative air ion exposure
p0321 A82-40446

**NEODYMIUM LASERS**

Biophysical fundamentals and instrumentation for the endovesical Nd:YAG-laser application --- tumor therapy
[MBB-UA-581-81-O]
p0133 N82-17843

**NEOPLASMS**

NT CANCER

Synthesis of adriamycin-coupled polyglutaraldehyde microspheres and evaluation of their cytostatic activity
p0409 A82-46540

**NEPTUNIUM**

NT NEPTUNIUM ISOTOPES

**NEPTUNIUM ISOTOPES**

The effect of the intravenous injection of neptunium-237 oxalate on the gonads of rats and on their progeny
p0412 A82-46871

**NERVES**

The sensitivity of the retinal nerve fibre layer to elevated intraocular pressure and graded hypoxia in the cat
p0025 A82-15475

Neurotrophic factor - Characterization and partial purification
p0026 A82-15698

Phasic components of frog semicircular canal
p0063 A82-17430

Neuronal interaction between ipsilateral medial and lateral vestibular nuclei
p0064 A82-17436

Reticulovestibular organization participating in generation of horizontal fast eye movement
p0065 A82-17439

LDH isoenzyme spectrum in intact and denervated skeletal muscles of rats of various age during cold adaptation
p0117 A82-21798

Electroacupuncture in the complex treatment of trifacial neuralgia
p0203 A82-27775

Kainic acid as a tool in brain research
p0278 A82-35662

Brain hypoxia and control of breathing - Role of the vagi
p0290 A82-37928

The effect of denervation and tendotomy on oxidative phosphorylation in skeletal muscles of the rabbit and the resistance of phosphorylation to uncoupling agents
p0307 A82-38171

The microcirculatory bed of the lungs after an effect exerted on the right vagus nerve

U NOISE (SOUND)
**NOISE INJURIES**
State of the hearing function in diesel locomotive crewmen
p0280 A82-35688
The landing signal officer - Auditory aspects --- of aircraft carrier flight operations
p0284 A82-35910
Pathomorphological investigation of the mechanism of cochlear damage caused by noise
p0316 A82-39241
Early clinical manifestations of vibration-noise pathology in miners of Donets Basin
p0368 A82-42616
Damage risk criteria for impulse noise --- industrial deafness
[IZF-1980-26] p0035 N82-12771
Report on a visit to Canada of the 10-17 May 1980 Second International Symposium on Personal Hearing Protection in Industry --- affects of acoustic trauma
[NAE-TN-FS-377] p0225 N82-21900
The effect of noise-induced hearing loss on the ability to understand speech
[IZF-1981-11] p0273 N82-25783
Recommendations to avoid hearing damage during firing of the M198, FH70, M71 and FH77 towed horwitzers
[IZF-1981-13] p0273 N82-25784
Statistical examination of hearing loss due to gunfire noise and industrial noise: Consequences for screening audiometry with fixed frequencies
[IZF-1981-20] p0273 N82-25785
Possibility of hearing loss from exposure to interior aircraft noise
[AD-A116504] p0424 N82-32973
**NOISE INTENSITY**
Aircraft noise and speech communication interference in JASDF air traffic control room
p0025 A82-15518
Cochlear analysis of sound intensity and some mechanisms of auditory sensations
p0116 A82-21792
Prediction of shifts in the radiation resistance of animals under the influence of various factors
p0154 A82-23208
The change in certain parameters of operator activity under the influence of alcohol
p0161 A82-24513
Performance effects of noise intensity, psychological set, and task type and complexity
p0237 A82-31389
Clinical features of the effect of factory noise as a function of its type and spectral characteristics
p0240 A82-31519
A preliminary study on noise induced hearing loss in serving aircrew of Indian Air Force
p0253 A82-32289
Histoenzymological changes in experimental animals exposed to variable noise
p0311 A82-38577
Alterations of histochemical organization in the organ of Corti under the influence of chronic noise
p0316 A82-39242
Experimental study of the combined effect of noise and acetone
p0368 A82-42612
The effect of general vibration combined with intermittent noise on the human auditory function
p0368 A82-42615
A physiological justification of allowable noise levels in work involving heavy physical labor under nervous stress
p0368 A82-42617
A study of the effects of fluctuation frequency on adverse reactions to noise
[NPL-AC-97] p0224 N82-21892
Recommendations to avoid hearing damage during firing of the M198, FH70, M71 and FH77 towed horwitzers
[IZF-1981-13] p0273 N82-25784
**NOISE MEASUREMENT**
Methods for diagnosing hearing loss in workers exposed to high noise levels in accordance with state standards
p0116 A82-21793
A study of the acoustic reflex as elicited by selected environmental noise stimuli
p0135 N82-17058
**NOISE METERS**
An investigation of the status of bone conduction audiometer calibration in the National Health Service
[NPL-AC-101] p0034 N82-12769
**NOISE POLLUTION**
Hygienic standards for industrial noise
p0116 A82-21794
Clinical-physiological characterization of the auditory-analyzer function of workers of various occupations at the Mikhailovskii concentration mill
p0160 A82-24503
Some indices of the functional physiological state of inspectors at a thermal power plant
p0161 A82-24515
The effects of noise on the physiological condition of blood leucocytes
p0163 A82-24544
Noise and sense of hearing
p0080 N82-15747
Man's adaptive reactions to acoustic parameters of isolated habitats
p0271 N82-25773
Detailed research plan: Cardiovascular effects of noise
[PB82-163379] p0391 N82-30934
Five-year research plan for effects of noise on health
[PB82-168972] p0425 N82-32976
**NOISE PROPAGATION**
Effect of tactile vibration on annoyance to synthesized propfan noise
[NASA-TM-83258] p0176 N82-18866
**NOISE REDUCTION**
Aircraft noise and speech communication interference in JASDF air traffic control room
p0025 A82-15518

The effects of microphones and facemasks on LPC vocoder performance
[AD-A107908] p0129 N82-16744

Report on a visit to Canada of the 10-17 May 1980 Second International Symposium on Personal Hearing Protection in Industry --- affects of acoustic trauma
[RAE-TM-FS-377] p0225 N82-21900

Advanced design linear noise-attenuating earphone-earcup system
[AD-A110820] p0298 N82-26990

NOISE SPECTRA

Clinical features of the effect of factory noise as a function of its type and spectral characteristics
p0240 A82-31519

Attributing macroscopic fluctuations in aqueous solutions of proteins and other substances to the class of flicker noise
p0312 A82-38592

NOISE SUPPRESSORS
U NOISE REDUCTION

NOISE THRESHOLD

Damage risk criteria for impulse noise --- industrial deafness
[ISP-1980-26] p0035 N82-12771

Temporal integration of acoustic power for interrupted stimuli at suprathreshold levels
p0135 N82-17856

A study of the acoustic reflex as elicited by selected environmental noise stimuli
p0135 N82-17858

Advanced design linear noise-attenuating earphone-earcup system
[AD-A110820] p0298 N82-26990

NOISE TOLERANCE

Noise and vibration effects on vestibular and visual functions in teenagers
p0113 A82-21747

Physiological-hygienic substantiation of admissible noise level in school rooms in a hot climate
p0113 A82-21749

Features of the reaction to noise of the spinal capillaries of white rats
p0114 A82-21767

Investigation of noise sickness
p0159 A82-24494

A basis for the optimal duration of work breaks in the presence of noise of various intensities during the course of a work shift
p0160 A82-24510

Evaluation of the information content of the clinical signs and the probability of noise sickness
p0160 A82-24511

A comparative study of the effects of constant and intermittent noise on the acoustic analyzer
p0163 A82-24543

Evaluation of certain indices used in experimental and field conditions to detect the effects of noise
p0188 A82-25703

Effect of white noise on the auditory cortex ultrastructure in rats
p0188 A82-25711

Effects of whole-body vibration and noise on the toxicity and risk parameters of chemical substances
p0191 A82-25814

Effects of acoustic stress on rat sensorimotor cortex morphology
p0202 A82-27765

A comparison of models to predict annoyance reactions to noise from mixed sources
p0227 A82-29168

Individual sensitivity to noise
p0240 A82-31521

Noise and annoyance - A new methodology
p0289 A82-37187

Achievements and possibilities in the research being carried out to protect workers in the 11th five-year plan from noise and vibration
p0311 A82-38573

The combined effect of carbon monoxide and total-body vibration on the organism
p0324 A82-40675

Tritium oxide distribution and excretion kinetics in the exposure of animals to noise
p0342 A82-41463

The incorporation of P-32 into various sections of the brain upon exposure to intermittent noise of low intensity
p0342 A82-41467

Effects of impulse noise on human beings: A pilot study on annoyance ratings in the laboratory
[ISP-1981-9] p0267 N82-24825

Epidemiology feasibility study: Effects of noise on the cardiovascular system
[PB82-147752] p0301 N82-27974

Epidemiology feasibility study: Effects of noise on the cardiovascular system: Appendix B: Annotated bibliography. Literature. The effects of noise on the cardiovascular system
[PB82-147760] p0301 N82-27975

Epidemiology feasibility study: Effects of noise on the cardiovascular system. Appendix C: Review of non-noise related research of cardiovascular disease
[PB82-147778] p0301 N82-27976

NONADIABATIC PROCESSES
U HEAT TRANSFER

NONDESTRUCTIVE TESTS

Intercomparison of techniques for the non-invasive measurement of bone mass
[DE81-029921] p0013 N82-11773

NONELECTROLYTES

Facilitated diffusion of small non-electrolytes in the human red blood cell
p0135 N82-17855

NONEQUILIBRIUM CONDITIONS

The regulation of equilibrium in humans on a small supporting surface
p0420 A82-48210

NONLINEAR SYSTEMS

Non-linear effects connected with the spatial vibrations of biomechanical systems
p0260 A82-33763

Sensitivity analysis as an aid in modelling and control of (poorly-defined) ecological systems --- closed ecological systems
[NASA-CR-166308] p0224 N82-21895

A design methodology for nonlinear systems containing parameter uncertainty: Application to nonlinear controller design
[NASA-CR-166358] p0355 N82-29005

NONREFLECTION
U ENERGY ABSORPTION

NONUNIFORM MAGNETIC FIELDS

The influence of a constant magnetic field on the epileptogenic foci in the hippocampus of rabbits
p0323 A82-40466

NORADRENALINE

Functional condition of the rat sympato-adrenal system during emotional and nociceptive stress
p0095 A82-20335

Activation of succinate dehydrogenation in rat liver by noradrenalin, cAMP and acute cooling
p0112 A82-21734

Changes in the level of catecholamines in the noradrenaline-synthesizing structures of the rat brain following immobilization
p0202 A82-27764

/H-3/-noradrenaline release potentiated in a clonal nerve cell line by low-intensity pulsed magnetic fields
p0207 A82-28099

Norepinephrine and enzymes of synthesis and degradation thereof in the rat hypothalamus following flight aboard the Cosmos-936 biosatellite
p0125 N82-16716

NOREPINEPHRINE

Plasma norepinephrine response to exercise before and after training in humans
p0005 A82-11152

Free and conjugated catecholamines and metabolites in cat urine after hypoxia
p0168 A82-24913

Modification of training-induced responses by repeated norepinephrine injections in rats
p0375 A82-44142

Norepinephrine and enzymes of synthesis and degradation thereof in the rat hypothalamus following flight aboard the Cosmos-936 biosatellite
p0125 N82-16716

Stationary magnetic fields and reticular influences on adrenergic and cholinergic systems
p0126 N82-16725
Biogenic monoamine content of the ganglia in the autonomic nervous system of rabbits during acute experimental emotional stress
[NASA-TM-76900] p0383 N82-30875
Epinephrine and norepinephrine concentrations in rat cardiac ventricles and atria after flight aboard Cosmos-1129 biosatellite
p0397 N82-31919
**NORMAL DENSITY FUNCTIONS**
The effect of abnormal cell proportion on specimen classifier performance
p0234 A82-30296
**NORMAL DISTRIBUTIONS**
U NORMAL DENSITY FUNCTIONS
**NORTHERN HEMISPHERE**
NT ARCTIC REGIONS
**NOSE (ANATOMY)**
Rhinopneumometric indicators during repeated antiorthostatic exposures
p0029 A82-15719
Investigations of the vascular reactions or the nasal mucous membranes of cosmonauts
p0419 A82-47576
Relationship between microflora and immunity of cosmonauts carrying staphylococcus aureus in the nasal cavity
p0214 N82-20843
**NOXIOUS MATERIALS**
U CONTAMINANTS
**NUCLEAR CAPTURE**
NT ELECTRON CAPTURE
**NUCLEAR ELECTRIC POWER GENERATION**
NT NUCLEAR POWER PLANTS
**NUCLEAR EXPLOSION EFFECT**
Aircrew ionizing doses from radioactive dust cloud generated by nuclear burst
[AD-A115541] p0390 N82-30929
**NUCLEAR INTERACTIONS**
NT ELECTRON CAPTURE
**NUCLEAR MAGNETIC RESONANCE**
NMR-imagery - A new method of biophysical investigation
p0200 A82-27745
NMR imaging in medicine
p0231 A82-29574
The temperature dependence of the H-1 NMR spectrum of hydrated collagen
p0313 A82-38611
The chemical basis for the origin of the genetic code and the process of protein synthesis
[NASA-CR-168748] p0220 N82-21068
Spin imaging equipment for small animal experiments
[ISBN-951-41-0420-X] p0293 N82-26951
Feasibility study: NMR imaging microscope
[PB82-125915] p0301 N82-27973
**NUCLEAR MEDICINE**
NT RADIOBIOLOGY
USSR report. Life sciences: Biomedical and behavioral sciences, no. 19
[JPRS-81442] p0391 N82-30935
**NUCLEAR PARTICLES**
NT BETA PARTICLES
NT POSITRONS
**NUCLEAR PHYSICS**
Radiation physics, biophysics and radiation biology
[DE81-025259] p0009 N82-10704
**NUCLEAR POWER PLANTS**
Human factors and safety in nuclear power plant operation
p0182 N82-19843
Overview of a procedure for human-reliability analysis
[DE81-030816] p0392 N82-30947
**NUCLEAR POWERED SHIPS**
Work and rest on nuclear submarines
p0021 A82-14274
**NUCLEAR RADIATION**
NT BETA PARTICLES
NT GAMMA RAYS
Some computer applications and digital image processing in nuclear medicine
p0431 N82-34000
**NUCLEAR REACTIONS**
NT ELECTRON CAPTURE
NT NUCLEAR SCATTERING
NT RADIOACTIVE DECAY
NT RESONANCE SCATTERING
**NUCLEAR SCATTERING**
NT RESONANCE SCATTERING
Use of nuclear resonant scattering of Gamma rays for in vivo measurement of iron
[DE81-026051] p0014 N82-11775
**NUCLEAR SHIELDING**
U RADIATION SHIELDING
**NUCLEAR WASTES**
U RADIOACTIVE WASTES
**NUCLEASE**
Blood serum nuclease activity in healthy persons and patients with various hematological diseases
p0118 A82-21813
**NUCLEATION**
Homogeneous nucleation of gas bubbles in vivo
p0418 A82-47387
**NUCLEIC ACIDS**
NT DEOXYRIBONUCLEIC ACID
NT GUANOSINES
NT RIBONUCLEIC ACIDS
The effects of space flight factors on the stress reaction of the nuclear nucleic acids in the rat liver
p0007 A82-12279
Are there structural analogies between amino acids and nucleic acids
p0020 A82-13840
Nucleic acid and protein concentrations in rat raphe nuclei neurons and gliocytes during complete sleep deprivation in the cylindrical tretbahn
p0024 A82-15352
DNA and RNA synthesis in the isolated nuclei of rat skeletal muscle fibers during hypokinesia
p0024 A82-15353
A theory of the origin of life
p0091 A82-20023
Reduction of thionucleosides - A prebiotic pathway to deoxyribonucleosides
p0100 A82-20928
The dynamics of protein and nucleic acid content in rat raphe nucleus cells after total deprivation of sleep /in a rotating cylinder/ and selective deprivation of its paradoxical phase
p0110 A82-21718
A model for protocellular coordination of nucleic acid and protein syntheses
p0195 A82-26583
The current status of REH theory --- Random Evolutionary Hits in biological molecular evolution
p0208 A82-28231
Distribution of nucleolar nucleic acids in Purkinje cells under vestibular stimulation and immobilization of rats
p0262 A82-34686
Effects of space flight factors and artificial gravity on deoxyribonucleoprotein in lymphoid organs of rats
p0333 A82-40723
DNA and RNA synthesis in isolated nuclei of rat skeletal muscles during hypodynamia
[NASA-TM-76875] p0385 N82-30888
Chromatin of rat brain neurons and nucleic acids of muscles as related to localization of decimeter waves during exercise
p0387 N82-30908
Effects of +G sub x acceleration and adeutron on nuclei acid content and other parameters of mouse peripheral blood
p0395 N82-31909
**NUCLEOSIDES**
NT ADENINES
NT ADENOSINE TRIPHOSPHATE
NT ADENOSINES
Reduction of thionucleosides - A prebiotic pathway to deoxyribonucleosides
p0100 A82-20928
Binding of nickel /II/ to 5-prime-nucleoside monophosphates and related compounds --- role in origin of life
p0257 A82-33278
**NUCLEOTIDES**
NT ADENINES
NT ADENOSINE TRIPHOSPHATE
NT ADENOSINES
NT POLYNUCLEOTIDES

A working hypothesis on the interdependent genesis of nucleotide bases, protein amino acids, and primitive genetic code
p0020 A82-13839
Polymerization of serine guanylate in the presence of montmorillonite
p0102 A82-20940
Evolving nucleotide binding surfaces
p0103 A82-20954
Summary of evidence for an anticodonic basis for the origin of the genetic code
p0104 A82-20958
DNA-protein complex from an extreme halophile - A histone-like protein in archaebacteria
p0105 A82-20970
Comparative biosequence metrics --- molecular evolution
p0208 A82-28230
Binding of nickel /II/ to 5-prime-nucleoside monophosphates and related compounds --- role in origin of life
p0257 A82-33278
Oligonucleotide formation catalyzed by mononucleotide matrices
p0258 A82-33284
Effect of thymalin on the system of cyclic nucleotides in the mouse spleen
p0262 A82-34679
Ambiguity and the evolution of the genetic code
p0305 A82-38120
The concentration of adenyl nucleotides and creatine phosphate in the cerebral hemispheres during different manifestations of stress
p0310 A82-38560
Ion currents through a neuron membrane during the injection of cyclic nucleotides
p0312 A82-38580
Similar genes for a mitochondrial ATPase subunit in the nuclear and mitochondrial genomes of Neurospora crassa
p0314 A82-38698
Ligation of oligonucleotides by pyrimidine dimers - A missing 'link' in the origin of life
p0317 A82-39423
The content of cAMP and cGMP in brain tissues during adaptation to ischemia
p0320 A82-40310
Molecular basis for the genetic code
p0339 A82-41195
Cyclic nucleotides in tissues during long-term hypokinesia
[NASA-TM-76726] p0011 N82-11757
Changes in rat tissue deoxyribonucleoprotein and nucleic acids following flight aboard Cosmos-1129 biosatellite
p0395 N82-31907

NT FINITE ELEMENT METHOD
NT MONTE CARLO METHOD
NT NEWTON-RAPHSON METHOD
Numerical methods for inferring evolutionary trees
[DE82-002295] p0248 N82-23971

NUMERICAL CONTROL
Robot with sense of touch
p0061 A82-17133
Evaluating operator performance on automated tactical systems
p0140 A82-22908
Scheduling of parallel computation for a computer-controlled mechanical manipulator
p0231 A82-29672
Automated visual field screening in the flying Dutch population
p0408 A82-46535
Initiation into the utilization of programmable industrial robots: Grafcet --- graphic engineering language
p0076 N82-14805
Methods for linking item parameters
[AD-A105509] p0084 N82-15779

NUTATION
Initiation of nutation in sunflower hypocotyls
p0333 A82-40724
Nutation of Helianthus Annuus in a microgravity environment
p0174 N82-18265

NUTATIONAL OSCILLATION
U NUTATION

NUTRIENTS
Treatment of CELSS and PCELSS waste to produce nutrients for plant growth --- Controlled Ecological Life Support Systems and Partially Controlled Ecological Life Support Systems
[ASME PAPER 81-ENAS-19] p0003 A82-10907
Nutrients that modify brain function
p0189 A82-25722
The role of intestinal nerves in the nutrient induced intestinal hyperemia
p0137 N82-17869
CELSS scenario analysis: Breakeven calculations
[NASA-CR-166319] p0250 N82-23982

NUTRITION
Effects of the diet on brain function
p0058 A82-16942
The condition of several metabolic processes in operators
p0159 A82-24491
Effects of starvation on human tolerance to acute hypoxia
p0236 A82-31159
Nutrition and athletics
p0238 A82-31502
Specialized acidophilic products for the nourishment of athletes
p0240 A82-31514
The efficiency of the training of young athletes when vitamins and trace elements are included in their diet
p0263 A82-34693
The influence of a deficit of vitamins on immunity /A review of the literature/
p0344 A82-41504
Dynamic of nutritional status during simulation of long-term aircraft flights
p0215 N82-20846
Application of Guided Inquiry System Technique (GIST) to Controlled Ecological Life Support Systems (CELSS)
[NASA-CR-166312] p0247 N82-22886
Nutritional and cultural aspects of plant species selection for a controlled ecological life support system
[NASA-CR-166324] p0250 N82-23985
Diet of crew in Salyut-6 orbital station
p0269 N82-25756
Biological value and shelf life of cultured dairy products in the diet of cosmonauts
p0270 N82-25759
Effect of hypokinesia on man's nutritional status
p0270 N82-25760
Evaluation of engineering foods for Controlled Ecological Life Support Systems (CELSS)
[NASA-CR-166359] p0355 N82-29006

NUTRITIONAL REQUIREMENTS
NT CALORIC REQUIREMENTS
Influence of 15-day alimentary starvation on human tolerance to the breathing of pure nitrogen
p0027 A82-15710
Nutritional criteria for closed-loop space food systems
p0030 A82-15856

Nutrition and athletics
p0238 A82-31502
The energy requirements of railway-bridge assemblers
p0240 A82-31515
Energy requirements of workers at an oil field in western Siberia

In-flight diets and quantitative adequacy thereof to pilot expenditure
p0130 N82-17813
Diet of crews of three main expeditions aboard Salyut-6 orbital station
p0130 N82-17815
Experimental study of high density foods for the Space Operations Center
p0248 N82-23109
Plant diversity to support humans in a CELSS ground based demonstrator
[NASA-CR-168918] p0268 N82-24833
Insects: A nutritional alternative
[NASA-CR-169056] p0298 N82-26988
Plant diversity to support humans in a CELSS ground-based demonstrator
[NASA-CR-166357] p0303 N82-27988
USSR report. Space biology and aerospace medicine, volume 16, no. 3, May - June 1982
[JPRS-81197] p0347 N82-28949
Metabolic distinctions related to intake of low-calorie 'survival' rations consisting only of readily assimilated carbohydrates
p0348 N82-28953
Mineral separation and recycle in a Controlled Ecological Life Support System (CELSS)
[NASA-CR-166388] p0426 N82-32987

**NYLON RESINS**
U POLYAMIDE RESINS

**NYSTAGMUS**
NT VESTIBULAR NYSTAGMUS
Sigma-movement and Sigma-nystagmus - A new tool to investigate the gaze-pursuit system and visual-movement perception in man and monkey
p0066 A82-17450
Velocity storage, nystagmus, and visual-vestibular interactions in humans
p0067 A82-17460
Nystagmus, gaze shift, and self-motion perception during sinusoidal head and neck rotation
p0069 A82-17473
Effect of frontal-eye-field lesion on eye-head coordination in squirrel monkeys
p0069 A82-17475
Synchronized nystagmus calibrator
p0280 A82-35695
Nystagmometry of optovestibular interaction
p0349 N82-28962
A procedure for the analysis of nystagmus and other eye movements
[AD-A112603] p0352 N82-28987

## O

**OASES**
Microbial life in cold saline environments
p0106 A82-20974

**OBLIQUENESS**
Conditioned tilt naming - A modified absolute judgment method is used to measure the oblique effect
p0281 A82-35768

**OBSERVABILITY (SYSTEMS)**
On the observability of electrical cardiac sources --- Thesis
p0381 A82-41450

**OBSERVATION**
NT EARTH OBSERVATIONS (FROM SPACE)
NT VISUAL OBSERVATION
Flight parameters and observer performance in RPV target acquisition
p0145 A82-22956

**OBSTRUCTING**
U BLOCKING

**OCCIPITAL LOBES**
Psychophysical characteristics of perception and bioelectric activity of the brain during micropolarization of the occipital part of the hemispheres
p0371 A82-43235

**OCCLUSION**
Evidence relating subjective contours and interpretations involving occlusion
[AD-A103925] p0010 N82-10712
Prosthetic occlusive device for an internal passageway
[NASA-CASE-MFS-25640-1] p0294 N82-26962

**OCEAN BOTTOM**
The trace element geochemistry of marine biogenic particulate matter
[AD-A095300] p0009 N82-10703

**OCEAN MODELS**
Genesis of amino acids in the primeval sea - Formation of amino acids from sugars and ammonia in a modified sea medium
p0100 A82-20925

**OCEAN THERMAL ENERGY CONVERSION**
OTEC biofouling, corrosion, and materials study from a moored platform at Punta Tuna, Puerto Rico
[DE82-007037] p0347 N82-28947
Technical assessment of the prevention of micro-fouling on OTEC heat-transfer surfaces through the use of ultraviolet radiation
[DE82-005489] p0356 N82-29850
OTEC-1 power system test program: Biofouling and corrosion monitoring on OTEC-1
[DE82-007035] p0356 N82-29851
Biofouling countermeasure evaluations for OTEC heat exchangers
[DE82-003918] p0386 N82-30896
Coatings for the prevention of macrofouling in the OTEC program
[DE82-003238] p0386 N82-30897
Five OTEC biofouling and corrosion experiments at Keahole Point, 1976 to 1980

**OSTEOPOROSIS**
Radiographic evidence of disuse osteoporosis in the monkey /M. nemestrina/
p0198 A82-26924
Skeletal abnormalities in rats induced by simulated weightlessness
p0345 A82-41540
Osteoporosis in unsupported extremities
p0350 N82-28970

**OTOLARYNGOLOGY**
Some characteristics of the aerial evacuation of the sick and otorhinolaryngologically injured
p0028 A82-15711
The functional condition of the ampullar apparatus in Meniere's disease
p0092 A82-20308
Deontology in the practice of otorhinolaryngology
p0093 A82-20312
Vestibular dysfunctions in caisson workers subjected to a combination of occupational hazards
p0187 A82-25689
Characteristics of pharmacotherapeutic complications in otolaryngology /Review of the literature/
p0369 A82-42628
Ear-nose-throat electrodiagnostic device for determining the rheobase of human mucosa and skin
p0369 A82-42629

**OTOLITH ORGANS**
The otolith reflex and space perception in cosmonauts
p0028 A82-15717
Investigation of the otolith apparatus in clinical practice
p0053 A82-16812
Nausogenic properties of various dynamic and static force environments --- in space
p0058 A82-16938
Physiological mechanisms of the nystagmus produced by rotations about an earth-horizontal axis
p0213 A82-17431
Dynamic characteristics of the otolithic oculomotor system
p0064 A82-17433
Binocular counterrolling in humans with unilateral labyrinthectomy and in normal controls
p0064 A82-17434
Ocular torsion on earth and in weightlessness
p0064 A82-17435
Microdisc gel electrophoresis in sodium dodecyl sulfate of organic material from rat otoconial complexes
p0070 A82-17482
Ocular torsion in the cat after lesions of the interstitial nucleus of Cajal
p0070 A82-17484
Human orientation in space
[AIAA PAPER 82-0422] p0071 A82-17940
Investigation of the otolithic membrane of the utricle of the guinea pig
p0091 A82-20301
A study in motion sickness - Saccular hair cells in the adult bullfrog
p0416 A82-47280
USSR report. Life sciences biomedical and behavioral sciences, no. 12
[JPRS-79338] p0012 N82-11762
Otolithic reflex and space perception function of cosmonauts
p0012 N82-11764
Measurements of vestibular function
p0180 N82-19826
Significance of vestibular asymmetry to genesis of vestibular dysfunction
p0215 N82-20850

**OTOLOGY**
The frequency of vestibular impairments in chronic purulent medial otitis
p0029 A82-15718
Reissner's membrane and the spiral ligament in normal rats and those treated with ethacrynic acid
p0055 A82-16833
Temporal bone characteristics in Meniere's disease
p0070 A82-17481
Evaluation of the information content of the clinical signs and the probability of noise sickness
p0160 A82-24511
Significance of the rehydration rate of the inner ear in the choice of method of surgical intervention in the endolymphatic system in Meniere's disease
p0261 A82-34473
Hormone levels in the blood of patients with Meniere's disease and cochleovestibulopathies
p0262 A82-34475
Characteristics of brain electric activity in different otoneurologic syndromes with

vestibular asymmetry
p0280 A82-35693
Otoneurological symptoms and syndromes --- Russian book
p0317 A82-39286

OUTGASSING
Shuttle toxicology
p0078 N82-15726

OUTPUT
NT LASER OUTPUTS

OVARIES
Morphometrical investigations on the reproductive activity of the ovaries in rats subjected to immobilization and to motion activity
[NASA-TM-76831] p0220 N82-21867

OXIDASE
Brain monoamine oxidase activity during cold adaptation and under the combined effects of cold and hyperbaric oxygenation
p0090 A82-19746
The effect of low temperature on the activity and substrate specificity of monoamine oxidases in rat brain mitochondria
p0112 A82-21735
Succinate dehydrogenase and cytochrome oxidase activity in tissues of rats submitted to long-term hypokinesia
p0126 N82-16723

OXIDATION
NT PHOTOOXIDATION
Wet oxidation as a waste treatment in closed systems
[ASME PAPER 81-ENAS-22] p0003 A82-10910
Clay-mediated reactions of HCN oligomers - The effect of the oxidation state of the clay
p0099 A82-20917
Formation of energy rich phosphate in Fenton's reaction --- for prebiotic conditions
p0100 A82-20922
Physical model of the initial stages of energy transformation during oxidative phosphorylation
p0200 A82-27738
Phosphorylating oxidation during changes in physiological condition
p0202 A82-27762
Change in protein-lipid interactions upon the peroxide oxidation of blood serum lipoproteins
p0228 A82-29447
Mechanism for fluctuations in cell cycle duration
p0241 A82-31529
The effect of denervation and tendotomy on oxidative phosphorylation in skeletal muscles of the rabbit and the resistance of phosphorylation to uncoupling agents
p0307 A82-38171
Chemical evolution. XL - Clay-mediated oxidation of diaminomaleonitrile
p0339 A82-41196
Effect of dosed physical loading on biological oxidation and bioenergy in liver and myocardium
p0370 A82-43046
The role of endogenous substances in creating a background of enhanced resistance to radioactivity. XIII - The effect of various radiation protective agents on lipid peroxidation
p0404 A82-45785
The possible mechanisms of lipid peroxidation in rat liver during the recovery period after mechanical asphyxia
p0413 A82-46883
Preparation and analysis of standardized waste samples for Controlled Ecological Life Support Systems (CELSS)
[NASA-CR-166392] p0426 N82-32988

OXIDATION-REDUCTION REACTIONS
New data on reverse electron transport in the respiratory chains of yeast mitochondria - The induction of reverse transport by exogenous NAD-H
p0228 A82-29445

OXIDES
NT CARBON DIOXIDE
NT CARBON MONOXIDE
NT CHLORINE OXIDES
NT INORGANIC PEROXIDES
NT NITROGEN DIOXIDE
NT NITROUS OXIDES
NT PEROXIDES
NT SILICON DIOXIDE
Chromosome aberrations in myelocaryocytes caused by the chronic action of tritium oxide at various dose rates
p0411 A82-46856

OXIDIZERS
NT LIQUID OXYGEN

OXIMETRY
Percutaneous measurement of partial oxygen tension and local blood flow in man during orthostatic test
p0395 N82-31904

OXYGEN
NT LIQUID OXYGEN
NT OXYGEN 18
NT OZONE
Experimental studies on the survival capacity in the sealed environment. III
p0025 A82-15515
Melanoidin polymers as possible oxygen sinks in the pre-biotic oceans
p0100 A82-20921
The use of oxygen as the test gas in the determination of the closing volume of respiratory ducts
p0117 A82-21801
Theoretical analysis of optimal P50 --- for maximizing oxygen unloading in hypoxia
p0230 A82-29568
The damaging effects of light on the retina - The role of singlet oxygen and lipid peroxides
p0232 A82-29817
Oxygen toxicity and lung collagenous protein
[AD-A104702] p0033 N82-12756
Distinctions of regeneration of confined atmosphere by means of photosynthesis of unicellular algae
p0125 N82-16720
Cognitive performance, sleep quality and mood during deep oxy-helium diving
[ENP-1/81] p0389 N82-30920

OXYGEN BREATHING
The self-stimulation response in cats in a nitrogen-oxygen medium under elevated pressure
p0024 A82-15351
Determination of oxygen content in air on the basis of meterological parameters /pressure, temperature, and moisture/ in order to predict the hypoxic effect of the atmosphere
p0162 A82-24534
The biological significance of physiological hypoxemia
p0164 A82-24558

OXYGEN CONSUMPTION
Increased hemoglobin-oxygen affinity does not decrease skeletal muscle oxygen consumption
p0006 A82-11154
Metabolism and thermoregulation during stages of sleep in humans exposed to heat and cold
p0006 A82-11157
Brain monoamine oxidase activity during cold adaptation and under the combined effects of cold and hyperbaric oxygenation
p0090 A82-19746
The role of extracellular O2 and CO2 tensions in membrane mechanisms of cerebral arterial smooth muscle regulation
p0090 A82-19747
Elevation of hypoxia resistance with the use of gutimine
p0093 A82-20319
Pulse rate evaluation of the relative physiological intensity of aerobic muscular work
p0094 A82-20331
The effect of two years' training of aerobic power and muscle strength in male and female cadets
p0107 A82-21678
Oxygen transport in dogs native to high altitudes during exercise
p0110 A82-21719
Dynamics of aerobic work capacity and changes in the functional stability of the oxygen-supply mechanism and hypophysical adrenocortical system in skiers
p0187 A82-25696
Characteristics of oxygen metabolism in patients with chronic ischemic heart disease during physical exercise
p0190 A82-25806
Complex technique for studying the oxygen regimen and hemodynamics of the oral mucosa under hypoxia
p0204 A82-27789

Effect of sodium fluoroacetate on oxygen consumption in rat and cat liver tissue and skeletal muscles
p0206 A82-27808

Determination of the anaerobic threshold by a noninvasive field test in runners
p0229 A82-29558

Delayed kinetics of respiratory gas exchange in the transition from prior exercise
p0230 A82-29561

Comparative physiological responses to exercise stress
p0231 A82-29571

Changes of the oxygen transport function of the blood and some metabolic values in patients with hypertension and chronic ischemic heart diseases during ergometric exercise
p0279 A82-35666

Seasonal variations of human cardiorespiratory indices in the North
p0282 A82-35838

Bohr effect and slope of the oxygen dissociation curve after physical training
p0285 A82-36032

Circadian changes in resting heart rate and body temperature, maximal oxygen consumption and perceived exertion
p0308 A82-38268

The flavin-dependent consumption of oxygen in mitochondria under illumination
p0312 A82-38509

Metabolic and cardiovascular adaptations in trained hypophysectomized rats
p0340 A82-41215

A critical value for O2 transport in the rat
p0375 A82-44141

The radiation sensitivity of animals exposed to a modified gas environment. IV - A comparative study of the effect of the respiration of pure oxygen at normal pressures on the proliferating activity of hemopoietic tissues and epithelial cells of the small intestine
p0404 A82-45783

Oxygen exposure and extrapulmonary respiratory tract ciliogenesis in adult male rats
p0417 A82-47340

Maximal cardiac function in sedentary normal men and women - Comparison of age-related changes
p0417 A82-47376

In vivo leucine oxidation at rest and during two intensities of exercise
p0418 A82-47388

The physiological effect of low-air-pressure anoxia
p0080 N82-15748

The efficiency coefficient of the rat heart and muscular system after physical training and hypokinesia
[NASA-TM-76843] p0245 N82-22868

The effects of varying exercise intensities and durations on plasma high density lipoprotein-cholesterol, body composition and maximum oxygen consumption
p0248 N82-23973

The exercise electrocardiogram
p0398 N82-31933

Ventilatory responses to exercise while eliciting the relaxation response
[AD-A115102] p0433 N82-34015

OXYGEN DEFICIENCY
U HYPOXIA

OXYGEN ISOTOPES

The effects of microphones and facemasks on LPC vocoder performance
[AD-A107908] p0129 N82-16744

OXYGEN METABOLISM

Oxygen deficiency in tissues and their blood supply
p0020 A82-13700

The classification of hypoxic conditions
p0027 A82-15708

Peroxidation of lipids in the liver and lungs of rats during prolonged adaptation to the cold
p0112 A82-21736

Effects of pyrroxane and methylapogalantamine on cerebral blood circulation and oxygen regime
p0115 A82-21776

The energy supply of serotonin inactivation processes in the lungs
p0186 A82-25680

Characteristics of oxygen metabolism in patients with chronic ischemic heart disease during physical exercise
p0190 A82-25806

Ventilation and acid-base equilibrium for upper body and lower body exercise
p0210 A82-28482

Changes in the peroxide metabolism of weight-lifters and wrestlers under the conditions of systematic muscular activity
p0239 A82-31505

Comparative study of the gas-transport characteristics of models of an extraerythrocytic oxygen carrier
p0262 A82-34680

Change in plasma cAMP and catecholamines in men subjected to the same relative amount of physical work stress
p0284 A82-35912

Exercise performance after ventilatory work
p0286 A82-36037

Reactions of O-18 exchange in the myosin systems of skeletal, cardiac, and smooth muscles
p0313 A82-38614

The participation of the lymphatic system in the resistance of an organism to hypoxia
p0319 A82-39793

Immobilization effects upon aerobic and anaerobic metabolism of the skeletal muscles
p0332 A82-40712

Relationship between muscle QO2 and fatigue during repeated isokinetic contractions --- respiratory capacities
p0340 A82-41216

Effect of dosed physical loading on biological oxidation and bioenergy in liver and myocardium
p0370 A82-43046

The superoxide radical and superoxide dismutase in the free radical theory of ageing /Review/
p0412 A82-46876

Effects of various countermeasures against the adverse effects of weightlessness on central circulation in the healthy man
p0416 A82-47331

Ozone exposure and pulmonary metabolic effects of mediators and hormones
[PB81-222408] p0014 N82-11779

Oxygen toxication
p0080 N82-15751

Effects of low-intensity electromagnetic fields on human and animal erythrocytes
p0351 N82-28974

Intracutaneous partial oxygen pressure (pO2 sub ic) in man during short-term space flights: Results of joint USSR-GDR space flight
p0363 N82-30278

Respiratory adaptation to acute metabolic acidosis in goats with ablated carotid bodies
[AD-A116657] p0428 N82-33984

Oxygen transport to human tissues
[AD-A115904] p0432 N82-34007

OXYGEN PRODUCTION

Development status of a preprototype water electrolysis subsystem
[ASME PAPER 81-ENAS-9] p0002 A82-10897

A new concept in life support systems - The NGL molecular sieve oxygen generator
p0156 A82-23370

Determination of maximal aerobic power during upper body exercise
[AD-A111712] p0358 N82-29866

OXYGEN SUPPLY EQUIPMENT
NT OXYGEN MASKS

Oxygen generation subsystem for spacecraft
[ASME PAPER 81-ENAS-40] p0004 A82-10925

U.S. Navy molecular sieve on-board oxygen generation system - An update
p0024 A82-14973

Check your oxygen --- oxygen supply equipment and aircraft safety
p0073 A82-18736

A new concept in life support systems - The NGL molecular sieve oxygen generator
p0156 A82-23370

The effect of morphological adaptation of personal flight equipment on the performance of oxygen

systems
p0408 A82-46312
Recommended guidelines for oxygen self-rescuers. Volume 1: Underground coal mining
[PB81-225872]
p0015 N82-11782
Recommended guidelines for oxygen self-rescuers. Volume 2: Appendices
[PB81-225880]
p0015 N82-11783

OXYGEN SYSTEMS
U OXYGEN SUPPLY EQUIPMENT

OXYGEN TENSION
NT HYPOXEMIA
Steady-state vascular responses to graded hypoxia in isolated lungs of five species
p0018 A82-13231
The oxygen regime of the human organism under conditions of extreme hypobaric hypoxia
p0027 A82-15709
Oxygen tension in albino rat abdominal cavity organs in normo- and hyperoxybaria
p0060 A82-16969
Variability of oxygen affinity of blood - Human subjects native to high altutude
p0088 A82-19493
The measurement of oxygen and carbon dioxide partial pressures in tissues by the gas depot method
p0093 A82-20318
A combined method for the study of tissue respiration under conditions corresponding to natural gas homeostasis
p0093 A82-20321
Oxygen supply of the muscle tissue in patients with chronic ischemic heart disease during graded physical loads
p0159 A82-24496
High altitude and the oxygen dissociation curve of hemoglobin Modifications in inter-heme cooperativity
p0167 A82-24844
Dynamics of brain cell oxygen tension and electrical activity in the norm and in hypoxia
p0186 A82-25678
Instrumentation simultaneously measuring carbon dioxide excretion and oxygen uptake in humans using titration methods
p0197 A82-26819
Determination of the anaerobic threshold by a noninvasive field test in runners
p0229 A82-29558
Microcirculation and oxygen tension in the rat brain cortex during hemorrhagic shock
p0262 A82-34683
Effects of high-G on ventilation/perfusion in the domestic fowl
p0328 A82-40672
A quantitative analysis of transcutaneous oxygen measurement
p0217 N82-20862
Determination of oxygen tension in the subcutaneous tissue of cosmonauts during the Salyut-6 mission
[NASA-TM-76793]
p0217 N82-20864
Percutaneous measurement of partial oxygen tension and local blood flow in man during orthostatic test
p0395 N82-31904

OXYGEN TOXICITY
U HYPEROXIA

OXYGEN 18
Reactions of O-18 exchange in the myosin systems of skeletal, cardiac, and smooth muscles
p0313 A82-38614
Measurement of energy expenditure in humans by doubly labeled water method
p0410 A82-47389

OXYGENATION
Variability of oxygen affinity of blood - Human subjects native to high altutude
p0088 A82-19493
The blood plasma protein spectrum of dogs under treatment for hypoxia with the membrane oxygenator Sever-OMB
p0152 A82-23264
Effects of hyperbaric oxygenation on homocarnosine metabolism in the brains of rabbits of various ages
p0240 A82-31526
Prevention of heart function abnormalities during reoxygenation after ischemia by adaptation to altitude hypoxia
p0322 A82-40455
Study of the kinetics of oxygen saturation of fluorocarbon emulsions --- blood substitutes
[ISSN-0077-5606]
p0170 N82-19810
Enhanced benzopyrene metabolism in hamster embryonic cells exposed in culture to fossil-synfuel products
[DE82-002904]
p0424 N82-32967

OXYHEMOGLOBIN
High altitude and the oxygen dissociation curve of hemoglobin Modifications in inter-heme cooperativity
p0167 A82-24844

OZONE
Comets and the photochemistry of the paleoatmosphere
p0097 A82-20866
Effects of long-term exposure to low levels of ozone - A review
p0107 A82-21676
Variation in plant response to ozone: A conceptual model of physiological events
[DE81-029692]
p0123 N82-16701
Health effects of carbon monoxide and ozone
[PB82-114265]
p0137 N82-17066
Determination of the effects of material from alternate energy sources on the upper respiratory tract clearance mechanism. Part 1: In vitro expowure to particulate pollutants. Part 2: In vivo exposure to ozone
[PB82-117037]
p0178 N82-19811
Cabin ozone and tropopause definition
p0220 N82-21151
Development and persistence of adaptation to ozone exposure in ozone-sensitive Southern California residents
[PB82-125899]
p0223 N82-21889
Modification of method for assaying ozone by the diacetyl dihydrolutidine reaction
p0351 N82-28973

OZONOMETRY
Ozone exposure and pulmonary metabolic effects of mediators and hormones
[PB81-222408]
p0014 N82-11779
Modification of method for assaying ozone by the diacetyl dihydrolutidine reaction
p0351 N82-28973

OZONOSPHERE
Biologically damaging radiation amplified by ozone depletions
p0029 A82-15788

P

P-3 AIRCRAFT
Potential applications of computer-assisted instruction to P-3 aircrew training
[AD-A113491]
p0361 N82-29893

PAIN
Central pain mechanisms
p0204 A82-27708
Preventing disturbances to the structure of DNA in the cardiac muscle from emotional-nociceptive stress by blocking beta-adrenoreceptors and the peroxidation of lipids
p0241 A82-31528
Change in the volume density of hypothalamic neurons during prolonged immobilization-nociceptive stress
p0243 A82-31549
Lipid peroxidation and retinal damage under stress
p0262 A82-34682
Functional condition of the heart mitochondria in the dynamics of emotional and pain stress
p0344 A82-41500
Transcutaneous electrical peripheral nerve stimulation: Implications for neural control mechanisms
p0032 N82-12749
New approaches to treatment of chronic pain: A review of multidisciplinary pain clinics and pain centers
[PB81-240913]
p0083 N82-15778
The etiology of facial pain as related to masticatory muscles
p0180 N82-19828

Activation of the cerebral gba-ergic inhibiting system in stress
[NASA-TM-76867] p0384 N82-30881

PAIN SENSITIVITY
The role of central gray matter in the activation of antipain systems of the rat's brain under stress
p0309 A82-38547

PAINTS
An evaluation of engineering control technology for spray painting
[PB81-243123] p0085 N82-15789
Settlement of fouling organisms at the JITTER North Harnard Island raft site
[NRL-TN-450] p0220 N82-21870
Settlement of fouling organisms at the HNAS STIRLING raft site
[NRL-TN-441] p0221 N82-21871

PALEOBIOLOGY
Ultraviolet selection pressure in the Prephanerozoic --- ancient microorganism survival
p0105 A82-20969
Emergence and radiation of multicellular organisms
p0148 A82-22992
Speculations on the evolution of intelligence in multicellular organisms
p0149 A82-22993

PALEONTOLOGY
The mass extinctions of the late Mesozoic --- iridium abundance as geologic evidence for celestial body impact
p0071 A82-17620

PAPERS
Some potential blood flow experiments for space
[UR-3490-1720] p0402 N82-32068

PARABOLIC FLIGHT
Ocular torsion on earth and in weightlessness
p0064 A82-17435
Rapid perceptual adaptation to high gravitoinertial force levels Evidence for context-specific adaptation
p0320 A82-40436

PARACHUTE DESCENT
The physiological response of anthropometrically selected female military personnel to the test parachuting environment
p0023 A82-14957
An investigation of ripcord pull force capability of male and female skydivers for ripcords located on the left main lift web at chest level
p0024 A82-14959
Physiopathology and pathology of spinal ailments in aerospace medicine
[AGARD-AG-250-FR] p0011 N82-10720
Parachuting
p0359 N82-29878

PARACHUTING
U PARACHUTE DESCENT

PARACHUTING INJURY
System to measure head motion during parachute opening shock
[AIAA PAPER 81-2517] p0021 A82-13914
Theories of the pathogenesis of fractures of the spine
p0359 N82-29874
Ejection of pilots from combat aircraft
p0359 N82-29877
Parachuting
p0359 N82-29878

PARALLEL PROCESSING (COMPUTERS)
Scheduling of parallel computation for a computer-controlled mechanical manipulator
p0231 A82-29672

PARALYSIS
Oculoparalytic illusion - Visual-field dependent spatial mislocalizations by humans partially paralyzed with curare
p0208 A82-28250

PARAMAGNETIC RESONANCE
NT ELECTRON PARAMAGNETIC RESONANCE

PARAMETER IDENTIFICATION
A quasi-Newton procedure for identifying pilot-related parameters of the optimal control model
p0044 N82-13694
A data collection scheme for identification of parameters in a driver model
p0044 N82-13696

Investigation of correlations between chemical parameters of metal ions and acute toxicity in mice and Drosophila
[DE82-001451] p0423 N82-32966

PARAMETERIZATION
NT PARAMETER IDENTIFICATION
Methods for linking item parameters
[AD-A105509] p0084 N82-15779
Parametric identification of human operator models
p0380 N82-30842

PARAMETERS
U INDEPENDENT VARIABLES

PARTIAL DIFFERENTIAL EQUATIONS
NT FOKKER-PLANCK EQUATION

PARTIAL PRESSURE
NT HYPOXEMIA
NT OXYGEN TENSION
Arterial CO2 response to low levels of inspired CO2 in awake beagle dogs
p0197 A82-26815
Theoretical analysis of optimal P50 --- for maximizing oxygen unloading in hypoxia
p0230 A82-29568

PARTICLE ACCELERATORS
NT VAN DE GRAAFF ACCELERATORS
Medical uses of accelerators
[DE82-000572] p0397 N82-31926

PARTICLE BEAMS
NT ATOMIC BEAMS
NT ELECTRON BEAMS

PARTICLE COUNTERS
U RADIATION COUNTERS

PARTICLE DECAY
U RADIOACTIVE DECAY

PARTICLE DENSITY (CONCENTRATION)
The radiobiological effect of alpha-emitting radionuclides incorporated in the lungs. I - The microdistribution in the lungs of insoluble dust which contains thorium-232
p0412 A82-46870

PARTICLE DETECTORS
U RADIATION COUNTERS

PARTICLE DIFFUSION
Myocardial perfusion scintigraphy using a new technique, the mesh chamber
[DE81-027995] p0083 N82-15773

PARTICLE EMISSION
NT FIELD EMISSION
STS-2 Induced Environment Contamination Monitor (IECM): Quick-look report
[NASA-TM-82457] p0177 N82-18870

PARTICLE INTERACTIONS
NT ELECTRON CAPTURE
NT INTERSTELLAR CHEMISTRY
NT MOLECULAR INTERACTIONS

PARTICLE SIZE DISTRIBUTION
A measurement of the size distribution of lipoproteins in the plasma of human blood
p0313 A82-38603
Deposition of aerosol particles in the human respiratory tract
p0039 N82-13659

PARTICLE SPIN
Spin imaging equipment for small animal experiments
[ISBN-951-41-0420-X] p0293 N82-26951

PARTICLES
NT AEROSOLS
NT ANIONS
NT BETA PARTICLES
NT CATIONS
NT CHARGED PARTICLES
NT COLD PLASMAS
NT ELECTRON BEAMS
NT ENERGETIC PARTICLES
NT FOG
NT METAL IONS
NT NEGATIVE IONS
NT NEUTRONS
NT PLASMAS (PHYSICS)
NT POLLEN
NT POSITRONS
NT PROTONS
Determination of the effects of material from alternate energy sources on the upper respiratory tract clearance mechanism. Part 1: In vitro exposure to particulate pollutants. Part 2: In vivo exposure to ozone
[PB82-117037] p0178 N82-19811

PARTICULATE SAMPLING
Carcinogenic effects of coal-conversion materials
[DE81-028108] p0076 N82-14803

PARTITIONS (MATHEMATICS)
Geometrical considerations in the separation of biological particles by affinity partitioning
p0402 N82-32069

PASSAGEWAYS
Prosthetic occlusive device for an internal passageway
[NASA-CASE-MFS-25640-1] p0294 N82-26962

PASSENGER AIRCRAFT
NT H-53 HELICOPTER
The nature and rate of occurrence of medical emergencies on board Air France aircraft
p0314 A82-38841
Psychological investigation of pilot behavior during integration of control systems in the cockpit of passenger airliners --- German thesis
p0326 A82-40560

PASSENGERS
Setting hygienic standards to be applied to environmental standards pertaining to the rolling stock of railroads and subway systems
p0311 A82-38578
Effect of tactile vibration on annoyance to synthesized propfan noise
[NASA-TM-83258] p0176 N82-18066

PATCH TESTS
Evaluation of materials proposed for use in space flight
[NASA-CR-167537] p0178 N82-19815

PATHOGENESIS
Surgical treatment of recurrent frontal sinus barotrauma - A case report
p0073 A82-18743
Cardiovascular origins of heatstroke pathophysiology - An anesthetized rat model
p0108 A82-21687
Emotional stress as a factor in cardiovascular disorders
p0117 A82-21796
Pathogenesis and prevention of the hypoxic contraction of the heart
p0164 A82-24552
Connection of motor regimen with morbidity in workers
p0187 A82-25695
Clinical characteristics of neurotic disorders in female long-distance telephone operators
p0187 A82-25697
Coagulopathy in miners with vibration sickness
p0188 A82-25704
The role of stress in the pathogenesis of ischemic heart disease
p0279 A82-35677
The detection of premorbid states and cardiovascular diseases during medical examinations of seamen
p0309 A82-38553
Pathomorphological investigation of the mechanism of cochlear damage caused by noise
p0316 A82-39241
Echocardiographic characterization of heart hypertension
p0319 A82-40307
The toxic properties of rabbit and dog sera under controlled hyperthermia
p0322 A82-40458
Application of laser therapy to patients with osteoarthrosis deformans
p0343 A82-41475
Functional conditions of the brain and cerebral pathology
p0369 A82-42634
Comparative analysis of the biological effects of electromagnetic radiation. II - Eye damage. Cataractogenesis
p0371 A82-43222
Immune complexes and atherosclerosis
p0410 A82-46714
The sympathico-adrenal and the hypophysial-adrenal systems in the pathogenesis of the post-ischemic syndrome
p0410 A82-46717
Prevention of staphylococcal infections during space flights
p0130 N82-17818
Aetiology and pathogenesis --- traumatic lesions of the spine
p0359 N82-29875

PATHOLOGICAL EFFECTS
Hypoxic vasoconstriction and fluid filtration in pig lungs
p0018 A82-13226
Harmful effects of temperature under conditions of elevated pressure in a helium-oxygen environment
p0027 A82-15706
Prevention of hypoxic heart damage by the use of oxypyridine-class antioxidants
p0055 A82-16821
Morphology of experimental pneumoconiosis arising from the effects of lunar soil
p0055 A82-16824
The effects of heat stress on the morphogenetic potencies of the nephron epithelium
p0055 A82-16825
Physiology and pathology of respiration and means of correcting oxygen deficiencies in an organism /Meeting of the Interdepartmental Commission on the Coordination of Studies in Medicine of the Academy of Sciences of the Ukrainian SSR and the Ministry of Health of the Ukrainian SSR/
p0092 A82-20303
Changes in the posture of healthy rats after the intracranial introduction of brain extracts from animals with experimental vestibulopathy
p0151 A82-23257
Phosphorylating oxidation during changes in physiological condition
p0202 A82-27762
An analysis of the risk of human cardiac damage during +Gz stress - A review
p0251 A82-32001
The pathophysiology, presentation, and triage of altitude-related decompression sickness associated with hypobaric chamber operation
p0253 A82-32012
Possibility of evaluating radiation injury to skin on the basis of changes in its functional state
p0278 A82-35655
Mechanisms of the development of hypersensitivity to strophanthin in experimental myocardial infarction and its pharmacological correction
p0280 A82-35683
Morphological and functional factors contributing to a hypertonic heart
p0310 A82-38557
Delayed effects of the internal irradiation of endocrine system in female rats
p0311 A82-38582
Early clinical manifestations of vibration-noise pathology in miners of Donets Basin
p0368 A82-42616
Comparative analysis of the biological effects of electromagnetic radiation. II - Eye damage. Cataractogenesis
p0371 A82-43222
Mechanisms of the damaging effect of light on retinal photoreceptors
p0371 A82-43233
Metabolism of the myocardium in the case of ischemia /Review of the literature/
p0409 A82-46702
Minor peptides under normal and pathological conditions
p0420 A82-48214
The sequence of the pathomorphological reactions to the effect of an alternating magnetic field
p0420 A82-48222

PATHOLOGY
NT HUMAN PATHOLOGY
An investigation of the ultrasound hemolysis of normal and pathological erythrocytes
p0419 A82-48204

PATIENTS
Physical and physiological features of long-range flight and its impact on patients
p0087 A82-19012
Results of the treatment of patients with chronic bronchitis at health resorts in contrasting climatic zones during different seasons
p0192 A82-25825
Hemodynamics and external respiration in patients with bronchial asthma at rest and during exercise
p0205 A82-27791

Diagnosis and organization of the therapy of patients with disorders of blood circulation in the brain
p0310 A82-38554

The effect of potassium orotate on the metabolism of certain vitamins in patients with fractures of the long tubular bones
p0310 A82-38563

Intrahemispherical relations of EEG slow-wave components in patients with local brain lesions
p0324 A82-40472

The significance of the bicycle ergometer test for evaluating the work capacity in patients with hypertension
p0324 A82-40477

Isoenzymes following exercise in patients with ischemic heart disease
p0411 A82-46723

PATRIOT MISSILE

Evaluating operator performance on automated tactical systems
p0140 A82-22908

PATTERN DISTRIBUTION

U DISTRIBUTION (PROPERTY)

PATTERN RECOGNITION

NT CHARACTER RECOGNITION

Principles of feature integration in visual perception
p0055 A82-16892

Is recognition accuracy really impaired when the target is repeated in the display
p0056 A82-16893

Item recognition as a Performance Evaluation Test for Environmental Research
p0143 A82-22934

Finding a needle in a haystack when you've never seen a needle - A human factors analysis of SETI
p0144 A82-22950

Bivariate response distributions in visual detection and discrimination
p0144 A82-22951

Recognition of VDU presented colors by color defective observers --- Visual Display Unit
p0146 A82-22966

A model of human decisionmaking in multiple process monitoring situations
p0231 A82-29671

Recognition of thermal images - Effects of scan-line density and signal-to-noise ratio
p0254 A82-32529

The roles of axes of symmetry in orientation illusions
p0259 A82-33749

Simulation of two forms of eye motion and its possible implication for the automatic recognition of three-dimensional objects
p0277 A82-34965

A procedure for the analysis of nystagmus and other eye movements
p0284 A82-35911

Perceptual discriminability as a basis for selecting graphic symbols
p0289 A82-37186

A computational theory of visual surface interpolation
[AD-A103921] p0010 N82-10710

The efficiency of detecting tribar patterns modulated in random dot density
[IZF-1980-25] p0036 N82-12779

Structure of the knowledge base for an expert labeling system
p0047 N82-13723

Performance tests for repeated measures: Moran and computer batteries
[AD-A115068] p0392 N82-30941

An experimental evaluation of tactical symbol-design features
[AD-A115895] p0427 N82-32993

PATTERN REGISTRATION

A comparison of display formats for the electronic master monitor and advisory display system
[AD-A115127] p0392 N82-30946

PAYLOAD DELIVERY (STS)

**PERFORMANCE PREDICTION**
NT PREDICTION ANALYSIS TECHNIQUES
Predicting the potentials of young swimmers based on clinical and physiological data
p0118 A82-21014
Task taxonomies and modeling for system performance prediction
p0144 A82-22946
Is image quality important --- predicting air-to-ground target acquisition performance with electro-optical system
p0145 A82-22954
Factor calculation of the test variables in use by the legal medicine institutes of the Italian Air Force
p0167 A82-24847
Robotics: Problems and prospects
p0324 A82-40473
Validation of a proposed pilot trainee selection system
p0406 A82-46270
Changes in the US Army aviator selection and training program
p0407 A82-46272
Development and application of air combat performance assessment methods
p0407 A82-46277
Individual differences in dual task performance
[AD-A110768] p0267 N82-24826
Centrolography used for integral assessment of mental work capacity
p0394 N82-31901
An EEG predictor of performance decrement in a vigilance task
[AD-A116960] p0433 N82-34014

Sixteenth Annual Conference on Manual Control
[NASA-TM-84273] p0436 N82-34037
Modeling human target acquisition in ground-to-air weapon systems
p0437 N82-34040
A model-based technique for predicting pilot opinion ratings for large commercial transports
p0438 N82-34050
An analytical prediction of pilot ratings utilizing human pilot model
p0438 N82-34051

**PERFORMANCE TESTS**
Application of improved technology to a preprototype vapor compression distillation /VCD/ water recovery subsystem
[ASME PAPER 81-ENAS-10] p0002 A82-10890
Eye movement measurement of readability of CRT displays
p0017 A82-12869
An evaluation of alphanumeric, graphic, and color information displays
p0017 A82-12871
Effects of extended practice on dual-task tracking performance
p0017 A82-12875
A comparison of single- and dual-task measures to predict simulator performance of beginning student pilots
p0029 A82-15813
What do pilots see in displays
p0139 A82-22906
Selection of Performance Evaluation Tests for Environmental Research --- human performance measures
p0142 A82-22930
Performance Evaluation Tests for Environmental Research /PETER/ - Auditory digit span task --- number sequence memory
p0142 A82-22932
A catalogue of Performance Evaluation Tests for Environmental Research
p0143 A82-22935
Comparison of memory tests for environmental research
p0143 A82-22936
Task analytic approach to human performance battery development
p0143 A82-22937
The finite intersection test - A new multivariate statistical technique applicable to the evaluation of complex systems --- of man and machine
p0144 A82-22947
A method for automatically evaluating operator performance
p0156 A82-23304
Design and validation of a tracking test for forming matched groups for continuous tracking experiments --- book
p0209 A82-28393
The accuracy of venturi masks at altitude
p0321 A82-40445
Methods for linking item parameters
[AD-A105509] p0084 N82-15779
The production of specified electrocortical activity as a measurable task
[AD-A111422] p0294 N82-26965
Assessment and development of oculomotor flying skills by the application of the channel theory of vision
[AD-A115325] p0436 N82-34035

**PERFUSION**
U DIFFUSION

**PERIODIC VARIATIONS**
NT ANNUAL VARIATIONS
NT DIURNAL VARIATIONS
NT NOCTURNAL VARIATIONS
The work capacity of sailors under conditions of varying work-rest cycles
p0071 A82-18524
Effect of low ambient temperatures on sleep-wakefulness periodicity in lemming /Dicrostonyx torquatus/
p0192 A82-25824
Effects of periodization in the yearly training cycle on cardiac volume in young athletes
p0204 A82-27779
Microdosimetric analysis of the variability of radiobiological effects in experiments with

high-energy radiation --- in space
p0206 A82-27810

Psychophysiological analysis of periodic oscillations of performance quality within the limits of a work cycle
p0282 A82-35833

**PERIODICITY**
U PERIODIC VARIATIONS

**PERIODICITY (BIOLOGY)**
U RHYTHM (BIOLOGY)

**PERIPHERAL CIRCULATION**

Change in the cytochemical indicators of carbohydrate metabolism in the peripheral blood neutrophils of pilots
p0107 A82-21457

Changes in peripheral hemodynamics during transient disturbances in cerebral circulation
p0159 A82-24497

The differential diagnosis of peripheral vasomotor impairments of vibrational and nonvibrational origin
p0160 A82-24507

Phase analysis of peripheral systemic circulation by a rheographic method
p0161 A82-24518

Effects of vibrating tools on the peripheral vessels and the peripheral nervous system in workers of an iron foundry - Preventive suggestions
p0260 A82-33758

Studies on the property and transplantation of haemopoietic stem cells from peripheral blood
p0261 A82-34247

The bioenergetics of erythrocytes in inhabitants of the North
p0282 A82-35831

Splanchnic vasoconstriction in heat-stressed men - Role of renin-angiotensin system
p0285 A82-36028

An improved apparatus for venous occlusion plethysmography
p0309 A82-38540

The effect of Clonidine on peripheral vasomotor reactions during simulated zero gravity
p0337 A82-40763

The rate at which exogeneous hydrocortisone is eliminated from peripheral blood flow in patients suffering from an acute myocardial infarction
p0344 A82-41498

Microcirculatory state in the case of chronic obliteration of arteries
p0369 A82-42626

Cutaneous vascular response to exercise and acute hypoxia
p0418 A82-47385

Changes in peripheral circulation of limbs during bone regeneration under influence of low-frequency magnetic fields
p0387 N82-30906

Changes in transcapillary metabolism in patients with chronic venous insufficiency of legs under influence of static magnetic fields
p0387 N82-30907

**PERIPHERAL EQUIPMENT (COMPUTERS)**
NT CONSOLES

**PERIPHERAL NERVOUS SYSTEM**

Effects of vibrating tools on the peripheral vessels and the peripheral nervous system in workers of an iron foundry - Preventive suggestions
p0260 A82-33758

Early reaction of the hemopoietic organs depending on the condition of the peripheral N-cholinergic systems
p0307 A82-38168

The use of electrovacuum therapy in certain diseases of the peripheral nervous system
p0343 A82-41478

Condition of meningeal nervous system during repeated exposure to transverse accelerations
p0127 N82-16730

**PERIPHERAL VISION**

Narrowing of the visual field as an indicator of mental workload
p0288 A82-36961

Color vision in the peripheral retina under photopic conditions
p0314 A82-38798

Global visual processing for saccadic eye movements
p0318 A82-39435

Spectral sensitivity of the peripheral retina to large and small stimuli
p0403 A82-45675

Visual problems in aviation and space navigation
p0081 N82-15758

**PERMEABILITY**

Optimization of medicinal electrophoresis --- enhancement of cutaneous penetration
p0343 A82-41472

Biomicroscopy of a microcirculatory bed in experiments - Possibilities, limitations, and prospects
p0368 A82-42611

**PERMITTIVITY**

Measurement of radio frequency permittivity of biological tissues with an open-ended coaxial line. I
p0097 A82-20891

Measurement of radio frequency permittivity of biological tissues with an open-ended coaxial line. II - Experimental results
p0097 A82-20892

**PEROXIDES**
NT INORGANIC PEROXIDES

Peroxidation of lipids in the liver and lungs of rats during prolonged adaptation to the cold
p0112 A82-21736

Kinetics of lipid peroxidation in cellular organelle anoxia under different conditions
p0190 A82-25809

The damaging effects of light on the retina - The role of singlet oxygen and lipid peroxides
p0232 A82-29817

Changes in the peroxide metabolism of weight-lifters and wrestlers under the conditions of systematic muscular activity
p0239 A82-31505

**PERSONALITY**

The role of communications, socio-psychological, and personality factors in the maintenance of crew coordination
p0405 A82-46252

**PERSONALITY TESTS**

Serial personality evaluations of repatriated U.S. Air Force southeast Asia POWs
p0193 A82-26237

Relationship of personality factors and some social habits to cardiovascular risk in submariners
p0211 A82-28487

The effect of threat on psychomotor and intellectual performance depending on characteristics of temperament
p0287 A82-36691

Main directions and principles of psychological expertise of cosmonauts
p0393 N82-31893

**PERSONNEL**
NT AIR TRAFFIC CONTROLLERS (PERSONNEL)
NT AIRCRAFT PILOTS
NT ASTRONAUTS
NT COSMONAUTS
NT CREWS
NT FLIGHT CREWS
NT FLYING PERSONNEL
NT GROUND CREWS
NT INSTRUCTORS
NT MEDICAL PERSONNEL
NT OPERATORS (PERSONNEL)
NT ORBITAL WORKERS
NT PHYSICIANS
NT PILOTS (PERSONNEL)
NT PROGRAMMERS
NT SPACECREWS
NT TEST PILOTS

Laws governing readaptation for seamen after a low-latitude cruise
p0092 A82-20310

Problems in evaluating health effects of occupational and environmental exposures
[DE81-028440] p0083 N82-15774

Medical research of naval personnel
[RNP-3/81] p0249 N82-23977

**PERSONNEL DEVELOPMENT**

Training of personnel specialized in cartography
p0356 N82-29669

PERSONNEL MANAGEMENT
  Training and personnel impact on increased
    productivity
                                        p0366 A82-42230
  Flight ergonomics in the aircraft industry
    personnel-ergonomic development
    [MBB-FE-301/S/PUB/44]              p0177 N82-18872
  Analysis of sickness rates --- in West German
    industry
    [PNR-90097]                        p0247 N82-22882
  Advanced Instructional System:  Applications for
    the future
    [AD-A117144]                       p0425 N82-32980
  Programs in education and training of manpower and
    personnel, including logistics and group aspects
    of human factors engineering
    [AD-A116275]                       p0427 N82-32990
PERSONNEL PROPULSION SYSTEMS
 U SELF MANEUVERING UNITS
PERSONNEL SELECTION
 NT PILOT SELECTION
  Psychological considerations in future space
    missions
                                        p0029 A82-15852
  Future directions for selecting personnel ---
    spacecrews for long duration space flight
                                        p0030 A82-15853
  Vestibular tests in the selection of cosmonauts
                                        p0058 A82-16941
  Convergence-divergence with extended practice -
    Three applications --- human psychomotor task
    correlation with external measures
                                        p0143 A82-22930
  The psychological selection of French astronauts
    for a Franco-Soviet scientific space mission
                                        p0171 A82-25496
  Follow-up of 14 abnormal electroencephalograms in
    asymptomatic U.S. Air Force Academy cadets
                                        p0194 A82-26242
  Investigation of the sensitivity of the vestibular
    apparatus to galvanic-current stimulation
                                        p0242 A82-31541
  The clinical selection of astronauts at the
    C.P.E.M.P.N
                                        p0316 A82-38852
  Vestibular screening of cosmonauts
                                        p0316 A82-38853
  Orthostatic tests during cosmonaut selection
                                        p0316 A82-38854
  Selection and training of European astronauts
                                        p0319 A82-39507
  A test for the prediction of risk-taking attitude
    in operators
                                        p0322 A82-40449
  Use of physiological information in man-machine
    systems
                                        p0372 A82-43380
  The deterioration of the working efficiency of
    stereophotogrammetrists and their professional
    selection
                                        p0410 A82-46709
  Weighting of aptitude components based on
    differences in technical school difficulty
    [AD-A102045]                       p0048 N82-13725
  Flight ergonomics in the aircraft industry
    personnel-ergonomic development
    [MBB-FE-301/S/PUB/44]              p0177 N82-18872
  Aptitude requirements based on task difficulty:
    Methodology for evaluation
    [AD-A110560]                       p0297 N82-26983
  Main directions and principles of psychological
    expertise of cosmonauts
                                        p0393 N82-31893
PERSPIRATION
  Some indicators of human adaptation to humid
    tropical conditions
                                        p0238 A82-31495
  Central and peripheral inputs in sweating
    regulation during thermal transients
                                        p0255 A82-32830
  The effectiveness of perspiration in a hot
    environment
                                        p0307 A82-38178
  In vivo and in vitro characteristics of eccrine
    sweating in patas and rhesus monkeys
                                        p0340 A82-41218
  The role of skin temperature in the control of
    sweating in man
                                        p0009 N82-10708
  Sweating responses of men and women during
    exercise in humid and dry heat
                                        p0032 N82-12745
  Analysis of evaporative water loss in the Skylab
    astronauts
    [NASA-CR-167462]                   p0178 N82-19814
  An evaluation of localized sweating rates for
    predicting total body sweating rates
    [AD-A111902]                       p0300 N82-27968
PERT
  An assessment of PERT as a technique for schedule
    planning and control
    [NASA-TM-83265]                    p0428 N82-33981
PESTICIDES
 NT INSECTICIDES
  Concerning the investigation of the condition of
    the cardiovascular system in experiments on
    animals --- pesticide effects
                                        p0412 A82-46873
  Chemicals Identified in Human Biological Media
    [DE81-030813]                      p0127 N82-16735
PETECHIAE
  The determination of capillary resistance
                                        p0279 A82-35667
PETROLEUM
 U CRUDE OIL
PETROLEUM PRODUCTS
 NT GASOLINE
 NT TARS
  Energy expenditure and dietary change
    [PB81-218471]                      p0010 N82-10717
PETROLOGY
  Organic matter in meteorites and Precambrian rocks
    - Clues about the origin and development of
    living systems
                                        p0121 A82-21980
PH
  Effect of pH on sensation and vastus lateralis
    electromyogram during cycling exercise
                                        p0256 A82-32835
PH FACTOR
  Domestic swine in physiological research.  3:
    Blood gas and acid-base values of arterial and
    venous blood from young anesthetized pigs
    maintained under steady-state ventilatory
    conditions
    [AD-A111834]                       p0347 N82-28945
PHARMACOLOGY
 NT PSYCHOPHARMACOLOGY
  Elevation of hypoxia resistance with the use of
    gutimine
                                        p0093 A82-20319
  Models of a functional lapse in one hemisphere and
    of the neuropharmacological effects on the deep
    structures of the brain
                                        p0094 A82-20325
  Flow visualization techniques in medical and
    biological applications
                                        p0096 A82-20778
  The effects of horizontal body casting on blood
    volume, drug responsiveness, and +Gz tolerance
    in the rhesus monkey
                                        p0108 A82-21682
  Effects of pyrroxane and methylapogalantamine on
    cerebral blood circulation and oxygen regime
                                        p0115 A82-21776
  The effect of piracetam on the body's resistance
    to hypoxia
                                        p0115 A82-21777
  Comparative neurophysiological characteristics of
    cold and caudate tremors
                                        p0116 A82-21790
  Analysis of the effects of isoprenaline on the
    energy consumption of skeletal muscle
                                        p0150 A82-23169
  The pharmacology of ocular hemodynamics /Review/
                                        p0151 A82-23252
  A method for the study of the pharmacodynamics of
    antianginal drugs with the use of repeated
    exercise tests
                                        p0152 A82-23266
  The effectiveness of using various radioprotective
    agents for protecting the genital cells of male
    mice from the genetic effects of radiation. I -
    Investigation of the yield of dominant lethal
    mutations in postspermatogonial cells
                                        p0155 A82-23289
  Biological methods for predicting the
    effectiveness of psychopharmacotherapy applied

to patients with schizophrenia /Review/
p0155 A82-23297
The effect of the beta-adrenergic blocker propranolol and the tranquilizer seduxen on the structure of natural sleep in the cat
p0157 A82-23644
The effects of serotonin on shivering thermogenesis
p0157 A82-23646
Correlation of the stress protective and autonomotropic effects of mebicar
p0164 A82-24559
Effects of pharmacological agents on the development of hematic hypoxia
p0189 A82-25720
Phenytoin - Ineffective against acute mountain sickness
p0192 A82-26231
Contribution of the kallikrein-kinin system to microcirculation disorders in the case of immobilization stress
p0204 A82-27787
The extraction and identification of drugs in aviation toxicology
p0210 A82-28478
The effect of several pharmacologically active substances on the transformation of cystamine in mouse tissues --- and sulfur-containing antiradiation drug metabolism
p0278 A82-35654
The first clinical experience with a new Soviet antiarrhythmic drug, the diethylamine analog of ethmozine, in patients with different disorders of the heart rhythm
p0279 A82-35678
The pharmacokinetic characteristics of trimecain as compared to lidocain in patients with myocardial infarction
p0280 A82-35682
Mechanisms of the development of hypersensitivity to strophanthin in experimental myocardial infarction and its pharmacological correction
p0280 A82-35683
Studies on the interaction of pemoline and centrophenoxine with some flight factors
p0287 A82-36688
An attempt at the classification of 'patient pharmacokinetic capacities'
p0310 A82-38562
Gramicidin A-induced conductance of the muscle fiber membrane
p0313 A82-38605
The effect of denervation and tendotomy on oxidative phosphorylation in the skeletal muscles of the rabbit and on the resistance of phosphorylation to uncoupling agents
p0326 A82-40504
The effect of Clonidine on peripheral vasomotor reactions during simulated zero gravity
p0337 A82-40763
Cardiovascular effects of Clonidine during 20 hours head down tilt /-5 deg/
p0337 A82-40764
The ultrastructure of the myocardium in the restorative period following aorto-coronary shunting in patients with chronic ischemic heart disease
p0343 A82-41484
Characteristics of pharmacotherapeutic complications in otolaryngology /Review of the literature/
p0369 A82-42628
Aeromedical considerations of malaria prophylaxis with mefloquine hydrochloride
p0409 A82-46536
The variations in the content of histamine in the tissues of the heart and stomach during the excessive stimulation of the organism and the influence of hexamethonium on these variations
p0413 A82-46086
A system of methodological approaches to the evaluation and prognostication of the hemodynamic effects of hypotensive and antianginal compounds
p0413 A82-46089
Side effects of cardiovascular drugs on the eye
p0414 A82-46098
PHASE ANGLE
U PHASE SHIFT
PHASE SHIFT
Suprachiasmatic stimulation phase shifts rodent circadian rhythms
p0165 A82-24799
Altitude and hypoxia as phase shift inducers --- of human circadian rhythms
p0210 A82-28480
Hyperacuity for luminance phase angle in the human visual system
p0314 A82-38799
PHASE TRANSFORMATIONS
NT EVAPORATION
NT FREEZING
Statistical mechanics of biomembrane phase transition. I - Excluded volume effects of lipid chains in their conformation change

Constant AMP synthesis in aqueous solution by electric discharges --- simulating primitive earth conditions
p0021 A82-13042
Formation of energy rich phosphate in Fenton's reaction --- for prebiotic conditions
p0100 A82-20922
Characteristics of the relations of the primary responses of the pentose phosphate pathway to glycolysis in the bone marrow of irradiated rats
p0111 A82-21725
Formation of pyrophosphate, tripolyphosphate, and phosphorylimidazole with the thioester, N, S-diacetylcysteamine, as the condensing agent --- molecular evolution
p0208 A82-28229
Effects of creatine phosphate on action potential duration and myocardial contractile force in the frog under hypoxia
p0241 A82-31532
Formation of cyanate and carbamyl phosphate by electric discharges of model primitive gas
p0305 A82-38116
PHOSPHINES
Photolysis of CH4-NH3 mixtures and PH3 as models for the photochemical transformations on the primitive earth and Jupiter
p0099 A82-20914
Possible role of phosphine in chemical evolution
p0099 A82-20915
PHOSPHORESCENCE
The use of phosphorescent probes in studies of model and biological membranes
p0420 A82-48208
PHOSPHORUS
NT PHOSPHORUS 32
The stability of a model with time lag, with the phytoplankton-phosphorous system considered as an example
p0420 A82-48209
Effects of 1 alpha-hydroxycholecalciferol and different amounts of phosphorus in food allowance on some parameters of phosphorus and calcium metabolism in hypokinetic rats

p0270 N82-25762
PHOSPHORUS COMPOUNDS
NT ADENINES
NT ADENOSINE TRIPHOSPHATE
NT ADENOSINES
NT NUCLEOTIDES
NT ORGANIC PHOSPHORUS COMPOUNDS
NT PHOSPHATES
NT PHOSPHINES
NT POLYNUCLEOTIDES
Abiotic synthesis of phosphoric esters of monosaccharides according to the 'cold model'
p0100 A82-20923
Mammalian toxicological evaluation of DIMP and DCPD (Phase 3 - IMPA)
[AD-A107574] p0133 N82-17840
PHOSPHORUS ISOTOPES
NT PHOSPHORUS 32
PHOSPHORUS METABOLISM
The effects of immobilization stress on diacyl and plasmogenic phospholipids in various organs and tissues of the rat
p0052 A82-16802
The concentration of adenyl nucleotides and creatine phosphate in the cerebral hemispheres during different manifestations of stress
p0310 A82-38560
The activity of ribosephosphate pyrophosphokinase in the thymus and liver of irradiated mice
p0404 A82-45779
Features of metabolic disturbances in rat myocardium under effect of alternating magnetic fields of different parameters
p0134 N82-17846
Effects of 1 alpha-hydroxycholecalciferol and different amounts of phosphorus in food allowance on some parameters of phosphorus and calcium metabolism in hypokinetic rats
p0270 N82-25762
PHOSPHORUS 32
The incorporation of P-32 into various sections of the brain upon exposure to intermittent noise of low intensity
p0342 A82-41467
PHOSPHORYLATION
Models for protocellular photophosphorylation
p0195 A82-26596
Physical model of the initial stages of energy transformation during oxidative phosphorylation
p0200 A82-27730
Phosphorylating oxidation during changes in physiological condition
p0202 A82-27762
The role of protein phosphorylation in neutral and hormonal control of cellular activity
p0234 A82-30766
Studies on structure and function of chloroplasts - Reconstitution of photophosphorylation activity by combining the deficient membranes of chloroplasts with crista membrane fragments of mitochondria
p0259 A82-33595
The effect of denervation and tendotomy on oxidative phosphorylation in skeletal muscles of the rabbit and the resistance of phosphorylation to uncoupling agents
p0307 A82-38171
A comparison between the protonophoric and separating functions of weak dibasic acids --- in mitochondrial respiration
p0312 A82-38590
The effect of denervation and tendotomy on oxidative phosphorylation in the skeletal muscles of the rabbit and on the resistance of phosphorylation to uncoupling agents
p0326 A82-40504
The effect of a physiological load on the exchange and phosphorylation of cell membrane proteins in the brain of rats
p0374 A82-43654
PHOTOABSORPTION
Linear dichroism of absorption changes upon the photoreduction of pheophytin in oriented preparations of photosystem II
p0228 A82-29442
PHOTOCHEMICAL REACTIONS
NT PHOTODECOMPOSITION
NT PHOTOLYSIS
NT PHOTOSYNTHESIS
NT RADIOLYSIS
Molecular complexes of amino acids with porphyrins as possible precursors of pigment-protein systems
p0020 A82-13041
Comets and the photochemistry of the paleoatmosphere
p0097 A82-20866
Clays as prebiotic photocatalysts
p0099 A82-20916
Coupling to solar energy: Sensitized photoreactions - The primary source of self-organization
p0105 A82-20960
Models for protocellular photophosphorylation
p0195 A82-26596
Participation of pheophytin in primary electron transfer processes in the reaction centers of photosystem II --- photoreduction reactions of chlorophyll derivative
p0201 A82-27746
The mechanism of the interaction of the triplet state of porphyrins and phthalocyanines with electron acceptors
p0228 A82-29432
The role of methylation and Ca/2+/ in the photoaxis of Halobacterium halobium
p0243 A82-31598
The flavin-dependent consumption of oxygen in mitochondria under illumination
p0312 A82-38589
PHOTOCHEMISTRY
U PHOTOCHEMICAL REACTIONS
PHOTOCURRENTS
U ELECTRIC CURRENT
PHOTODECOMPOSITION
A protective function of the coacervates against UV light on the primitive earth
p0403 A82-45592
PHOTOELECTRIC CELLS
NT PHOTOVOLTAIC CELLS
PHOTOELECTROMAGNETIC DETECTORS
U RADIATION MEASURING INSTRUMENTS
PHOTOGRAMMETRY
The deterioration of the working efficiency of stereophotogrammetrists and their professional selection
p0410 A82-46709
Close-range cine-photogrammetry: A generalized technique for quantifying gross human motion
p0036 N82-12781
PHOTOGRAPH INTERPRETATION
U PHOTOINTERPRETATION
PHOTOGRAPHIC EQUIPMENT

NT INFRARED IMAGERY
NT PHOTOMICROGRAPHY
NT STEREOPHOTOGRAPHY
NT STEREOSCOPY
NT UNDERWATER PHOTOGRAPHY
Conceptual ergonomics: Early detection of field of vision restrictions by means of ergoscopy --- photography of scale models through endoscopes
[DRIC-T-6253] p0225 N82-21899
PHOTOINTERPRETATION
Map interpretation and geographic orientation during nap-of-the-earth flight
p0144 A82-22945
PHOTOLUMINESCENCE
NT X RAY FLUORESCENCE
PHOTOLYSIS
NT RADIOLYSIS
Far UV photolysis of methane-water gaseous mixtures and the prebiotic synthesis of aldehydes
p0099 A82-20913
Photolysis of CH4-NH3 mixtures and PH3 as models for the photochemical transformations on the primitive earth and Jupiter
p0099 A82-20914

Possible role of phosphine in chemical evolution
p0099 A82-20915
PHOTOMETERS
NT ULTRAVIOLET SPECTROMETERS
PHOTOMETRY
NT SPECTROPHOTOMETRY
NT VISUAL PHOTOMETRY
PHOTOMICROGRAPHY
Sex methodological aspects of the investigation of organ specificity of the lymphatic pathways
p0367 A82-42602
PHOTON ABSORPTION
U ELECTROMAGNETIC ABSORPTION
PHOTON DENSITY
Measurement of the bone mineral density of trabecular bone by a coherent and Compton scattering technique
p0032 N82-12747
Emission computed tomography: The single photon approach
[PB82-131285] p0297 N82-26980
PHOTOOXIDATION
Rhodopsin aggregation under the damaging effects of light on the photoreceptor membranes
p0109 A82-21705
Photodamage to the rhodopsin molecule - SH-group oxidation
p0153 A82-23275
Effects of reversible manganese extraction on the light reactions of photosystem II preparations
p0231 A82-29816
PHOTORECEPTORS
Psychophysical evidence for more than two kinds of cone in dichromatic color blindness
p0089 A82-19608
Rhodopsin aggregation under the damaging effects of light on the photoreceptor membranes
p0109 A82-21705
Intraretinal recordings of slow electrical responses to steady illumination in monkey - Isolation of receptor responses and the origin of the light peak
p0185 A82-25649
The magnetic susceptibility of rhodopsin
p0199 A82-27729
The damaging effects of light on the retina - The role of singlet oxygen and lipid peroxides
p0232 A82-29817
Mechanisms of the damaging effect of light on retinal photoreceptors
p0371 A82-43233
PHOTOREDUCTION
U PHOTOCHEMICAL REACTIONS
PHOTOSENSITIVITY
NT LIGHT ADAPTATION
Psychophysical evidence for more than two kinds of cone in dichromatic color blindness
p0089 A82-19608
Sensing of the proton potential /Delta mu H/ in Halobacterium halobium
p0228 A82-29441
The role of methylation and Ca/2+/ in the phototaxis of Halobacterium halobium
p0243 A82-31598
PHOTOSENSORS
U RADIATION MEASURING INSTRUMENTS
PHOTOSTRESSES
The use of a phytochrome-dependent reaction to assess the influence of space flight factors on a plant organism
p0242 A82-31547
PHOTOSYNTHESIS
Mathematical model of the spatial distribution and accumulation of assimilates in plants
p0026 A82-15702
Dynamics of plant physiological activity during a light interruption of the dark period of the day
p0027 A82-15705
Photoassisted carbon dioxide reduction and formation of twoand three-carbon compounds --- prebiological photosynthesis
p0100 A82-20920
Evolution of the rhodospirillaceae and mitochondria - A view based on sequence data
p0105 A82-20972
On the origin of photosynthetic eukaryotic cells - Cyanidium caldarium as a 'bridge' alga between prokaryotic cyanobacteria and eukaryotic rhodophytes: Evidence from environmental, polysaccharide biochemistry and ultrastructural studies
p0106 A82-20973
Effects of ultraviolet-B irradiances on soybean. IV - Leaf ontogeny as a factor in evaluating ultraviolet-B irradiance effects on net photosynthesis
p0195 A82-26602
Antenna form of photosystem-2 chlorophyll in chloroplasts
p0199 A82-27730
Linear dichroism of absorption changes upon the photoreduction of pheophytin in oriented preparations of photosystem II
p0228 A82-29442
Spectral character of sunlight modulates photosynthesis of previtamin D3 and its photoisomers in human skin
p0255 A82-32692
Studies on structure and function of chloroplasts - Reconstitution of photophosphorylation activity by combining the deficient membranes of chloroplasts with crista membrane fragments of mitochondria
p0259 A82-33595
Magnetic-field effect on photophysical processes in the light-harvesting pigment apparatus of purple photosynthetic bacteria
p0264 A82-34917
Light curves for photosynthesis under intermittent illumination
p0313 A82-38608
Model systems in photosynthesis research
[DE81-023889] p0009 N82-10706
Higher plant acclimation to solar ultraviolet-B radiation
p0031 N82-12737
Distinctions of regeneration of confined atmosphere by means of photosynthesis of unicellular algae
p0125 N82-16720
The structure and function of chlorophyll-proteins in photosystem 1 and the light harvesting complex of photosystem 2
p0129 N82-17811
Higher plant response to elevated ultraviolet irradiance
[NASA-CR-167538] p0213 N82-20828
Action spectra for photosynthetic inhibition
p0213 N82-20831
Primary light-harvesting system: Phycobilisomes and associated membranes
[DE81-028326] p0221 N82-21874
Orientation and energy-transfer studies on chlorophyll in the photosynthetic membrane
[DE82-010180] p0356 N82-29852
PHOTOTHERMOTROPISM

PHYSICAL EXERCISE
NT HYPERKINESIA
Progress in computer analysis of the exercise electrocardiogram
p0001 A82-10630
Evaluation of abnormal exercise electrocardiogram in apparently healthy subjects - Labile repolarization /ST-T/ abnormalities as a cause of false positive responses
p0001 A82-10631
Variations in normal electrocardiographic response to treadmill testing
p0001 A82-10632
Endurance training in the rat. I - Myocardial mechanics and biochemistry
p0006 A82-11155
Noninvasive assessment of T-wave abnormalities on precordial electrocardiograms in middle-aged professional bicyclists
p0006 A82-11200
Autonomic mechanisms of training bradycardia - Beta-adrenergic receptors in humans
p0019 A82-13233
Cardiovascular responses to mixed static and dynamic exercise
p0022 A82-14803
Management by means of muscular activity under unloaded conditions
p0028 A82-15712
Computer-enhanced thallium scintigrams in asymptomatic men with abnormal exercise tests
p0049 A82-16167
Ion regulatory function of the human kidney in prolonged space flights
p0057 A82-16936
Characteristics of loading hypoxia
p0060 A82-16968
The role of physical training in the prevention of ischemic heart disease
p0071 A82-18525
Effect of blood volume on sweating rate and body fluids in exercising humans
p0089 A82-19495
Enhanced heat production in physically restrained rats in hypoxia
p0089 A82-19496
The influence of muscular work on the vestigial effects of cold acclimation
p0090 A82-19749
Microcirculation, tolerance to physical strain, and certain homeostasis parameters in patients with angina pectoris
p0094 A82-20324
Pulse rate evaluation of the relative physiological intensity of aerobic muscular work
p0094 A82-20331
Bioenergetic characteristics of various kinds of physical loads
p0095 A82-20334
A study of treadmill exercise protocols for Chinese males
p0107 A82-21677
The effect of two years' training of aerobic power and muscle strength in male and female cadets
p0107 A82-21678
Changes in the main characteristics of the central hemodynamics of healthy individuals and hypertension patients during physical exercise
p0110 A82-21711
Oxygen transport in dogs native to high altitudes during exercise
p0110 A82-21719
The effect of physical training on the lipid and lipoprotein metabolism in people of various ages
p0114 A82-21757
The physical activity of humans as a social and biological problem
p0114 A82-21760
Changes in the structure and cellular composition of the inguinal lymph nodes of white rats subjected to static and dynamic stresses
p0114 A82-21761
An electron microscope study of hyperplasia in fibers of the skeletal muscles of athletes
p0114 A82-21764
Adaptogenic effect of mebicar during emotional stress, exercise, and hypoxia
p0115 A82-21780
Functional state of the hippocampal-reticular complex under submaximal physical load and fatigue
p0116 A82-21786
Seasonal rhythm of the immune reactivity and heart tolerance to physical load in patients with ischemic heart disease
p0117 A82-21802
Nonesterified fatty acid metabolism during exercise in humans
p0117 A82-21809
The dynamics of heart rate recovery following work of various aerobic intensities
p0118 A82-21815
Development of an automatic data bank for managing physical education of students
p0118 A82-21816
Rationalizing physical regimen of sedentary workers
p0118 A82-21818
Effect of the functional properties of the vestibular analyzer on the effectiveness of instruction in gymnastics
p0118 A82-21819
Mechanisms of adaptation to ergothermic hypoxemia in athletes specializing in different sports
p0118 A82-21820
Radiometric determination of potassium content in athletes
p0119 A82-21822
Increased excretion of urea and N/tau/-methylhistidine by rats and humans after a bout of exercise
p0119 A82-21927
Cybernetic analysis of cardiac rhythm during a graded exercise test in Salyut-6 crew members
p0153 A82-23273
The effect of athletic training on the mass distribution of athletes' bodies
p0154 A82-23280
Indicators of the T system of immunity during physical overstraining
p0154 A82-23281
Possibility of using recorder systems with a low upper frequency boundary in EEG telemetry
p0154 A82-23286
Diurnal and seasonal rhythms in adrenal cortex activity in albino rats undergoing physical training
p0155 A82-23295

Criteria and the quantitative evaluation of human disturbance tolerance --- external electrical stimuli effects on athlete performance
p0158 A82-24478

Directed training of wrestlers in the biofeedback control of physical work intensity according to heat rate
p0158 A82-24480

The phase structure in the process by which a system of motions is formed in gymnasts
p0158 A82-24482

The importance of carboanhydrase in regulating the acid-base equilibrium during muscular activity
p0158 A82-24485

A hand-operated electric bicycle ergometer
p0158 A82-24486

Natural immunity in athletes of different age groups
p0159 A82-24489

Effect of regulated muscular load on the morphological and functional characteristics of adrenal glands in dogs with experimental hypocorticalism
p0161 A82-24524

Morphometric analysis of ultrastructural changes in the skeletal muscles during physical exercise in acute and chronic experiments
p0163 A82-24549

A bicycle-ergometer evaluation of the physical adjustment made by patients after an inner mitral commissurotomy
p0187 A82-25690

Connection of motor regimen with morbidity in workers
p0187 A82-25695

Dynamics of aerobic work capacity and changes in the functional stability of the oxygen-supply mechanism and hypophysical adrenocortical system in skiers
p0187 A82-25696

Clinical and epidemiologic analysis of ischemic EKG responses to physical exercise in males
p0188 A82-25707

The significance of chemoreceptor stimuli for the rate of switch-on and switch-off of the respiratory response to physical exercise
p0188 A82-25713

Thyroid and hypophysial thyrotropic function in athletes during bicycle ergometer exercise
p0189 A82-25716

Ultrastructural changes in skeletal muscle fibers under the influence of acute physical exercise
p0189 A82-25717

The significance of the pulmonary gas-exchange response in physical exercise testing for the evaluation of the effectiveness of mitral commissurotomy
p0190 A82-25805

Characteristics of oxygen metabolism in patients with chronic ischemic heart disease during physical exercise
p0190 A82-25806

Electromyographic pattern of muscular activity during pushing-off and methods for its directed correction in young ski-jumpers on a trampoline
p0203 A82-27776

Effects of increased carbohydrate resources on aerobic work capacity /Carbohydrate loading method/
p0203 A82-27777

Effects of exercise adaptation on the age variation of human cardiac contractile function and left ventricular mass
p0204 A82-27785

Hemodynamics and external respiration in patients with bronchial asthma at rest and during exercise
p0205 A82-27791

Ventilation and acid-base equilibrium for upper body and lower body exercise
p0210 A82-28882

Chylomicron triglyceride metabolism in resting and exercising fed dogs
p0229 A82-29551

Respiratory muscle fatigue after marathon running
p0229 A82-29552

Acclimatization to dry heat - Active men vs. active women
p0229 A82-29553

Effect of upper body posture on forced inspiration and expiration
p0229 A82-29559

The value of spiroergography in the diagnosis of the initial stage of cardiac insufficiency
p0233 A82-30030

Effects of novodrine and physical exercise on hemodynamics and coronary blood supply in the healthy human --- catecholamine effects
p0236 A82-31157

Characteristics of iron and copper metabolism during athletic training
p0237 A82-31165

Changes in psychophysiological functions of flight personnel under various regimes of active rest
p0238 A82-31494

Changes in the peroxide metabolism of weight-lifters and wrestlers under the conditions of systematic muscular activity
p0239 A82-31505

Specialized acidophilic products for the nourishment of athletes
p0240 A82-31514

Adaptation of skeletal and cardiac muscle to elevated motor activity in hypo- and athyreotic rats
p0241 A82-31527

Hemodynamic response during combined tilt table-isometric exercise test and +Gz acceleration tolerance
p0251 A82-31832

Characteristics of adjustment of lung diffusing capacity to work
p0255 A82-32827

Effect of training on beta-adrenergic receptor number in rat heart
p0255 A82-32828

Effect of pH on sensation and vastus lateralis electromyogram during cycling exercise
p0256 A82-32835

Acute hypervolemia, cardiac performance, and aerobic power during exercise
p0256 A82-32836

Dynamics of cardiac, respiratory, and metabolic function in men in response to step work load
p0256 A82-32837

Increases in plasma beta-endorphin/beta-lipotropin immunoreactivity after treadmill running in humans
p0256 A82-32839

A computer linear regression model to determine ventilatory anaerobic threshold
p0257 A82-32843

The prevention of dysadaptive changes in sailors at sea
p0259 A82-33728

Changes of the oxygen transport function of the blood and some metabolic values in patients with hypertension and chronic ischemic heart diseases during ergometric exercise
p0279 A82-35666

Investigation of the functional state of the central nervous system and the motor apparatus for various regimes of rest and physical exercise
p0279 A82-35668

Recent developments in assessing the myocardial dystrophy encountered in athletes as a consequence of chronic physical overexertion
p0280 A82-35680

Measurement of cardiopulmonary performance during acute exposure to a 2440-m equivalent atmosphere
p0283 A82-35904

Effect of orthostatic stress on exercise performance after bedrest
p0283 A82-35907

Change in plasma cAMP and catecholamines in men subjected to the same relative amount of physical work stress
p0284 A82-35912

Man at extreme altitude
p0284 A82-36026

An automated, indirect assessment of cardiac output during rest and exercise
p0285 A82-36030

Parameters of ventilatory and gas exchange dynamics during exercise
p0285 A82-36031

Bohr effect and slope of the oxygen dissociation curve after physical training
p0285 A82-36032

Superficial shell insulation in resting and exercising men in cold water

p0285 A82-36034

Exercise performance after ventilatory work
p0286 A82-36037

Effects of glycogen depletion and pedaling speed on 'anaerobic threshold'
p0286 A82-36038

Attenuation of blood pressure increases in Dahl salt-sensitive rats by exercise
p0286 A82-36039

Effect of habitual exercise on left ventricular response to exercise
p0286 A82-36040

Fibrinopeptide A after strenuous physical exercise at high altitude
p0290 A82-37926

Muscle weakness following dynamic exercise in humans
p0290 A82-37929

Diagnostics of disturbances of heart rhythm and conductance and their professional evaluation in flight personnel
p0319 A82-40309

The changes in the concentration of free amino acids in muscles during exercise
p0320 A82-40314

The effect of inotropic factors on the postexercise characteristics of the heart
p0322 A82-40451

The significance of the bicycle ergometer test for evaluating the work capacity in patients with hypertension
p0324 A82-40477

Physical activity and human requirements for energy and food substances
p0324 A82-40487

X-ray study of loaded skeletal portions in the upper extremities of athletes engaging in karate
p0325 A82-40490

Cardiovascular responses to isometric exercise during simulated zero gravity
p0327 A82-40662

Effect of athletic training on physical fitness under hypodynamics
p0327 A82-40663

Effect of physical training in cool and hot environments on +Gz acceleration tolerance in women
p0327 A82-40664

Aspects of cardiovascular adaptation to gravitational stresses
p0329 A82-40687

Orthostatic tolerance and exercise response before and after 7 days simulated weightlessness
p0334 A82-40731

Response of rat body composition to simultaneous exercise and centrifugation at 3.14g
p0338 A82-40766

Neuromuscular adaptation in human thenar muscles following strength training and immobilization
p0340 A82-41213

In vivo and in vitro characteristics of eccrine sweating in patas and rhesus monkeys
p0340 A82-41214

Relationship between muscle QO2 and fatigue during repeated isokinetic contractions --- respiratory capacities
p0340 A82-41216

Effect of induced erythrocythemia on hypoxia tolerance during physical exercise
p0341 A82-41218

Acid-base, metabolic, and ventilatory responses to repeated bouts of exercise
p0341 A82-41219

The amplitude of the R wave and the contractile function of the left ventricle in patients with ischemic heart disease
p0343 A82-41486

Output and efficiency of the heart in young athletes as a function of the type of athletic training
p0344 A82-41497

Circulation and energetics of forearm muscles in man
p0367 A82-42604

Effect of dosed physical loading on plasma and liver lipids and lipoproteins in rats
p0370 A82-43045

Effect of dosed physical loading on biological oxidation and bioenergy in liver and myocardium
p0370 A82-43046

The effect of a physiological load on the exchange and phosphorylation of cell membrane proteins in the brain of rats
p0374 A82-43654

Effects of beta-adrenergic receptor blockade on glycogenolysis during exercise
p0374 A82-44133

Hemodynamic response to converting enzyme inhibition at rest and exercise in humans
p0375 A82-44135

Effect of exercise conditioning on coronary resistance
p0375 A82-44139

Modification of training-induced responses by repeated norepinephrine injections in rats
p0375 A82-44142

Regulation of glycogenolysis in human muscle at rest and during exercise
p0376 A82-44144

Effect of heat stress on cutaneous vascular responses to the initiation of exercise
p0376 A82-44146

The results of the exercise test and further outcomes in patients with chronic ischemic heart disease
p0410 A82-46720

Graded physical-exercise loads in the period right after myocardial infarction
p0411 A82-46722

Isoenzymes following exercise in patients with ischemic heart disease
p0411 A82-46723

The dynamics of several electrocardiographic, cardiohemodynamic, and biochemical parameters under the influence of intensive training on the bicycle ergometer in patients with angina pectoris
p0411 A82-46724

Postexercise blood pressure as a predictor of hypertension
p0417 A82-47342

Maximal cardiac function in sedentary normal men and women - Comparison of age-related changes
p0417 A82-47376

Plasma prostaglandins, renin, and catecholamines at rest and during exercise in hypertensive humans
p0418 A82-47382

Effect of ventilatory drive on the perceived magnitude of added loads to breathing
p0418 A82-47383

A model of the regulation of the blood glucose level during physical exercise
p0419 A82-48201

The effects of cold- and exercise-induced alterations in skin and core temperature on substrate mobilization and utilization
p0011 N82-10719

Airway gas mixing during rest and bicycle exercise
p0013 N82-11768

Effects of curative treatment emphasizing endurance training on the performance and blood pressure of hypertensive and normotensives
[NASA-TM-76520] p0013 N82-11771

Cardiovascular responses to isometric exercise in sitting and lying position
p0180 N82-19823

A comparison between acetylene and freon rebreathing for measuring cardiac output during exercise --- in space
p0181 N82-19831

Morphometrical investigations on the reproductive activity of the ovaries in rats subjected to immobilization and to motion activity
[NASA-TM-76831] p0220 N82-21867

Sleep deprivation and exercise tolerance
[AD-A113043] p0294 N82-26963

Sparing effect of chronic high-altitude exposure on muscle glycogen utilization during exercise
[AD-A111063] p0295 N82-26969

An ergometer for concentric and eccentric muscular contraction
[AD-A111061] p0295 N82-26971

Perception of effort during isometric contractions as related to heart rate and blood pressure responses
[AD-A111033] p0296 N82-26974

Physiological studies of heat stress acclimation during a specific exercise regimen
[AD-A111897] p0353 N82-28991

Acclimatization to dry heat: Active men versus active women
[AD-A111708] p0353 N82-28993
Chromatin of rat brain neurons and nucleic acids of muscles as related to localization of decimeter waves during exercise
p0387 N82-30908
Control of muscle activity in unloaded conditions
[NASA-TM-76883] p0390 N82-30927
Cybernetic analysis of cardiac rhythm of Salyut-6 orbital station crew during graded exercise test
p0402 N82-32282
Combined rehabilitation and therapeutic measures in space medicine
p0402 N82-32283
Prolonged self-paced hard physical exercise comparing trained and untrained men
[AD-A116608] p0431 N82-34006
Effects of prior physical exertion on tolerance to hypoxia, orthostatic stress, and physical fatigue
[AD-A114741] p0432 N82-34009
Ventilatory responses to exercise while eliciting the relaxation response
[AD-A115102] p0433 N82-34015

PHYSICAL FACTORS
The effect of the circadian rhythm of physiological functions on the mental work capacity of operators
p0203 A82-27769
Daily rhythms of physiological functions during shift work
p0203 A82-27771
An analysis of the role of genetic and environmental factors in predicting the effectiveness of arterial hypertension treatments
p0410 A82-46719
Fatigue in Flight Inspection Field Office (FIFO) flight crews
[AD-A106791] p0127 N82-16733
Sustained blood pressure responding during synthetic work
[AD-A115733] p0424 N82-32974

PHYSICAL FITNESS
Plasma norepinephrine response to exercise before and after training in humans
p0005 A82-11152
Endurance training in the rat. II - Performance of isolated and intact heart
p0006 A82-11156
Effect of physical fitness and training on physiological responses to hypogravity
p0057 A82-16933
EEG description algorithm for use in clinical practice and studies of work capacity
p0092 A82-20304
The effect of two years' training of aerobic power and muscle strength in male and female cadets
p0107 A82-21678
Physical health of truck drivers in the open-pit mining industry of the far north
p0117 A82-21805
Stress and immunity in athletes
p0118 A82-21821
The role of sleep in the adaptation system and in the prognosis of psychological readiness of athletes in competition
p0154 A82-23279
Quantitative criteria for evaluating the candidates granted admission and the effectiveness of athletic training among students in institutes of physical culture
p0158 A82-24483
A model of the dynamics of athlete condition during the yearly cycle and its role in the management of training
p0204 A82-27780
The determination of overall physical endurance in athletes
p0204 A82-27781
Time course of ultrastructural changes in skeletal muscle after two types of exercise
p0229 A82-29560
Effect of aerobic conditioning on cardiovascular response to isometric exercise
p0256 A82-32841
The efficiency of the training of young athletes when vitamins and trace elements are included in their diet
p0263 A82-34693
Investigation of the general fitness of the progeny of irradiated animals. III - The resistance of mice to irradiation, hypoxia, endotoxin, and physical stress
p0278 A82-35652
Characteristics of hemapoiesis in athletes undergoing endurance-training
p0279 A82-35670
Effect of athletic training on physical fitness under hypodynamics
p0327 A82-40663
Problems in the metrology of the training load of ski racers
p0344 A82-41502
The speed of blood flow in athletes subjected to the combined action of a training regime and high-altitude climatic factors
p0344 A82-41505
Levels of physiological reserves of sailors working a 10-hour shift
p0368 A82-42618
Comparative antihypoxic efficacy of pressure chamber conditioning and fasting of man
p0127 N82-16729
Physical performance tasks required of U. S. Marines operating in a desert environment
[AD-A107866] p0136 N82-17863
Statistical tools for determining fitness to fly
[AD-A108599] p0175 N82-18860
The efficiency coefficient of the rat heart and muscular system after physical training and hypokinesia
[NASA-TM-76843] p0245 N82-22868
Medical research of naval personnel
[RNP-3/81] p0249 N82-23977
Cardio-respiratory physical training in water and on land
[AD-A111064] p0295 N82-26968
Sparing effect of chronic high-altitude exposure on muscle glycogen utilization during exercise
[AD-A111063] p0295 N82-26969
Task analysis and the ability requirements of tasks: Collected papers
[AD-A111181] p0354 N82-29000
The spine and fitness for flight
p0361 N82-29889
Ankylosing spondylitis
p0361 N82-29891

PHYSICAL WORK
Changes in Hageman factor system indicators during human adaptation to intense physical loading
p0054 A82-16816
The functional state of some subcortical cerebral structures during adaptation and deadaptation to physical loading
p0055 A82-16823
Evaluation of maximal and submaximal static muscle exertions
p0088 A82-19223
The economy of muscular work during unfused tetanus
p0109 A82-21701
The application of bicycle ergometry to the early detection of ischemic heart disease
p0115 A82-21775
Evaluation of the functional state of the cardiovascular system in patients with ischemic heart disease with reference to the nature of their occupational activity
p0117 A82-21803
The effects of left hand fatigue on right hand performance
p0147 A82-22970
The physiological condition of press operators
p0154 A82-23285
The work capacity of seamen under an altered schedule of work and rest
p0155 A82-23302
Regulation of blood supply in the extremities during exercise in women
p0158 A82-24479
Additional criteria of cerebral hemodynamic disorders limiting physical loads in patients with hypertension
p0159 A82-24495
Oxygen supply of the muscle tissue in patients with chronic ischemic heart disease during graded physical loads
p0159 A82-24496

The functional state of the segmental apparatus of the spinal cord in humans during local work after a short period of rest
p0160 A82-24501
Cumulative fatigue over long periods caused by localized muscular movements
p0160 A82-24502
Certain neurohormonal and blood-coagulation changes in the case of early symptoms of vibration-related pathology in miners
p0160 A82-24504
Working conditions and health of female workers in the sawmill sections of the wood-working industry
p0160 A82-24508
Physiological and hygienic evaluation of the work of female tower crane operators
p0160 A82-24512
The regulation of body temperature during physical work
p0166 A82-24836
Vestibular dysfunctions in caisson workers subjected to a combination of occupational hazards
p0187 A82-25689
Computer analysis of tests involving physical stress --- in cardiology
p0190 A82-25807
Development of the hypothesis of the system quantization of behavior with reference to human work activity --- monotonous conveyor-belt task
p0205 A82-27798
Method for improving the reliability of the recognition and classification of worker physiological condition in problems of work physiology
p0236 A82-31156
The energy requirements of railway-bridge assemblers
p0240 A82-31515
The effect of certain characteristics of work motions on the tolerance of hand muscles to static exertions
p0311 A82-38568
The conditions attending muscular strain in work involving only a few types of movements
p0311 A82-38569
Energy requirements of workers at an oil field in western Siberia
p0324 A82-40481
Diurnal dynamics of the indicators of the capacity for physical work and of physiological functions
p0342 A82-41460
The tolerance to physical loads in women during menopause complicated by climacteric neurosis with cardialgia
p0344 A82-41495
A physiological justification of allowable noise levels in work involving heavy physical labor under nervous stress
p0368 A82-42617
Physiological mechanisms determining the mechanical work of breathing for different types of muscular activity
p0371 A82-43237
Evaluation of the heaviness of physical work with marked nervous-emotional stress
p0372 A82-43240
A composite assessment of heart rhythm regulation during dosed functional loads
p0373 A82-43637
The role of the extrapolation and dynamic stereotype in the mechanism of the formation and improvement of adequate motor coordination
p0374 A82-43651
The morphological characteristics of the terminal respiratory bronchioles and the arteries accompanying them during individually graded muscular activity
p0420 A82-48220
Fatigue in Flight Inspection Field Office (FIFO) flight crews
[AD-A106791] p0127 N82-16733
Slow waves of cardiac rhythm in healthy man under different conditions
p0348 N82-20955
Sustained blood pressure responding during synthetic work
[AD-A115733] p0424 N82-32974

PHYSICIANS
Medical emergencies on board an airliner - Procedures when a doctor is on board
p0315 A82-38844
Support role of aviation physicians
p0265 N82-24809

PHYSICS
Physics and biology --- developments in biophysics
p0194 A82-26550

PHYSIOCHEMISTRY
Trends in space life support
p0059 A82-16953
Is transmission between the vestibular type I hair cell and its primary afferent chemical
p0065 A82-17444
A study of tropomyosins in human muscular and nonmuscular organs
p0117 A82-21806
Biological methods for predicting the effectiveness of psychopharmacotherapy applied to patients with schizophrenia /Review/
p0155 A82-23297
The possible role of hydrogen bonds in the mechanism of muscular contraction
p0200 A82-27734
A factor of resistance to emotional stress in the brain of rats
p0322 A82-40452
The anti-stress role of the gamma-aminobutyric acid system of the brain
p0323 A82-40468
Increasing the efficiency of running on the basis of learning algorithms and information tools
p0324 A82-40488
Biochemical aspects of the mechanism by which cholinolyptics affect the brain
p0342 A82-41468
The use of biochemical monitoring methods in the ergometry of patients with atherosclerosis
p0344 A82-41494
Current problems in hypobiosis
p0366 A82-42171
An analysis of the role of endogenous opioid peptides in experimental hypertension
p0373 A82-43629
The age-related changes of biochemical and biomechanical parameters of human sclera in normal and myopic individuals
p0410 A82-46713
The dynamics of several electrocardiographic, cardiohemodynamic, and biochemical parameters under the influence of intensive training on the bicycle ergometer in patients with angina pectoris
p0411 A82-46724
The superoxide radical and superoxide dismutase in the free radical theory of ageing /Review/
p0412 A82-46876
The activity of the microsomal hydroxylases according to age in healthy individuals
p0413 A82-46878
The metabolic mechanisms of several types of muscle atrophy during muscle inactivity
p0413 A82-46879
The possible mechanisms of lipid peroxidation in rat liver during the recovery period after mechanical asphyxia
p0413 A82-46883
The effect of myocardial ischemia on the phospholipid content of heart tissue and mitochondria
p0413 A82-46884
A technique for long-term measurements of thyroid function in beagle dogs using iodine 125
[FOA-A-59003-H3] p0393 N82-31890

PHYSIOLOGICAL ACCELERATION
Proceedings of a Meeting of the IUPS Commission on Gravitational Physiology --- Book
p0326 A82-40649
Study of high-g effects in animals
p0326 A82-40651
The effect of G sub z acceleration on pulmonary perfusion in the miniature swine
p0329 A82-40681
International Union of Physiological Sciences, Annual Meeting, 2nd, Budapest, Hungary, July 13-19, 1980, Proceedings
p0329 A82-40686
Physiological mechanisms of adaptation of rat skeletal muscles to weightlessness and similar functional requirements
p0330 A82-40689

Artificial gravity in space flight p0330 A82-40691
Variability of physiological properties of rat skeletal muscles at different gravity levels p0331 A82-40702
Morphometric analysis of rat muscle fibers following space flight and hypogravity p0331 A82-40703
Gravitational adaptation of animals p0333 A82-40716
Restraint of animals in space research p0336 A82-40748
Effect of sustained Gz acceleration on lung fluid balance - An ultrastructural study p0337 A82-40761
The dynamics of certain psychophysiological indicators under the cumulative effect of Coriolis accelerations p0370 A82-42995

PHYSIOLOGICAL DEFENSES
The effect of the motor activity regime on the development, conservation, and regeneration of defensive conditioned reflexes in rats p0092 A82-20305
Natural resistance of the organisms of seamen during postcruise rest p0093 A82-20311
The influence of adaptation on the periodic effect of hypoxia on the poststress activation of the primary immune response p0093 A82-20320
The effects of successive ionizing radiation and heat on antibody formation p0113 A82-21751
The effect of piracetam on the body's resistance to hypoxia p0115 A82-21777
The mathematics of immunity --- response to viral intrusion p0119 A82-21824
Indicators of the T system of immunity during physical overstraining p0154 A82-23281
Methodological aspects of studying the immune system in athletes p0158 A82-24481
Vitamins and natural immunity p0159 A82-24490
Experimental and clinical study of a new immunoregulatory preparation - thymalin p0307 A82-38177
The role of central gray matter in the activation of antipain systems of the rat's brain under stress p0309 A82-38547
The participation of the lymphatic system in the resistance of an organism to hypoxia p0319 A82-39793
Factors of the natural resistance of the body and methods for studying them p0319 A82-40308
A factor of resistance to emotional stress in the brain of rats p0322 A82-40452
Dynamics of a stabilized motor defensive conditioned reflex for different levels of motivation in irradiated rats p0323 A82-40464
Weightlessness effects on resistance and reactivity of animals p0330 A82-40690
Effect of spaceflight on lymphocyte stimulation p0331 A82-40700
Aspects of the body's defence mechanisms as protection against biological agents --- used in biological warfare [DRIC-T-6433] p0223 N82-21886
USSR report: Life sciences. Effects of nonionizing electromagnetic radiation, no. 6 [JPRS-81300] p0386 N82-30899

PHYSIOLOGICAL EFFECTS
NT HEMODYNAMIC RESPONSES
NT PHYSIOLOGICAL RESPONSES
Visual fatigue and cathode ray tube display terminals p0017 A82-12870
Effects of visual display units on the eyes - A bibliography /1972-1980/ p0017 A82-12873
The sensitivity of the retinal nerve fibre layer to elevated intraocular pressure and graded hypoxia in the cat p0025 A82-15475
Harmful effects of temperature under conditions of elevated pressure in a helium-oxygen environment p0027 A82-15706
The classification of hypoxic conditions p0027 A82-15708
Well-being and privacy in space - Anticipating conflicts of interest p0030 A82-15854
Concerning the rationalization of the work and rest schedule of cosmonauts p0052 A82-16724
The response of the hematic system of adrenalectomized mice to stressor activity p0054 A82-16814
Prevention of hypoxic heart damage by the use of oxypyridine-class antioxidants p0055 A82-16821
Effects of disuse by limb immobilization on different muscle fiber types p0055 A82-16830
Reissner's membrane and the spiral ligament in normal rats and those treated with ethacrynic acid p0055 A82-16833
Summary of medical investigations in the U.S.S.R. manned space missions p0056 A82-16928
U.S. biological experiments in space p0056 A82-16930
Current views and future programs in cardiovascular physiology in space p0056 A82-16931
Effect of physical fitness and training on physiological responses to hypogravity p0057 A82-16933
Hematological and immunological changes during space flight p0057 A82-16937
Effects of the diet on brain function p0058 A82-16942
Bone effects of space flight - Analysis by quantum concept of bone remodelling p0059 A82-16947
Characteristics of loading hypoxia p0060 A82-16968
The state of the air-blood barrier in hyperoxia p0060 A82-16970
Some characteristics of thermal adaptation in small laboratory animals p0060 A82-16971
Experimental biology and medicine in space p0060 A82-17123
Neuronal interaction between ipsilateral medial and lateral vestibular nuclei p0064 A82-17436

Evidence for the involvement of central alpha2 mechanisms in intrathoracic volume expansion-induced diuresis - A study with clonidine and propranolol
p0210 A82-28481

The interaction of actin with phosphorylase kinase
p0228 A82-29434

Regional redistribution of blood flow in the cat under conditions of high ambient temperature
p0231 A82-29697

Study of the simultaneous effects of hormones and radioprotectors in the exposure of animals to ionizing radiation
p0234 A82-30032

For a prolonged stay in space
p0234 A82-30298

Under the hot sun --- human heat acclimatization in deserts
p0234 A82-30303

Circadian rhythm dynamics under conditions of an altered gaseous medium and hypokinesia
p0235 A82-31151

Effects of geomagnetic field disturbances on the diurnal rhythm of physiological functions
p0235 A82-31152

The relation between cardiac and respiratory rhythms as a function of the state of the geomagnetic field
p0236 A82-31153

The ventilation-perfusion relation in residents of the Arctic coast of the north-east USSR
p0236 A82-31154

Effects of starvation on human tolerance to acute hypoxia
p0236 A82-31159

Cardiac rhythm regulation at rest and during orthostasis
p0236 A82-31160

The voluntary regulation of heart rate
p0236 A82-31161

Changes in psychophysiological functions of flight personnel under various regimes of active rest
p0238 A82-31498

Clinical features of the effect of factory noise as a function of its type and spectral characteristics
p0240 A82-31519

Preventing disturbances to the structure of DNA in the cardiac muscle from emotional-nociceptive stress by blocking beta-adrenoreceptors and the peroxidation of lipids
p0241 A82-31528

Experimental model with a supplementary source of endogenous serotonin
p0241 A82-31534

Eight-hour rhythm of autonomic regulation
p0242 A82-31542

Acceleration-induced atrioventricular dissociation - Hemodynamic consequences
p0251 A82-32002

Human tracking performance changes during combined +Gz and + or - Gy stress
p0251 A82-32003

The pathophysiology, presentation, and triage of altitude-related decompression sickness associated with hypobaric chamber operation
p0253 A82-32012

Effect of limb immobilization on skeletal muscle
p0255 A82-32826

Effect of training on beta-adrenergic receptor number in rat heart
p0255 A82-32828

Mechanical properties of rat lung during prolonged hypercapnia
p0255 A82-32831

Effects of hyperventilation on pulmonary blood flow and recirculation time of humans
p0255 A82-32832

Finger temperature after a finger-cooling test - Influence of air temperature and smoking
p0256 A82-32833

Effects of acute cold exposure on muscle amino acid and protein in rats
p0256 A82-32840

Industrial hygiene and the prophylaxis of occupational diseases in work with lasers --- Russian book
p0258 A82-33394

Mechanoreceptor systems of the organism from the viewpoint of vibrational biomechanics
p0259 A82-33755

Immediate effects of vibration transmitted to the hand
p0260 A82-33756

Effects of vibrating tools on the peripheral vessels and the peripheral nervous system in workers of an iron foundry - Preventive suggestions
p0260 A82-33758

Effects of traumatic shock on cytogenetic processes in the epithelial cells of the cornea and tongue and the bone marrow cells of albino rats
p0262 A82-34676

The effect of repeated sublethal overheating on cytogenetic processes in the epithelium of the cornea and in bone marrow cells in white rats
p0262 A82-34685

Protective effect of a gaseous hypoxic mixture under the combined effect on the organism of radiation and physical stress
p0278 A82-35653

Investigation by means of a fluorescent probe of changes in cellular membranes of fibroblasts of the Chinese hamster under laser and X-ray irradiation
p0278 A82-35660

Early diagnosis of overstrain of the cardiovascular system in athletes engaging in cyclic forms of sport
p0278 A82-35664

The combined effect of medicines
p0279 A82-35665

Variation of the biomechanical characteristics of an 800-m run under the influence of fatigue
p0279 A82-35671

Recent developments in assessing the myocardial dystrophy encountered in athletes as a consequence of chronic physical overexertion
p0280 A82-35680

Investigation of the combined effects of bedrest and mild hypoxia
p0283 A82-35905

Man at extreme altitude
p0284 A82-36026

Mechanical properties of the lungs during acclimatization to altitude
p0284 A82-36027

Effects of horizontal body casting on the baroreceptor reflex control of heart rate
p0285 A82-36033

Evidence for diminished sensitivity of the hamster pulmonary vasculature to hypoxia
p0285 A82-36035

Exercise performance after ventilatory work
p0286 A82-36037

Attenuation of blood pressure increases in Dahl salt-sensitive rats by exercise
p0286 A82-36039

Effect of habitual exercise on left ventricular response to exercise
p0286 A82-36040

The effect of acute hypoxia on the EEG and unit impulse activity of neurons of different brain structures in rats
p0286 A82-36172

Gravity, and metabolic scale effects in mammals
p0286 A82-36319

Fibrinopeptide A after strenuous physical exercise at high altitude
p0290 A82-37926

The effect of helium on gas exchange and tissue respiration
p0307 A82-38165

Causes of high-altitude acute pulmonary edema
p0307 A82-38167

The effect of hypokinesia on the resistance of the heart to hypoxia
p0307 A82-38170

Some characteristics of the diurnal rhythm of physiological functions of sailors in the tropics
p0308 A82-38180

The influence of the GABA-receptor blocker bicuculline on the effects of fenibut and diazepam
p0308 A82-38539

Local cerebral blood flow dynamics during experimental ischemia
p0309 A82-38544

Alterations in heart work rhythm during hyperactivation of the anterior amygdaline nucleus
p0309 A82-38545

Ultrastructural changes in the brains of rats subjected to acute emotional stress
p0310 A82-38558

Achievements and possibilities in the research being carried out to protect workers in the 11th five-year plan from noise and vibration
p0311 A82-38573

Histoenzymological changes in experimental animals exposed to variable noise
p0311 A82-38577
Proof of the existence of Ca/2+/-induced structural changes in stems of myosin-containing filaments of vertebrate skeletal muscles
p0312 A82-38599
Pathomorphological investigation of the mechanism of cochlear damage caused by noise
p0316 A82-39241
Alterations of histochemical organization in the organ of Corti under the influence of chronic noise
p0316 A82-39242
Alterations in the labyrinth receptors after laser irradiation as detected by electron microscopy
p0316 A82-39244
Effect of the Circutone seat on hemodynamic, subjective, and thermal responses to prolonged sitting
p0321 A82-40442
The influence of a constant magnetic field on the epileptogenic foci in the hippocampus of rabbits
p0323 A82-40466
Statistical analysis of neuronal impulse activity in the diencephalon during immobilization-produced emotional stress in rats
p0323 A82-40467
The combined effect of carbon monoxide and total-body vibration on the organism
p0324 A82-40475
The cause of high-altitude acute pulmonary edema
p0325 A82-40478
Low-G simulation in mammalian research
p0326 A82-40654
A new rat model simulating some aspects of space flight
p0326 A82-40655
Effect of postural changes on minute ventilation, functional residual capacity and pulmonary N2 clearance
p0327 A82-40660
Effect of athletic training on physical fitness under hypodynamics
p0327 A82-40663
Effect of physical training in cool and hot environments on +Gz acceleration tolerance in women
p0327 A82-40664
Bone growth and composition in weanling and mature rats exposed to chronic centrifugation
p0328 A82-40669
Influences of horizontal hypokinesia on performance and circadian physiological rhythms in female humans
p0329 A82-40682
Adaptation to weightlessness and its physiological mechanisms - Results of animal experiments aboard biosatellites
p0329 A82-40688
Body composition of rats flown aboard Cosmos-1129
p0330 A82-40695
Studies of specific hepatic enzymes involved in the conversion of carbohydrates to lipids in rats exposed to prolonged spaceflight aboard Cosmos 1129
p0331 A82-40698
Bone resorption and calcium absorption in rats during spaceflight
p0331 A82-40704
Bone growth in the rat mandible during space flight
p0331 A82-40705
Space flight effects upon plasma and tissue lipids in rats
p0333 A82-40722
Changes of periodic protoplasmic movements on the fast clinostat
p0334 A82-40725
Skin temperature and thermal comfort in weightlessness
p0334 A82-40726
Relation between physiological effects of gravitational forces and that of magnetic forces
p0334 A82-40730
The reaction of simulated and true weightlessness on digestive tract of rats
p0334 A82-40733
Evidence for arrested bone formation during spaceflight
p03 A82-40767
Validation of a new method for studying effects of vibration on the primate sp
p03 A82-40768
Chronic acceleration and brain density
p033 A82-40769
Relation between physiological effects of gravitational forces and that of magnetic forces. II
p0338 A82-40771
Altitude-induced changes in plasma thyroxine, 3,5,3 prime-triiodothyronine, and thyrotropin in rats
p0340 A82-41207
Neuromuscular adaptation in human thenar muscles following strength training and immobilization
p0340 A82-41213
The effect of diethylamine analog of ethmozine on the functional condition of myocardium /Clinical and experimental study/
p0343 A82-41488
The effect of leu-enkephalin and thyroxine on the lymphatic and blood microvessels
p0344 A82-41490
Skeletal abnormalities in rats induced by simulated weightlessness
p0345 A82-41548
Experimental study of the combined effect of noise and acetone
p0368 A82-42612
The condition of the cardiovascular system in air traffic controllers according to data acquired at the workplace
p0368 A82-42614
A physiological justification of allowable noise levels in work involving heavy physical labor under nervous stress
p0368 A82-42617
Changes in the lymphoid organs of rats under the effect of acute hypoxia
p0368 A82-42623
Characteristics of pharmacotherapeutic complications in otolaryngology /Review of the literature/
p0369 A82-42628
The influence of afferent visual impulses on the morphological and biochemical parameters of the development of the neurons of the visual, motor, and parietal cerebral cortices
p0369 A82-42636
Analysis of methods for evaluating thermal stress --- effects on human beings
p0370 A82-42994
Microcirculation during acute blood loss and hypoxia
p0370 A82-42997
An analysis of the role of endogenous opioid peptides in experimental hypertension
p0373 A82-43629
The responses of the coronary vessels in dogs to hypothalamic stimulation in acute and chronic experiments
p0373 A82-43634
The effect of drugs altering the exchange of cAMP on the bioelectrogenesis of skeletal muscles
p0374 A82-43653
The effect of a physiological load on the exchange and phosphorylation of cell membrane proteins in the brain of rats
p0374 A82-43654
Changes of the functional condition of the neocortex during direct application of optical radiation
p0374 A82-43655
Vibration and comfort. III - Translational vibration of the feet and back. IV - Application of experimental results
p0374 A82-43674
Effects of beta-adrenergic receptor blockade on glycogenolysis during exercise
p0374 A82-44133
Temperature effects on lung mechanics in air- and liquid-filled rabbit lungs
p0375 A82-44138
Effect of exercise conditioning on coronary resistance
p0375 A82-44139
A critical value for O2 transport in the rat
p0375 A82-44141

Modification of training-induced responses by
  repeated norepinephrine injections in rats
p0375 A82-44142
Hyperoxia inhibits stimulated superoxide release
  by rat alveolar macrophages
p0376 A82-44143
Regulation of glycogenolysis in human muscle at
  rest and during exercise
p0376 A82-44144
Head cooling and heat
p0376 A82-44292
The increase in the endurance for static loads in
  irradiated rats treated with gas hypoxic mixture
  /GHM-10/, an anti-irradiation agent
p0404 A82-45786
Ways to increase the work capacity of persons
  subjected to prolonged sensory overloads
p0409 A82-46696
Isoenzymes following exercise in patients with
  ischemic heart disease
p0411 A82-46723
The content of the luteinizing hormone in the
  hypothalamus depending on the physiological
  condition of rats
p0412 A82-46877
The relationship between the formation of ATP that
  is stimulated by insulin and the effect of
  insulin on the accumulation of creatine in
  cytoplasmic-membrane-enriched particles from rat
  skeletal muscles
p0413 A82-46880
The possible mechanisms of lipid peroxidation in
  rat liver during the recovery period after
  mechanical asphyxia
p0413 A82-46883
The effect of myocardial ischemia on the
  phospholipid content of heart tissue and
  mitochondria
p0413 A82-46884
The protective effect of psychotropic drugs
  diazepam, sodium hydroxybutyrate, and mebicar
  during experimental arrhythmia
p0413 A82-46885
A system of methodological approaches to the
  evaluation and prognostication of the
  hemodynamic effects of hypotensive and
  antianginal compounds
p0413 A82-46889
The effect of humoral factors of the lymph tissues
  on hemopoietic stem cells
p0413 A82-46890
Mathematical modelling of physiological functions
  in space flight
  [IAF PAPER 82-176]  p0414 A82-46974
A French primate study program for physiological
  problems encountered in weightlessness
  [IAF PAPER 82-184]  p0414 A82-46976
Results of studies of pulmonary ventilation in
  cosmonauts during the period of acute adaptation
  to weightlessness
  [IAF PAPER 82-431]  p0415 A82-47061
Effects of various countermeasures against the
  adverse effects of weightlessness on central
  circulation in the healthy man
p0416 A82-47331
Serum and urinary cation changes on acute
  induction to high altitude /3200 and 3771 metres/
p0417 A82-47339
Homogeneous nucleation of gas bubbles in vivo
p0418 A82-47387

PHYSIOLOGICAL RESPONSES

NT HEMODYNAMIC RESPONSES

Evaluation of abnormal exercise electrocardiogram in apparently healthy subjects - Labile repolarization /ST-T/ abnormalities as a cause of false positive responses
p0001 A82-10631

Variations in normal electrocardiographic response to treadmill testing
p0001 A82-10632

Glucocorticoid receptors and metabolic disturbances in the liver and heart during immobilization
p0002 A82-10750

Frequency analysis of EEG in rats during the preconvulsive period of O2 poisoning
p0005 A82-11029

Body fluid and hematologic changes in the toad exposed to 48 h of simulated high altitude
p0005 A82-11151

Factors determining temporal pattern of isobaric supersaturation --- in tissue blood gas transport models of bubble production
p0006 A82-11153

The significance of the respiratory minute volume index in the evaluation of vestibular stability
p0006 A82-11697

The effects of space flight factors on the stress reaction of the nuclear nucleic acids in the rat liver
p0007 A82-12279

The effect of adrenergic substances on cardiac activity and brain electrical activity in the rabbit under hypoxia
p0007 A82-12299

Changes in the heat resistance of rats under various regimes of cold adaptation
p0018 A82-12952

Effect of exhaustive exercise on myocardial performance
p0018 A82-13228

Effects of rib cage or abdominal restriction on lung mechanics
p0018 A82-13229

Steady-state vascular responses to graded hypoxia in isolated lungs of five species
p0018 A82-13231

Pulmonary injury in rats following continuous exposure to 60% O2 for 7 days
p0019 A82-13232

ACTH and cortisol responses to hypoxia in dogs
p0019 A82-13235

Artificial hypobiosis as a stable functional state of reduced vital activity
p0020 A82-13699

Diurnal variation in vigilance efficiency
p0022 A82-14275

Cardiovascular responses to mixed static and dynamic exercise
p0022 A82-14803

The physiological response of anthropometrically selected female military personnel to the test parachuting environment
p0023 A82-14957

The self-stimulation response in cats in a nitrogen-oxygen medium under elevated pressure
p0024 A82-15351

Nucleic acid and protein concentrations in rat raphe nuclei neurons and gliocytes during complete sleep deprivation in the cylindrical tretbahn
p0024 A82-15352

DNA and RNA synthesis in the isolated nuclei of rat skeletal muscle fibers during hypokinesia
p0024 A82-15353

Performance changes during exposure to +Gz stress
p0025 A82-15517

EEG-correlates of training in the voluntary control of heart rate in man
p0026 A82-15703

Dynamics of plant physiological activity during a light interruption of the dark period of the day
p0027 A82-15705

The oxygen regime of the human organism under conditions of extreme hypobaric hypoxia
p0027 A82-15709

The nature of induced EEG activity in the alpha-rhythm range
p0028 A82-15713

Mechanisms of temporal discrimination in the visual analyzer
p0028 A82-15714

Functional characteristics of the pilot hypothalamus-hypophysis-adrenal cortex system
p0049 A82-16275

The reorganization of EEG structure during adaptation to the Antarctic
p0053 A82-16810

Investigation of physiological compensation processes following the surgical destruction of the labyrinth
p0053 A82-16811

Damage and repair of heart muscle DNA during emotional-pain stress
p0055 A82-16822

An overview of the endocrine and metabolic changes in manned space flight
p0057 A82-16935

The effects of operator activity on the diurnal rhythm of physiological functions
p0061 A82-17142

Vestibular and oculomotor physiology; Proceedings of the International Meeting, New York, NY, September 22-25, 1980
p0063 A82-17426

Directional sensitivity of individual vertebrate hair cells to controlled deflection of their hair bundles --- in frog vestibules
p0063 A82-17427

Phasic components of frog semicircular canal
p0063 A82-17430

Physiological mechanisms of the nystagmus produced by rotations about an earth-horizontal axis
p0213 A82-17431

Effects of gravity on rotatory nystagmus in monkeys
p0213 A82-17432

Dynamic characteristics of the otolithic oculomotor system
p0064 A82-17433

Nonlinear characteristics of single neurons in the vestibular nuclei
p0064 A82-17438

Some thoughts about the three neurons in the vestibular ocular reflex
p0065 A82-17442

Cat medial pontine neurons in vestibular nystagmus
p0065 A82-17443

Vestibular habituation in man and monkey during sinusoidal rotation
p0066 A82-17453

Patterns of vestibular and neck responses and their interaction - A comparison between cat cortical neurons and human psychophysics
p0067 A82-17456

Early directional influence of visual motion cues on postural control in the falling monkey
p0067 A82-17459

Human vertical fusional response under open and closed loop stimulation to predictable and unpredictable disparity presentations
p0071 A82-17571

Effects of vasopressin administration on diuresis of water immersion in normal humans
p0088 A82-19491

Orthostatic fluid-electrolyte and endocrine responses in fainters and nonfainters
p0088 A82-19492

Variability of oxygen affinity of blood - Human subjects native to high altutude
p0088 A82-19493

Alterations in responses to drugs of atria from white rats acclimated to hypobaric hypoxia
p0089 A82-19497

Vestibular responses of neurons in the feline anterior suprasylvian gyrus and their interaction with responses to acoustic and facial stimuli
p0092 A82-20309

Special and clinical physiology of hypoxic states
p0093 A82-20317

Contractile dysfunction of vascular wall smooth muscle under emotional nociceptive stress
p0094 A82-20322

The significance of airflow resistance to changes in responses to increasing hypercapnia
p0094 A82-20327

Parameters of the interaction of bradykinin with cardiovascular system receptors
p0095 A82-20332

Functional condition of the rat sympato-adrenal system during emotional and nociceptive stress
p0095 A82-20335

Regional distribution of cardiac output in unanesthetized baboons during +Gz stress with and without an anti-G suit
p0108 A82-21681

Acceleration induced voltage variations in the electrocardiogram during exhaustive simulated aerial combat maneuvering
p0108 A82-21683

Adaptation to high-altitude hypoxia at different ambient temperatures /before and during adaptation/
p0110 A82-21715

Metabolic change in test animals as an indicator of the biological effect of an electromagnetic field having a frequency of 50 Hz
p0114 A82-21758

The morphology of the lungs of dogs whose movement is completely restricted
p0114 A82-21765

Features of the reaction to noise of the spinal capillaries of white rats
p0114 A82-21767

Lysosomes under conditions of stress
p0114 A82-21770

Adaptogenic effect of mebicar during emotional stress, exercise, and hypoxia
p0115 A82-21780

The effect of cholinomimetics on the development of hypothermia
p0115 A82-21781

The effects of emotional activation on the spatial synchronization of human brain biopotentials
p0116 A82-21785

Coordination of processes in the hierarchic structure of the visual analyzer
p0116 A82-21788

Types of spontaneous discharges in muscle receptors
p0116 A82-21789

Acute experimental emotional stress in rabbits /physiological and cytochemical aspects/
p0119 A82-21825

Comparative study of several physiological parameters in the evaluation of functional condition in nurses
p0119 A82-21826

Erythrocyte indices during a competitive marathon
p0120 A82-21932

Enzymatic capacities of skeletal muscle - Effects of different types of training
p0121 A82-22248

In vitro Ca-45/++/ uptake and exchange by otoconial complexes in high and low K/+/Na/+/ fluids
p0121 A82-22249

Perception and performance in the heat
p0143 A82-22940

Changes in the activity of monoaminergic systems of the brain under conditions of adaptation to high altitude
p0149 A82-23144

Phase characteristics of the response of the hypophyseal-adrenal system under high-altitude conditions
p0150 A82-23166

The effects of cutting or of stretching skeletal muscle in vitro on the rates of protein synthesis and degradation
p0150 A82-23244

Phase phenomena in the vestibular analyzer - Vestibular recruitment
p0151 A82-23256

The use of correlation analysis for the detection of signs of changes in the physiological condition of workers exposed to vibration
p0160 A82-24509

Morphofunctional changes in the rabbit myocardium during chronic solar thermal overheating
p0161 A82-24516

Chronobiological aspects in the science of health resorts and physiotherapy
p0162 A82-24536

Individual variability in reaction norms and population adaptation --- tadpole growth in various environments
p0162 A82-24537

The effects of noise on the physiological condition of blood leucocytes
p0163 A82-24544

Morphometric analysis of ultrastructural changes in the skeletal muscles during physical exercise in acute and chronic experiments
p0163 A82-24549

A mechanism for the stimulation of the immune response under the influence of high ambient temperature
p0164 A82-24557

The biological significance of physiological hypoxemia
p0164 A82-24558

Autonomous biotechnological means for the continuous monitoring and correction of physiological systems
p0165 A82-24834

Man in weightlessness - Physiological problems, clinical aspects, prevention and protection
p0167 A82-24846

Objective sensometrics on the basis of the alpha-rhythm block reaction
p0168 A82-24907

Ventilatory responses at rest and during exercise in marathon runners
p0169 A82-24919

Current questions in the problem of flight crew fatigue
p0170 A82-25188

Systemic mechanisms of emotional stress --- Russian book
p0170 A82-25231

Corrective saccades - Effect of shifting the saccade goal
p0185 A82-25647

Intraretinal recordings of slow electrical responses to steady illumination in monkey - Isolation of receptor responses and the origin of the light peak
p0185 A82-25649

The influence of the seasonal factor and the intensity of work on the basic physiological functions of agricultural workers
p0186 A82-25685

A bicycle-ergometer evaluation of the physical adjustment made by patients after an inner mitral commissurotomy
p0187 A82-25690

Clinical and epidemiologic analysis of ischemic EKG responses to physical exercise in males
p0188 A82-25707

The significance of chemoreceptor stimuli for the rate of switch-on and switch-off of the respiratory response to physical exercise
p0188 A82-25713

Reflexometry as an additional method of investigating hypoactivity in the thyroid gland
p0190 A82-25802

The permeability of the lymphatic vessels of the muscles of the upper extremities in vibration sickness
p0190 A82-25804

Physiological, biochemical, and performance responses to a 24-hour crash diet
p0192 A82-26229

The diving response in clinical medicine
p0194 A82-26241

The physiology and hygiene of the individual protection of man from the cold --- Russian book
p0194 A82-26522

Some physiological mechanisms for the effects of the hypothalamus on erythron
p0196 A82-26753

Effect of breathing patterns on the perceived magnitude of added loads to breathing
p0197 A82-26813

Ventilatory adaptations to resistive loading during wakefulness and non-REM sleep
p0197 A82-26814

Arterial CO2 response to low levels of inspired CO2 in awake beagle dogs
p0197 A82-26815

General characteristics of the development of the body's reaction to external stimuli
p0201 A82-27747

Phosphorylating oxidation during changes in physiological condition
p0202 A82-27762

Trace reactions and the ambient temperature --- organism, organ and tissue thermoregulatory reactions
p0209 A82-28454

Some mechanisms of central inhibition
p0209 A82-28456

The contribution of V. N. Chernigovskii to the development of diving physiology and medicine
p0210 A82-28457

Ventilation and acid-base equilibrium for upper body and lower body exercise
p0210 A82-28482

The medical and public health challenge of space
p0228 A82-29266

Respiratory muscle fatigue after marathon running
p0229 A82-29552

Acclimatization to dry heat - Active men vs. active women
p0229 A82-29553

Effect of acid-base status on the kinetics of the ventilatory response to moderate exercise
p0230 A82-29564

Body fluid and hematologic adjustments during resting cold acclimation in rhesus monkey
p0230 A82-29565

Adjustments in metabolic heat production by squirrel monkeys exposed to microwaves
p0230 A82-29569

Relation of changes in autonomic reactions to the effectiveness of mental activity under conditions of emotional stress
p0236 A82-31158

An approach to the determination of the reflex reactions of cardiac rhythm
p0237 A82-31162

Reflection of individual characteristics of human and animal higher nervous activity in the nature of heart rate changes
p0238 A82-31486

Nutrition and athletics
p0238 A82-31502

The biological and therapeutic effect of microwaves
p0239 A82-31506

The state of vegetative functions with hypertension under the action of decimetric waves on the region of the brain /Experimental study/
p0239 A82-31508

Dynamics of changes in animal body mass and skeletal musculature under conditions of hypokinesia
p0241 A82-31533

Electrophysiological studies of the auditory-receptor function in the case of the combined injection of kanamycin and lasix
p0242 A82-31537

Investigation of the sensitivity of the vestibular apparatus to galvanic-current stimulation
p0242 A82-31541

Functional-morphological characteristics of microvessels of the rat liver under hypokinesia
p0242 A82-31545

Women at altitude - Cardiovascular responses to hypoxia
p0252 A82-32009

Sex differences in cardiac responses to successive apnea periods
p0252 A82-32011

Central and peripheral inputs in sweating regulation during thermal transients
p0255 A82-32830

Acute hypervolemia, cardiac performance, and aerobic power during exercise
p0256 A82-32836

Dynamics of cardiac, respiratory, and metabolic function in men in response to step work load
p0256 A82-32837

Increases in plasma beta-endorphin/beta-lipotropin immunoreactivity after treadmill running in humans
p0256 A82-32839

Effect of aerobic conditioning on cardiovascular response to isometric exercise
p0256 A82-32841

Modern problems of vibrations in the systems 'man-machine-environment'
p0259 A82-33752

Dynamic modeling and vibratory response of human subjects in heave mode
p0260 A82-33761

Vibration defence of man - Questions of modeling
p0260 A82-33764

Rare cases of serious disturbances in cardiac rhythm during a hypoxic functional test
p0280 A82-35684

Classification of vestibular disorders as a function of the phase of the disease and the degree of vestibular compensation
p0280 A82-35691

Physiological adaptations and maintenance of vegetative homeostasis
p0281 A82-35826

Human adaptation in arid regions
p0281 A82-35828

Stages of the adaptation of human lungs in conditions of the Far North
p0282 A82-35829

The bioenergetics of erythrocytes in inhabitants of the North
p0282 A82-35831

Evaluation of the functional state existing in the adaptation to high-altitude conditions
p0282 A82-35836

Seasonal variations of human cardiorespiratory indices in the North
p0282 A82-35838

Dependence of reactions of the organism to extremal factors on initial state
p0282 A82-35839

Rate of change of physiological functions as an index of the degree of adaptation
p0283 A82-35840

Postural stability during slow-onset and rapid-onset hypoxia
p0283 A82-35906

A procedure for the analysis of nystagmus and other eye movements
p0284 A82-35911

Splanchnic vasoconstriction in heat-stressed men - Role of renin-angiotensin system
p0285 A82-36028

Parameters of ventilatory and gas exchange dynamics during exercise
p0285 A82-36031

Physiological monitoring and the concept of adaptive systems
p0288 A82-36963

Electrophysiological measurement techniques
p0288 A82-36964

Brain extracellular fluid pH and blood flow during isocapnic and hypocapnic hypoxia
p0290 A82-37930

Early reaction of the hemopoietic organs depending on the condition of the peripheral N-cholinergic systems
p0307 A82-38168

Physiological and hygienic analysis of the response of young truck drivers to their work load
p0311 A82-38567

Field sensitivity of the 'red' mechanism derived from primate local electroretinogram
p0318 A82-39431

Approaches to the study of the hypothalamus-pituitary gland relationship
p0319 A82-39569

The physiological mechanisms of the arousal response in animals under conditions of hypobiosis
p0320 A82-40311

The changes in the concentration of free amino acids in muscles during exercise
p0320 A82-40314

Antimotion-sickness efficacy of scopolamine 12 and 72 hours after transdermal administration
p0320 A82-40437

Task categorization and the limits of human performance in extreme heat
p0321 A82-40439

Thermoregulation and the menstrual cycle
p0321 A82-40441

The effect of hyperactivation of the anterior amygdaloid nucleus on heart activity during states of altered reactivity
p0322 A82-40454

Characteristics of human auditory evoked potentials during the lateralization of a 'moving' auditory image
p0323 A82-40465

The anti-stress role of the gamma-aminobutyric acid system of the brain
p0323 A82-40468

The effect of the electrical stimulation of afferent pathways on neurons in septal slices
p0323 A82-40469

Participation of the prefrontal cortex in delayed spatial choice and differentiation of time intervals in rhesus monkeys
p0323 A82-40470

Age changes in the cerebral cortex of humans and cats /A comparative electron-microscopical investigation/
p0325 A82-40496

The early reaction of the hemopoietic organs to stress, depending on the condition of the peripheral H-cholinergic systems
p0325 A82-40499

The effect of products erythrocyte destruction on immunological processes
p0325 A82-40500

Computer simulations of postural change, water immersion and bedrest - An integrative approach for understanding the spaceflight response
p0327 A82-40659

Receptors signaling gravity orientation in an insect
p0328 A82-40668

Effects of high-G on ventilation/perfusion in the domestic fowl
p0328 A82-40672

A new rat model for studies of hypokinesia and antiorthostasis
p0331 A82-40706

Effect of immobilization of the excitatory parameters of different type skeletal muscle
p0332 A82-40710

Alterations in heat loss and heat production mechanisms in rat exposed to hypergravic fields
p0333 A82-40718

Autonomic reactions in labyrinthectomized rabbits during centrifuge acceleration
p0333 A82-40720

International Union of Physiological Sciences, Annual Meeting, 3rd, Innsbruck, Austria, September 29-October 2, 1981, Proceedings
p0335 A82-40734

Analysis of transient cardiovascular response to orthostatic stress using noninvasive methods
p0335 A82-40740

Suspension restraint - Induced hypokinesia and antiorthostasis as a simulation of weightlessness
p0336 A82-40744

Results of investigations of weightlessness effects during prolonged manned space flights onboard Salyut-6
p0336 A82-40750

Mechanisms of the effects of weightlessness on the motor system of man
p0336 A82-40752

Cardiac and cerebral vascular adaptation to gravitational stresses in man
p0337 A82-40765

Response of rat body composition to simultaneous exercise and centrifugation at 3.14g
p0338 A82-40766

Temperature and behavioral responses of squirrel monkeys to 2Gz acceleration
p0338 A82-40774

Ventilatory and heart rate responses to hypoxia and hypercapnia during sleep in adults
p0339 A82-41206

Application of laser therapy to patients with osteoarthrosis deformans
p0343 A82-41475

Immunological reactions to lipoproteins and heparin in young men with a hereditary tendency to atherosclerosis
p0343 A82-41487

The use of biochemical monitoring methods in the ergometry of patients with atherosclerosis
p0344 A82-41494

An on-line procedure for the extraction of acoustically evoked potentials from the electroencephalogram --- German thesis
p0365 A82-41688

Subjective response to whole-body vibration - The effects of posture
p0370 A82-42831

Individual features of the vegetative regulation of body functions during the adaptation of sailors in the tropics
p0370 A82-42996

Brain-stem auditory evoked potentials in persons with normal hearing
p0371 A82-43234

Electrocardiographic correlates of emotional stress
p0371 A82-43236

Physiological mechanisms determining the mechanical work of breathing for different types of muscular activity

p0124 N82-16708
Individual differences in dual task performance
[AD-A110768] p0267 N82-24826
Changes in psychometric coefficients and factor structure due to practicing performance tests
[ESA-TT-686] p0426 N82-32983

PSYCHOPHARMACOLOGY
The organ of vision and medicines used in treating psychological disorders /Survey/
p0240 A82-31525
Minor peptides under normal and pathological conditions
p0420 A82-48214

PSYCHOPHYSICS
NT PSYCHOACOUSTICS
Circularvection - Psychophysics and single-unit recordings in the monkey --- vestibular effects of rotation
p0066 A82-17449
Patterns of vestibular and neck responses and their interaction - A comparison between cat cortical neurons and human psychophysics
p0067 A82-17456
Psychophysical evidence for more than two kinds of cone in dichromatic color blindness
p0089 A82-19608
Psychophysical studies of perception and memory --- Russian book
p0167 A82-24901
Problems of the psychic reflection of the properties of the objective world on the sensory-perception level
p0167 A82-24902
Mathematical models of detection and discrimination --- in psychophysics
p0167 A82-24903
Scales of subjective intensities and judgment processes
p0167 A82-24904
Dynamic approach to the analysis of the signal detection process --- in psychophysics
p0168 A82-24905
Selective visual adaptation and the feature model
p0168 A82-24906
Objective sensometrics on the basis of the alpha-rhythm block reaction
p0168 A82-24907
Experience with the application of the method of evoked potentials in psychophysical studies
p0168 A82-24908
Analysis of operator speed by means of neurophysiological methods
p0168 A82-24909
Perceived rate of movement depends on contrast
p0185 A82-25648
Effect of breathing patterns on the perceived magnitude of added loads to breathing
p0197 A82-26813
Psychophysical characteristics of perception and bioelectric activity of the brain during micropolarization of the occipital part of the hemispheres
p0371 A82-43235
A theory of diagnostic interference. 1: Imagination and the psychophysics of evidence
[AD-A115940] p0435 N82-34026

**PSYCHOPHYSIOLOGY**
NT WORKLOADS (PSYCHOPHYSIOLOGY)

Some contributions of touch, pressure and kinesthesis to human spatial orientation and oculomotor control
p0024 A82-15280

The use of a psychophysiological feedback system for purposes of activity optimization
p0050 A82-16706

Psychophysiological correlates of the control activity of the astronaut
p0050 A82-16707

Problems of the control of operator state
p0050 A82-16710

The influence of certain habitation conditions on the physiological functions, work capacity, and dream dynamics of man
p0051 A82-16720

The effect of emotional stress on astronaut activity in a radio-telegraphy system
p0051 A82-16722

Comparative psychophysiological evaluation of the effectiveness of psychic models of body hypo- and hyperponderousness
p0052 A82-16723

The activity of psychic models of hypogravity during 30-day experiments
p0052 A82-16725

Psychophysiological safety control in long-duration space flights
p0052 A82-16726

An investigation of memory during the process of adaptation to mountain conditions
p0061 A82-17138

Characteristics of indicators of cardiac rhythm in the norm and in mental maladjustment
p0062 A82-17144

Visually induced self-motion sensation adapts rapidly to left-right reversal of vision
p0067 A82-17455

Acoustic-induced eye movements
p0069 A82-17473

Psychological testing at high altitudes
p0107 A82-21679

Complex physiological-hygienic characteristics of a new work-rest regime for seamen
p0113 A82-21748

Comparative study of several physiological parameters in the evaluation of functional condition in nurses
p0119 A82-21826

Bivariate response distributions in visual detection and discrimination
p0144 A82-22951

Model of visual detection and discrimination
p0145 A82-22952

Biological rhythm aspects of adaptation mechanisms
p0153 A82-23277

The role of sleep in the adaptation system and in the prognosis of psychological readiness of athletes in competition
p0154 A82-23279

Criteria for a healthy way of life and prerequisites for establishing it
p0161 A82-24521

A device for laboratory investigations of technical-diagnostic activity
p0161 A82-24527

Psychophysiological characteristics of the fatigue state based on activation indicators
p0162 A82-24529

A complex of instruments for psychophysiological studies
p0163 A82-24546

The effects of a flashing light on the spectral composition of brain biopotentials and the biomechanical effectiveness of balancing
p0166 A82-24837

Comments on the theory for the accuracy of rapid motor acts of Schmidt et al
p0187 A82-25691

A psychophysiological analysis of the memory changes undergone by humans in adapting to new climatic and geographic conditions
p0187 A82-25694

Evaluation of certain indices used in experimental and field conditions to detect the effects of noise
p0188 A82-25703

Motion and vision. IV - Isotropic and anisotropic spatial responses
p0207 A82-28115

Reflection of individual characteristics of human and animal higher nervous activity in the nature of heart rate changes
p0230 A82-31486

Changes in psychophysiological functions of flight personnel under various regimes of active rest
p0238 A82-31494

The functional reserves of athletes
p0239 A82-31504

Specialized laboratory for the educational and research activity of students and the psychodiagnostic study of athletes
p0279 A82-35673

Psychophysiological analysis of periodic oscillations of performance quality within the limits of a work cycle
p0282 A82-35833

Fatigue and the adaptive possibilities of the organism during work
p0282 A82-35835

Circadian changes in resting heart rate and body temperature, maximal oxygen consumption and perceived exertion
p0308 A82-38268

The correlations of the central nervous system and thyroid functions in conditions of chronic emotional stress
p0322 A82-40453

An LED system for the formation of visual stimuli
p0323 A82-40471

Psychic stress in athletic activity
p0325 A82-40489

Higher integrative systems of the brain --- Russian book
p0326 A82-40642

Neurochemical mechanisms of learning and memory --- Russian book
p0326 A82-40646

The effects of the direction of attention on the transmission of cutaneous information --- French thesis
p0365 A82-42083

The dynamics of certain psychophysiological indicators under the cumulative effect of Coriolis accelerations
p0370 A82-42995

Threshold models of spatial vision
p0371 A82-43230

Dynamics of the process of the determination of orientation by man
p0371 A82-43231

Electrocardiographic correlates of emotional stress
p0371 A82-43236

Mental hygiene of sailors --- Russian book
p0372 A82-43602

Psychophysiological performance examination onboard the orbital complex Salyut-Soyuz [IAF PAPER 82-171]
p0377 A82-44686

Cerebral hemispheric activity and autonomic nervous function
p0137 N82-17868

Female and male size, strength and performance: A review of current literature [AD-A109270]
p0218 N82-20868

Systemic mechanisms of human subconscious activity
p0391 N82-30938

**PSYCHOSES**
NT SCHIZOPHRENIA

**PSYCHOSOMATICS**

Comparative psychophysiological evaluation of the effectiveness of psychic models of body hypo- and hyperponderousness
p0052 A82-16723

The voluntary regulation of heart rate
p0236 A82-31161

Psychosomatic self-regulation - An effective method for sustaining pilot work capacity during a prolonged flight
p0259 A82-33727

Vegetative reactions to the administration of atropine and propranolol in rats that exhibit different types of behavior
p0323 A82-40463

The influence of psychological and somatic factors on the symptomatics of hypertension
p0344 A82-41492

The tolerance to physical loads in women during menopause complicated by climacteric neurosis with cardialgia
p0344 A82-41495

Analysis of sickness rates --- in West German industry
[PNR-90097] p0247 N82-22082

PSYCHOTHERAPY
Biological methods for predicting the effectiveness of psychopharmacotherapy applied to patients with schizophrenia /Review/
p0155 A82-23297

Psychotherapeutic use of sleep deprivation in treating insomnia produced by psychic soporific dependence
p0242 A82-31543

PSYCHOTROPIC DRUGS
Change in the nature of the psychotropic effect on the emotional reactivity and behavior in stress situations depending on the state of the catecholaminergic systems of the brain
p0112 A82-21739

Changes in the temporal parameters of visual perception under the influence of psychostimulants
p0151 A82-23253

Biological methods for predicting the effectiveness of psychopharmacotherapy applied to patients with schizophrenia /Review/
p0155 A82-23297

The protective effect of psychotropic drugs diazepam, sodium hydroxybutyrate, and mebicar during experimental arrhythmia
p0413 A82-46885

PSYCHROPHILES
Study of the morphological and biological properties of obligate and facultative psychrophylic bacteria found in the Antarctic
p0374 A82-43671

PUBLIC HEALTH
The biological effects of low-level ionizing radiation
p0091 A82-20146

The physical activity of humans as a social and biological problem
p0114 A82-21760

Progress in the study of occupational diseases at the F. F. Erisman Hygiene Research Institute in Moscow
p0160 A82-24505

Characteristics of the functional state of health
p0161 A82-24520

Criteria for a healthy way of life and prerequisites for establishing it
p0161 A82-24521

Experience with the development and practical introduction of operational reference levels for radiation safety
p0191 A82-25817

Use of mathematical modeling for the determination of allowable quantities of chemical fibers in clothing
p0191 A82-25818

The medical and public health challenge of space
p0228 A82-29266

Health advice for aircrew on refugee flights
p0284 A82-35915

Setting hygienic standards to be applied to environmental standards pertaining to the rolling stock of railroads and subway systems
p0311 A82-38578

Carbon/graphite fibers: Environmental exposures and potential health implications
[PB81-229692] p0014 N82-11780

Health effects of carbon monoxide and ozone
[PB82-114265] p0137 N82-17866

Environmental and health aspects of acrylamide: A comprehensive bibliography of published literature
[PB82-110123] p0181 N82-19835

First All-Union Symposium on Problems of Evaluating and Forecasting Man's Functional States in Applied Physiology
p0217 N82-20859

PULMONARY CIRCULATION
Analysis of lung vasomotor responses to alveolar hypoxia and hypercapnia
p0002 A82-10749

Hypoxic vasoconstriction and fluid filtration in pig lungs
p0018 A82-13226

Simulation of human reactions under extreme conditions
p0057 A82-16934

The state of the air-blood barrier in hyperoxia
p0060 A82-16970

Northern pulmonary arterial hypertension
p0061 A82-17143

The effect of blood pressure in the pulmonary artery on gas exchange in functionally heterogeneous lungs
p0112 A82-21738

A comparative evaluation of the hemodynamic effects of large doses of morphine, dipidolor, pentazocine, and phentanyl
p0117 A82-21795

Air embolism - Possible role of surfactant on recompression
p0120 A82-21931

Regulation of Pa/CO2/ and ventilation in humans inspiring low levels of CO2
p0168 A82-24912

Mechanical cardiopulmonary interdependence
p0168 A82-24915

Bradykinin-induced increase in pulmonary vascular permeability in hypoxic sheep
p0169 A82-24918

The significance of the pulmonary gas-exchange response in physical exercise testing for the evaluation of the effectiveness of mitral commissurotomy
p0190 A82-25805

The role of calcium in the activity of the smooth muscles of the pulmonary veins
p0196 A82-26756

Respiratory and inert gas exchange during high-frequency ventilation
p0197 A82-26817

Functional diagrams of flow and volume for the dog's lung
p0230 A82-29567

Mechanism for the change in pulmonary blood volume upon the stimulation of the vagosympathetic trunk
p0231 A82-29698

Effects of hyperventilation on pulmonary blood flow and recirculation time of humans
p0255 A82-32832

Regional changes of pulmonary functions in inhabitants of the North
p0282 A82-35830

Parameters of ventilatory and gas exchange dynamics during exercise
p0285 A82-36031

Intrapulmonary blood flow redistribution during hypoxia increases gas exchange surface area
p0285 A82-36036

The microcirculatory bed of the lungs after an effect exerted on the right vagus nerve
p0325 A82-40497

The effect of G sub z acceleration on pulmonary perfusion in the miniature swine
p0329 A82-40681

Effect of sustained Gz acceleration on lung fluid balance - An ultrastructural study
p0337 A82-40761

The effectiveness of neurohumoral influences on pulmonary circulation
p0367 A82-42607

Hypoxic pulmonary vasoconstriction and the size of hypoxic compartment
p0375 A82-44138

Mathematical modelling of physiological functions in space flight
[IAF PAPER 82-176] p0414 A82-46974

Results of studies of pulmonary ventilation in cosmonauts during the period of acute adaptation to weightlessness
[IAF PAPER 82-431] p0415 A82-47061

Effects of various countermeasures against the adverse effects of weightlessness on central circulation in the healthy man
p0416 A82-47331

Oxygen exposure and extrapulmonary respiratory tract ciliogenesis in adult male rats
p0417 A82-47340

New approaches to quantitating the pulmonary effects on inhaled pollutants
[PB81-222382] p0014 N82-11778

Three-dimensional stress distribution in arteries: Radial compression experiments of arterial wall:

stress concentration in lung near a cylindrical cavity; finite element analysis of pleural surface pressure distribution in dog's lung during electrophrenic stimulation p0032 N82-12750
Oxygen toxicity and lung collagenous protein [AD-A104702] p0033 N82-12756
A monitor for noninvasive estimation of pulmonary blood flow p0039 N82-13656
Non-invasive pulmonary arterial pressure measurement [PB81-239410] p0083 N82-15776

**PULMONARY FUNCTIONS**
Effects of rib cage or abdominal restriction on lung mechanics p0018 A82-13229
Pulmonary injury in rats following continuous exposure to 60% O2 for 7 days p0019 A82-13232
Digital spirometer for automatic pulmonary function p0022 A82-14746
Pulmonary diffusing capacity under conditions of restricted motor activity p0061 A82-17140
Changes in microcirculatory flow with respiratory insufficiency p0094 A82-20323
The significance of airflow resistance to changes in responses to increasing hypercapnia p0094 A82-20327
Pulmonary shunting and its regulation p0111 A82-21728
Pulmonary gas exchange during altered density gas breathing p0120 A82-21935
Cardiac output increase and gas exchange at start of exercise p0120 A82-21936
Respiratory regulation --- Russian Book p0139 A82-22400
Features of biorhythms for patients with chronic nonspecific pulmonary diseases during adaptation to the climato-geographic conditions of the Crimea p0162 A82-24535
Pulmonary carbonic anhydrase in the human, monkey, and rat p0169 A82-24917
Ventilatory responses at rest and during exercise in marathon runners p0169 A82-24919
Equipment for artificial pulmonary ventilation and inhalation anesthesia p0191 A82-25822
Protective effects of unsaturated fatty acids in adrenaline pulmonary edema and hypobaric hypoxia /The biological significance of catecholamine hyperlipidemia/ p0204 A82-27786
Ventilation and acid-base equilibrium for upper body and lower body exercise p0210 A82-28482
Characteristics of adjustment of lung diffusing capacity to work p0255 A82-32827
Regional changes of pulmonary functions in inhabitants of the North p0282 A82-35830
Measurement of cardiopulmonary performance during acute exposure to a 2440-m equivalent atmosphere p0283 A82-35904
Evidence for diminished sensitivity of the hamster pulmonary vasculature to hypoxia p0285 A82-36035
Causes of high-altitude acute pulmonary edema p0307 A82-38167
The cause of high-altitude acute pulmonary edema p0325 A82-40498
Effect of postural changes on minute ventilation, functional residual capacity and pulmonary N2 clearance p0327 A82-40660
Effects of high-G on ventilation/perfusion in the domestic fowl p0328 A82-40672
Autonomic reactions in labyrinthectomized rabbits during centrifuge acceleration p0333 A82-40720
Pulmonary stretch receptor discharge patterns in eupnea, hypercapnia, and hypoxia p0340 A82-41210
A nonlinear model combining pulmonary mechanics and gas concentration dynamics p0341 A82-41230
Pulmonary function in normal humans with exercise and temperature-humidity stress p0419 A82-47391
Ozone exposure and pulmonary metabolic effects of mediators and hormones [PB81-222408] p0014 N82-11779
Evaluation of short-term bioassays to predict functional impairment. Selected short-term pulmonary toxicity tests [AD-A103766] p0075 N82-14797
Evaluation of short-term bioassays to predict functional impairment. development of pulmonary bioassays in small animals: Directory of Institutions; individuals involved in utilization [AD-A103767] p0075 N82-14798
INTDOS: A computer code for estimating internal radiation dose using recommendations of the International Commission on Radiological Protection [DE82-000507] p0075 N82-14799
Pulmonary function measures before and after exposure of human subjects to +G(z) and +G(x) acceleration loads [AD-A114652] p0390 N82-30928
Fluid distribution in progressive pulmonary edema: A low-temperature scanning electron microscopy study [DE82-002554] p0390 N82-31928
Respiratory adaptation to acute metabolic acidosis in goats with ablated carotid bodies [AD-A116657] p0428 N82-33984
An apparatus for the measurement of pulmonary function in unanesthetized small animals [AD-A114938] p0428 N82-33985

**PULMONARY LESIONS**
Pulmonary injury in rats following continuous exposure to 60% O2 for 7 days p0019 A82-13232
Sarcoidosis in aircrew p0194 A82-26240
Current clinical approaches to mediastino-pulmonary sarcoidosis p0232 A82-29993
The anatomy and topography of the human bronchopulmonary lymph nodes p0360 A82-42624
Factors inducing periodic breathing in humans - A general model p0375 A82-44140

RADIATION DAMAGE
NT LASER DAMAGE
Biologically damaging radiation amplified by ozone depletions
p0029 A82-15788
Photodamage to the rhodopsin molecule - SH-group oxidation
p0153 A82-23275
Prediction of shifts in the radiation resistance of animals under the influence of various factors
p0154 A82-23288
The effectiveness of various radio-protective agents in protecting the germ cells of male mice against the genetic effects of radiation. II - The incidence of reciprocal translocations in irradiated spermatogonia
p0186 A82-25601
Mitotic activity and chromosome aberrations in the regenerated liver of rats after irradiation by X rays
p0190 A82-25811
The nature of radiation damage of haemopoietic stem cells under continuous irradiation at low dose rate
p0259 A82-33600
Possibility of evaluating radiation injury to skin on the basis of changes in its functional state
p0278 A82-35655
Bone-marrow haemopoiesis in dogs exposed to various repeated total-body nonuniform irradiations
p0278 A82-35656
Modeling of the recovery of cells from radiation damage and the principle of effective-dose reduction. I - Models of the recovery of cells after acute irradiation
p0278 A82-35657
Radiation damage and recovery of mouse T-cells. IV - Elimination of radiation-induced migration abnormalities in T-lymphocytes
p0306 A82-38156
Effects of cAMP accumulation activators on certain stages of genome expression in cells upon acute radiation damage to the organism. III Comparative study of the properties of RNA synthesized in a system of isolated liver and spleen cell nuclei from irradiated rats and animals having been treated with serotonin prior to irradiation
p0306 A82-38157
The effect of long-wave ultraviolet radiation on cyclophosphamide-induced levels of chromosome aberrations in the bone marrow cells of mice
p0310 A82-38556
The induction of reversions to prototrophy in Escherichia coli cells under the influence of neutrons and gamma radiation
p0404 A82-45777
The modification of radiation damage by dibasic sulfur-containing phenol acids
p0404 A82-45784
The oxygen effect in E. coli cells. II - The role of the genotype and the suspension medium
p0411 A82-46851
Models for the recovery of cells from radiation damage and the principle of the diminution of the effective dose. II - A model of the recovery of cells under arbitrary conditions of irradiation
p0411 A82-46855
Repair of chemical damage in mammalian cells
[DE81-030823] p0033 N82-12757
Ionizing radiation and its biological effects
p0081 N82-15756
Role of immobilization of irradiated rats in the protective effect of bone marrow shielding
[NASA-TM-76828] p0220 N82-21866
Structural changes in plasma membrane under influence of ionizing radiation

The effects of successive ionizing radiation and
heat on antibody formation
p0113 A82-21751

Athermal submillimeter-microwave biological effects
p0198 A82-26065
Effects of a high-frequency electromagnetic field on tetraphenyl borate transport through bilayer lipid membranes
p0200 A82-27744
The combined effects of ionizing radiation and certain other environmental factors /Review of the literature/
p0205 A82-27794
Mathematical modeling and analysis of death dynamics in irradiated mouse populations
p0206 A82-27809
Adjustments in metabolic heat production by squirrel monkeys exposed to microwaves
p0230 A82-29569
Biological effects of high-frequency radiation - The concept of the specific absorption rate /SAR/ and its effect on safety regulations
p0235 A82-30952
Immunodepressive and immunostimulatory effects of decimetric waves on the primary immunological response
p0239 A82-31511
Destructive and reparative processes in the hippocampus upon prolonged exposure to nonionizing microwave radiation
p0241 A82-31536
Spectral character of sunlight modulates photosynthesis of previtamin D3 and its photoisomers in human skin
p0255 A82-32692
Enzymatic characterization of peptidic materials isolated from aqueous solutions of ammonium cyanide /pH9/ and hydrocyanic acid /pH6/ exposed to ionizing radiation
p0257 A82-33277
Studies on the property and transplantation of haemopoietic stem cells from peripheral blood
p0261 A82-34247
The effect of millimeter-wave electromagnetic radiation on biological structures and organisms of varying complexity
p0263 A82-34768
Structural changes of the thymus of irradiated animals that were also subjected to heat trauma
p0278 A82-35651
Investigation of the general fitness of the progeny of irradiated animals. III - The resistance of mice to irradiation, hypoxia, endotoxin, and physical stress
p0278 A82-35652
Protective effect of a gaseous hypoxic mixture under the combined effect on the organism of radiation and physical stress
p0278 A82-35653
Structural changes of the plasmatic membrane under the effect of ionizing radiation
p0278 A82-35661
Radiogenic changes in the behavior and physiology of the spontaneously hypertensive rat - Evidence for a dissociation between acute hypotension and incapacitation
p0283 A82-35903
An electron-microscopic study of the brain of the fruit fly, Drosophila melanogaster, exposed to high-LET krypton /Kr-84/ particle radiation
p0287 A82-36320
The radiolysis and racemization of leucine on proton irradiation
p0305 A82-38118
Changes in electrically neutral Ca/2+/-H/+/ exchange in rat liver mitochondria following gamma irradiation
p0306 A82-38151
Changes in the relations of pyrimidine blocks in DNA of the hematopoietic system immediately following gamma irradiation of the animal
p0306 A82-38152
Radiation-induced shortening of the life span of D. melanogaster. II - Sensitizing effects of 5-bromo-2-deoxyuridine
p0306 A82-38155
State of the lactate dehydrogenase reaction in the muscular tissue of irradiated animals
p0306 A82-38158
Effect of the combined administration of antibiotic-resistant bifidobacteria and the corresponding antibiotics on the survival of irradiated mice
p0311 A82-38581
Delayed effects of the internal irradiation of endocrine system in female rats
p0311 A82-38582
The effect of laser radiation on lipid synthesis in yeast
p0311 A82-38585
Nonthermal effect of nanosecond microwave pulses on the transepithelial transport of sodium ions
p0312 A82-38586
The mechanism of the microwave effect on the conductivity of bilayer lipid membranes
p0312 A82-38587
ATPase activity and the potassium ion permeability of erythrocyte membranes in the presence of serotonin and radiation
p0324 A82-40479
The intracellular responses of frog eggs to novel orientations to gravity

Effects of salicylate and 2,4-dinitrophenol on respiration and metabolism
p0418 A82-47386
Airway gas mixing during rest and bicycle exercise
p0013 N82-11768
Medical diagnostic application of radiofrequency range electromagnetic waves
p0032 N82-12746
Carcinogenic effects of coal-conversion materials
[DE81-028108] p0076 N82-14803
On-line, real-time determinations of breath-to-breath gas exchange
p0181 N82-19832
The effect of pulsed microwaves on the breathing of mice
[FOA-C-54032-H2, H3] p0245 N82-22873
Evaluation of immunological methods for toxicity studies in animals: Inhalation studies with benzene and halothane in rats
[MBL-1980-4] p0266 N82-24814
Inhalation studies with benzene in rats. Part A: Toxicological data
p0266 N82-24815
Inhalation studies with benzene in rats. Part B: Immunological data
p0266 N82-24816
Inhalation studies with halothane in female rats. Part A: Toxicological data
p0266 N82-24817
Inhalation study with halothane in female rats. Part B: Immunological data
p0266 N82-24818
Toxic hazards research unit
[AD-A110587] p0272 N82-25780

The subchronic inhalation toxicity of polyethylene glycol 200 in the rat and mouse
[AD-A110668] p0293 N82-26956
Human external respiration and gas exchange in acute period of adaptation to immersion in water
p0349 N82-28959
Investigation on the carcinogenic effect of trichlorethylene by inhalation and mechanisms of metabolic bioactivation
[BMFT-FB-HA-82-007] p0391 N82-30933
Toxicological tests on trifluoromonobromomethane --- freon inhalation
[DRIC-T-6663] p0424 N82-32970
Respiratory adaptation to acute metabolic acidosis in goats with ablated carotid bodies
[AD-A116657] p0428 N82-33984
An apparatus for the measurement of pulmonary function in unanesthetized small animals
[AD-A114938] p0428 N82-33985
Ventilatory responses to exercise while eliciting the relaxation response
[AD-A115102] p0433 N82-34015

RESPIRATORS
Equipment for artificial pulmonary ventilation and inhalation anesthesia
p0191 A82-25822
A respirator for training in conditions of changeable respiratory mixture
p0324 A82-40485

RESPIRATORY DISEASES
NT ASTHMA
NT PNEUMONIA
NT TUBERCULOSIS
Morphology of experimental pneumoconiosis arising from the effects of lunar soil
p0055 A82-16824
Changes in microcirculatory flow with respiratory insufficiency
p0094 A82-20323
Morbidity involving a temporary loss of work capacity among drivers of automotive passenger vehicles
p0161 A82-24522
Features of biorhythms for patients with chronic nonspecific pulmonary diseases during adaptation to the climato-geographic conditions of the Crimea
p0162 A82-24535
Thermoregulation and morbidity in coal miners
p0191 A82-25815
Results of the treatment of patients with chronic bronchitis at health resorts in contrasting climatic zones during different seasons
p0192 A82-25825
Affections of the upper respiratory tracts in transport-fleet sailors and the prophylaxis of these affections on long voyages
p0281 A82-35696
The impulse activity of neurons in the nodose ganglion during acute hemodynamic and respiratory disorders
p0309 A82-38546
The use of hyperoxic mixtures for the diagnosis of latent disturbances in the external respiration system
p0322 A82-40457
Effects of short-term intermittent air pollutants on incidence and severity of acute respiratory disease: Data collection and quality assurance
[PB82-129479] p0223 N82-21887
Fluid distribution in progressive pulmonary edema: A low-temperature scanning electron microscopy study
[DE82-002554] p0398 N82-31928

RESPIRATORY IMPEDANCE
Respiratory movements of the facial muscles and respiratory resistance
p0322 A82-40456
New approaches to quantitating the pulmonary effects on inhaled pollutants
[PB81-222382] p0014 N82-11778

RESPIRATORY PHYSIOLOGY
Effects of rib cage or abdominal restriction on lung mechanics
p0018 A82-13229
Steady and unsteady pressure-flow relations in bronchial tree models
p0023 A82-14804
The state of the air-blood barrier in hyperoxia
p0060 A82-16970
The circadian organization of the circulatory and respiratory systems of Antarctic workers
p0061 A82-17139
Breath-by-breath measurement of true alveolar gas exchange
p0089 A82-19498
Physiology and pathology of respiration and means of correcting oxygen deficiencies in an organism /Meeting of the Interdepartmental Commission on the Coordination of Studies in Medicine of the Academy of Sciences of the Ukrainian SSR and the Ministry of Health of the Ukrainian SSR/
p0092 A82-20303
Special and clinical physiology of hypoxic states
p0093 A82-20317
A combined method for the study of tissue respiration under conditions corresponding to natural gas homeostasis
p0093 A82-20321
The significance of airflow resistance to changes in responses to increasing hypercapnia
p0094 A82-20327
Respiration of brain synaptosomes under conditions of depolarization in rats deprived of paradoxal sleep
p0095 A82-20336
Pulmonary shunting and its regulation
p0111 A82-21728
The effect of blood pressure in the pulmonary artery on gas exchange in functionally heterogeneous lungs
p0112 A82-21738
The use of oxygen as the test gas in the determination of the closing volume of respiratory ducts
p0117 A82-21801
An asymmetrical model of the airways of the dog lung
p0119 A82-21926
Phase V of the single-breath washout test
p0119 A82-21928
Pulmonary gas exchange during altered density gas breathing
p0120 A82-21935
Cardiac output increase and gas exchange at start of exercise
p0120 A82-21936
Respiratory regulation --- Russian Book
p0139 A82-22400
Effects of gravitational atelectases on the expiratory closure of respiratory tracts
p0152 A82-23260
The significance of chemoreceptor stimuli for the rate of switch-on and switch-off of the respiratory response to physical exercise
p0188 A82-25713
Cardiorespiratory assessment of 24-hour crash-diet effects on altitude, +Gz, and fatigue tolerances
p0192 A82-26228
Phosphorylating oxidation during changes in physiological condition
p0202 A82-27762
The determination of overall physical endurance in athletes
p0204 A82-27781
Physiological criteria and methods for increasing the effectiveness of correction of hypoxic states
p0205 A82-27797
Respiratory muscle fatigue after marathon running
p0229 A82-29552
Respiratory mechanics of a small carnivore - The ferret
p0229 A82-29554
Effect of upper body posture on forced inspiration and expiration
p0229 A82-29559
Delayed kinetics of respitratory gas exchange in the transition from prior exercise
p0230 A82-29561
Effect of acid-base status on the kinetics of the ventilatory response to moderate exercise
p0230 A82-29564
No effect of naloxone on hypoxia-induced ventilatory depression in adults
p0230 A82-29566
Comparative characteristics of respiratory and circulatory changes upon acute hyperthermia in cats
p0231 A82-29699

The ventilation-perfusion relation in residents of the Arctic coast of the north-east USSR
p0236 A82-31154
A comparative characterization of hemodynamics and respiration under static and dynamic loads
p0238 A82-31503
Mechanical properties of rat lung during prolonged hypercapnia
p0255 A82-32831
Stages of the adaptation of human lungs in conditions of the Far North
p0282 A82-35829
Regional changes of pulmonary functions in inhabitants of the North
p0282 A82-35830
Parameters of ventilatory and gas exchange dynamics during exercise
p0285 A82-36031
Comparison of human vocal cord movements during isocapnic hypoxia and hypercapnia
p0290 A82-37927
The thermal pulsation method in the study of several physiological mechanisms of the brain stem
p0310 A82-38559
The cause of high-altitude acute pulmonary edema
p0325 A82-40498
Effect of postural changes on minute ventilation, functional residual capacity and pulmonary N2 clearance
p0327 A82-40660
Pulmonary stretch receptor discharge patterns in eupnea, hypercapnia, and hypoxia
p0340 A82-41210
Activation of lipid peroxidation during stress in man, evaluated according to the content of pentane in expired air
p0367 A82-42600
Physiological mechanisms determining the mechanical work of breathing for different types of muscular activity
p0371 A82-43237
Hyperoxia inhibits stimulated superoxide release by rat alveolar macrophages
p0376 A82-44143
Effect of ventilatory drive on the perceived magnitude of added loads to breathing
p0418 A82-47383
The morphological characteristics of the terminal respiratory bronchioles and the arteries accompanying them during individually graded muscular activity
p0420 A82-48220
Cardiorespiratory responses and handgrip isometric component for various wheelchair propulsion systems
p0011 N82-10718
Airway gas mixing during rest and bicycle exercise
p0013 N82-11768

RESPIRATORY RATE
NT DYSPNEA
Removal by negative air ions of changes in mitochondrial respiration under stress
p0028 A82-15716
The effect of dipilodor, diazepam, pipolphen, and their combinations on the vasomotor reflex and respiration
p0189 A82-25721
Modulation of human sinus node function by systemic hypoxia
p0197 A82-26812
Arterial CO2 response to low levels of inspired CO2 in awake beagle dogs
p0197 A82-26815
Role of the carotid chemoreceptors in regulation of inspiratory onset
p0229 A82-29557
The relation between cardiac and respiratory rhythms as a function of the state of the geomagnetic field
p0236 A82-31153
Dynamics of cardiac, respiratory, and metabolic function in men in response to step work load
p0256 A82-32837
A computer linear regression model to determine ventilatory anaerobic threshold
p0257 A82-32843
Rate of change of physiological functions as an index of the degree of adaptation
p0283 A82-35840
Effects of glycogen depletion and pedaling speed on 'anaerobic threshold'
p0286 A82-36036
Relations between respiratory and circulatory control during gravitational load in man
p0332 A82-40714
Ventilatory and heart rate responses to hypoxia and hypercapnia during sleep in adults
p0339 A82-41206
Results of studies of pulmonary ventilation in cosmonauts during the period of acute adaptation to weightlessness
[IAF PAPER 82-431] p0415 A82-47061
Possible impairment of respiratory regulation under hyperbaric nitrogen narcosis
p0349 N82-28964
Significance of minute volume parameters to evaluation of vestibular stability
p0357 N82-29860
Dual physiological rate measurement instrument
[NASA-CASE-MSC-20078-1] p0424 N82-32971

RESPIRATORY REFLEXES
NT HERING-BREUER REFLEX
The significance of chemoreceptor stimuli for the rate of switch-on and switch-off of the respiratory response to physical exercise
p0188 A82-25713
The diving response in clinical medicine
p0194 A82-26241
Effect of breathing patterns on the perceived magnitude of added loads to breathing
p0197 A82-26813
Ventilatory adaptations to resistive loading during wakefulness and non-REM sleep
p0197 A82-26814
Tissue chemoreceptors
p0209 A82-28453
The voluntary regulation of heart rate
p0236 A82-31161
An approach to the determination of the reflex reactions of cardiac rhythm
p0237 A82-31162
Respiratory movements of the facial muscles and respiratory resistance
p0322 A82-40456
Factors inducing periodic breathing in humans - A general model
p0375 A82-44140
A hereditary defect in the sensitivity to hypoxia during normal sensitivity to hypercapnia
p0420 A82-48217

RESPIRATORY SYSTEM
NT BRONCHI
NT LUNGS
NT NOSE (ANATOMY)
The significance of the respiratory minute volume index in the evaluation of vestibular stability
p0006 A82-11697
The state of the vegetative functions during sleep
p0114 A82-21771
The biological significance of physiological hypoxemia
p0164 A82-24558
The nature of autonomic effects produced by sombrevin --- during narcosis
p0187 A82-25693
Respiratory and inert gas exchange during high-frequency ventilation
p0197 A82-26817
Tissue chemoreceptors
p0209 A82-28453
New data on reverse electron transport in the respiratory chains of yeast mitochondria - The induction of reverse transport by exogenous NAD-H
p0228 A82-29445
Age characteristics of fatigue during local muscular work in humans
p0238 A82-31487
Seasonal variations of human cardiorespiratory indices in the North
p0282 A82-35838
Computer simulation of respiratory control system
p0371 A82-43145
Oxygen exposure and extrapulmonary respiratory tract ciliogenesis in adult male rats
p0417 A82-47340
New approaches to quantitating the pulmonary effects on inhaled pollutants
[PB81-222382] p0014 N82-11778

Oxygen toxicity and lung collagenous protein
[AD-A104702] p0033 N82-12756

Deposition of aerosol particles in the human respiratory tract
p0039 N82-13659

Evaluation of short-term bioassays to predict functional impairment. Selected short-term pulmonary toxicity tests
[AD-A103766] p0075 N82-14797

Respiratory toxicology, 1981
[AD-A107672] p0133 N82-17841

Determination of the effects of material from alternate energy sources on the upper respiratory tract clearance mechanism. Part 1: In vitro exposure to particulate pollutants. Part 2: In vivo exposure to ozone
[PB82-117037] p0178 N82-19811

Cardio-respiratory physical training in water and on land
[AD-A111064] p0295 N82-26968

RESPONSE BIAS

Modeling human tracking error in several different anti-tank systems
p0044 N82-13699

RESPONSE TIME (COMPUTERS)

An evaluation of alphanumeric, graphic, and color information displays
p0017 A82-12871

Item recognition as a Performance Evaluation Test for Environmental Research
p0143 A82-22934

Identification of the adaptive feedback of the human motor system using the response difference method
p0033 N82-12754

RESPONSES
NT DYNAMIC RESPONSE
NT GALVANIC SKIN RESPONSE
NT HEMODYNAMIC RESPONSES
NT PHYSIOLOGICAL RESPONSES
NT TRANSIENT RESPONSE

REST
NT BED REST

Natural resistance of the organisms of seamen during postcruise rest
p0093 A82-20311

Hemodynamics and external respiration in patients with bronchial asthma at rest and during exercise
p0205 A82-27791

Cardiac rhythm regulation at rest and during orthostasis
p0236 A82-31160

Changes in psychophysiological functions of flight personnel under various regimes of active rest
p0238 A82-31494

An automated, indirect assessment of cardiac output during rest and exercise
p0285 A82-36030

Superficial shell insulation in resting and exercising men in cold water
p0285 A82-36034

Sympathetic and parasympathetic cardiac control in athletes and nonathletes at rest
p0286 A82-36041

Circadian changes in resting heart rate and body temperature, maximal oxygen consumption and perceived exertion
p0308 A82-38268

Hemodynamic response to converting enzyme inhibition at rest and exercise in humans
p0375 A82-44135

Regulation of glycogenolysis in human muscle at rest and during exercise
p0376 A82-44144

Plasma prostaglandins, renin, and catecholamines at rest and during exercise in hypertensive humans
p0418 A82-47382

Airway gas mixing during rest and bicycle exercise
p0013 N82-11768

RESTRAINTS
U CONSTRAINTS

RESTRICTIONS
U CONSTRICTIONS

RESUSCITATION

Anesthesia, surgical aid and resuscitation in manned space missions
p0059 A82-16950

The use of inosine during resuscitation for the prevention of post-resuscitation circulatory insufficiency
p0420 A82-48215

Anesthesia, surgery and resuscitation during manned spaceflights
p0393 N82-31894

RETARDANTS
NT FLAME RETARDANTS

RETENTION (PSYCHOLOGY)

Convergence-divergence with extended practice - Three applications --- human psychomotor task correlation with external measures
p0143 A82-22938

Evidence relating subjective contours and interpretations involving occlusion
[AD-A103925] p0010 N82-10712

Time and information model of human Memory Organization
p0012 N82-11763

Ability differences and cognitive mapping skill
[AD-A106389] p0128 N82-16741

RETICULOCYTES

Methodological aspects of testing erythrocyte balance by counting incubated reticulocytes
p0350 N82-28972

RETINA

Peripheral chorioretinal lesions and aeronautical flight personnel Consequences for fitness
p0008 A82-12315

The sensitivity of the retinal nerve fibre layer to elevated intraocular pressure and graded hypoxia in the cat
p0025 A82-15475

Analysis of retinal work in the discrimination of a contour signal
p0054 A82-16819

Sigma-movement and Sigma-nystagmus - A new tool to investigate the gaze-pursuit system and visual-movement perception in man and monkey
p0066 A82-17450

Corrective saccades - Effect of shifting the saccade goal
p0185 A82-25647

Intraretinal recordings of slow electrical responses to steady illumination in monkey - Isolation of receptor responses and the origin of the light peak
p0185 A82-25649

Reception of retinol in rat retinas - Various molecular forms
p0187 A82-25687

The damaging effects of light on the retina - The role of singlet oxygen and lipid peroxides
p0232 A82-29817

Lipid peroxidation and retinal damage under stress
p0262 A82-34682

Mechanisms of the damaging effect of light on retinal photoreceptors
p0371 A82-43233

Spectral sensitivity of the peripheral retina to large and small stimuli
p0403 A82-45675

Ultrasonic scanning in the diagnosis of retinoblastomas
p0410 A82-46710

Laser retinometry for cataracts
p0410 A82-46711

The significance of the changes in the chorioretinal structures for the mechanism of the therapeutic action of the argon laser /experimental study/
p0410 A82-46712

RETINAL ADAPTATION
NT DARK ADAPTATION
NT LIGHT ADAPTATION

The effects of age and ametropia on the dark focus of visual accommodation
p0142 A82-22929

Selective visual adaptation and the feature model
p0168 A82-24906

Effects of high-frequency ultrasound on adaptive changes in cell resistance
p0242 A82-31546

The constancy of stereoscopic depth perception
[AD-A111484] p0302 N82-27984

RETINAL IMAGES

Disappearance of stabilized chromatic gratings --- visual contrast sensitivity
p0049 A82-16125

Natural retinal image motion - Origin and change
p0066 A82-17452
Responses of vestibulospinal neurons to neck and macular vestibular inputs in the presence or absence of the paleocerebellum
p0067 A82-17457
Directional plasticity of the vestibulo-ocular reflex in the cat
p0068 A82-17467
Low-level laser light effects - Long-term effects --- on visual acuity of behaviorally trained monkeys
p0140 A82-22913
Changes in spectral acuity following laser irradiation
p0140 A82-22914
Fading of stabilized retinal images
p0207 A82-28116
Evaluation of object size upon viewing through an aperture
p0237 A82-31163
Eye modelling
p0254 A82-32525
Hyperacuity and interpolation by the visual pathways
p0371 A82-43100
Factors determining the characteristics of the perception of stabilized retinal images
p0371 A82-43232
Detection of amblyopia utilizing generated retinal reflexes
[NASA-CR-161944] p0127 N82-16732
Purkinje image eyetracking: A market survey
[NASA-CR-166338] p0272 N82-25779

**RETINENE**
Reception of retinol in rat retinas - Various molecular forms
p0187 A82-25687

**RETRACTABLE LANDING GEAR**
U LANDING GEAR

**RETRIEVAL**
NT INFORMATION RETRIEVAL

**REUSABLE SPACECRAFT**
NT SPACE SHUTTLES

**REVERSE TIME**
U REACTION TIME

**RHEOENCEPHALOGRAPHY**
Phasic energy analysis of rheoencephalograms in the detection of the decompensation of cerebral hemodynamics
p0113 A82-21754
Additional criteria of cerebral hemodynamic disorders limiting physical loads in patients with hypertension
p0159 A82-24495
Rheoencephalographic signs of inadequate cerebral blood supply in incipient cerebrovascular insufficiency
p0201 A82-27755
System for automatic analysis of rheoencephalograms
p0396 N82-31916

**RHEOLOGY**
Expansion of the experimental possibilities of evaluating cardiac output by means of integral rheography using a high-pass filter
p0185 A82-25677
Characteristics of the blood rheology, platelet function, and hemodynamics in patients with ischemic heart disease during extended hypokinesia following amputations of the limbs
p0410 A82-46721

**RHEOMETERS**
Phase analysis of peripheral systemic circulation by a rheographic method
p0161 A82-24518

**RHEUMATIC DISEASES**
A study of tropomyosins in human muscular and nonmuscular organs
p0117 A82-21806
Ankylosing spondylitis
p0361 N82-29891
Medico-legal aspect of spinal disorders in aviation medicine
p0361 N82-29892

**RHYTHM (BIOLOGY)**
NT CIRCADIAN RHYTHMS
The nature of induced EEG activity in the alpha-rhythm range
p0028 A82-15713
Potential for the use of biorhythm structures for the prognosis of the course of a disease
p0028 A82-15715
Concerning the rationalization of the work and rest schedule of cosmonauts
p0052 A82-16724
The effects of hyperventilation on EEG alpha-rhythm depression induced by a suggested visual representation
p0052 A82-16801
The reorganization of EEG structure during adaptation to the Antarctic
p0053 A82-16810
Characteristics of indicators of cardiac rhythm in the norm and in mental maladjustment
p0062 A82-17144
The dynamics of cardiac rhythm parameters during work under various loads --- by air traffic controllers
p0062 A82-17146
The effect of motor activity on the development of cardiac arrhythmias in experimental emotional stress
p0110 A82-21713
Disturbances in biological rhythms as a result of a conflict of incompatible stimuli
p0111 A82-21720
Seasonal rhythm of the immune reactivity and heart tolerance to physical load in patients with ischemic heart disease
p0117 A82-21802
Phase characteristics of the response of the hypophysal-adrenal system under high-altitude conditions
p0150 A82-23166
A sino-auricular block with Samoilov-Wenkeback periods - Diagnosis with the aid of an automated analysis of the structure of heart rhythms and clinical assessment
p0153 A82-23270
The statistical structure of EEG rhythm interaction and individual features of brain autoregulation mechanisms
p0157 A82-23643
Circadian and seasonal rhythms in plasma androgen levels in the rhesus macaque monkey
p0161 A82-24525
Features of biorhythms for patients with chronic nonspecific pulmonary diseases during adaptation to the climato-geographic conditions of the Crimea
p0162 A82-24535
Chronobiological aspects in the science of health resorts and physiotherapy
p0162 A82-24536
Regulation of heart rhythm in depressor baroreflex
p0190 A82-25812
Effects of physical factors in the environments on the diurnal and seasonal periodicity of bronchial asthma attacks
p0205 A82-27795
Evidence for a biological clock
p0234 A82-30301
The relation between cardiac and respiratory rhythms as a function of the state of the geomagnetic field
p0236 A82-31153
Cardiac rhythm regulation at rest and during orthostasis
p0236 A82-31160
An approach to the determination of the reflex reactions of cardiac rhythm
p0237 A82-31162
Hormonal mechanisms of seasonal rhythms in rats
p0240 A82-31518
The formation in human ontogeny of the ability to reproduce a given rhythm
p0240 A82-31523
Eight-hour rhythm of autonomic regulation
p0242 A82-31542
Rare cases of serious disturbances in cardiac rhythm during a hypoxic functional test
p0280 A82-35684
The contraction, regulation, and functional role of lymph vessels
p0367 A82-42603
A composite assessment of heart rhythm regulation during dosed functional loads
p0373 A82-43637

A systems analysis of the maturation of sleep using a semi-Markov model
p0039 N82-13658
Effect of transmeridional flights on biorhythm of zone formation by Streptomyces levoris
p0124 N82-16711
Phenomena of fluctuation of human reaction to antiorthostatic position
p0125 N82-16721
Cerebral hemispheric activity and autonomic nervous function
p0137 N82-17868
Stress and biological rhythms
p0213 N82-20837

RIBONUCLEIC ACIDS
Origin of translation - The hypothesis of permanently attached adaptors --- proposed prebiotic amino acid synthesis
p0091 A82-20022
Origin and evolution of the genetic code
p0103 A82-20955
Evolutionary processes of the genetic code
p0104 A82-20957
Primitive transfer RNA and origin of Darwinian system
p0104 A82-20959
Nucleic acid and protein metabolism in cardiac muscle
p0115 A82-21772
Transfer RNA and the origin of protein synthesis
p0148 A82-22991
The content of RNA in structures of the autonomic nervous system of rabbits under acute emotional stress
p0202 A82-27759
Molecular relationships between closely related strains and species of nematodes
p0208 A82-28228
Taxonomic relations between archaebacteria including 6 novel genera examined by cross hybridization of DNAs and 16S rRNAs
p0257 A82-33276
Polynucleotide replication coupled to protein synthesis A possible mechanism for the origin of life
p0305 A82-38119
Effects of cAMP accumulation activators on certain stages of genome expression in cells upon acute radiation damage to the organism. III Comparative study of the properties of RNA synthesized in a system of isolated liver and spleen cell nuclei from irradiated rats and animals having been treated with serotonin prior to irradiation
p0306 A82-38157
The synthesis of nuclear and mitochondrial DNA and RNA, and the synthesis of heme and globin in rabbit bone marrow during the stimulation of erythropoiesis
p0307 A82-38169
RNA-content distribution of cells from the normal and atherosclerotic human aorta
p0308 A82-38535
Study of RNA synthesis rate and DNA content in the myocardium of new-born rats during adaptation to high-altitude hypoxia
p0308 A82-38537
The dynamics of quantitative changes of RNA in rat cerebellum Purkinje cells in different functional states
p0308 A82-38538
The synthesis of nuclear and mitochondrial DNA and RNA, and the synthesis of heme and globin in rabbit bone marrow during the stimulation of erythropoiesis
p0325 A82-40501
Protein composition of mRNA containing 18S-40S subribosomal particles in soleus muscle before and after immobilization
p0335 A82-40742
Molecular basis for the genetic code
p0339 A82-41195
The influence of activators of cAMP accumulation on individual stages of genome expression in animal cells in the presence of acute ionizing radiation. IV - A study of the cytosol factors controlling the transcription and release of RNA from the nuclei in irradiated animals and in conditions of the action of the radioprotective agent serotonin
p0404 A82-45776
The molecular mechanisms of the interphase death of lymphoid cells. V - Determination of the lifespan of nuclear and polysomal RNA in irradiated thymocytes
p0412 A82-46867
Molecular events basic to cellular radiation response
[DE81-027898] p0014 N82-11776
Spectrophotometric studies on the RNA structure in E.coli ribosomes. Part 1: Fundamentals of ultraviolet spectrophotometry of nuclei acids
[ISS-R-80/2-PT-1] p0078 N82-15734
Spectrophotometric studies of the RNA structure in E.coli ribosomes. Part 2: Influence of ions and proteins on the RNA secondary structure
[ISS-R-80/3-PT-2] p0079 N82-15735
Molecular events basic to cellular radiation response
[DE81-029813] p0221 N82-21875
Indices of the rat central nervous system metabolism during 36- and 60-day hypokinesia
[NASA-TM-76870] p0384 N82-30883
RNA accumulation in the body of neurons as an indicator of their functional deafferentation
[NASA-TM-76850] p0389 N82-30922
Reaction to hypokinesia and hyperkinesia of somatochrome neurons in the motor zone of the cerebral cortex in rabbits
[NASA-TM-76885] p0390 N82-30925
Changes in rat tissue deoxyribonucleoprotein and nucleic acids following flight aboard Cosmos-1129 biosatellite
p0395 N82-31907

RICHARDSON-DUSHMAN EQUATION
U TEMPERATURE EFFECTS

RIDING QUALITY
Vibration and comfort. I - Translational seat vibration
p0370 A82-42829
Vibration and comfort. II - Rotational seat vibration
p0370 A82-42830
An evaluation of helicopter noise and vibration ride qualities criteria
[NASA-TM-83251] p0137 N82-17871

RIEMANN INTEGRAL
U MEASURE AND INTEGRATION

RISK
Effects of whole-body vibration and noise on the toxicity and risk parameters of chemical substances
p0191 A82-25814
A test for the prediction of risk-taking attitude in operators
p0322 A82-40449
Damage risk criteria for impulse noise --- industrial deafness
[IZF-1980-26] p0035 N82-12771
Overview of a procedure for human-reliability analysis
[DE81-030816] p0392 N82-30947
Probabilistic methodology for estimating radiation induced cancer risk

Evaluation of abnormal exercise electrocardiogram in apparently healthy subjects - Labile repolarization /ST-T/ abnormalities as a cause of false positive responses
p0001 A82-10631

**SABATIER REACTION**
Development of an advanced Sabatier CO2 reduction subsystem
[ASME PAPER 81-ENAS-11] p0002 A82-10899

**SACCADIC EYE MOVEMENTS**
Vestibular influence upon head-eye coordination
p0069 A82-17470
The interaction between accuracy of gaze with and without head movements in patients with cerebellar ataxia
p0069 A82-17472
Dissociation of the eyes in saccadic movement
p0070 A82-17479
Different effects involved in the interaction of saccades and the vestibulo-ocular reflex
p0070 A82-17480

Differences in eye movement data recorded by electro-oculography and corneal reflection techniques
p0088 A82-19224
Study of the electrical activity of the extraocular muscles
p0112 A82-21731
Corrective saccades - Effect of shifting the saccade goal
p0185 A82-25647
Perception of suprathreshold stimuli during saccadic eye movement
p0235 A82-30870
Brain mechanisms of visual attention
p0253 A82-32075
Global visual processing for saccadic eye movements
p0318 A82-39435
Pilot scanning patterns while viewing cockpit displays of traffic information
p0046 N82-13710
Model simulation studies to clarify the effect on saccadic eye movements of initial condition velocities set by the Vestibular Ocular Reflex (VOR)
p0046 N82-13712

**SACCHARIDES**
U CARBOHYDRATES

**SAFETY**
NT AIRCRAFT SAFETY
NT FLIGHT SAFETY
NT INDUSTRIAL SAFETY
NT REACTOR SAFETY
Review of health and safety aspects of video display terminals
[CRC-TN-712-E] p0179 N82-19816
Safety analysis for Naval liquid oxygen life support system
[AD-A115742] p0427 N82-32998

**SAFETY DEVICES**
NT EJECTION SEATS
NT HELMETS
NT SPACE SUITS
Holographic laser eye protection
p0024 A82-14971
Thermal test of flying helmet for two different types of impact protection devices - Nylon sling and polystyrene liner
p0025 A82-15519
Nonauditory effects of high intensity noise on ground crews at a naval air station
[AD-A108996] p0181 N82-19834

**SAFETY FACTORS**
An investigation of ripcord pull force capability of male and female skydivers for ripcords located on the left main lift web at chest level
p0024 A82-14959
Evaluation of safety of decompression from the critical volume of gas bubbles formed in the organism
p0110 A82-21717
Problems of the development of life support and safety assurance system for space crews
p0190 A82-27510
Setting safety standards for ionizing radiation
p0311 A82-38560
The psychology and safety of weightlessness
[IAF PAPER 82-252] p0415 A82-47008
Conspicuity of observation posts at the air weapon firing ranges on the Vliehors and the Noordvaarder
[IZF-1979-33-E] p0035 N82-12774
Review of literature and regulation relating to thoracic impact tolerance and injury criteria
[PB82-108697] p0128 N82-16736
Study of chlorine dioxide and its metabolites in man
[PB82-109356] p0175 N82-18863
Study of protective mask type 33
[FOA-C-40134-C2] p0247 N82-22808

The effect of the motor activity regime on the development, conservation, and regeneration of defensive conditioned reflexes in rats
p0092 A82-20305
A systems analysis of human motor reactions in various modes of operation of goal-directed behavioral acts
p0111 A82-21729
Perception and performance in the heat
p0143 A82-22940
Bivariate response distributions in visual detection and discrimination
p0144 A82-22951
Characteristics of cerebral somato-sensory evoked potentials under various conditions for the formation of simple motor reactions
p0165 A82-24830
The effects of a flashing light on the spectral composition of brain biopotentials and the biomechanical effectiveness of balancing
p0166 A82-24837
The role of proprioceptive afferentation in maintaining the equilibrium of unstable mechanical systems
p0166 A82-24838
Analysis of operator speed by means of neurophysiological methods
p0168 A82-24909
Effects of emotional stress in bus drivers
p0191 A82-25819
Effects of acoustic stress on rat sensorimotor cortex morphology
p0202 A82-27765
Adaptation in motion perception - Alteration of motion evoked by ocular pursuit
p0237 A82-31412
Central nervous system reactivity in the image of the visual evoked potential and the perceptual-motor performance of pilots and

cosmonaut candidates under conditions of sleep deprivation
p0251 A82-31831
Investigation of the functional state of the central nervous system and the motor apparatus for various regimes of rest and physical exercise
p0279 A82-35668
Analysis of human movements for workplace design
p0288 A82-36966
The cortical regulation of human motion --- Russian book
p0316 A82-39283
Rapid perceptual adaptation to high gravitoinertial force levels Evidence for context-specific adaptation
p0320 A82-40436
State of adaptation in patients with hypertension
p0324 A82-40476
Relation between sensoric and motoric function of Wistar rats after space flight by biosatellite Cosmos 1129
p0335 A82-40737
Mechanisms of the effects of weightlessness on the motor system of man
p0336 A82-40752
The dynamics of certain psychophysiological indicators under the cumulative effect of Coriolis accelerations
p0370 A82-42995
The role of the extrapolation and dynamic stereotype in the mechanism of the formation and improvement of adequate motor coordination
p0374 A82-43651
Identification of the adaptive feedback of the human motor system using the response difference method
p0033 N82-12754
Muscle, motor cortex, cerebellar nuclear, and spindle afferent during slow hold-ramp-hold position-tracking movements of the monkey's wrist
p0135 N82-17854
Identification of the adaptive feedback of the human motor system using the Response Difference Method (RDM)
[NTHD-134] p0176 N82-18869
Neurophysiological characteristics of sensorimotor cortex of rats submitted to early motor deprivation and conditioning
p0271 N82-25770
Local serial correlation in behavioral states in the mouse
[AD-A111021] p0294 N82-26959
Proceedings of the Sixteenth Annual Conference on Manual Control
[NASA-CR-169243] p0379 N82-30833

SENSORS
An approach to algorithms for processing data from the visual sensor of an integrated robot
p0026 A82-15681
Evaluation of Smart sensor displays for multidimensional precision control of space shuttle remote manipulator
p0302 N82-30870
Evaluation of SMART sensor displays for multidimensional precision control of Space Shuttle remote manipulator
p0442 N82-34074

SENSORY DEPRIVATION
The response of the microstructure of the cerebral subcommisural organ to a change in light cycle
p0150 A82-23173
Labyrinth plugging as a model of suspended vestibular sensory input
p0333 A82-40721
Neurophysiological characteristics of sensorimotor cortex of rats submitted to early motor deprivation and conditioning
p0271 N82-25770
RNA accumulation in the body of neurons as an indicator of their functional deafferentation
[NASA-TM-76850] p0309 N82-30922

SENSORY DISCRIMINATION
NT TACTILE DISCRIMINATION
NT VISUAL DISCRIMINATION

p0331 A82-40703
Labyrinth plugging as a model of suspended vestibular sensory input
p0333 A82-40721
Space flight effects upon plasma and tissue lipids in rats
p0333 A82-40722
Effects of space flight factors and artificial gravity on deoxyribonucleoprotein in lymphoid organs of rats
p0333 A82-40723
The reaction of simulated and true weightlessness on digestive tract of rats
p0334 A82-40733
Relation between sensoric and motoric function of Wistar rats after space flight by biosatellite Cosmos 1129
p0335 A82-40737

Involuntary and voluntary mechanisms for preventing cerebral ischemia due to positive /Gz/ acceleration
p0336 A82-40747
Results of investigations of weightlessness effects during prolonged manned space flights onboard Salyut-6
p0336 A82-40750
Results of biosatellite studies of gravity-dependent changes in the musculo-skeletal system of mammals
p0336 A82-40751
Vestibular effects of water immersion and Clonidine
p0337 A82-40762
Evidence for arrested bone formation during spaceflight
p0338 A82-40767
Gravity only dependent receptor field of the vestibular sensors Its significance in orbital flight
p0338 A82-40770
Medical monitoring and therapy of space motion sickness
[IAF PAPER 82-169] p0377 A82-44684
Psychophysiological performance examination onboard the orbital complex Salyut-Soyuz
[IAF PAPER 82-171] p0377 A82-44686
Catecholamines and their enzymes in discrete brain areas of rats after space flight on biosatellites Cosmos
[IAF PAPER 82-180] p0377 A82-44688
Mathematical modelling of physiological functions in space flight
[IAF PAPER 82-176] p0414 A82-46974
A French primate study program for physiological problems encountered in weightlessness
[IAF PAPER 82-184] p0414 A82-46976
Results of studies of pulmonary ventilation in cosmonauts during the period of acute adaptation to weightlessness
[IAF PAPER 82-431] p0415 A82-47061
The human spirit in space --- long duration space flight stress
p0416 A82-47279
A study in motion sickness - Saccular hair cells in the adult bullfrog
p0416 A82-47280
USSR report. Life sciences biomedical and behavioral sciences, no. 12
[JPRS-79338] p0012 N82-11762
Otolithic reflex and space perception function of cosmonauts
p0012 N82-11764
A compendium of hypokinetic and hypodynamic animal studies
[NASA-CR-3485] p0076 N82-15709
USSR report: Space biology and aerospace medicine, vol. 15, no. 5, Sep. - Oct. 1981
[JPRS-79346] p0130 N82-17812
Effect of space flights of different duration on energy metabolism of human erythrocytes
p0130 N82-17817
Human lipid metabolism during confinement in pressure chamber
p0131 N82-17822
Ultrastructure of blood vessels and muscle fibers of rat skeletal muscles after flights aboard Cosmos-605 and Cosmos-782 biosatellites
p0063 N82-17835
Blood fibrinogen as related to immersion in water for seven days and short-term space flight
p0133 N82-17836
USSR Report: Space biology and aerospace medicine, volume 16, no. 1, January - February 1982
[JPRS-80323] p0213 N82-20834
Effect of radioprotective agents on reactivity to space flight factors
p0213 N82-20835
Stress and biological rhythms
p0213 N82-20837
Structural and functional properties, and energy metabolism of erythrocytes during space flights varying in duration
p0214 N82-20841
Relationship between microflora and immunity of cosmonauts carrying staphylococcus aureus in the nasal cavity
p0214 N82-20843
Activity of some rat liver enzymes following flight aboard Cosmos-936 biosatellite
p0216 N82-20854
USSR report. Space biology and aerospace medicine, volume 16, no. 3, May - June 1982
[JPRS-81197] p0347 N82-28949
Dynamics of left ventricular systolic phase structure during long-term (140-185 days) spaceflights
p0348 N82-28954
Biomedical research publications: 1980 - 1982
[NASA-CR-3587] p0356 N82-29848
Activity of rat adrenal medula after flight aboard Cosmos-1129 biosatellite
p0395 N82-31905
Stereological analysis of rat bone tissue after flight aboard Cosmos-1129 biosatellite
p0395 N82-31906
Changes in rat tissue deoxyribonucleoprotein and nucleic acids following flight aboard Cosmos-1129 biosatellite
p0395 N82-31907
Renin-angiotensin-aldosterone system and electrolyte metabolism in rat blood after flight aboard Cosmos-1129 biosatellite
p0397 N82-31910
Epinephrine and norepinephrine concentrations in rat cardiac ventricles and atria after flight aboard Cosmos-1129 biosatellite
p0397 N82-31919
Rat blood plasma corticosterone after flight aboard Cosmos-1129 biosatellite
p0397 N82-31920
Deoxyribonucleoprotein and nucleic acid content of rat tissues after flight aboard Cosmos-936 biosatellite
p0397 N82-31921
The advantage of the lower body negative pressure test in aerospace medicine
p0400 N82-31942
Techniques for cardiovascular examination in human centrifuges and the principal results obtained
p0400 N82-31943
Cybernetic analysis of cardiac rhythm of Salyut-6 orbital station crew during graded exercise test
p0402 N82-32282
Combined rehabilitation and therapeutic measures in space medicine
p0402 N82-32283

SPACE FLIGHT TRAINING
Staying sane in space
p0089 A82-19743
Training for space
p0149 A82-23069
Selection and training of European astronauts
p0319 A82-39507

SPACE INDUSTRIALIZATION
Habitat requirements, design and options --- for long duration space missions
p0030 A82-15855
Human roles in future space operations
p0060 A82-16955
The medical and public health challenge of space
p0228 A82-29266
Solar bacterial biomass farm for space vehicles
p0261 A82-33895
Working in space
p0261 A82-33909

SPACE LABORATORIES
NT MANNED ORBITAL LABORATORIES

SPACE MAINTENANCE
Simulation of operator activity in a system for the technical servicing of a space station
p0051 A82-16717
Study of EVA operations associated with satellite services
[NASA-CR-167614] p0302 N82-27986

SPACE MANUFACTURING
Working in space --- Book
p0096 A82-20772
The assembly of large structures in space - An evaluation of hardware configurations and assembly techniques through neutral buoyancy simulation
p0141 A82-22918

SPACE MISSIONS
A regenerative life support system for Space Operations Center /SOC/ A probable first flight application

[ASME PAPER 81-ENAS-12] p0002 A82-10900
Human factors of outer space production --- Book p0029 A82-15851
Psychological considerations in future space missions p0029 A82-15852
Habitat requirements, design and options --- for long duration space missions p0030 A82-15855
Nutritional criteria for closed-loop space food systems p0030 A82-15856
Summary of medical investigations in the U.S.S.R. manned space missions p0056 A82-16928
Coping with space motion sickness in Spacelab missions p0058 A82-16939
Anesthesia, surgical aid and resuscitation in manned space missions p0059 A82-16950
A new eye movement recording system for vestibular research
[IAF PAPER 82-173] p0414 A82-46973
Nutritional and cultural aspects of plant species selection for a controlled ecological life support system
[NASA-CR-166324] p0250 N82-23985

**SPACE ORIENTATION**
Determination of the angular orientation of the body of a walking machine p0049 A82-16288
Human orientation in space
[AIAA PAPER 82-0422] p0071 A82-17940
How do we avoid confounding the direction we are looking and the direction we are moving p0071 A82-18024

**SPACE PERCEPTION**
NT AUTOKINESIS
The effects of binocular and motion-generated information on the perception of depth and height p0019 A82-13423
The otolith reflex and space perception in cosmonauts p0028 A82-15717
Auditory depth perception - Localization of nonmoving and moving sound sources p0111 A82-21727
Eyes and glass curtains - Visual accommodation, the Mandelbaum effect, and apparent size p0146 A82-22967
The role of the vestibular analyzer in the spatial analysis of gymnastic exercises p0154 A82-23283
Oculoparalytic illusion - Visual-field dependent spatial mislocalizations by humans partially paralyzed with curare p0208 A82-28250
Electrical stimulation of the exterior geniculate body induces eye movements p0229 A82-29448
Contour curvature analysis - Hyperacuities in the discrimination of detailed shape --- human performance efficiency p0235 A82-30872
Visual depth sensitivities of various cues for depth perception p0238 A82-31447
Reconstruction of spatial information in the human visual system p0264 A82-34830
A computational model of binocular depth perception p0264 A82-34834
Simulation of two forms of eye motion and its possible implication for the automatic recognition of three-dimensional objects p0277 A82-34965
Locus of the stimulus to visual accommodation - Where in the world, or where in the eye --- sources of visual perception errors p0289 A82-37184
Hyperacuity for luminance phase angle in the human visual system p0314 A82-38799
Neurons in cat visual cortex tuned to the direction of motion in depth - Effect of positional disparity p0318 A82-39434
Contrast increment thresholds of rhesus monkeys p0370 A82-43099
Threshold models of spatial vision p0371 A82-43230
Absence of depth processing in the large-frame rod-and-frame effect --- human space perception p0378 A82-44823
Inhibition of the rod-and-frame effect by circular contours --- human depth perception p0378 A82-44824
Cybernetics and car driving: Perspective perception and the output vector of the system to be controlled
[IZF-1980-29] p0036 N82-12778
Visual problems in aviation and space navigation p0081 N82-15758
Results of studies of cosmonauts' vestibular function and spatial perception p0214 N82-20838
Correlation between individual distinctions of functional asymmetry of cerebral hemispheres and pilot performance p0215 N82-20844
Influence of orientation method on quality of pilot's spatial orientation p0215 N82-20845
The constancy of stereoscopic depth perception
[AD-A111484] p0302 N82-27984
Distance estimation in projected photographs --- visual estimates
[FOA-C-56031-H2] p0426 N82-32982
Optical flow and texture variables useful in simulating self motion
[AD-A117016] p0443 N82-34081

**SPACE PROBES**
NT VIKING MARS PROGRAM

**SPACE PROGRAMS**
NT APOLLO PROJECT
NT FRENCH SPACE PROGRAMS
NT U.S.S.R. SPACE PROGRAM
Status of space biomedical programs p0129 N82-17239
Experimental study of high density foods for the Space Operations Center p0248 N82-23109

**SPACE RADIATION**
U EXTRATERRESTRIAL RADIATION

**SPACE RATIONS**
Biological value and shelf life of cultured dairy products in the diet of cosmonauts p0270 N82-25759

**SPACE SELF MANEUVERING UNITS**
U SELF MANEUVERING UNITS

**SPACE SHUTTLE ORBITAL FLIGHT TEST 1**

SPACE VEHICLE CONTROL
U SPACECRAFT CONTROL
SPACEBORNE EXPERIMENTS
Design, development, and verification of Life Sciences experiments
p0008 A82-12538
U.S. biological experiments in space
p0056 A82-16930
Future investigations onboard Soviet biosatellites of the Cosmos series
p0060 A82-16954
Experimental biology and medicine in space
p0060 A82-17123
Principal results of medical studies carried out during long-term manned flights in the Salyut 6-Soyuz-Progress orbital complex
p0198 A82-27512
Effects of space flight factors at the cellular level - Results of the Cytos experiment
p0211 A82-28485
Biological experiments in space biology and gravitation
p0254 A82-32349
Space biology and medicine
p0263 A82-34695
The effect of space flight factors on quiescent nuclei of certain plant and animal test objects
p0290 A82-37372
Lockheed involvement in Shuttle life sciences flight experiments
p0319 A82-39541
Morphogenesis of a higher plant from cultured cells and embryos in space
p0327 A82-40666
Studies of specific hepatic enzymes involved in the conversion of carbohydrates to lipids in rats exposed to prolonged spaceflight aboard Cosmos 1129
p0331 A82-40698
Bone resorption and calcium absorption in rats during spaceflight
p0331 A82-40704
Bone growth in the rat mandible during space flight
p0331 A82-40705
Space flight effects upon plasma and tissue lipids in rats
p0333 A82-40722
Skin temperature and thermal comfort in weightlessness
p0334 A82-40726
Results of biosatellite studies of gravity-dependent changes in the musculo-skeletal system of mammals
p0336 A82-40751
The first joint Franco-Soviet manned flight - The posture experiment
[IAF PAPER 82-183] p0377 A82-44689
The Biorack programme - A European contribution to space biology
p0403 A82-45179
A new eye movement recording system for vestibular research
[IAF PAPER 82-173] p0414 A82-46973
Feasibility study (phase A) for a Life Science Double Rack envisaged for the Spacelab mission D1
[BMFT-FB-W-81-037] p0078 N82-15732
Concept study of a life sciences payload element (PLE) for the SL-D1 mission
[BMFT-FB-W-81-038] p0078 N82-15733
Positions, movements and equilibrium of rats after flights aboard biosatellites
p0124 N82-16713
Rat amino acid composition after flight aboard Cosmos-1129 biosatellite
p0132 N82-17831
Myocardial protein fractions and enzymatic activity thereof in experimental rats flown aboard Cosmos-936 biosatellite
p0132 N82-17832
Metabolic processis in rat skeletal muscles after flight aboard Cosmos-936
p0132 N82-17833
Activity of some enzymes of carbonhydrate metabolism in rat skeletal muscles after space flight
p0132 N82-17834
Effects of rectilinear acceleration, optokinetic and caloric stimuli in space
p0173 N82-18255
Vestibular experiments
p0173 N82-18256

Vestibulo-spinal reflex mechanisms
p0173 N82-18257
The influence of space flight on erythrokinetics in man
p0173 N82-18258
Measurement of central venous pressure and determination of hormones in blood serum during weightlessness
p0173 N82-18259
Effects of prolonged weightlessness on the humoral immune response of humans
p0173 N82-18260
Three-dimensional ballistocardiography in weightlessness
p0174 N82-18262
Preliminary characterization of persisting circadian rhythms during space flight: Neurospora as a model system
p0174 N82-18266
Microorganisms and biomolecules in space hard environment
p0174 N82-18267
Advanced biostack experiment
p0174 N82-18269
STS-2 Induced Environment Contamination Monitor (IECM): Quick-look report
[NASA-TM-82457] p0177 N82-18870
A comparison between acetylene and freon rebreathing for measuring cardiac output during exercise --- in space
p0181 N82-19831
USSR Report: Space biology and aerospace medicine, volume 16, no. 1, January - February 1982
[JPRS-80323] p0213 N82-20834
Third decade of space biology
p0269 N82-25755
Initial audiometric investigations in an orbital station
p0363 N82-30277
Changes in rat tissue deoxyribonucleoprotein and nucleic acids following flight aboard Cosmos-1129 biosatellite
p0395 N82-31907

SPACEBORNE TELESCOPES
Space telescope neutral buoyancy simulations: The first two years
[NASA-TM-82485] p0392 N82-30942

SPACECRAFT CABIN ATMOSPHERES
Development status of a preprototype water electrolysis subsystem
[ASME PAPER 81-ENAS-9] p0002 A82-10897
Development of an advanced Sabatier CO2 reduction subsystem
[ASME PAPER 81-ENAS-11] p0002 A82-10899
Lightside atmospheric revitalization system for Space Shuttle Orbiter
[ASME PAPER 81-ENAS-26] p0003 A82-10913
Regenerable CO2 collection for spacecraft application
[ASME PAPER 81-ENAS-28] p0004 A82-10915
Investigation of the combined effects of bedrest and mild hypoxia
p0283 A82-35905
STS-1 medical report
[NASA-TM-58240] p0076 N82-15711
Medical microbiology of crewmembers
p0078 N82-15723
Shuttle toxicology
p0078 N82-15726
Cabin pollution
p0081 N82-15760
Preprototype nitrogen supply subsystem development
[NASA-CR-166192] p0084 N82-15780
Preprototype independent air revitalization subsystem
[NASA-CR-167703] p0362 N82-29898

SPACECRAFT CABIN SIMULATORS
Dehydration therapy for subjects exposed to simulated spaceflight conditions
p0394 N82-31897

SPACECRAFT CABINS
Dangers of explosive decompression
p0080 N82-15750

SPACECRAFT COMMUNICATION
Investigation of the functions of an astronaut operator in information systems
p0051 A82-16721

SPACECRAFT COMPONENTS
NT SPACECRAFT CABINS
NT SPACECRAFT MODULES
Remote manipulators in industry and space
p0415 A82-47273

SPACECRAFT CONTAMINATION
Advanced Microbial Check Valve development --- for Space Shuttle
[ASME PAPER 81-ENAS-45] p0005 A82-10929
Shuttle toxicology
p0078 N82-15726
STS-2 Induced Environment Contamination Monitor (IECM): Quick-look report
[NASA-TM-82457] p0177 N82-18870

SPACECRAFT CONTROL
NT SATELLITE CONTROL
Basic principles and methods for assuring the eficiency of astronaut activity in flight
p0050 A82-16702
Psychophysiological correlates of the control activity of the astronaut
p0050 A82-16707
Optimization of astronaut operator activity and systems of semiautomatic control of manned spacecraft on the basis of probabilistic criteria
p0050 A82-16711
Investigation of the statistical characteristics of astronaut operator activity directed towards the control of a manned spacecraft
p0050 A82-16712
Design and development of a six degree of freedom hand controller
p0045 N82-13706
Six degree of freedom manual controls study report
[NASA-CR-167532] p0181 N82-19837

SPACECRAFT ENVIRONMENTS
Generic waste management requirements for a controlled ecological life support system /CELSS/
[ASME PAPER 81-ENAS-23] p0003 A82-10911
The CELSS program - An overview of its structure and use of computer modelling
[ASME PAPER 81-ENAS-36] p0004 A82-10922
Oxygen generation subsystem for spacecraft
[ASME PAPER 81-ENAS-40] p0004 A82-10925
Design and control strategies for CELSS - Integrating mechanistic paradigms and biological complexities
[ASME PAPER 81-ENAS-43] p0005 A82-10927
Influential factors of negative effects in the isolated and confined environment
p0277 A82-35641
Methodological aspects of future cardiovascular research in space
p0326 A82-40652
Regenerable life support for the space station - A technology status summary
[IAF PAPER 82-45] p0377 A82-44658
Habitability support for manned missions of space 2000
[IAF PAPER 82-170] p0377 A82-44685
Sensitivity analysis of physiological factors in space habitat design
[IAF PAPER 82-179] p0414 A82-46975
Environmental conditions of aviation and space navigation
p0079 N82-15738
The relationship of body temperature to environmental temperature
p0080 N82-15752
Space navigation life guarantees
p0081 N82-15759
Radiation environment mapping
p0174 N82-18268
Influence on urea hydrolysis of typical microflora of urine and pressurized habitats
p0216 N82-20856
Optimal use of electrophysiological indicators of muscular effort and fatigue
p0248 N82-23134
Dehydration therapy for subjects exposed to simulated spaceflight conditions
p0394 N82-31897

SPACECRAFT MANEUVERS
NT ORBITAL MANEUVERS

SPACECRAFT MODELS
Simulation of operator activity in a system for the technical servicing of a space station
p0051 A82-16717

Investigations of the visual identification of abstract spacecraft models
p0156 A82-23307

SPACECRAFT MODULES
Life support system considerations for space station
p0415 A82-47276

SPACECRAFT ORBITAL ASSEMBLY
U ORBITAL ASSEMBLY

SPACECRAFT POWER SUPPLIES
Lightside atmospheric revitalization system for Space Shuttle Orbiter
[ASME PAPER 81-ENAS-26] p0003 A82-10913

SPACECRAFT TRACKING
The effects of a light blue background on the operator visual analyzer
p0052 A82-16727

SPACECREWS
Future directions for selecting personnel --- spacecrews for long duration space flight
p0030 A82-15853
Nutritional criteria for closed-loop space food systems
p0030 A82-15856
Hematological and immunological changes during space flight
p0057 A82-16937
Coping with space motion sickness in Spacelab missions

The role of HZE particles in space flight - Results from spaceflight and ground-based experiments
p0059 A82-16949
Working in space --- Book
p0096 A82-20772
Problems of the development of life support and safety assurance system for space crews
p0198 A82-27518
Sociological aspects of permanent manned occupancy of space
p0261 A82-33910
Habitability support for manned missions of space 2000
[IAF PAPER 82-170] p0377 A82-44685
Crew activities in space
p0031 N82-12129
Skylab water balance analysis
[NASA-CR-167461] p0033 N82-12753
STS-1 medical report
[NASA-TM-58240] p0076 N82-15711
Evaluation of crew health
p0077 N82-15712
Inflight observations
p0077 N82-15713
Crew medical debriefing
p0077 N82-15714
Health stabilization program
p0077 N82-15715
Crew medical training
p0077 N82-15717
Validation of predictive tests and countermeasures for space motion sickness
p0077 N82-15719
Crew cardiovascular profile
p0077 N82-15720
Biochemistry and endocrinology results
p0077 N82-15721
Hematological and immunological analyses
p0078 N82-15722
Medical microbiology of crewmembers
p0078 N82-15723
Radiological health
p0078 N82-15727
Analysis of evaporative water loss in the Skylab astronauts
[NASA-CR-167462] p0178 N82-19814
Evaluation of materials proposed for use in space flight
[NASA-CR-167537] p0178 N82-19815
Optimal use of electrophysiological indicators of muscular effort and fatigue
p0248 N82-23134
STS-3 medical report
[NASA-TM-58247] p0423 N82-32961
Mission operation report. Space Shuttle program: STS-4 postflight medical operations report
[NASA-TM-84854] p0431 N82-34001

SPACELAB
Coping with space motion sickness in Spacelab missions
p0058 A82-16939
The Biorack programme - A European contribution to space biology
p0403 A82-45179
Crew activities in space
p0031 N82-12129
Radiation environment mapping
p0174 N82-18260

SPACELAB PAYLOADS
NT POINTING CONTROL SYSTEMS
Biological experiments in space biology and gravitation
p0254 A82-32349
Selection and training of European astronauts
p0319 A82-39507
A new eye movement recording system for vestibular research
[IAF PAPER 82-173] p0414 A82-46973
A French primate study program for physiological problems encountered in weightlessness
[IAF PAPER 82-184] p0414 A82-46976
Feasibility study (phase A) for a Life Science Double Rack envisaged for the Spacelab mission D1
[BMFT-FB-W-81-037] p0078 N82-15732
Concept study of a life sciences payload element (PLE) for the SL-D1 mission
[BMFT-FB-W-81-038] p0078 N82-15733
Effect of weightlessness on lymphocyte proliferation
p0173 N82-18261
Three-dimensional ballistocardiography in weightlessness
p0174 N82-18262
Mass discrimination during weightlessness
p0174 N82-18264
Nutation of Helianthus Annuus in a microgravity environment
p0174 N82-18265
Preliminary characterization of persisting circadian rhythms during space flight: Neurospora as a model system
p0174 N82-18266
Microorganisms and biomolecules in space hard environment
p0174 N82-18267
Advanced biostack experiment
p0174 N82-18269

SPACING
NT AIRCRAFT APPROACH SPACING

SPATIAL DISTRIBUTION
Mathematical model of the spatial distribution and accumulation of assimilates in plants
p0026 A82-15702
Cytoarchitectronics of the epidermis and the epidermal proliferative units /EPU/
p0325 A82-40491
Effect of motion sweep duration and number of stations upon interpolation in discontinuous motion --- visual tracking motion perception
p0403 A82-45674
Display-control compatibility in 3-D displays. 1: Effects of orientation
[AD-A109491] p0219 N82-20875

SPATIAL FILTERING
Some neurophysiological correlates of visual perception
p0209 A82-28455
Temporal sensitivities to square-wave gratings, sawtooth-wave gratings and their fundamentals - More evidence for multiple spatial frequency channels in human vision
p0318 A82-39437

SPATIAL ISOTROPY
U SPATIAL DISTRIBUTION

SPATIAL ORIENTATION
U ATTITUDE (INCLINATION)

SPECIFIC GRAVITY
U DENSITY (MASS/VOLUME)

SPECIFICATIONS
NT EQUIPMENT SPECIFICATIONS
Development of the helicopter crewman jacket
[AD-A115635] p0427 N82-32992

SPECIMENS
The effect of abnormal cell proportion on specimen classifier performance
p0234 A82-30296

SPECTRA
NT ABSORPTION SPECTRA
NT EMISSION SPECTRA

NT INFRARED SPECTRA
NT MOLECULAR SPECTRA
NT NOISE SPECTRA
NT ULTRAVIOLET SPECTRA

SPECTRAL ABSORPTION
U ABSORPTION SPECTRA

SPECTRAL BANDS
NT ABSORPTION SPECTRA

SPECTRAL NOISE
U WHITE NOISE

SPECTRAL REFLECTANCE
Organic and inorganic interpretations of the Martian UV-IR reflectance spectrum p0106 A82-21208

SPECTRAL SENSITIVITY
Psychophysical evidence for more than two kinds of cone in dichromatic color blindness p0089 A82-19608
Low-level laser light effects - Long-term effects --- on visual acuity of behaviorally trained monkeys p0140 A82-22913
Changes in spectral acuity following laser irradiation p0140 A82-22914
Comparison of flicker-photometric and flicker-threshold spectral sensitivities while the eye is adapted to colored backgrounds p0208 A82-28123
Color fusion under conditions of equal brightness p0237 A82-31164
Field sensitivity of the 'red' mechanism derived from primate local electroretinogram p0318 A82-39431
Discrimination and detection thresholds - The effect of observer criterion on the spatial properties of chromatic and achromatic mechanisms p0318 A82-39438
Spectral sensitivity of the peripheral retina to large and small stimuli p0403 A82-45675
Long-term and progressive changes in Rhesus spectral sensitivity after low-level coherent light (514nm exposure) --- effects of laser exposure on visual function [AD-A111639] p0347 N82-28946

SPECTRAL SIGNATURES
Spectral character of sunlight modulates photosynthesis of previtamin D3 and its photoisomers in human skin p0255 A82-32692

SPECTROMETERS
NT ULTRAVIOLET SPECTROMETERS

SPECTROPHOTOMETRY
Spectrophotometric studies on the RNA structure in E.coli ribosomes. Part 1: Fundamentals of ultraviolet spectrophotometry of nuclei acids [ISS-R-80/2-PT-1] p0078 N82-15734
Spectrophotometric studies of the RNA structure in E.coli ribosomes. Part 2: Influence of ions and proteins on the RNA secondary structure [ISS-R-80/3-PT-2] p0079 N82-15735

SPECTROPOLARIMETERS
U POLARIMETERS

SPECTROSCOPIC ANALYSIS
Spectrophotometric studies on the RNA structure in E.coli ribosomes. Part 1: Fundamentals of ultraviolet spectrophotometry of nuclei acids [ISS-R-80/2-PT-1] p0078 N82-15734
Spectrophotometric studies of the RNA structure in E.coli ribosomes. Part 2: Influence of ions and proteins on the RNA secondary structure [ISS-R-80/3-PT-2] p0079 N82-15735

SPECTROSCOPY
NT ASTRONOMICAL SPECTROSCOPY
NT INFRARED SPECTROSCOPY
NT LASER SPECTROSCOPY
NT MASS SPECTROSCOPY
NT SPECTROPHOTOMETRY
NT SPECTROSCOPIC ANALYSIS

SPEECH
NT CONVERSATION
NT WORDS (LANGUAGE)
Evaluation of synthesized voice approach callouts /SYNCALL/ p0289 A82-36967
The feasibility of miniaturizing the versatile portable speech prosthesis: A market survey of commercial products [NASA-CR-168611] p0181 N82-19838
Research and development of a versatile portable speech prosthesis [NASA-CR-168741] p0224 N82-21897

SPEECH DEFECTS
Quantitative evaluation of hoarseness using a computer p0242 A82-31540

SPEECH DISCRIMINATION
U SPEECH RECOGNITION

SPEECH RECOGNITION
Aircraft noise and speech communication interference in JASDF air traffic control room p0025 A82-15518
Voice entry for reducing pilot workload p0141 A82-22916
Voice control of the space shuttle video system p0047 N82-13719
The effects of microphones and facemasks on LPC vocoder performance [AD-A107908] p0129 N82-16744
Time-sharing manual control and memory search: The joint effects of input and output modality competition, priorities and control order [AD-A108721] p0176 N82-18867
The effect of noise-induced hearing loss on the ability to understand speech [IZF-1981-11] p0273 N82-25783
Objectives hierarchy for air intercept controller prototype training system [AD-A110847] p0297 N82-26981
Effect of task duration on voice recognition system performance [AD-A107442] p0301 N82-27979
Effect of operator mental loading on voice recognition system performance [AD-A107477] p0301 N82-27980
The role of temporal overlap of visual and auditory material in dual media comprehension [AD-A115714] p0425 N82-32978

SPEED
U VELOCITY

SPEED CONTROL
Effects of motivation on car-following p0441 N82-34070

SPEED REGULATION
U SPEED CONTROL

SPERMATOZOA
Possible mechanism for chemical induction of chromosome aberrations in male meiotic and postmeiotic germ cells of mice [DE81-031999] p0123 N82-16700

SPHEROIDS
NT PROLATE SPHEROIDS

SPHYGMOGRAPHY
Logic-controlled occlusive cuff system [NASA-CASE-MSC-14836-1] p0013 N82-11770

SPIN
NT ELECTRON CAPTURE
NT PARTICLE SPIN

SPIN TESTS
Spin imaging equipment for small animal experiments [ISBN-951-41-0420-X] p0293 N82-26951

SPIN-ORBIT INTERACTIONS
NT ELECTRON CAPTURE

SPINAL CORD
NT SPINE
Retro-hyperflexion luxation - Mechanism of cervical spinal cord contusion injury during ejection sequence p0005 A82-11032
Structural changes in motor neurons during hind limb immobilization p0027 A82-15707
Investigation of recurrent inhibition in the human spinal cord during static skeletal muscle activity p0094 A82-20330
Features of the reaction to noise of the spinal capillaries of white rats p0114 A82-21767
The functional state of the segmental apparatus of the spinal cord in humans during local work after a short period of rest p0160 A82-24501
Central pain mechanisms p0204 A82-27788
Changes in neurons of the spinal cord and spinal ganglia under hypokinesia /neuromorphological and histochemical investigation/

p0325 A82-40494
Physiopathology and pathology of spinal ailments in aerospace medicine
[AGARD-AG-250-FR] p0011 N82-10720
Electrode unit for testing human H reflex
p0127 N82-16728
Vestibulo-spinal reflex mechanisms
p0173 N82-18257

SPINE
Validation of a new method for studying the effects of vibration on the primate spine
p0338 A82-40768
A homeomorphic finite element model of impact head injury
p0009 N82-10707
Significance of bone density to spinal trauma related to pilot ejection
p0215 N82-20849
Preliminary study of the effects of prolonged acceleration on spinal dynamics of baboons. 1: Acceleration. 2: Biomechanical analysis
[AD-A101766] p0245 N82-22871
Fracture and viscoelastic characteristics of the human cervical spine kinematics of the 3 actuator system
[AD-A110980] p0299 N82-27965
Finite element analysis of the visco-elastic interaction of the annulus fibrosis and nucleus pulposis within the human intervertegral joint
[AD-A111161] p0300 N82-27971
Physiopathology and pathology of spinal injuries in aerospace medicine
[AGARD-AG-250(ENG)] p0359 N82-29870
Anatomy of the spine
p0359 N82-29871
Biomechanics of the spine
p0359 N82-29872
Spinal stresses in flight
p0359 N82-29873
Theories of the pathogenesis of fractures of the spine
p0359 N82-29874
Aetiology and pathogenesis --- traumatic lesions of the spine
p0359 N82-29875
Helicopter accidents
p0359 N82-29876
Parachuting
p0359 N82-29878
Fractures of the spine in flight
p0360 N82-29880
Accidents in centrifuges and experiments (ejection seat training towers, sleds)
p0360 N82-29881
Clinical examination of spinal injuries
p0360 N82-29882
Radiology of spinal trauma in aviation medicine
p0360 N82-29883
Analytical study of traumatic lesions of C3-C7
p0360 N82-29884
Radiological study of fractures of C1 and C2
p0360 N82-29885
Sequelae of vertebral fractures and trauma
p0360 N82-29886
The cervical column of pilots of combat aircraft
p0361 N82-29888
The spine and fitness for flight
p0361 N82-29889
Ankylosing spondylitis
p0361 N82-29891
Medico-legal aspect of spinal disorders in aviation medicine
p0361 N82-29892
A dynamic model of the cervical spine and head
[AD-A114887] p0432 N82-34008

SPIROMETERS
Digital spirometer for automatic pulmonary function
p0022 A82-14746
Rhinopneumometric indicators during repeated antiorthostatic exposures
p0029 A82-15719
The value of spiroergography in the diagnosis of the initial stage of cardiac insufficiency
p0233 A82-30030

SPLEEN
Hepato-splenic injury in aircraft accidents
p0072 A82-18735
The effects of immobilization of mice of various radiation sensitivities and the shielding of portions of their bone marrow on survival rate and the formation of splenic colonies following irradiation
p0152 A82-23265
Effect of thymalin on the system of cyclic nucleotides in the mouse spleen
p0262 A82-34679
The induction of the formation of morphine-binding spleen cells as a manifestation of the immune response
p0413 A82-46888
Effect of single exposure to microwaves on quantity and functional properties of T and B lymphocytes of guinea pig and mouse spleen
p0388 N82-30913

SPRAYED COATINGS
An evaluation of engineering control technology for spray painting
[PB81-243123] p0085 N82-15789

SPRAYED PROTECTIVE COATINGS
U PROTECTIVE COATINGS
U SPRAYED COATINGS

SQUARE WAVES
Temporal sensitivities to square-wave gratings, sawtooth-wave gratings and their fundamentals - More evidence for multiple spatial frequency channels in human vision
p0318 A82-39437

SQUID (DETECTORS)
Superconducting magnetocardiograph
p0286 A82-36260
Superconducting magnetometry for cardiovascular studies and an application of adaptive filtering
p0038 N82-13648

STABILITY
NT CONTROL STABILITY
NT DYNAMIC STABILITY
NT LATERAL STABILITY
NT MOTION STABILITY
NT STORAGE STABILITY
NT SYSTEMS STABILITY
NT THERMAL STABILITY
Empirical studies of procedural flaws, impasses, and repairs in procedural skills
[AD-A113791] p0302 N82-27981

STABILIZERS (AGENTS)
Technique for the aerobic cultivation of microorganisms in water-in-oil emulsions
[NRC/CNR-TT-2031] p0428 N82-33980

STANDARDS
Setting hygienic standards to be applied to environmental standards pertaining to the rolling stock of railroads and subway systems
p0311 A82-38578
Setting safety standards for ionizing radiation
p0311 A82-38580
Health effects of carbon monoxide and ozone
[PB82-114265] p0137 N82-17866
What is ALARA
[DE81-030814] p0353 N82-28995
Development of a methodology for assessing aircrew workloads
[AD-A114364] p0355 N82-29010

STAPHYLOCOCCUS
The bactericidal activity of various clothing fabrics and dressing materials
p0206 A82-27801
Prevention of staphylococcal infections during space flights
p0130 N82-17818
Relationship between microflora and immunity of cosmonauts carrying staphylococcus aureus in the nasal cavity
p0214 N82-20843

STARS
NT NEUTRON STARS
NT PULSARS

STATE VECTORS
Cybernetics and car driving: Perspective perception and the output vector of the system to be controlled
[IZF-1980-19] p0036 N82-12778

STATIC DISCHARGERS
Formation of systemic adaptation reactions in static magnetic fields
p0387 N82-30904
Changes in transcapillary metabolism in patients with chronic venous insufficiency of legs under influence of static magnetic fields

p0387 N82-30907

STATIC ELECTRICITY
Cytogenetic and gonadotoxic effects of static electric fields
p0388 N82-30915

STATIC LOADS
Investigation of recurrent inhibition in the human spinal cord during static skeletal muscle activity
p0094 A82-20330
A comparative characterization of hemodynamics and respiration under static and dynamic loads
p0238 A82-31503
The effect of certain characteristics of work motions on the tolerance of hand muscles to static exertions
p0311 A82-38568

STATIONS
NT CREW STATIONS
NT CREW WORK STATIONS
NT GROUND STATIONS
NT ORBITAL SPACE STATIONS
NT ORBITAL WORKSHOPS
NT SALYUT SPACE STATION
NT SPACE STATIONS

STATISTICAL ANALYSIS
NT BIVARIATE ANALYSIS
NT CORRELATION COEFFICIENTS
NT FACTOR ANALYSIS
NT KOLMOGOROFF-SMIRNOFF TEST
NT MULTIVARIATE STATISTICAL ANALYSIS
NT NORMAL DENSITY FUNCTIONS
NT REGRESSION ANALYSIS
NT STATISTICAL CORRELATION
NT STATISTICAL DECISION THEORY
Evaluation of maximal and submaximal static muscle exertions
p0088 A82-19223
Pulsars' timing noise and external disturbances - Gravitational waves
A82-27519
Statistical optimization of interaction in man-machine systems
p0208 A82-28218
Statistical techniques for instrument panel arrangement
p0287 A82-36959
A model for the origin of life
p0339 A82-41198
An investigation into pilot and system response to critical in-flight events, volume 1
[NASA-CR-166243-VOL-1] p0040 N82-13662
An investigation into pilot and system response to critical in-flight events, volume 2
[NASA-CR-166243-VOL-2] p0040 N82-13663
Statistical tools for determining fitness to fly
[AD-A108599] p0175 N82-18860
A statistical model of the controller functions of the human temperature regulating system
p0248 N82-23972
Statistical examination of hearing loss due to gunfire noise and industrial noise: Consequences for screening audiometry with fixed frequencies
[IZF-1981-20] p0273 N82-25785
A performance analysis study of a complex G field experiment
p0380 N82-30852
Supervision of dynamic systems: Monitoring, decision-making and control
p0441 N82-34069

STATISTICAL CORRELATION
The use of correlation analysis for the detection of signs of changes in the physiological condition of workers exposed to vibration
p0160 A82-24509

STATISTICAL DECISION THEORY
Detecting human operator impairment with a psychomotor task
p0047 N82-13718
Diagnosticity and the base-rate effect
[AD-A109731] p0223 N82-21891

STATISTICAL DISTRIBUTIONS
NT BRIGHTNESS DISTRIBUTION
Recognition of vehicle targets from the air: A field test
[FOA-C-56027-H2] p0247 N82-22889

STATISTICAL MECHANICS
Statistical mechanics of biomembrane phase transition. I - Excluded volume effects of lipid chains in their conformation change
p0199 A82-27561

STATISTICAL PROBABILITY
U PROBABILITY THEORY

STATISTICAL TESTS
NT KOLMOGOROFF-SMIRNOFF TEST

STEADY STATE
The effect of visual-vestibular conflict on the latency of steady-state visually induced subjective rotation
p0019 A82-13422
Steady state visual evoked potentials in the alert primate
p0403 A82-45673

STEEP GRADIENT AIRCRAFT
U V/STOL AIRCRAFT

STEERING
Levels of steering control: Reproduction of steering wheel movements
[IZF-1980-16] p0036 N82-12777
A data collection scheme for identification of parameters in a driver model
p0044 N82-13696
Manual control analysis of drug effects on driving performance
p0046 N82-13709
Stability analysis of automobile driver steering control
p0047 N82-13717
The bench mining system: Progress in two-dimensional simulation of steering characteristics
[RR-176] p0401 N82-31950
Levels of steering control: Reproduction of steering-wheel movements
p0441 N82-34071
Analysis of driver performance under reduced visibility
p0442 N82-34075

STELLAR DOPPLER SHIFT
U DOPPLER EFFECT
U EXTRATERRESTRIAL RADIATION

STELLAR ENVELOPES
Laboratory simulation of interstellar chemical evolution
p0365 A82-41665

STEREOCHEMISTRY
Are there structural analogies between amino acids and nucleic acids
p0020 A82-13840
Resolution of underivatized amino acids by high pressure liquid chromatography, using chiral eluants
p0102 A82-20944
Stereoselective interactions of small biological molecules
p0102 A82-20945
Beta decay and the origins of biological chirality - Theoretical results
p0290 A82-37421

STEREOGRAPHY
U STEREOPHOTOGRAPHY

STEREOPHOTOGRAPHY
System to measure head motion during parachute opening shock
[AIAA PAPER 81-2517] p0021 A82-13914
The deterioration of the working efficiency of stereophotogrammetrists and their professional selection
p0410 A82-46709
Segmentation and analysis of stereophotometric body surface data
[AD-A114916] p0358 N82-29868

STEREOSCOPIC PHOTOGRAPHY
U STEREOPHOTOGRAPHY

STEREOSCOPIC VISION
Hyperacuity for luminance phase angle in the human visual system
p0314 A82-38799

STEREOSCOPY
NT STEREOPHOTOGRAPHY
Perception of spatial features with stereoscopic displays
[AD-A110191] p0222 N82-21882
The constancy of stereoscopic depth perception
[AD-A111484] p0302 N82-27984
Stereological analysis of rat bone tissue after flight aboard Cosmos-1129 biosatellite
p0395 N82-31906

STERILIZATION
The microflora of the central Antarctica glacier and control methods for the sterile isolation of an ice core for microbiological analyses
p0318 A82-39430
STERILIZATION EFFECTS
NT CHEMICAL EFFECTS
NT DECONTAMINATION
STEROIDS
NT ACTINOMYCIN
NT ALDOSTERONE
NT CHOLESTEROL
NT CORTICOSTEROIDS
NT CORTISONE
NT HYDROXYCORTICOSTEROID
Testosterone enhances C-14 2-deoxyglucose uptake by striated muscle --- sex hormones and muscle
[NASA-CR-169101] p0352 N82-28986
STIFFNESS
The determination of the equivalent biomechanical characteristics of the ankle joint muscles by vibration tests
p0260 A82-33760
STIMULANTS
NT ATROPINE
NT CAFFEINE
NT NORADRENALINE
NT NOREPINEPHRINE
Changes in the temporal parameters of visual perception under the influence of psychostimulants
p0151 A82-23253
Temperature characteristics of the ouabain-insensitive sodium flux in frog muscles
p0312 A82-38600
Stimulation of body weight increase and epiphyseal cartilage growth by insulin like growth factor
[NASA-TM-84285] p0428 N82-33983
STIMULATED EMISSION DEVICES
NT ARGON LASERS
NT CARBON DIOXIDE LASERS
NT HELIUM-NEON LASERS
NT LASERS
NT NEODYMIUM LASERS
NT Q SWITCHED LASERS
STIMULATION
NT AUDITORY STIMULI
NT SENSORY STIMULATION
STIMULI
A procedure for the analysis of nystagmus and other eye movements
[AD-A112603] p0352 N82-28987
Responses to harmonic acceleration with varying head positions
[AD-A114736] p0432 N82-34010
STOCHASTIC PROCESSES
NT MARKOV PROCESSES
NT RANDOM PROCESSES
A neutral theory of biogenesis
p0091 A82-20024
A stochastic model of a human operator in the manual control of a dynamic system
p0229 A82-29469
Optimization of stochastic man-machine systems
p0261 A82-33769
Conformational dynamics of proteins and simplest molecular 'machines'
p0313 A82-38610
STOMACH
The variations in the content of histamine in the tissues of the heart and stomach during the excessive stimulation of the organism and the influence of hexamethonium on these variations
p0413 A82-46086
Effect of sensitization on development of stress gastric ulcers in rats
[NASA-TM-76868] p0385 N82-30892
Efficacy of cimetidin in the prevention of ulcer formation in the stomach during immobilization stress
[NASA-TM-76864] p0389 N82-30923
STONY METEORITES
NT CARBONACEOUS CHONDRITES
NT CARBONACEOUS METEORITES
STORABLE PROPELLANTS
NT AIRCRAFT FUELS
STORAGE STABILITY
Storage stability and improvement of intermediate moisture foods, phase 3
[NASA-CR-167503] p0128 N82-16742
Comparative evaluation of antimicrobial activity of some urine preservatives
p0132 N82-17830
Biological value and shelf life of cultured dairy products in the diet of cosmonauts
p0270 N82-25759
STRAIN DISTRIBUTION
U STRESS CONCENTRATION
STRAIN ENERGY METHODS
Three-dimensional stress distribution in arteries: Radial compression experiments of arterial wall; stress concentration in lung near a cylindrical cavity; finite element analysis of pleural surface pressure distribution in dog's lung during electrophrenic stimulation
p0032 N82-12750
STRANDS
Lack of induction of single-strand breaks in mammalian cells by sodium azide and its proximal mutagen
[DE82-001721] p0424 N82-32968
STRATA
NT SUBSTRATES
STRATEGY
The dependence of the strategy by which a solution is sought on the type of intellection
p0162 A82-24533
STRATIGRAPHY
Mass mortality and its environmental and evolutionary consequences --- at end of Cretaceous period
p0227 A82-28596
STRATOFORTRESS AIRCRAFT
U B-52 AIRCRAFT
STRATOTANKER AIRCRAFT
U C-135 AIRCRAFT
STRENGTH OF MATERIALS
U MECHANICAL PROPERTIES
STREPTOCOCCUS
Effect of altitude exposure on induction of Streptococcal endocarditis in young and middle-aged rats
p0073 A82-18740
STREPTOMYCETES
Effect of transmeridional flights on biorhythm of zone formation by Streptomyces levoris
p0124 N82-16711
STRESS (BIOLOGY)
The effects of immobilization on the development of experimental atherosclerosis in rabbits
p0054 A82-16815
Biogenic monoamine concentrations in autonomic nervous system ganglia during acute experimental emotional stress
p0054 A82-16817
The effects of heat stress on the morphogenetic potencies of the nephron epithelium
p0055 A82-16825
Disturbances in biological rhythms as a result of a conflict of incompatible stimuli
p0111 A82-21720
The effect of cold stress on the level and activity of microsomal cytochrome P-450 in the rat liver
p0112 A82-21732
Emotional stress as a factor in cardiovascular disorders
p0117 A82-21796
STRESS (PHYSIOLOGY)
NT ACCELERATION STRESSES (PHYSIOLOGY)
NT CENTRIFUGING STRESS
The effects of space flight factors on the stress reaction of the nuclear nucleic acids in the rat liver
p0007 A82-12279
The physiological response of anthropometrically selected female military personnel to the test parachuting environment
p0023 A82-14957
Removal by negative air ions of changes in mitochondrial respiration under stress
p0020 A82-15716
The effects of immobilization stress on diacyl and plasmogenic phospholipids in various organs and tissues of the rat
p0052 A82-16802
The response of the hematic system of adrenalectomized mice to stressor activity
p0054 A82-16814

Damage and repair of heart muscle DNA during emotional-pain stress
p0055 A82-16822
Characteristics of loading hypoxia
p0060 A82-16960
Free amino acid concentrations in the livers of animals subjected to certain extremal factors
p0072 A82-18662
Recent life change measurement in Canadian Forces pilots
p0072 A82-18733
Glycogen and nonspecific adaptation to cold
p0089 A82-19494
The influence of adaptation on the periodic effect of hypoxia on the poststress activation of the primary immune response
p0093 A82-20320
Microcirculation, tolerance to physical strain, and certain homeostasis parameters in patients with angina pectoris
p0094 A82-20324
Functional condition of the rat sympato-adrenal system during emotional and nociceptive stress
p0095 A82-20335
The effect of motor activity on the development of cardiac arrhythmias in experimental emotional stress
p0110 A82-21713
Activation of the metabolism of the gamma-aminobutyric acid system in the cerebral hemispheres under various types of stress
p0113 A82-21746
Echoencephalographic indices in patients with hypertensive disease under the effect of functional loads
p0113 A82-21753
Changes in the structure and cellular composition of the inguinal lymph nodes of white rats subjected to static and dynamic stresses
p0114 A82-21761
Neuronal-glial alterations in the cerebral cortex of animals under the influence of white noise
p0114 A82-21769
Lysosomes under conditions of stress
p0114 A82-21770
The effect of the prolonged administration of sodium hydroxybutyrate on the physical work capacity and muscle tissue state of rats
p0115 A82-21779
Adaptogenic effect of mebicar during emotional stress, exercise, and hypoxia
p0115 A82-21780
The ultrastructure of the liver sinusoids of mice under conditions of acute stress - Morphometric study
p0116 A82-21782
The dynamics and physiological importance of the activation of the gamma-amino-butyric acid system in the brain and cardiac muscle under pain and emotional stress
p0117 A82-21808
Mechanisms of adaptation to ergothermic hypoxemia in athletes specializing in different sports
p0118 A82-21820
Stress and immunity in athletes
p0118 A82-21821
Mental performance impairment in heat stress
p0143 A82-22939
Morphological changes in the hematopoietic organs of rats under the influence of adrenalin
p0150 A82-23167
Variation in catecholamine excretion in adolescents under mountain conditions
p0150 A82-23174
Phase phenomena in the vestibular analyzer - Vestibular recruitment
p0151 A82-23256
Biological rhythm aspects of adaptation mechanisms
p0153 A82-23277
The influence of physical stress on the dynamics of work capacity and electrical activity of skeletal muscles in the course of an entire day
p0154 A82-23284
Reaction of the blood system to single and double exposure to a stress agent
p0154 A82-23287
Criteria and the quantitative evaluation of human disturbance tolerance --- external electrical stimuli effects on athlete performance
p0158 A82-24478
A basis for the optimal duration of work breaks in the presence of noise of various intensities during the course of a work shift
p0160 A82-24510
An evaluation of the total stress involved in certain types of precision work
p0161 A82-24514
Effect of regulated muscular load on the morphological and functional characteristics of adrenal glands in dogs with experimental hypocorticalism
p0161 A82-24524
Changes in blood sodium and potassium concentrations during emotional stress induced by nociceptive stimuli in rats
p0164 A82-24550
The typological systematization of adaptive responses - Example of the antiorthostatic effect
p0165 A82-24835
Characteristics of skin function in sailors in the tropics
p0170 A82-25189
Basis for the refinement of permissible levels of local vibration
p0188 A82-25702
Ultrastructural changes in skeletal muscle fibers under the influence of acute physical exercise
p0189 A82-25717
The permeability of the lymphatic vessels of the muscles of the upper extremities in vibration sickness
p0190 A82-25804
Kinetics of lipid peroxidation in cellular organelle anoxia under different conditions
p0190 A82-25809
Damage to the Ca/2+/-transporting system in the sarcoplasmic reticulum of the heart during emotional and nociceptive stress
p0190 A82-25810
Effect of air ions on the ratio between direct and reverse electron transport in mitochondria under stress
p0199 A82-27731
The participation of adrenergic mechanisms in microcirculation changes under stress
p0202 A82-27757
Contribution of the kallikrein-kinin system to microcirculation disorders in the case of immobilization stress
p0204 A82-27787
Suction-type EKG electrodes with a remote vacuum pump for stress testing
p0205 A82-27800
Comprehensive evaluation of the human functional state using ergometry
p0206 A82-27804
The information content of indicators of cerebral vascular responses to adequate influences
p0210 A82-28459
Comparative physiological responses to exercise stress
p0231 A82-29571
The relationship between circadian and circanian rhythms of some parameters of the heart contractile function and vascular tension
p0231 A82-29807
Changes in the peroxide metabolism of weight-lifters and wrestlers under the conditions of systematic muscular activity
p0239 A82-31505
Specialized acidophilic products for the nourishment of athletes
p0240 A82-31514
Hormonal mechanisms of seasonal rhythms in rats
p0240 A82-31518
Change in the volume density of hypothalamic neurons during prolonged immobilization-nociceptive stress
p0243 A82-31549
An analysis of the risk of human cardiac damage during +Gz stress - A review
p0251 A82-32001
Stress testing and coronary artery disease - Study of 140 cases on tread mill
p0253 A82-32288
A longitudinal analysis of TH Index and identification of period of acute heat stress
p0253 A82-32290

The effects of hypoxia on serial response time
p0254 A82-32390

Increases in plasma beta-endorphin/beta-lipotropin immunoreactivity after treadmill running in humans
p0256 A82-32839

Effect of base oscillations on the human skeletal muscle and joint forces in a standing posture
p0259 A82-33754

Effects of traumatic shock on cytogenetic processes in the epithelial cells of the cornea and tongue and the bone marrow cells of albino rats
p0262 A82-34676
